MORWELL SEWERAGE AUTHORITY.

BY-LAW NO. 1, RELATING TO CONSENTS, LICENCES, ETC., ALSO LEVELS, DIMENSIONS, CONSTRUCTION, MAINTENANCE, VENTILATION, AND CLEANSING OF SEWERS AND OTHER MATTERS RELATING TO HOUSE CONNEXION WORK.

THE Morwell Sewerage Authority, pursuant to and in exercise and execution of the powers and authorities conferred on it by the Sewerage Districts Acts and of any and every other power or authority in any wise enabling it in that behalf, doth hereby make and prescribe the following By-law, that is to say:—

In the construction of this By-law, unless inconsistent with the context or subject-matter—

- "Acts" means the Sewerage District Act and any amendment thereof, and any Act incorporated therein, or amendment of such Acts.
- "Anti-siphonage vent" (or "back vent") means any vent pipe from an individual trap to the open air, or a main or branch vent pipe having for its purpose the prevention of loss of water seal in the trap.
- "Authority" means the Morwell Sewerage Authority.
- "Bore," "diameter," or "size," in reference to any pipe, means the nominal diameter thereof, in accordance with accepted trade practice.
- "Building" means any building used as a work place, residence, place of business, place of amusement, or place of human habitation, or for the storage of food intended for human consumption, but does not include outbuildings unless such are used for any of the above purposes.
- "Disconnector trap" means a trap for isolating or disconnecting waste pipes from the house drain and soil pipes and providing inlet ventilation to the waste pipe or pipes discharging into it.
- "Drain" means any drain used for the drainage of one building only or of premises within the same curtilage and includes any drain for draining any group or block of houses by a combined operation under the order of the Authority.
- "Educt vent" means an opening or pipe for the exit of air from and the induction of draught in a soil pipe, waste pipe, or house drain.
- "Fittings" mean all apparatus or appliances, together with their necessary appurtenances and connexions, for use in connexion with the plumbing or drainage system of any property, with the exception of fixtures and straight piping.
- "Fixtures" means all apparatus or appliances, together with their necessary appurtenances and connexions, which may be attached to the plumbing or drainage system of any property, and which are intended for the collection or retention of any wastes or waste waters for ultimate discharge into the sewerage system.
- "Housemaids' slop sink" means any fixture other than a closet pan or urinal used for the discharge of soil waters and provided with a flushing apparatus in accordance with Division 33 of this By-law.
- "Induct vent" means an opening or pipe for the admission of air to a soil pipe, waste pipe, or house drain.
- "Interceptor trap" (or "boundary trap") means a trap for preventing the passage of air or gases from the sewer to the house drain, and situated on the house drain at some point between the sewer and the lowest inlet to the house drain.
- "Occupier" means the person for the time being in actual or constructive occupation of the premises.
- "Owner" includes the person for the time being who receives or is entitled to receive the rent of the lands or premises in connexion with which the word is used, whether on his own account or as agent of or as trustee for any other person, or who if such lands or premises were let to a tenant at a rack rent would be entitled to receive the rack rent from the occupier thereof.
- "Premises" includes any house and any building whatsoever and any part of any house or building and any garden stable yard or other offices used together or in connexion with any house or building and every part thereof.
- "Responsible officer" means any officer authorized by the Authority to act as its representative in the particular matter to which the reference is made.
- "Sewer" means any sewer or underground gutter or channel which is not a drain within the meaning of the Acts and any drain or portion of a drain laid between a sewer and the boundary line of any allotment or curtilage.
- "Sewerage District" means any portion of the Shire of Morwell to which the Acts apply and which under the Acts is proclaimed the sewerage district of the Authority and includes any area which is added to and forms part of such sewerage district.
- "Sewered property" means as well as any sewered land or premises any land or premises which have been declared by a general notice given by the Authority under the Acts to be deemed and taken to be a sewered property within the meaning of the Acts.
- "Sewerage system" includes all sewers, fittings, fixtures, appliances, plant, machinery, and any other sewerage works vested in the Authority.
- "Soil pipe" means any pipe which conveys the discharge from water closets, housemaids' slop sinks, or urinals to the house drain.
- "Stack" means any vertical line of soil, waste or vent piping with its offsets, if any.
- "Trap" means any fitting designed to retain a quantity of water to arrest the passage of air or gases through such fitting.
- "Waste pipe" means any pipe which conveys the discharge from any fixture (except water closets, housemaids' slop sinks, or urinals), to a disconnector trap.
- "Water seal" or "trap seal" means the vertical distance between the dip and the crown weir of a trap.

PART I.

GENERAL REGULATIONS.

Division 1.—Applications for Consents, &c.

Section 1. Application for the Authority's consent to connect with the sewerage system, or to do plumbing and drainage work connected therewith, must be made in writing by the owner of the property to be so connected, or by his authorized agent.

Section 2. Such application shall give the precise location of the property, the name of the owner, and the name of the person employed to do the work, and shall be in the form prescribed by the Authority. For any wilful misrepresentation in such application the owner or authorized agent as aforesaid shall be guilty of an offence against this By-law. No consent given by the Authority shall be deemed to authorize anything not stated in the application, nor to confer or grant the right to lay a drain through any land intervening between the sewer of the Authority and the land proposed to be connected, and every owner or agent applying for the Authority's consent shall satisfy himself as to his legal right to drain through such intervening land, as he shall be solely responsible for any trespass or damage thereon or thereto.

Section 3. Consents to make connexions with the sewerage system will be issued only when the plumbing and draining in the property to be connected is planned to be made in accordance with the rules for plumbing and draining hereinafter prescribed, and after such plan has been inspected and approved of by the responsible officer appointed by the Authority for the purpose, or, in the case of new buildings, when a proper plan of the plumbing and of the drainage of the building into the branch, of which the Authority shall have fixed the position, has been approved of in writing by the Authority. All connexions with drains or sewers, and all plumbing and drainage connexions therewith, shall be made under the direction of the responsible officer of the Authority. Consent will not be given for the performance of any such work except upon condition that no person shall be engaged or employed as a workman in the actual performance of any plumbing or drainage work unless he be the holder of a licence issued by the Authority to do such work. Any person who shall at any time or at any place make up, form, affix, alter, or repair any fitting, pipe, bend, trap, or other thing connected or intended to be connected with the Authority's sewerage system, unless he be the holder of a licence from the Authority authorizing him to do such work, shall be liable to a penalty not exceeding Ten pounds. Any person, whether licensed as aforesaid or not, who shall alter, remove, or in any way interfere with any drain, fitting, pipe, bend, trap, or other thing connected with the Authority's sewerage system, unless the Authority's written consent has been previously issued to do such work at the premises concerned, shall be liable to a penalty not exceeding Ten pounds.

Section 4. Where the sanction, permission, authority, consent, approval, satisfaction, order, direction, opinion, indication, or notice of or from the Authority is necessary, whether specified in writing or otherwise, with regard to any act, matter, or thing mentioned in the By-law, the same may be given by and under the hand of the chairman of the Authority, or of the responsible officer, personally or through an inspecting officer appointed under him, who severally shall be competent to give the same and authorized on behalf of the Authority, to prescribe any conditions attaching thereto, and subject to and in accordance with which only the same shall be deemed to have been given.

Section 5. In any case in which the Authority shall be of the opinion that a compliance with any of the provisions of this By-law would in any particular case be vexatious or be

needless in the interest of public health, it shall be lawful for the Authority, by resolution, to dispense with or forbid such compliance in whole or in part as it shall think fit, or to authorize or direct such a modification or alteration of such provisions as shall, in its opinion, most nearly adapt the principle of those provisions to the particular case. It shall be unlawful to comply with any provision, or part of any provision, of which compliance shall have been forbidden, or to act contrary to or otherwise than as directed by such modification or alteration.

Division 2.—Penalties, Recovery of Cost of Work, &c.

Section 6. Where anything is by this By-law directed to be done, or forbidden to be done, or where any authority is given to the Authority or any of its officers to direct or to forbid anything to be done, and such act so directed to be done remains undone, or such act so forbidden to be done is done, then, and in every such case, the person making default as to the said direction or prohibition respectively shall be guilty of an offence against this By-law.

Section 7. Every person guilty of an offence against this By-law, not otherwise specially provided for by or under the authority hereof, shall be liable for every such offence, besides any costs or expenses which may be incurred in the taking of proceedings against such person guilty of such offence, as well as any costs or expenses which may be incurred in remedying such default, as particularly provided for in this By-law or the Acts, to a penalty not exceeding Ten pounds, and to a further penalty of One pound for each day during which such offence is continued by such person after notice of the offence shall have been given by the Authority to him; and such penalty shall be recoverable, notwithstanding that the Authority may not have chosen to exercise any power given to it by the Acts or by this By-law to remedy such default.

Division 3.—Fees for Plans, Inspections, and Alterations.

Section 8. Copies of the Authority's plans, and for designs of individual house drainage, will be furnished by the Authority upon application on the prescribed form and payment for the same as follows:—

(a) Where the Authority prepares designs and carries out work—

- (i) In all cases in which the Authority prepares the plan of drainage, and has the work carried out for the owner, a charge equal to Ten per centum of the capital cost of the work shall be paid to the Authority for the preparation of the design and specification, the letting of the contract, and the supervising of details in connexion with the work.
- (ii) For making and/or examining any alterations or additions to a plan previously issued or approved of by the Authority a minimum charge of Five shillings shall be made for each fixture or drain altered or added.

(b) Where the Authority prepares designs and the owner carries out the work—

- (i) For a plan of drainage, including surveys, &c., for every house, shop, factory, or other building a charge of Twenty shillings plus Two shillings and six pence for each fixture shall be made.
- (ii) For making and/or examining any alterations or additions to a plan previously issued or approved by the Authority a minimum charge of Five shillings shall be made for each fixture or drain altered or added.
- (iii) For the inspection and testing of house connexions a further fee of Twenty shillings, per tenement plus Two shillings and six pence for each fixture.
- (iv) The Authority, through its duly appointed officers, may, during the construction of the work, order the owner to carry out such additions and/or amendments as may be necessary for the satisfactory completion of the work. The house connexion shall not be passed until the installation, together with any amendments and/or additions which may be ordered have been completed to the satisfaction of the Authority.

(c) Where the owner designs and carries out the work—

- (i) For the supply of a block plan a minimum charge of Two shillings and six pence shall be made.
- (ii) The owner shall submit for examination a properly-drawn design and a typewritten specification. The design and specification shall be supplied to the Authority in

triplicate. The work shall not proceed until the owner's design and specification have been approved by the Authority.

- (iii) For examining the owner's plan of design and specification a charge of Two shillings and six pence for each fitting shall be made, with a minimum charge of Ten shillings.
- (iv) For examining any alterations or additions to a plan previously issued or approved of by the Authority a minimum charge of Two shillings and six pence shall be made for each fixture or drain altered or added.
- (v) For the inspection and testing of house connexions a further fee of Twenty shillings per tenement plus Two shillings and six pence for each fixture.
- (vi) For the final inspection by the Authority's Engineer, and charting work on the Authority's plans, a charge of Ten shillings per tenement shall be made, plus Five shillings for each additional inspection necessary owing to faulty work.
- (vii) The Authority, through its duly appointed officers, may, during the construction of the work, order the owner to carry such additions and/or amendments as may be necessary for the satisfactory completion of the work. The house connexion shall not be passed until the installation, together with any amendments and/or additions, which may be ordered, have been completed to the satisfaction of the Authority.

Division 4.—Maintenance and Defective Work.

Section 9.—Any drain pipe, soil pipe, trap, water closet, urinal, sink, or other fitting laid, used, or constructed otherwise than in accordance with this By-law, or which shall in the opinion of the Authority be or become bad or of defective quality, shall, upon notice in writing from the Authority to the owner or occupier of the property, be by such owner or occupier removed or repaired in the manner determined and within the time fixed by the Authority; and in case such owner or occupier fails to comply with the requirements of the notice, he shall be liable to prosecution and penalty for an offence against the Acts, or the Authority will, if it thinks fit, remove or repair the said defective fitting and charge such owner or occupier of the premises with the cost so incurred, and will proceed for recovery of the same in a manner provided by the said Acts.

Division 5.—Licences.

Section 10. No person shall tender for or enter into any contract for or undertake any plumbing work relating to sewerage within the Morwell Sewerage District or connected or to be connected with the sewers of the Authority who does not hold either a master plumber's or a working plumber's licence issued by the Authority.

Section 11. No person shall tender for or enter into any contract for or undertake any draining work relating to sewerage within the Morwell Sewerage District, or connected or to be connected to the sewers of the Authority who does not hold either a master plumber's or working plumber's licence, or a drainer's licence issued by the Authority.

Section 12. No person other than a holder of a working plumber's licence issued by the Authority shall actually do or perform any such plumbing work.

Section 13. No person other than the holder of a working plumber's or a drainer's licence issued by the Authority shall actually do or perform any such draining work.

Section 14. At the discretion of the Authority a master plumber's licence may be granted to any master plumber or master builder, building contractor, or other person, firm, or corporation who is approved by the Authority, but such licence will only entitle the holder to tender for or enter into contracts for or otherwise undertake plumbing and drainage work under these By-laws, but shall not entitle the holder to personally do any actual plumbing or drainage work under these By-laws.

Section 15. Holders of master plumber's licences not themselves licensed plumbers or licensed drainers must continuously employ on all and every plumbing work carried out by them under these By-laws licensed plumbers, and on all and every drainage work, licensed drainers.

Section 16. Working plumber's licences will be issued at the discretion of the Authority to persons who hold and produce to the Authority a certificate of competency issued by the Sanitary Plumber's Examination Board of Victoria. Such licence will permit the holder to do practical work as a working plumber upon all fittings, appliances, and apparatus connected or to be connected with the sewers of the Authority, subject to and in accordance with the Authority's By-laws and Regulations.

Section 17. Drainer's licences will be issued to any person who shall satisfy the Authority by passing an examination by examiners appointed by them or in such other manner as the Authority from time to time or in any particular case may direct that he has a thorough knowledge of the following subjects:—

Plans.—The reading of plans and the meaning of scales and of elevation, plan, and section drawing.

Levelling.—The use of the straight-edge, spirit-level, and boning rods.

Excavation, Timbering, and Refilling.—The use of tools for excavation, the protection of trenches by timbering, the treatment of different soils, tunnelling, and tunnel timbering, precautions near buildings, and manners of refilling of trenches and tunnels.

Drain-laying.—The preparation of the bottom of trenches, the laying and jointing of stone-ware, cement, concrete, and cast-iron pipes, cement, bitumen, lead, and self-fitting joints, laying of drains under houses and in soft ground, and the depth of drains below surfaces.

Drainage Details.—Junctions to sewers, diminishing of sizes of pipes, yard gullies, grease and other traps, inspection openings, and cast-iron drainage details.

Drainage Work.—Knowledge of the provisions of this By-law and of the Acts, insofar as same relate to the work and duties of drainers in regard to the construction, maintenance, and protection of the sewerage system and the construction and use of drains and drainage traps.

Candidates for drainer's licences shall give notice in writing to the Authority of their intention to submit themselves to examination, and this examination shall be at such a time and at such place as shall be appointed by the Authority. Candidates must provide themselves with their own tools and materials, and pay a fee of 10s. for each examination.

Section 18. The conditions upon which all master plumber's licences, working plumber's licences, and drainer's licences will be issued are—

(1) That every licence will be subject to suspension or cancellation at the will of the Authority, and that all such licences or renewals thereof will expire on the 30th day of September next following.

(2) That every holder of a licence from the Authority who shall have received the consent of the Authority to execute any works in connexion with sewerage or drainage, or who shall (where such consent of the Authority is not required before the execution of any such works) have notified the Authority of his intention to carry out such works—

- (a) shall obtain permission when necessary for the execution of such works on, over, or through any private property, or any streets, roads, parks, reserves or other public places or properties; and
- (b) shall pay any fees demanded by the Council or Authority for opening any street, road, or thoroughfare or otherwise in connexion with the work; and
- (c) shall execute such works in accordance with the provisions of the Acts and of the By-laws made thereunder, and of any special directions or orders given or issued by the Authority or proper officer; and
- (d) shall use materials of good quality only and free from defects; and
- (e) shall employ only competent operatives or assistants; and
- (f) shall execute such works in a thorough and tradesmanlike manner to the satisfaction of the Authority as expeditiously as practicable, and leave site clean and undefaced; and
- (g) shall in the execution of such works take such proper and necessary precautions that no accident or damage or unnecessary inconvenience may be directly or indirectly occasioned thereby; and
- (h) shall restore any part of any street, road, or thoroughfare interfered with by the work to the satisfaction of the municipal authority having control thereof upon the completion of the work; and
- (i) shall restore any other property interfered with by the work to the satisfaction of the responsible officer of the Authority; and
- (j) shall in all cases notify the proper officer immediately upon completion of any work in hand, promptly amend any defects therein, and again at once notify the said officer, and subsequently take steps forthwith to secure the certificate of satisfactory completion and give same to owner; and
- (k) shall, when so directed by the Authority, make good at his own expense any defect found within three months of the date of completion of any such work which, in the opinion of the Authority, is due to bad workmanship or defective material.

Section 19. Prior to the issue of any licence the person to whom the same is to be issued must sign a register containing a declaration that he accepts such licence subject to and in conformity with the conditions of such licence and of this By-law and that he will conform to and comply therewith, and shall pay to the Authority the fee named hereunder:—

	s.	d.
For every master plumber's licence	10	0
For every working plumber's licence	7	6
For every drainer's licence	5	0
For the renewal of any licence	2	6

Division 6.—New Buildings, Additions, &c.

Section 20. Every person who shall intend to erect a building on any property within the Sewerage District, or to rebuild or to make any alterations or additions to any such buildings shall, before commencing such work, give to the Authority seven days' notice in writing of such intention; and such notice shall be accompanied by plans and sections of such intended buildings, alterations, or additions, showing their positions, dimensions, depths, and levels of foundations, cellars, or basements, all appurtenant walls and fences, the intended lines of drainage, and the boundary of the land, which plans, &c., shall become the property of the Authority.

Division 7.—General.

Section 21. Any work or thing in respect of or in connexion with sewerage under the Act that is not specifically mentioned in this By-law shall be performed in accordance with the directions of the Authority.

PART 2.

GENERAL REGULATIONS.

Division 8.—Use of Sewers and Drains—Prohibition of Certain Discharges.

Section 22. *Use of Sewers and Drains.*—The owner and the occupier of any sewered property shall discharge into the sewerage system all faecal matter, urine, household slops and household liquid refuse from such property, and such other polluted water from stables, washing areas, manure bins, basements, cellars, and roofed yards, and such trade or manufacturing liquid refuse as the Authority may authorize or require, subject in each and every case to such conditions as it may impose.

Section 23. *Prohibited Discharges.*—The deposition or discharge of any of the following substances into any house drain is prohibited:—

- (a) Any animal matter other than is specified in section 22, fleshings, wool, hair, dead animal, grease, dust, ashes, rubbish, garbage, offal, vegetable and fruit or their parings, rags, oil, silt, mud, sand, gravel, or like substances, or any other substance which is, in the opinion of the Authority or its responsible officers, liable to be injurious to any part of the sewerage system or to the employees of the Authority engaged in the operation or maintenance of same.
- (b) Any petrol or other inflammable or explosive substance, whether solid, liquid, or gaseous.
- (c) Any rain, roof, surface, or flood waters.
- (d) The contents of any night-soil cart, cesspool, or privy.
- (e) Any waste water, liquid, trade waste, or other substance which has not been neutralized to the approval of the responsible officer of the Authority, or which is above the temperature of 100 deg. Fahrenheit, or such lower temperature as may be prescribed by the Authority, having regard to the special circumstances of the case.
- (f) Any liquid which contains such percentage of common salt or any other mineral salt, acid, or gas, as is, in the opinion of the responsible officer of the Authority, injurious to, or liable to form compounds injurious to, any part of the sewerage system or to employees of the Authority engaged in the operation or maintenance of same.

Division 9.—Trade Wastes.

Section 24. *Conditions of Discharge.*—No person shall discharge any trade or manufacturing liquid, refuse, or waste into any sewer, unless and until the following conditions are complied with:—

- (a) Application for permission to discharge any such trade wastes shall be made in writing and accompanied by plans and specifications of the work to be done and of the apparatus to be used, and shall include such details concerning the nature of the waste and the quantity and rates of discharge of the proposed effluent as considered necessary by the responsible officer of the Authority.
- (b) The permission of the Authority in writing shall be obtained and an agreement containing a covenant to comply with the By-law and with any further stipulations required by the Authority, shall be executed.
- (c) The volume of liquid refuse or waste discharged shall, if ordered, be measured and determined by meter or by some other approved means of measurement. The

maximum aggregate daily quantity of effluent which may pass from any trade premises into a sewer, the maximum permissible rate of such discharge, the size and capacity of the drain for conveying such effluent from the trade premises to the sewer, and the hours during which such flow will be permitted shall be determined by the Authority.

- (d) All such liquid refuse or waste shall be passed through such settling, screening, and/or neutralizing chambers and/or such other appliances and/or otherwise treated as ordered or approved by the Authority to ensure that the resulting effluents shall comply with the conditions of the agreement.
- (e) Every settling, screening, neutralizing, or other chamber, appliance, or apparatus for the treatment of trade wastes in accordance with this By-law shall be cleansed and maintained by the occupier at his own expense and at such intervals as may be considered necessary by the Authority or its responsible officer to ensure the efficient operation of such chamber, appliance, or apparatus, and in no case shall such chamber, appliance, or apparatus be altered without the approval in writing of the Authority first obtained.

Division 10.—Sub-soil Water.

Section 25. The discharge of sub-soil water into sewers shall be prohibited.

Division 11.—Inspection Tests.

Section 26. *Notice.*—The owner or his authorized agent, or the plumber, drainer, or contractor, shall give at least forty-eight hours notice to the Authority, in writing, of his intention to commence work and of work ready for inspection. All work shall be left uncovered and accessible for examination until inspected and approved. Inspection shall be made within twenty-four hours of the receipt of such notification except when the notification is received on a Saturday, when seventy-two hours shall be allowed.

The contractor carrying out any work shall, within seven days of the completion of such work, file in the office of the Authority, on forms furnished for this purpose, a correct statement of the work done and the cost thereof. Such statement shall be countersigned by the responsible officer of the Authority, and a certificate embodying such statement shall be forwarded to the contractor.

Section 27. *Inspection.*—All drains, wastes, fittings, joints, fixtures, &c., will be inspected by the responsible officer of the Authority to ensure compliance with the By-law and approved plan.

Section 28. *Tests.*—Drains, whether laid by the Authority's workmen or others, must be thoroughly tested in every case before being passed by the Authority's officers. The responsible officer of the Authority may require the application of the water or smoke test, or such other tests as he may order or approve.

Section 29. *Water Test.*—The water test may be applied to the drainage and/or plumbing systems and their fittings in their entirety or in sections. It shall be applied by hermetically sealing all openings below the top of the section to be tested. The system shall then be filled with water to a height of 6 feet above the highest point of the section, or, if considered necessary, to such additional height as the responsible officer may order, and every joint carefully examined for leaks.

Section 30. *Smoke Test.*—The smoke test shall be applied by hermetically sealing all openings into the section to be tested, and forcing into the system thick smoke to a pressure equivalent to 1 inch of water, by means of a smoke test apparatus. Every joint shall then be carefully examined for leaks.

Section 31. *Equipment, &c.*—The equipment, material, power, and labour necessary for the inspection and tests shall be furnished by the contractor, plumber, or drainer.

Section 32. *Defective Work.*—Any drain, pipe, fixture, fitting, &c., which is laid, used, or constructed otherwise than in accordance with this By-law or with the approved plans, or which, in the opinion of the responsible officer of the Authority, is or has become bad or of defective quality or condition, shall, upon notice, in writing to the owner or occupier of the property, or his authorized agent, be removed and/or repaired by such owner or occupier in the manner determined, and within the time fixed by the Authority. In case the owner or occupier fails to comply with the requirements of that notice he shall be guilty of an offence against this By-law, and the Authority may, if it so think fit, remove and/or repair the defective drain, pipe, fixture, fitting, &c., and charge the said owner or occupier with the cost so incurred, and may proceed for the recovery of the said cost in the manner provided.

Section 33. *Maintenance.*—Every person holding a licence from the Authority who shall execute any work in connexion with sewerage drainage and/or sanitary plumbing shall, when so directed by the Authority, make good at his own expense any defect found within three months of date of completion of any such work due, in the opinion of the Authority, to bad workmanship or defective material.

Division 12.—Materials and Workmanship.

Section 34. *Materials.*—All materials, pipes, bends, junctions, fittings, fixtures, and apparatus shall be of the best of their respective kinds, sound and free from defects, and shall comply with such Australian standard specifications as apply and are accepted by the Authority, otherwise to be approved by the Authority.

Section 35. *Testing.*—All materials, pipes, bends, junctions, fittings, fixtures, and apparatus shall be submitted for examination and/or test, and shall not be placed in position until passed and stamped by the Authority. Such testing of materials shall be paid for by the person submitting same, whether passed or rejected, and shall be done at such time and place, and at such rates, as may from time to time be fixed by the Authority.

Section 36. *Workmanship.*—All work shall be executed in a thorough and workmanlike manner, and to the satisfaction of the Authority.

Section 37. *Precautions.*—Adequate precautions shall be adopted by the person carrying out the work to prevent injury to workmen, property, or public, and the Authority will accept no responsibility for claims for injury arising from the inadequacy of such precautions.

Section 38. *Concrete.*—Concrete, unless otherwise ordered, shall consist of one part Portland cement, two parts clean sharp sand, and four parts hard metal, shingle or gravel not exceeding $\frac{1}{2}$ in. gauge, and shall be thoroughly mixed with clean water to such consistency as ordered or approved by the responsible officer of the Authority.

Section 39. *Cement Mortar.*—Cement mortar, unless otherwise ordered, shall consist of one part Portland cement and two parts clean sharp sand, properly mixed with an approved proportion of clean water.

PART 3.

DRAINAGE.

Division 13.—Drainage, General.

Section 40. (1) Every premises shall be separately drained unless a combined drain shall have been ordered or approved by the Authority. Owners desiring to have the drainage of their properties combined must sign a request for a combined drain, and obtain the approval of the Authority. In any case in which it appears to the Authority that any properties may be drained more advantageously in combination than separately the Authority may order that those properties be drained by a combined operation.

(2) In any case where a combined drain serves two or more properties the Authority, with the consent of the owners of the properties served by such combined drain, may take over such combined drain, and thereafter such combined drain shall be and remain a sewer of the Authority.

(3) In every case of a combined drain the Authority will determine, as between the respective owners and occupiers of the properties drained thereby, the proportions in which the cost of such combined drain shall be paid. In every case of the occurrence of an obstruction in a combined drain the Authority will also determine by whom and in what proportion the cost of removing such obstruction shall be paid.

(4) Owners and occupiers of premises are responsible for clearing stoppages in drains within their premises, or between their premises and the sewers into which the branches lead, but must employ only licensed plumbers or drainers to clear same.

(5) Before a licensed plumber or drainer commences to clear a stoppage in a drain he must notify the Authority in writing of the time when he intends to clear the stoppage, so that the Authority's proper officer may attend and pass the work in accordance with the provisions of the Act.

Section 41. *Size of Drains.*—Every drain shall be of adequate size for the drainage of the property to be served, in accordance with the requirements of section 34, with a minimum diameter of 4 inches.

Section 42. *Materials.*—All drain pipes, bends, junctions, and fittings used shall be of glazed stoneware, concrete, cast-iron, or other approved material, provided that the responsible officer of the Authority may prohibit the use of any of the above-mentioned where the circumstances or conditions are considered unfavorable.

Section 43. *Cast-iron Pipes.*—Cast-iron drainage pipes and their fittings shall comply with the Australian standard specification, or, in the event of no such standard being in existence, with the standard approved by the Authority for cast-iron water pipes and their fittings of similar diameters.

Section 44. *Interceptor Traps.*—Where directed by the Authority, an interceptor trap shall be fixed in the drain laid from any property to the sewer. Such trap shall be fixed as near as practicable to the boundary, and wherever practicable shall be within the boundaries of the property. The interceptor trap shall be provided with an inspection cap on the sewer side of the trap. If ordered, an approved man-hole shall be provided for the trap.

Section 45. *Inspection Chambers.*—All drains shall, wherever considered necessary by the Authority, join in an inspection chamber at least 3 feet long by 2 feet wide, fitted with a closed cover. The portions of the drains crossing the floor of the inspection chamber shall be connected either in a straight line or by curved junctions in the floor of the chamber.

Section 46. *Inspection Openings.*—Every line of drain shall be provided with an inspection opening at each junction not provided with an inspection chamber, at each change of direction, at each fixture, and in no case at greater than 30 feet intervals, and in paved areas these shall, if considered necessary by the responsible officer of the Authority, be brought to the surface and furnished with approved airtight covers. The area of an inspection opening shall be not less than the area of the drain.

Section 47. *Drain Openings Not in Use.*—The ends of all house drains not immediately connected with the plumbing fixtures and all inspection openings shall be securely closed with watertight imperishable materials.

Section 48. *Replacing or Inserting Pipes.*—Where it becomes necessary to remove a pipe to clear a stoppage or to insert a pipe or branch in an existing drain, such pipe so removed shall be replaced by an inspection pipe or inspection junction of the same length by whichever one of the following methods is approved by the Authority or its proper officer:—

- (a) A length of not less than three pipes may be removed, the centre pipe replaced by an inspection pipe, and the pipes dropped back into place without springing or cutting. Junctions in existing metal pipes shall not be made unless an approved closure pipe is used in each case. Springing pipes into position shall not be resorted to or allowed.
- (b) An approved split pipe with double collar surrounded with concrete 3 inches thick may be used.
- (c) The top half of the socket of the new pipe and of the existing downstream pipe may be removed, but the bottom half shall always be left intact and the joints surrounded with concrete not less than 3 inches thick.

Division 14.—Basement and Cellar Drainage.

Section 49. *Fixtures.*—No water-closet, urinal, and/or other fixture shall be placed in any cellar or basement, or on any floor below ground level, unless by consent of the Authority, and then only when, in the opinion of the Authority, other provision cannot be made. The owner shall submit such plans and/or other information as the Authority may require, and shall undertake in writing to accept all risk of damage that may occur. If satisfied that the ventilation and lighting provided are in accordance with section 151 or 152 of these By-laws, and all other conditions have been complied with, the Authority may give its consent; provided always that such consent may be revoked by the Authority at any time, and that upon 14 days' notice of revocation such fixture shall be abolished by the owner.

Section 50. *Risk of Back Flow.*—Where such cellar, basement, or floor below ground level is at such a level as may, in the opinion of the Authority, involve risk of back flow in the event of the sewer becoming overcharged, the sewage from all fixtures therein shall be raised by ejector, syphon, or other approved mechanical appliance to such height as ordered and discharged into the sewer as and where directed.

Section 51. *Seepage Drains.*—In no case shall seepage drains from cellars, basements, or any floor below ground level be discharged into a sewer without the consent of the Authority. Where such discharge is permitted by the Authority the seepage shall be raised by ejector, syphon, or other approved mechanical appliance to such height as ordered, and discharged into the sewer as and where directed.

Division 15.—Polluted Areas.

Section 52. *Connexion.*—The Authority may, if it thinks fit, authorize or require that any of the following places:—namely, stables, cow-sheds, dairies, market places, areas for washing vehicles, and any other polluted place, be connected with the sewers, subject to such conditions as the Authority may impose.

Section 53. *Conditions Governing Connexion.*—No such connexion shall be made unless the following conditions have been complied with:—

- (a) The place to be connected shall, if required, be so roofed as to prevent the entry of rain water from it to the sewers, and in no case shall rain water be permitted to discharge on to such place from adjoining surfaces.
- (b) The place to be connected shall be paved with approved materials, and graded to the satisfaction of the responsible officer of the Authority.
- (c) The drain from any such place shall be provided with an approved silt trap with a removable grating and connected with the drain above the interceptor trap where such is used.

Division 16.—Pipe Trenches.

Section 54. The trench for the house drain from any property shall be so dug as to meet the Authority's sewer at the position provided or to be provided for the connexion.

The material from the trench shall be so placed as to cause the least possible obstruction and inconvenience to the public.

Proper barriers and lights must be maintained where necessary to guard against accident during the progress of the work.

In refilling the trench selected refilling shall first be deposited around and over the pipe to a depth of 12 inches and carefully consolidated, after which the remainder of the trench shall be filled in in layers and rammed or flooded, as ordered or approved.

No stone shall be used in refilling until earth or gravel has been placed over the pipe to a depth of 1 foot, or more if directed.

On no account shall any water, sand, earth, &c., be allowed to enter the sewer during the progress of the work.

On completion of refilling the surface shall be restored as nearly as possible to the same condition as it was in before operations were commenced, unless the owner in writing otherwise requires.

Division 17.—Laying Drains, &c.

Section 55. *Position and Line.*—Every drain and every fitting, &c., connected therewith shall be laid and fixed where directed by the responsible officer of the Authority. As far as possible all drains shall be laid in straight lines; where changes of direction occur they shall be made in manholes, or by a suitably curved pipe with an inspection opening on each straight pipe next adjoining the curve.

Section 56. *Oblique Junctions.*—Where any drain joins another drain the junction shall be made obliquely at an approved angle with the direction of flow of such drain. Right-angled junctions shall not be made.

Section 57. *Connexion to Sewer.*—The position of the Authority's connexion to any premises shall be located prior to the commencement of any drain excavation. The disc stopper at the point of connexion to the sewer shall be carefully removed so as not to injure the socket or allow any debris to enter the sewer.

The first length of the drain at the branch shall be an inspection opening.

Section 58. *Gradients.*—All drains shall be laid on an even grade, and, except by special permission in writing, from the Authority, such gradients shall in no case be less than the following minimum permissible gradients:—

4-in. diameter	1 in 40
6-in. diameter	1 in 60

In cases where the grades of 4-in. and 6-in. drains are steeper than 1 in 10 and 1 in 15, respectively, concrete stops shall be placed as and where directed by the responsible officer of the Authority.

Section 59. *Depth of Drains.*—Drains of stoneware or concrete pipe, unless bedded in and encased in concrete of not less than 3 inches thickness over any part of the drain, shall be laid at a depth to the socket of the pipe of not less than the following:—

- (a) In public thoroughfares, rights-of-way, or other open spaces subject to vehicular traffic—2 feet.
- (b) In private property not subject to vehicular traffic—1 foot.

No person shall alter the surface over any drain so as to deprive it of the minimum depth of cover specified by the preceding paragraph, unless approved measures are adopted to protect the drain.

Section 60. *Laying Drains.*—All pipes shall be laid to such lines and grades as may be shown on the plans or directed, and, except where otherwise ordered, holes shall be cut in the bottom of the pipe trench to receive the sockets of the pipes, and all the pipes shall be carefully bedded with the barrel on the solid ground.

In the case of rock-bottomed trench, or where directed, the pipes shall be bedded up to the horizontal diameter upon not less than 2 inches thickness of approved sand or other approved material measured from the barrel of the pipe.

In water-charged ground, or where the foundation is bad, or where directed, the drain shall be formed of cast-iron pipes; or, if of stoneware or concrete pipes, they shall be bedded on and encased in concrete as ordered, and, if ordered, supported upon approved timber foundations as directed.

Drops or bends in vertically-inclined drains shall have a concrete support placed under and around as directed.

Division 18.—Drains Under Buildings.

Section 61. Every drain shall, as far as practicable, be so constructed as not to pass under any building. Where a drain does pass under a building it shall, if practicable, be laid in a direct line for the whole distance beneath such building, and shall have approved means of access for rodding outside the

walls of the building, and also, if directed, beneath the building. The pipes used shall be of stoneware or concrete, surrounded by not less than 4 inches of concrete or 3 inches of cement mortar or of cast-iron.

In any case in which pipes pass through or under walls, approved provision shall be made to prevent injury to the pipes by settlement, and, in outer walls, to prevent the ingress of vermin.

Division 19.—Joints, Drainage.

Section 62. *Stoneware and Cement Pipes.*—Joints of stoneware and cement pipes shall be filled in solidly with cement mortar neatly splayed off, or with other approved material. After each joint is made the interior of the joint shall be wiped clear of surplus mortar before the next pipe is laid.

Section 63. *Cast-iron Pipes.*—All joints in cast-iron pipes must be stemmed with approved gaskets and so filled and caulked with lead or other approved material as to make them gas and water tight.

All connexions between stoneware or concrete pipes, and cast-iron pipes shall be made as for joints in stoneware or concrete pipes.

Division 20.—Drainage Ventilation.

Section 64. *Vents on Main House Drain.*—The main drain shall be ventilated at its upper end by a pipe ventilator erected vertically, and such ventilator may be a soil pipe.

If the drain is provided with an interceptor trap there shall be in addition a ventilator connected to the interceptor trap shaft.

In such cases there shall, wherever practicable, be a difference in height of not less than 6 feet between the tops of the vents at the upper and lower ends of the drains respectively.

Section 65. *Vents on Branch Drains.*—Branch drains need not be vented if the drainage traps are within 20 feet from the main house drain, measured along the line of pipes, including the drop, if any, from the centre line of the main drain to the centre of the outlet side of the water seal of the drainage trap, unless otherwise ordered by the Authority, in which case they must be vented as directed.

Section 66. *Height of Vents.*—Every vent pipe extending upwards from a soil or drain pipe shall be carried not less than 6 feet higher than any window or door within a distance of 30 feet thereof, and in any case at least 18 feet above ground level and 6 feet above the level of the eaves or coping, or to such additional height as may be necessary to prevent effectually the escape of foul air into any building within the vicinity.

Where the vent pipe extends into a gable of the building it shall further be carried at least 2 feet above the point of intersection with the roof.

Such pipes shall, where necessary, be provided with sufficient clips or stays to support them effectively.

Section 67. *Chimneys.*—No chimney shall be used as a ventilator to any drain, soil, or waste pipe.

Section 68. *Vents Near Chimneys.*—Vents must, as far as possible, be kept away from chimneys and ventilating air shafts. Where a ventilator pipe terminates 6 feet or more from a chimney opening or ventilating air shaft, the requirements of section 66 shall apply, but where the distance is less than 6 feet the vent pipe shall, unless otherwise ordered, terminate not less than 2 feet below the top of such chimney or air shaft.

Section 69. *Vents Adjoining High Buildings.*—In any case in which a building is erected next to a previously existing building of less elevation, and any windows of the new building are located within 30 feet of any existing vent stack on the lower building, the owner of such new building shall defray the cost of or shall himself make such alterations to the vents of the previously existing building as necessary to conform with section 66.

The owner of the lower or existing building shall make such alterations upon the receipt of money, or security therefor sufficient for the purpose, from the owner of the new or higher building, or shall permit at the election of the owner of the new or higher building, the making of such alteration by the owner of such new or higher building.

Section 70. *Size of Drainage Vents.*—Drainage vent pipes shall, unless otherwise ordered, be of not less than 4 inches diameter in the case of educt vents and not less than 3 inches diameter in the case of induct vents, with the provision that where more than one educt vent is provided the vent on the longest line of drain shall be of not less than 4 inches diameter and all others of not less than 3 inches diameter; but in no case shall a drainage vent be of smaller diameter than necessary to comply with the requirements of section 85.

Unless otherwise ordered or approved every such vent pipe shall be without return bend and provided with basket end or educt or induct cowls as directed.

Section 71. *Materials, &c.*—Drainage vent pipes situated wholly outside of buildings shall be of cast-iron, galvanized wrought iron, double galvanized sheet iron, or other approved material above ground, and of stoneware or concrete beneath the surface of the ground. Galvanized sheet-iron vent pipes shall not be less gauge than 20 for 3-in. and 4-in. diameter pipes and 18 for 6-in. pipes, and where ordered the first 6 feet above ground shall be of cast-iron or other approved material. Drainage vent pipes inside a building shall, unless otherwise approved, be of cast-iron or of galvanized wrought iron. The circumferential joints of galvanized sheet iron vent pipes shall be riveted and soldered.

Section 72. *Gratings.*—Openings or ventilation shall be effectively protected by approved gratings of ample area. The aggregate area of apertures in any such grating shall not be less than the sectional area of the pipe or drain to which such grating is fixed. Every opening for ventilation shall at all times be kept perfectly free from obstruction.

Section 73. *Pipe Clips, &c.*—There shall be at least one pipe clip to each 6-ft. length of vent pipe.

For cast-iron or wrought-iron pipe approved coated wrought-iron clips and for galvanized sheet iron pipe 1½-in. x 14-gauge galvanized band iron clips shall be provided. Wherever it is necessary to fix pipes clear of the wall approved extension clips shall be used.

Clips in the case of cast-iron pipes must be placed tight up against the bend or underside of collar.

Section 74. *Attachment to Walls.*—Where a galvanized sheet iron pipe, with or without offset, is carried up above the brick wall of a building a galvanized wrought-iron clip must be used, leaded into the wall near the top wherever possible and bolted against the vent pipe.

All band iron clips of vent pipes to brick walls shall be fastened with nuts and bolts, leaded in, or by means of T-headed bolts passed through the brick joints and turned at right angles to the joints.

Section 75. *Supporting Vents.*—Wherever a vent pipe with offset is not more than 12 feet long above such offset it need not be stayed; if longer, it shall be stayed as directed with ½-in. galvanized wrought-iron piping.

An unsupported length of 15 feet above highest clip of straight vent pipe without offset will be permitted.

Section 76. *Induct Vents.*—Every induct vent shall be securely supported in an approved manner.

Division 21.—Drainage Traps.

Section 77. *Trapping of Inlets.*—Every inlet to any drain other than inlets provided for ventilation in accordance with the By-law shall be provided with an approved trap. No inlets to any drain connecting directly with a sewer shall be constructed within a building other than such inlets necessary for the apparatus of any water-closet, urinal, or housemaid's slop sink.

Section 78. *Classes of Traps.*—Four classes of traps shall be used—

- (a) "Traps" for intercepting gases only, to be of round section and self-cleansing form, but not such as to empty by momentum or suction,
- (b) "Silt traps" for intercepting both gases and solids, to have slightly tapered sides, flat bottom, and rounded angles, and provided with approved means for catching and removing solids.
- (c) "Grease traps" for solidifying and collecting grease or other semi-fluid matter liable to foul the pipes, to be of such form as approved.
- (d) "Oil traps" for collecting all kinds of oil and to be of such form as approved.

The term "yard gully" is applied to traps (a) in cases where they are used externally and fitted with dished tops and gratings.

Section 79. *Water Seal.*—Every drainage trap must have a water seal not less than 2 inches in depth.

Section 80. *Provision of Yard Gullies.*—A yard gully must, wherever practicable, be provided in the yard of every property, as near as practicable to the kitchen or back door, with a tap placed over it at a height of not less than 2 feet. No yard gully shall be situated within a building. Where it is not practicable to provide a yard gully, a slop sink must be provided within the building.

Section 81. *Details of Yard Gullies.*—Yard gullies shall be fitted with dished tops and gratings, the dished top being in one piece with the trap or jointed thereto by spigot and faucet, or as otherwise approved.

The depth of the dished top to the grating must be not less than 6 inches, and the grating must be so fixed as to be removable with reasonable facility.

Section 82. *Kerbing, &c., to Yard Gullies.*—Yard gully basins and the dished tops of silt traps must be so surrounded with an approved impervious kerbing as to prevent the access of

surface water to the drains, and, if directed, the wall at the rear of the gully or silt trap, if of brick or stone, must be cement rendered to the height of the trap over same, and if of wood the wall must be provided with an approved galvanized sheet iron apron.

PART 4.

PIPE CAPACITIES.

Division 22.—Capacities of Soil, Waste, Drain, and Vent Pipes.

Section 83. *Fixture Units.*—For the purpose of determining the size of any drain, waste, soil, or vent pipe, the following equivalent fixture units shall be adopted, unless otherwise directed.

Fixture.	Nominal Outlet Diameter.	Fixture Units.
One lavatory basin	1½ inch ..	1
One lavatory basin	1½ inch ..	1½
One kitchen sink (up to 6-in. depth to overflow) ..	2 inches ..	3½
One bath	1½ inch ..	3½
One bath	2 inches ..	5½
One wash trough set with common trap	1½ inch ..	3½
One wash trough set with common trap	2 inches ..	5½
One urinal	1½ inch ..	3
One slop sink	2½ inches ..	3
One slop sink	3 inches ..	4½
One shower bath	2 inches ..	3
One water closet	4 inches ..	6
One bathroom group, consisting of one lavatory basin, one bath, and one shower	7

The equivalent fixture units to be adopted for fixtures other than those shown shall be determined by the Authority. One fixture unit denotes a rate of discharge equal to 1 cubic foot per minute.

Section 84. *Sizes of Soil, Waste, and Drain Pipes.*—Except by special permission the required sizes of soil, waste, and drain pipes shall be determined on the basis of the total number of fixture units drained, or likely to be drained, in accordance with the following table:—

Diameter of Pipe (Inches).	Minimum Permissible Grade.	Permissible Maximum Number of Fixture Units.										Vertical.	Maximum Number of Fixture Units permitted to be connected in any 8-ft. length of vertical stack.
		Grade not less than—											
		1 in 60	1 in 50	1 in 40	1 in 30	1 in 25	1 in 20	1 in 15	1 in 12½	1 in 10	1 in 5

1½	1 in 50	1½	6
1½	1 in 60	330	370	430	520	630	780	1,100	1½	6

Provided that—

- (a) Waste and soil pipes shall not be diminished in diameter in the direction of flow.
- (b) The diameter of trap, waste, or soil pipe receiving the discharge from any fixture shall in no case be less than the nominal outlet diameter of such fixture.
- (c) No water-closet shall discharge into a drain or soil pipe of less than 4 inches in diameter.
- (d) All connexions between inclined pipes and vertical stacks shall be through 45 degrees junctions.
- (e) Soil and waste stacks shall be as direct as possible and free from sharp bends. Where such are unavoidable approved provision shall, if necessary, be made to safeguard fixtures immediately above and below the bend.

Section 85. *Sizes of Vents.*—(1) Main Vents.—Except by special permission, the required sizes of main vents shall be determined from the size of the soil, or waste pipe, or stack to be vented, the total number of fixture units drained into it, and the developed length of the vent, in accordance with the following table, interpolating where necessary between permissible lengths of vent given in the table.

MAXIMUM PERMISSIBLE LENGTH OF MAIN VENTS (IN FEET FOR SOIL AND WASTE PIPES).

6	Up to 780	8	37	137	300
6	Up to 1,100	7	26	112	260

Provided that—

- (a) No vent shall be less than 1½ inch in diameter, and in no case shall a vent have a diameter less than one half that of the soil or waste pipe which it serves.
- (b) For 2-in. and 2½-in. waste pipes the vent shall have a diameter of not less than 1½ inch.

(2) *Sizes of Branch Vents.*—The required sizes of branch vents shall be determined from the number of fixture units served by the branch vent and the developed length of the vent from the point of connexion of the anti-syphonage vent from the last fixture served by the branch vent to the outlet to the open air at the upper end of the main vent, in accordance with the following table, interpolating where necessary between permissible lengths of vent given in the table:—

Provided that—

- (a) Branch vents shall conform to provisions (a), (b), for main vents.
 - (b) No branch vent need be larger in diameter than the soil or waste pipe which it serves.
- (3) *Individual Anti-syphonage Vents.*—The required sizes of individual anti-syphonage vents shall be determined from the diameter of the fixture trap served in accordance with the following table:—

Diameter of Fixture Trap.	Minimum Permissible Size of Anti-Syphonage Vent.	Diameter of Fixture Trap.	Minimum Permissible Size of Anti-Syphonage Vent.

**PART 5.
PLUMBING.**

Division 23.—General.

Section 86. *Waste Pipes.*—Separate waste pipes shall be provided for each of the following class of polluted water, viz. :—

- (a) Dirty water from baths, sinks, lavatory basins, and wash troughs, and other waters containing a small proportion of soap and/or dirt.
- (b) Greasy water from kitchen and scullery sinks or other fixtures, in such cases where grease traps are ordered or required.

Section 87. *Soil Pipes.*—Soil pipes shall be provided for soil water from closets and other waters containing faecal matter, and for urinal waters from slop stinks and urinals, and, where directed, for discharges from operating theatres and morgues, and in no case shall such waters be discharged into any waste pipe as defined by this By-law.

Section 88. *Connexions to Drain.*—All waste pipes shall discharge under the grating of a yard gully or into a disconnector trap. All soil pipes, including those for urinals and house-maids' slop sinks, must be connected direct to the drain. No waste pipe shall be laid in the ground outside any building unless by special permission.

Section 89. *Flashing, &c.*—All troughs, sinks, and other fixtures which are placed less than 3 inches, and all baths fixed less than 6 inches clear from any wall shall be flashed with 5-lb. lead, 24-gauge copper, bronze, brass, nickel, silver, or monel metal, or other approved material. Galvanized sheet iron may be used for fixtures other than sinks.

All such flashings shall be turned up the walls at least 4 inches, except where the walls are tiled, when the flashings shall be carried up at least 1 inch behind the tiles. Baths and other fixtures having turned-up flanges for use against tiled walls in lieu of sheet metal flashing shall be properly supported to prevent settlement, and the flange shall lap at least 1 inch behind the tiles, which shall be brought hard down on to the surface of the fixture. All flashing shall be properly secured and made watertight, and shall be bedded for a width of not less than 1 inch along the edge nearer the fixture in red or white lead.

Section 90. *Fixtures Not to Abut Against Walls.*—Unless otherwise directed or permitted, sinks, tubs, and similar fixtures situated in premises other than private houses where food for human consumption is prepared, manufactured, or stored for sale, and draining boards, slabs, and plates used in connexion with such fixtures, shall not abut against any wall but shall have a clear space of not less than 3 inches between such fixtures and any wall surfaces or obstructions.

Section 91. *Bib-cocks.*—Internal bib-cocks shall not be permitted unless a sink, lavatory basin, or other approved fixtures, or a properly drained impervious floor, is provided underneath.

Division 24.—Soil, Waste, and Vent Pipes.

Section 92. *Materials.*—No material shall be used for soil pipes other than cast-iron, lead or brass, and for waste pipes other than wrought-iron, cast-iron, lead, brass or copper.

Section 93. *Lead Pipes.*—The minimum permissible weight of lead for soil, waste, or vent pipes for water closets, urinals, and slop sinks shall be 7 lb. per square foot, and for all other fixtures 6 lb. per square foot.

Section 94. *Wrought-iron Pipes.*—All wrought-iron pipes and their fittings shall be approved standard weight and quality and galvanized or lined to the approval of the Authority.

Section 95. *Cast-iron Pipes.*—All cast-iron pipes shall be sound, free from holes and cracks, and coated with approved bituminous composition, or lined with glass enamel to the approval of the Authority.

Cast-iron pipes and their fittings, where laid in the ground, shall comply with the Australian standard specifications, or in the event of no such standard being in existence, with the standard approved by the Authority for cast-iron water pipes and their fittings of similar diameter. Cast-iron pipes for use in other situations shall have a minimum thickness of 3.16 inch measured in the case of glass-enamelled pipes without the enamel, and their fittings shall correspond with them in weight and quality. All junctions shall be curved, right-angled junctions shall not be made.

Section 96. *Galvanized Sheet Iron Pipes.*—External vent pipes of galvanized sheet iron shall be of a gauge not less than the following :—

- 1½ inch, 2 inch, 2½ inch diameter—22-gauge.
3 inch and 4 inch diameter—20-gauge.
6 inch diameter—18-gauge.

Section 97. Where lead, copper, brass, or cast-iron soil or waste pipes are fixed outside a wall for upstairs fixtures, the lead, copper, brass, or cast-iron pipes shall be carried at least 2 feet above the level of the highest fixtures attached to the pipe.

Section 98. *Vent Pipes.*—Vent pipes, if inside a building shall in all cases be of cast-iron, wrought-iron, lead, copper, or brass. Grooved, welded, or riveted double galvanized

sheet iron vent pipes may be used where they are entirely outside a building, and shall be connected with the traps or waste or soil pipes, with brass ferrules or other joints approved by the responsible officer of Authority.

Section 99. *Vents in Shed, &c.*—Galvanized sheet iron vent pipes may be used inside stables or open sheds, except where liable to damage.

Section 100. *Use of Lead Pipes.*—Lead pipes shall not be used, except where exposed to view and/or not liable to damage.

Section 101. *Supporting Lead Pipes.*—Lead pipes shall be supported by cast lead tacks of approved dimensions, wiped on to the pipe or by other approved fastenings, and such fastenings shall be arranged as nearly as possible thus—

4-in. vertical lead pipes—2 ft. 6 in. centres.

4-in. horizontal lead pipes—2 feet centres.

Less than 4-in. vertical pipe—3 feet centres.

Less than 4-in. horizontal pipe—2 ft. 3 in. centres.

Two pairs of tacks, fixed opposite, is sufficient for fixing lead flush pipes from cisterns.

Section 102. *Minimum Permissible Gradients.*—The following are the minimum gradients to be adopted for soil and waste pipes :—

Diameter of Pipe.	Minimum Gradient.
1½ inch	1 in 12½
1¾ inch	1 in 15
2 inch	1 in 17½
2½ inches	1 in 20
3 inches	1 in 25
4 inches	1 in 30
5 inches	1 in 40
6 inches	1 in 50

Section 103. *Length of Unvented Waste Pipes.*—Waste pipes need not be ventilated unless they exceed 10 feet in inclined length or 12 feet in vertical length, provided that there is only one fixture attached to the waste pipe, and provided that the water seal of the trap is not reduced by syphonage or other cause. Where there is more than one fixture, or the water seal is reduced, a vent pipe shall be supplied to the fixture trap or traps. All fixtures discharging into a sub-drain of greater length than 10 feet shall be vented.

Section 104. *Junctions.*—Where a waste or soil stack is branched into a graded waste, soil, or drain pipe, the branch fitting shall have an angle of not less than 45 degrees to the horizontal, and the length of the branch of the fitting shall be such that the vertical projection of the attached stack will be wholly outside of the area of the junction with the graded pipe.

Section 105. *Sealing of Pipes.*—Wherever a fixture is abolished, the soil, waste, vent, and water supply pipes to such fixture shall be removed, or, if allowed by the Authority to remain, the ends of the pipes shall be sealed with watertight imperishable materials.

Section 106. *Soil Vent Pipes.*—In all cases the upward extension from the soil pipe for ventilation shall pass in as direct a manner as possible above, and, if necessary, through the roof.

Section 107. *Vent Pipe Grades.*—All vertical lines of vent pipe shall connect, full size, at their bases with a soil, waste, or drain pipe at an angle of not less than 45 degrees to the horizontal, and shall extend in undiminished size above the roof or be connected to the soil, waste, or vent stack, in compliance with the requirements of section 109, on a grade sufficient to avoid the collection of water.

All intermediate bends or offsets shall be at a grade of not less than 45 degrees to the horizontal.

Vent pipes shall not be used as waste or soil pipes.

Section 108. *Anti-syphonage Vents.*—Traps must be prevented from syphoning by proper ventilation, in accordance with the requirements of section 85. Such anti-syphonage vents from fixtures shall be carried above the eaves of the building or joined to the branch or main vent above the level of the fixture, unless special permission to the contrary is granted.

These vent pipes shall be connected to the waste or soil pipe at a point not less than 3 inches nor more than 12 inches from the crown of the trap and on the opposite side of the water seal to the fixture, except in the case of closet pans where the vent pipe shall be not more than 3 feet from the crown of the trap. No other fixture shall be connected to the soil or waste pipe between the anti-syphonage vent and the fixture which it serves.

Section 109. *Combining of Vents.*—The various vents may be combined by branching together those which serve traps of the same class. The vent pipes may be branched into a soil or waste pipe of the same class above the level of the highest fixture.

Section 110. Where a branch is required to a galvanized sheet iron vent pipe, a brass saddle piece bolted and soldered to the vent must be used.

Section 111. *Sheet Metal Bends and Offsets.*—All sheet metal bends and offsets for flush and vent pipes shall be bent or pressed. Mitréd elbows will not be permitted.

Section 112. *Pipes to be Accessible.*—All soil, waste, and vent pipes and traps shall, where practicable, be accessible at all times for ready inspection and convenience of repairing. When placed within partitions or recesses of walls they shall be covered with woodwork or other approved material, so fastened as to be readily removable. No junctions shall be built in except with special permission from the Authority in writing.

Section 113. Concealed standing wastes will not be permitted.

Section 114. *Painting.*—All external plumbers' work and all cast-iron cisterns and brackets, woodwork in connexion with plumbing installations, sheet iron flush pipes, and sheet iron storage tanks and trays, shall be painted, after inspection, to the approval of the Authority.

Division 25.—Joints.

Section 115. *Stoneware, Cement, or Cast-iron Pipes.*—Joints of stoneware, cement, or cast-iron pipes shall conform with the requirements of section 62 or 63.

Section 116. *Lead Pipe.*—All joints in lead pipe shall be plumber's wiped joints.

Section 117. *Wrought-iron Pipe.*—The screwed ends and sockets of each particular size of wrought-iron or wrought steel pipe shall be so formed and the threads so cut that the ends of the pipe will butt against each other when screwed home in the sockets; bends, junctions, and similar fittings shall be similarly formed and screwed so that when the pipe ends are screwed home the bore will be continuously uniform and without breaks or pockets. The burr shall be neatly filed off on the inner edge of all pipe ends. All screwed joints shall be made with approved jointing material.

Section 118. *Wrought-iron Pipe to Lead Pipe.*—All joints between wrought-iron and lead pipes shall be made by means of brass unions screwed to iron and wiped to lead.

Section 119. *Brass or Copper Pipes.*—Joints of brass or copper pipes shall be made in accordance with the Australian standard Specification B36—"Compression joints and copper alloy screwed fittings for standard copper tubes."

Section 120. *Lead Pipe to Cast-iron Pipe.*—The connexion of lead pipes or traps to cast-iron pipes shall be made by means of brass ferrules. The brass ferrules shall be lined with and connected to the lead pipe or trap by means of a wiped joint and connected to the cast-iron by inserting ferrule in socket thereof and making the joint in the same way as in cast-iron pipe.

Section 121. *Sheet-iron Pipe to Cast-iron Pipe.*—All connexions of galvanized sheet iron to cast-iron pipes shall be made with molten lead, lightly but tightly caulked in to cast-iron sockets.

Section 122. *Sheet-iron Pipe to Wrought-iron Pipe.*—Galvanized sheet iron pipes shall be connected to wrought-iron pipes by means of brass unions or sleeves soldered to the sheet iron and screwed to the wrought-iron, or by means of a wrought-iron socket screwed to the wrought-iron pipe, into which the sheet-iron pipe shall be lightly but tightly caulked with molten lead.

Section 123. *Sheet-iron Pipe to Lead Pipe.*—Connexions of sheet-iron pipes to lead pipes shall be made by means of brass sleeves wiped to the lead pipe and soldered to the sheet-iron pipe, or by means of a cast lead collar wiped to the lead pipe, into which the galvanized sheet-iron pipe shall be caulked to approval.

Section 124. *Concrete or Stoneware Pipe and Traps to Lead Pipe.*—Connexions of lead pipe to stoneware or concrete pipe shall be made by means of a brass ferrule connected to the lead pipe by means of a wiped joint and connected to the stoneware or concrete pipe by inserting it in the socket thereof and making a cement mortar joint.

The connexion of a stoneware or concrete trap to a lead pipe shall be by means of a cast lead or brass socket, and the joint made with bitumen or other approved material. The lead pipe shall be connected to the tail end of the brass or lead socket by means of a plumber's wiped joint.

Section 125. *Connexion of Closet Pan Traps to Soil Pipe or Drain.*—Connexion of a closet pan to a soil or drain pipe shall be made by means of a bituminous jointing material, consisting of a mixture of approved bitumen and finely graded inert mineral filler in equal proportions, filled in solidly into faucet of soil or drain pipe and neatly splayed off, or by other approved method. In the case of lead soil pipes, a cast lead or brass faucet shall be used and connected to the lead pipe by means of a wiped joint.

Section 126. *Cistern Flush Pipe to Closet Pan.*—The flushing pipe from cistern shall be connected to the water-closet pan by a lead cap piece of not less than 4-lb. lead, packed with red lead or other approved material. The cap piece shall be jointed to galvanized sheet iron, copper, brass, or drawn steel pipe by means of a soldered joint and to lead flush pipe by wiped or soldered joint. The connexion of the flushing pipe to cistern shall be by means of a brass union, wiped to lead pipe or soldered to sheet-iron pipe. Copper or brass pipe shall be connected to cistern by means of a brass ring, with nut brazed to pipe, or by other approved means.

Section 127. *Vent Pipe to Closet Pan.*—Vent pipe shall be connected to the vent horn of water-closet trap by a lead cap piece with red lead packing or by other approved methods. The cap piece shall be jointed to copper or brass pipe by means of a soldered joint and to lead flush pipe by a soldered or wiped joint.

Section 128. *Outlet Fittings to Fixtures.*—Connexions between outlet fittings and such fixtures as baths, sinks, basins, &c., when the latter are constructed of cast-iron, plate-iron, ceramicware, or concrete, shall be made with lock nuts. The outlet fitting shall in all cases be connected to the waste pipe by means of a union.

When these fixtures are made of sheet metal lighter than 20-gauge soldered connexions may be used in lieu of lock nuts.

Section 129. *Waste Pipes to Troughs.*—Connexions of waste pipes to wash troughs shall be made as under:—

(a) Cement troughs, unless otherwise approved, shall have cast-in outlets.

(b) Sheet-metal troughs shall be connected to the waste pipes in compliance with section 128.

(c) For wooden troughs, lead, copper, or brass, waste pipes shall have flanges connected to the waste in accordance with the provisions of this By-law, and fastened to the underside of the trough with copper tacks. The waste pipe shall then be turned over inside the trough and the plug casting bedded over it with red lead putty and screwed to trough with brass wood screws.

Where wrought-iron or other screwed pipes are used the plug must be connected to the trough by means of a lock nut in lieu of flange.

Division 26.—Fixture Traps.

Section 130. *Fixtures to be Trapped.*—Every water-closet, urinal, slop or other sink, lavatory or wash basin, bath, wash trough or set of wash troughs, and any other fixture, shall be separately and effectively trapped, unless otherwise specially permitted by the Authority.

Section 131. *Position of Traps.*—Traps shall be placed as near the fixtures as possible, and in no case shall a trap be more than 2 feet from its fixture, except as provided in section 179, unless otherwise specially permitted by the Authority.

Section 132. *Depth of Water Seal.*—Every trap shall have a water seal of not less than 2 inches.

Section 133. *Closet Pan Traps.*—Outlets from closet-pan traps shall be of not less than 3½ inches nor more than 4 inches diameter, except in the case of syphonic pans.

Section 134. *Sealed Disconnecter Traps.*—Where approved by the Authority, sealed disconnecter traps may be fixed outside or inside the building, but in such cases breather pipes or fresh air inlets of the same diameter as disconnecter traps shall be taken above the level of the lowest fixture, or to such other height as directed, and when trap is inside shall be led to the outside of the building. The material for such breather pipes shall be the same as for waste pipes; sheet-iron will not be allowed. Inspection openings to such traps shall be sealed with screwed plugs, or as otherwise approved by the Authority.

Section 135. *Form of Trap.*—The "P" form of trap, with joints visible and accessible all round, must, unless otherwise permitted, be used in preference to the "S" form of trap for all internal fixtures wherever practicable. Where the "S" form of trap is used facilities for periodical inspection must be provided.

Section 136. *Lead Traps.*—All lead traps must be of the weights specified in section 93 for lead pipes of the same diameter.

Division 27.—Gratings.

Section 137.—Fixtures discharging into waste pipes and all urinals shall have non-corrodable outlet gratings of approved design and material, in accordance with the Australian standard Specification B.38, "Metal alloy sanitary fittings."

Division 28.—Cleaning Eyes and Inspection Openings.

Section 138. *Provision for Inspection and Cleaning.*—Sufficient inspection and cleaning eyes shall be provided in such positions on all soil and waste pipes as to be easy of access for proper inspection and cleansing.

Traps for fixtures, other than water closets, urinals and housemaids' slop sinks, shall be provided with approved screwed brass plugs for cleaning purposes fixed under the water line of the trap.

Section 139. *Inspection Openings on Soil Pipes.*—In all cases where the vertical stack of soil pipe provides for closets 4 feet or more above the ground level, measured from floor level of water-closet to ground level at foot of stack, an inspection opening having a cover fixed to a flange with bolts or studs shall be provided in such a position as directed by the responsible officer of the Authority.

Division 29.—Grease Traps.

Section 140. *Provision of Grease Traps.*—Every fixture or area from which grease or any other objectionable matter is likely to be discharged or conveyed into waste or soil pipes, or house drains, and every sink in all such places as food-packing houses, butchers' shops, lard rendering establishments, hotels, restaurants and boarding-houses, and such fixtures, areas, apparatus, or appliances as the Authority may direct, shall first discharge into an approved apparatus for preventing the objectionable matter from reaching the soil pipe or drain. Such apparatus shall be of such dimensions, design, and construction and in such position as the Authority, or its responsible officer, may in each case approve.

Section 141. *External Grease Traps.*—Every grease trap shall be fixed outside the premises whenever practicable, and (if not portable) shall be of glazed stoneware, concrete, slate, or brick in cement, and the outlet shall be connected to the drain through a disconnector trap.

Section 142. *Internal Grease Traps.*—Wherever a grease trap is used inside a building it shall be so fitted as to be easily removable, and, if directed, fixed upon a tray. All internal grease traps shall be of copper or other approved material, provided with a close fitting cover, and shall be independently ventilated as required by the Authority, or its responsible officer.

Section 143. *Grease Trap Ventilation.*—Every grease trap shall have provision made for inlet and outlet ventilation if and as directed by the Authority or its responsible officers.

Section 144. *Size of Grease Trap.*—The dimensions of grease trap to be provided shall be such as to ensure the congealing and retention of all grease entering such trap.

Section 145. *Outlet Pipes.*—The outlet pipe from any grease trap must be at least one size larger than that size of pipe which has a cross sectional area equivalent to the total area of incoming waste pipes. In no case, except by special permission, shall the outlet pipe be less than 3 inches diameter for grease traps of copper or other approved metal and 4 inches for stoneware.

Section 146. *Maintenance.*—Every grease trap shall be maintained by the occupier at his own expense, and shall be cleaned at such intervals as may be necessary to ensure that such trap operates in an efficient and hygienic manner.

Division 30.—Water Closets and Flushing Apparatus.

Section 147. *Water-closets. General.*—At least one water-closet shall be provided for each house or building within a sewered area, and also in such other cases as may be directed by the Authority.

In every shop, factory, office, flat, or building containing more than one tenement, at least one water-closet shall be provided for the use of the occupier of each tenement, or as otherwise directed by the Authority, and shall be so placed, either within or without such building, as to ensure the due observance of decency and to be easily accessible to the occupiers.

Section 148. *Water-closets at Hotels, shops, &c.*—In hotels, offices, lodging-houses, shops, and, if so directed, in any other premises, closets for different sexes shall not adjoin each other unless separated by a soundproof wall of such material and of such thickness as shall be approved by the Authority.

Section 149. *Water-closets for Factories.*—The owner of any building which is used for the purpose of a factory shall provide water-closets for the use of employees at such building in accordance with the Factories Act.

Section 150. *Light Ventilation, &c., for Water-closets.*—Except as herein provided in section 151, every water-closet in a building shall comply with the following conditions:—

- (a) One of its sides at least shall be an external wall of such building, abutting on a street or lane or an open space of not less than 100 square feet in area, such space being portion of the premises.
- (b) It shall not be entered directly from any room used for human habitation or for the manufacture, preparation, or storage of food for human consumption, or used as a factory, workshop, or work place. In cases where otherwise such closet would be directly entered from any such room, an ante-chamber, or airlock having a floor area of not less than 20 square feet shall be provided and effectively lighted, and shall be ventilated by an air shaft or some approved method to the open air. The doors of such closet and ante-chamber or airlock shall be close fitting and self closing, and all internal walls constructed of brick or other approved airtight material, extending the entire height from floor to ceiling. For closets in private residences opening on to a well-lit and well-ventilated hall, passage, lobby, or staircase, no airlock is required, but where these conditions do not exist the airlock as above shall be provided.
- (c) Each water-closet apartment, ante-chamber, or airlock shall be provided with adequate means of constant fresh air ventilation, and shall be lighted by a window or glazed louvres of not less than 2 square

feet of clear light area per water-closet, opening directly into external air. The effective area provided for outlet ventilation of each water-closet apartment, ante-chamber, or airlock shall be not less than 27 square inches, and where the level of the floor of the water-closet apartment is lower than the outside surface of the ground exhaust ventilation shall be provided by means of a tube of at least 6 inches diameter, carried up through the roof and furnished with a cowl. Approved provision for inlet ventilation shall be made as near the floor level as possible.

- (d) The floors of all water-closet apartments shall be constructed of concrete of not less than 4 inches thickness, or of other approved impervious material, and graded as directed, or they shall be provided with lead safes in accordance with the requirements of sections 183, 184, and 186. The frame of every wooden closet shall be securely fastened to the floor and made rigid, without attachment to fences.
- (e) Each closet apartment shall be not less than 3 feet wide and 5 feet long, inside measurements, and the walls shall be at least 7 feet high at the lowest part.

Section 151. *Mechanical Ventilation and Artificial Light.*—Subject to the approval of the Authority in writing the requirements of section 150 may be waived, provided that the following conditions be complied with, viz.:—

- (a) In every such case a mechanical system of exhaust ventilation in duplicate, approved by the Authority, and capable of changing the air contents of such water-closet eight times per hour shall be installed in connexion therewith.
- (b) Upon completion the owner or his representative shall carry out such tests of the mechanical system referred to as the Authority may deem necessary.
- (c) Such mechanical system shall at all times be underneath the continuous supervision of one or more properly qualified persons, and shall be continuous in operation.
- (d) Any such mechanical system shall be open to inspection by the Authority at all reasonable times, and shall be subject to such tests as the Authority shall from time to time direct. The air and pipe shafts shall be readily accessible, and shall have a minimum width of 2 ft. 6 in. and a minimum area of 12 square feet.
- (e) The failure of any such mechanical system at any time to pass such tests shall be an offence by the owner of such a building against this By-law, and the owner thereof shall also, in respect of such failure, be guilty of an offence against this By-law.
- (f) Every such water-closet shall be provided with an efficient system of electric lighting to the approval of the Authority, and same shall be maintained at all times in good working order.

Section 152. *Wooden Water-closets.*—In wooden water-closets buildings the bottom plates and plinths must be of approved timber. In repairs to studs they shall be cut to sound timber with a new plate, supported on a concrete dwarf wall extended up from the floor level.

Section 153. *Fixing Closet Pan.*—On concrete floors, or floors of tiles set in concrete, the closet pan shall be securely bedded upon concrete or cement mortar and fixed with brass screws to approved lead dowels set in the floor. Where the floor is of timber covered with an approved impervious material the closet pan shall be secured to the timber by means of brass screws as directed or by other approved means.

Section 154. *Closet Pans.*—Every water-closet shall be furnished with a pan of non-absorbent material of such shape, capacity, and construction as approved by the Authority. Water-closet pans and fittings thereto shall be entirely open to inspection and without any enclosure. Vent horns shall be provided on all pans, even if no anti-syphonage vent is required. If not used for a vent such vent horn shall be sealed with a lead disc, bituminous filler, and a lead cap piece, or by other approved method.

Section 155. *Closet Pan Seats.*—Except as approved by the Authority, all hinged closet pan seats shall be not less than 1 inch in thickness and constructed of approved material. When constructed of wood, four-piece seats shall be glued and either dowelled or bolted, and one-piece seats shall be reinforced with two wood or brass slips let in flush on the underside.

Section 156. *Flushing Apparatus.*—Approved apparatus shall be provided for the effective application of water to the pan of the water-closet and for the efficient flushing and cleansing of the pan and effective removal therefrom of any solid or liquid matter which may from time to time be deposited therein. Such apparatus shall have a flushing capacity of 2½ gallons, and shall be so constructed, fitted, and placed as to supply water for use in the pan without any direct communication with any service water pipe upon the premises.

Section 157. *Flushing Cisterns.*—Flushing cisterns shall be fixed at such height as will effectively flush the pan; but, except by special permission, no cistern shall be fixed at a less height, measured from top of seat to bottom of cistern, than 5 feet where 1½-in. flush pipe is used or 4 feet where 1¼-in. flush pipe is used. There shall be a distance of at least 9 inches between top of cistern and ceiling of closet.

Every cistern shall have a separate stop-tap and an overflow of 2-in. internal diameter, and shall be fixed to cistern boards not less than 12 inches deep and 1¼ inch thick, or fixed in other approved manner.

Water supply pipes to cisterns shall be adequate to fill any cistern at the rate of not less than 1 gallon per minute.

Section 158. *Flush Pipes.*—Flush pipes to closet pans shall be of brass, copper, 6-lb. lead, galvanized-iron of not less than 22-gauge, or other approved material, and shall have a minimum diameter of 1¼ inch.

Section 159. *Flushing Apparatus Other Than Cisterns.*—Notwithstanding anything contained in this By-law, closet pans in any building may be flushed by means of any apparatus which—

- (a) automatically controls the amount of water used, and/or
- (b) is approved by the Authority.

Section 160. *Storage Tanks.*—Except where otherwise allowed by the Authority, on request in writing, by the owner accepting all responsibility in the matter, internal water-closets shall be provided with storage tanks capable of holding 6 gallons of water for each occupant of the building, with a minimum of 60 gallons per closet for all buildings except private residences, which shall have a minimum capacity of 30 gallons.

Unless otherwise directed by the Authority, the storage tanks may be placed in the water-closet apartment itself, on the roof over a flat or gutter, or in an accessible place between the ceiling and the roof, in which latter case a safe of galvanized-iron, lead, or other approved impervious material, with overflow, shall be fixed under the storage tank.

Section 161. *Venting Closet Pans.*—Unless otherwise directed or permitted, every closet pan on an upstairs floor shall discharge into a soil-ventilator pipe, except that any closet pan on a floor which is not more than 8 feet in height from the ground surface level may be ventilated by an anti-syphonage vent only, in accordance with the requirements of sections 85 and 108 and discharge into a soil pipe without extension as a ventilator pipe; provided that no fixtures at a lower level are connected to such soil pipe.

Any closet pan where ordered, and also unless otherwise directed every internal closet pan, shall be ventilated by an anti-syphonage vent in accordance with the requirements of section 85 sufficiently close to prevent syphonage, and in no case more than 18 inches from the trap.

The anti-syphonage vent may be omitted under the following conditions:—

- (a) Where the internal closet pan is not more than 4 feet from a fully vented soil pipe as measured along the axis of the pipe between the centre of the soil pipe and the centre of the pan;
- (b) Where no closet pan and/or group of fixtures with a total discharge of more than eight fixture units is connected to such ventilator soil pipe at a higher level; and/or
- (c) No syphonage occurs.

Section 162. *Grouped External Closets.*—Where there are more than three external water-closet pans grouped on the ground floor or in the yard of any premises special provision must be made to prevent syphonage.

Division 31.—Urinals and Flushing Apparatus.

Section 163. *Urinals, General.*—Every urinal on premises licensed for the sale of fermented or spirituous liquors, and on premises used as a factory, workshop, work place, manufactory, shop, office, or school where persons of the male sex are employed or in attendance, shall be of such size as the Authority requires. Provided that when the number of persons of the male sex does not exceed ten, a urinal need not be fixed if the closet has a pedestal pan with a hinged tip-up weighted seat.

Section 164. *Internal Urinals.*—The positions, approaches, arrangement of lighting, ventilation, &c., for internal urinals shall comply as nearly as possible with the provisions as to internal water-closets.

Section 165. *Details of Construction, &c.*—Except by special permission, only round-backed stall type urinals of approved impervious material shall be used. The soil pipes shall be of lead, stoneware or glass enamelled or coated cast-iron, or other approved material, shall be kept as short and free from bends as possible, and shall be trapped. Inspection openings shall be provided on soil pipes as directed, with clamped covers. The urinals shall be provided with approved flushing apparatus and a hose tap shall be provided in a suitable position for hosing down.

Section 166. *Treatment of Floors.*—The floor in front of a urinal shall be covered with approved impervious material for a width of not less than 2 feet, or, if raised above floor level of urinal apartment, not less than 1 ft. 6 in., and graded to drain to urinal.

Impervious Materials.—The following materials will be considered impervious:—

- (a) For urinals: glazed fire clay or salt glazed stoneware.
- (b) For floors in front of urinals: Glazed tiles set in cement mortar (composed of equal parts of cement and sand), concrete 6 inches thick rendered with ½-in. thick cement mortar, slate, marble or asphaltum.

Section 167. *Flushing Apparatus.*—Pull and chain flushing cisterns or other approved apparatus operated by hand shall be fixed on all urinals except where automatic flushing cisterns are permitted or directed by the Authority.

Section 168. *Flushing Cisterns.*—The discharge from a cistern shall be equal to 1 gallon for each urinal stall, except where otherwise allowed by the Authority, but in no case shall larger than a 3-gallon cistern be used.

The height of a cistern shall, unless otherwise allowed by special permission, be at least 8 feet from the floor to the top of the cistern. The cistern shall be so fixed that the ball tap is accessible.

A separate stop tap shall be provided for each urinal cistern.

Section 169. *Flush Pipes.*—Flush pipes for urinals shall be of brass or copper with gunmetal fittings, and shall have a minimum diameter of 1¼ inch, except that flush pipes for automatic flushing cisterns generally shall not exceed—

- for 1-gallon cistern, 3-in. internal diameter,
- for 2-gallon cistern, 1-in. internal diameter,
- for 3-gallon cistern, 1¼-in. internal diameter,

with branches as directed by the responsible officer of the Authority.

Division 32.—Housemaids' Slop Sinks.

Section 170. *General.*—Housemaids' slop sinks shall be made in one piece of approved impervious material and provided with approved flushing apparatus of 2-gallon capacity.

Section 171. *Ventilation, Light, &c.*—Housemaids' slop sinks shall be so placed and ventilated as to comply with the requirements for water closets as set out in sections 150 (a), (b), and (c), and 161.

Section 172. *Bibcock over Slop Sink.*—A bibcock shall be fixed directly over a housemaid's slop sink, and at least 18 inches above such sink.

Division 33.—Wash Troughs.

Section 173. *General.*—Wash troughs shall be of approved pattern and material, securely fixed and graded to outlet pipe, fitted with brass strainer sunk to level of bottom of trough.

Section 174. *Support for Lead Waste Pipe.*—Where the distance between outlets on troughs exceeds 21 inches and lead waste pipe is used, the pipe shall be supported either by a lead tack wiped on the top of the pipe or by a wooden block screwed to the bottom of the trough and clamped to the pipe.

Section 175. *Troughs Abutting Against Brick Wash Coppers.*—Wherever the end of a wash trough abuts against the brickwork of a wash copper the space between the end of trough and the brickwork shall be filled with approved waterproof material.

Division 34.—Sinks, Baths, Showers, and Lavatory Basins.

Section 176. *Sinks.*—All new sinks shall be fixed on brackets and traps and wastes left readily accessible.

Section 177. *Galvanized Sheet-iron Baths.*—The bottoms of galvanized sheet iron baths shall be effectively supported. Such baths shall not be enclosed. Longitudinal joints in the bottoms of baths shall not be permitted.

Section 178. *Bath Traps.*—Where a bath trap is fixed on the outside of a wall it shall in no case be more than 3 feet from the outlet of the bath, unless by special permission of the Authority.

Section 179. *Showers.*—All showers on the ground floor shall be provided with a 4-in. stoneware or concrete trap, fitted with brass grating. All showers above the ground floor shall be provided with drainage in accordance with the requirements for baths.

The floors of shower compartments shall be well graded to the trapped outlet and shall be constructed of not less than 4 inches of concrete, trowelled smooth or covered with tiles set in cement mortar, or of other approved impervious materials, or if constructed of timber shall be covered with enamelled cast-iron, approved non-corrosive sheet metal or other approved material turned up at the edges and flashed in accordance with the requirements of section 89.

The walls of shower compartments shall be constructed of brickwork or concrete, cement rendered to a smooth finish or covered with tiles set in cement mortar or of other approved impervious materials, or if constructed of timber shall be lined with approved non-corrosive sheet metal or other approved impervious material and with impervious joints.

Section 180. *Venting of Lavatory Basins.*—All lavatory basins shall be provided with anti-syphonage vents.

In ranges of lavatory basins, ventilation by means of a single vent pipe at the upper end of the range will be permitted, provided that the vent and main waste pipe are sufficiently large to prevent syphonage.

Section 181. *Tip-up Basins.*—Tip-up lavatory basins shall not be permitted.

Division 35.—Safes and Overflows.

Section 182. *Safes.*—Safes of lead or other approved impervious material shall be fitted under all housemaids' slop sinks, internal water closets, under all fixtures located on the first or higher floors and in such other positions as directed.

Section 183. *Lead Safes in Water-closets.*—All lead safes shall be laid with sheet lead weighing not less than 5 lb. per square foot, and where the whole floor is not covered with lead the safe shall extend 12 inches beyond the sides and 15 inches beyond the front of the pan, measured from the outside of the basin, and shall extend back to and 3 inches up the wall and over flashed, if directed. The roll of such safe shall be 2 inches wide and $\frac{1}{4}$ inch high.

Section 184. *Safe Overflows.*—Unless otherwise permitted, every safe shall be drained by a separate 2-in. diameter pipe, provided at the inlet with a brass grating and at the outlet into the open air with a flap valve of brass or other approved metal, and shall not connect with any waste pipe, soil pipe, drain, or sewer.

Section 185. *Cistern Overflows.*—Every cistern supplied with water shall, unless otherwise approved, have an overflow pipe of adequate size discharging in a position where it will not cause damage, but where it will act as a warning pipe. On ground floors where cisterns are fixed over impervious floors graded to drain outside of the room the overflow may discharge on to such floors, provided no damage is likely to arise therefrom.

Section 186. *Discharges from Overflows.*—Overflows may discharge into the open air above ground floor level only when the discharge will not cause any inconvenience or nuisance. In all other cases the pipes must be brought to the ground surface or be arranged to discharge where they will not prove a source of annoyance or inconvenience.

Section 187. *Existing Floors.*—Where necessary, in the opinion of the responsible officer of the Authority, every existing floor under a fixture shall be regraded and a proper waste pipe, and, if directed, a flap valve fixed.

Division 36.—Existing Fixtures.

Section 188. All existing fixtures, fittings, and appliances not in accordance with this By-law which the owner may desire to retain unaltered, and which, in the opinion of the Authority, will be inoffensive, may at the distinct request in writing of the owner only remain unaltered until such time as the Authority shall otherwise order. Existing fixtures, fittings, and appliances which, in the opinion of the Authority, are offensive shall be removed at once.

PART 6.

WATER SUPPLY.

Section 189. *Supply of Water to Fixtures.*—All water-closets and other plumbing fixtures shall be provided with a sufficient supply of water for flushing purposes to keep them at all times in proper and cleanly conditions.

Every owner of property who desires, or has been ordered by the Authority, to provide sanitary appliances for his own property and to connect his property with the sewers of the Authority, shall before or at the commencement of the work of making such connexion, provide piping approved of by the Authority for the conveyance of water, and shall cause the piping to be joined at the most convenient water supply main, or, with the permission of the Authority, to some pipe already joined to the main. Such piping shall be of capacity sufficient to supply all sanitary fittings on the property freely and continuously, and convey to the flushing cistern, flushing tank, or other flushing apparatus of each water-closet on the property enough water to fill the same at a rate of not less than 1 gallon per minute, and the owner shall cause such piping to be connected with the cistern before the completion of the work.

The water supply to any fixture shall be so arranged that there shall be an actual physical discontinuity between the water stored or used in any such fixture and that in the water service pipe.

Section 190. *Material, Condition, Capacity, &c., of Water Supply Piping.*—The entire length of the water supply piping from its connexion with the water supply main to the water-closet flushing cistern or other fixture shall be such as is, in the opinion of the Authority, suitable in regard to material, condition, and capacity to convey a sufficiency of water for the sanitary requirements of the particular tenement.

No. 109.—4195/40.—2

The owner shall keep the piping from becoming, whether by reason of corrosion or other cause, of insufficient capacity to fill the flushing cistern, storage tank, or other flushing apparatus at the rate of not less than 1 gallon per minute.

Section 191. *Fixtures Not Connected With Sewers.*—No water service pipe shall be laid to supply any fixture in any property in any sewerage area unless such fixture is connected with the sewers of the Authority, or unless special permission in writing has been previously given to lay such service pipe.

Section 192. *Storage Tanks.*—Water supply pipes to storage tanks for internal closets shall be of not less than $\frac{1}{2}$ -in. diameter and be provided with stop taps and high-pressure ball valves, except where the elevation of the storage tank is not sufficient to allow of high-pressure ball valves being used. In such cases the permission of the Authority shall be obtained to fix low-pressure ball valves. Where the head of the water supply of the storage tank to the flushing cistern is less than 20 feet, a low-pressure ball valve shall be provided to the cistern.

Outlets from storage tanks shall not be less than $\frac{1}{2}$ inch for one or two cisterns, and 1 inch for three to six cisterns.

Wherever a larger number than six cisterns is fixed, the size of the outlet shall be proportionally increased. The overflow from a storage tank shall be $\frac{1}{2}$ inch in diameter, and a stop tap shall be fixed on the rising supply pipe to the tank.

Full way gate valves shall be provided between storage tank and flushing apparatus.

Section 193. *Supply Pipe Connexion With Flushing Cistern.*—In all water-closets, where directed, a piece of lead or copper pipe not less than 12 inches in length shall be used between the flushing cistern and the supply pipe.

The foregoing By-law was made and passed by the Morwell Sewerage Authority at a special meeting held on the 12th day of February, 1940, and confirmed at a subsequent special meeting of the Authority on the 11th day of March, 1940.

In witness whereof the Common seal of the said Authority was affixed hereto in the presence of—

SHIRE OF KORONG.—KORONG VALE WATER SUPPLY DISTRICT.

RATING BY-LAW FOR THE YEAR COMMENCING 1ST OCTOBER, 1939.

THE Council of the Shire of Korong, in pursuance and exercise of the powers conferred by the Water Acts, doth hereby make a rate for the supply of water for domestic purposes, otherwise than by measure, of Forty-two pence in the pound on the annual municipal valuation of lands and tenements liable to be rated within the Korong Vale Water Supply District.

Provided that in no case shall the amount of rate payable per annum in respect of any tenement (other than land on which there is no building) be less than Sixty shillings, and in respect of any land on which there is no building, less than Ten shillings.

Such rates are made and shall be levied upon the occupiers or owners of the said lands and tenements for the year commencing the 1st day of October, 1939, and ending on the 30th day of September, 1940, and shall be payable on the 15th day of April, 1940, at the office of the said Council.

For water supplied by the Council for domestic as well as for other than domestic purposes by measure (except in cases of special agreement with the Council), the minimum quantity of water to be charged for in respect of all lands and tenements shall be the quantity for which the charge of Eighteen pence per 1,000 gallons would be equal to the amount of rate which would be payable for the lands and tenements so supplied if otherwise than by measure. All water supplied by measure by the Council in excess of such aforesaid quantity shall be charged for at the rate of Eighteen pence per 1,000 gallons.

Passed this 12th day of December, 1939.

THE ARCHITECTS ACTS.

AMENDING REGULATIONS.

REGULATIONS (No. 4) made by the Architects Registration Board of Victoria pursuant to and under the authority conferred by section 20 of the *Architects Act 1928*.

These Regulations shall be deemed to come into force on the date of publication in the *Government Gazette*.

Regulations (No. 3) made by the Architects Registration Board of Victoria, and approved by the Governor in Council on the second day of November, One thousand nine hundred and thirty-six, and published in the *Gazette* of the fourth day of November, One thousand nine hundred and thirty-six, are hereby amended in the manner following, that is to say:—

1. The Schedule is amended by adding after the expression "under sub-sections 8 (1) (e) and (f)," where it first appears, the expression "of the *Architects Act 1928*;" and by adding after the expression "under the provisions of section 8 (1)," where it first appears, the expression "of the *Architects Act 1928* and of section 4 (1) of the *Architects Act 1939*."

2. The Schedule is further amended by deleting the expression "*Architects Act 1928*," where it first appears, and inserting in its stead the words "The Architects Acts."

3. Form "A" of the Schedule is amended—

(a) by deleting the title "*Architects Act 1928*" and inserting in its stead the title "The Architects Acts";

(b) by deleting the expression "*Architects Act 1928*" where it secondly appears, and inserting in its stead the words "Architects Acts", and by adding after the expression "*Architects Act 1928*," where it thirdly appears, the expression "and in section 4 (1) of the *Architects Act 1939*";

(c) by adding at the end of Form "A" the following paragraph:—

"(g) To be used by a person who had for a period of at least three years before the date of the commencement of the *Architects Act 1939* been bona fide engaged in Victoria in the practice of the profession of an architect—

(i) For what period or periods of time prior to the commencement of the *Architects Act 1939* had you been continuously practising as an Architect in the State of Victoria?

(ii) At what place or places in Victoria have you practised?

(iii) During such time or times were you practising as a principal or were you during the whole or part of such time or times in the employ of some person or persons or public or municipal body, or in any Government department? Give full particulars.

(iv) During the whole of such time or times was the practice of the profession of an architect your sole or main source of livelihood?

(v) If not give particulars of what other occupation or occupations you combined with your practice as an architect as your means of livelihood.

(vi) Give particulars of one or more buildings or works in Victoria solely designed by you, and executed or carried out under your personal supervision, and whether plans may be inspected, and where.

4. Form "B" of the Schedule is amended by deleting the expression "*Architects Act 1928*" and inserting in its stead the words "Architects Acts."

5. Form "C" of the Schedule is amended by deleting the words "or practising architect, as the case may be."

6. Form "D" of the Schedule is amended by deleting the expression "Section 8 (1) of the *Architects Act 1928*" and inserting in its stead the words "the Architects Acts."

7. Form "E" of the Schedule is amended by deleting the expression "is a registered architect within the meaning of the *Architects Act 1928*" and inserting in its stead the words "is registered as an architect under the provisions of the Architects Acts."

Opticians Registration Act 1935.

OPTICIANS REGISTRATION BOARD.

REGULATION.

UNDER the powers in that behalf conferred by the *Opticians Registration Act 1935*, the Opticians Registration Board, with the approval of the Governor in Council, doth hereby amend the Regulations cited as the "Opticians Regulations" as follows (that is to say):—

1. For Regulation 43 there shall be substituted the following:—

43. After the first day of January, 1941, no person shall be entitled to commence the course of training or sit for the examinations prescribed by these Regulations unless he has passed the following preliminary examinations and complied with the following conditions:—

(a) Passed the examinations required for the School Leaving Certificate of the University of Melbourne, including English, one other language and either a Mathematics or a Science subject, and qualified to matriculate at the University of Melbourne; or

(b) passed some other examinations which in the opinion of the Board are substantially equivalent to the standard of the examinations necessary to qualify a person for the School Leaving Certificate and which would entitle such person to matriculate at the University of Melbourne:

Provided however that any person who has obtained the Intermediate Certificate of the Melbourne University shall be entitled, during the year 1940, to commence the course of training and to sit for the examinations aforesaid.

The foregoing Regulation was made by the Opticians Registration Board, at a meeting of the said Board, held on the 16th day of October, 1939.

B. NATHAN, Chairman.
H. L. GORDON, Registrar.

Approved by the Governor in Council,
1st April, 1940.

C. W. KINSMAN,
Clerk of the Executive Council.

GRAIN ELEVATORS ACT 1934 (No. 4270).

At the Executive Council Chamber, Melbourne, the first day of April, 1940.

PRESENT:

His Excellency the Governor of Victoria.

Mr. Hogan

Sir John Harris.

AMENDMENT OF THE SCHEME SUBMITTED BY THE GRAIN ELEVATORS BOARD FOR COUNTRY AND TERMINAL ELEVATORS THROUGHOUT VICTORIA.

IN pursuance of the provisions in that behalf contained in section 11 of the *Grain Elevators Act 1934* (No. 4270), His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth by this Order hereby amend the Order made on the 16th June, 1936, approving the scheme submitted by the Grain Elevators Board for country and terminal elevators, in so far as it relates to the terminal elevator at Williamstown, as follows (that is to say):—

For the words "two million (2,000,000) bushels" there shall be substituted the words "two million six hundred thousand (2,600,000) bushels."

And the Honorable Edmond John Hogan, His Majesty's Minister of Agriculture for the State of Victoria, shall give the necessary directions herein accordingly.

C. W. KINSMAN,
Clerk of the Executive Council.

COUNTRY ROADS BOARD.

At the Executive Council Chamber, Melbourne, the first day of April, 1940.

PRESENT:

His Excellency the Governor of Victoria.
Mr. Hogan | Sir John Harris.

DECLARATION OF A DEVIATION FROM THE HIGH-
LANDS-ROAD IN THE SHIRE OF SEYMOUR.

WHEREAS by section 58 of the *Country Roads Act 1928* (No. 3662) it is amongst other things enacted that when the Country Roads Board under the provisions of the Country Roads Act has by Resolution declared a deviation to be a main road the said Board may also declare that such deviation shall be in lieu of any existing road or part thereof named in such Resolution and that on publication in the *Government Gazette* of the Order confirming such Resolution the existing road or part thereof shall cease to be a main road or be discontinued as provided in the Resolution: And whereas the said Board has by Resolution declared the deviation on the land described in the First Schedule to such Resolution to be a main road and has also declared that such deviation shall be in lieu of the part of the existing road being the land described in the Second Schedule to the said Resolution and that such part of the said existing road shall be discontinued: Now therefore His Excellency the Governor of the State of Victoria by and with the advice of the Executive Council thereof doth hereby confirm the said Resolution.

Resolution for Declaration of a deviation under the
Country Roads Act.

Whereas the land the site of the road the course of which is below set out was taken by the Board under the provisions of the *Country Roads Act 1928* for the purpose of constructing such road deviation which road deviation has now been laid out and formed on the same: And whereas the said Board (being the Country Roads Board incorporated under the said Act) thinks that the road aforesaid is fit to be used as a public highway such Board at a meeting now holden acting under the authority conferred upon it by section 58 of the said Act doth by this present Resolution hereby declare the said road deviation the course of which is described in the First Schedule hereto with the commencing and terminating points thereof respectively specified to be part of a main road within the meaning and for the purposes of the *Country Roads Act 1928*: And the said Board doth also declare that such deviation shall be in lieu of the existing road or part thereof described in the Second Schedule hereto and that such part of the said existing road shall be discontinued.

FIRST SCHEDULE.

Shire of Seymour.

6. *Highlands-road* (15106).—All those pieces of land in the Parish of Worrhough, the boundaries of which are as follow:—

ORDER APPROVING OF A DEVIATION FROM A ROAD
IN THE SHIRES OF HEYTESBURY AND WARRNAM-
BOOL.

WHEREAS the Country Roads Board constituted under the *Country Roads Act 1928* (No. 3662) has represented to His Excellency the Governor in Council that it appears to it desirable that the deviation hereinafter referred to from the existing Ayresford-road in the Shires of Heytesbury and Warrnambool should be made by the said Board: And whereas the said Board in accordance with the requirements of section 4 of the *Country Roads Act 1936* (No. 4458) and of section 19 of the said first cited Act has caused to be prepared a map plan and estimate showing the points between which and on and through what land the said deviation is proposed to be made and the cost of acquiring the land and constructing the said deviation: And whereas on an inspection of the said map and plan and a consideration of the said estimate His Excellency the Governor in Council is satisfied that there are funds legally available for acquiring the land and constructing the said deviation: Now therefore be it known by this present Order that His Excellency the Governor of the State of Victoria with the advice of the Executive Council thereof doth hereby approve of the said road being made, that is to say:—

All that piece of land in the Parish of Ecklin, the boundaries of which are as follow:—Commencing at the north-western angle of allotment 7a, section 8, of the said parish; thence by lines bearing respectively 65 deg. 18 min. 563 links, 186 deg. 14 min. 603.5 links, 203 deg. 11 min. 1,103.5 links, and 350 deg. 30 min. 1,379 links to the point of commencement—which said piece of land is particularly delineated and shown coloured red and blue on survey plan No. 4326, lodged in the office of the Country Roads Board.

And the Honorable Sir George Goudie, His Majesty's Commissioner of Public Works for the State of Victoria, shall give the necessary directions herein accordingly.

C. W. KINSMAN,
Clerk of the Executive Council.

COMPANIES ACT 1938.

At the Executive Council Chamber, Melbourne, the first day of April, 1940.

PRESENT:

His Excellency the Governor of Victoria.
Mr. Hogan | Sir John Harris.

KEEPING OF BRANCH REGISTER OF BRITISH COMPANY IN VICTORIA.

WHEREAS it is provided by section 107 of the *Companies Act 1938* that if by virtue of the law in force in any part of His Majesty's Dominions outside Victoria companies incorporated under that law have power to keep in Victoria branch registers of their members resident in Victoria, the Governor in Council may, by Order published in the *Government Gazette*, direct that sections ninety-eight and one hundred of the said Act shall, subject to any modifications and adaptations specified in the Order, apply to and in relation to any such branch registers kept in Victoria as they apply to and in relation to the registers of companies within the meaning of Part I of the said Act: And whereas The Bank of Australasia is a society or co-partnership established in Great Britain under a deed of settlement bearing date the second day of June, One thousand eight hundred and thirty-four under conditions therein mentioned, and set forth for the purpose of carrying on banking business in Great Britain and elsewhere under the name of "The Bank of Australasia": And whereas by Royal Charter bearing date the twenty-first day of May, One thousand eight hundred and thirty-five, the said society or co-partnership was incorporated in Great Britain under the name of "The Bank of Australasia" (hereinafter called "The Bank"): And whereas The Bank has for many years past kept at its principal office, in Melbourne, in Victoria, a list of its Australian shareholders, and is now empowered to keep a branch register in Victoria of such shareholders: And whereas The Bank, for the purpose of facilitating the making of title to shares in The Bank by the legal personal representatives of deceased persons now entered on the said list and for other purposes, desires to close such list, and in lieu thereof, to keep a branch register at its principal office in Victoria, of shareholders from time to time entitled to be entered on such branch register: And whereas it is expedient that the application of the said section ninety-eight should be modified by amending the date of commencement of the said branch register in Victoria from the date of the registration of the company, as provided by that section, to the 15th day of April, 1940, being the commencing date of the financial year and balancing period of The Bank: Now therefore the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby direct that on and from the said fifteenth day of April, 1940, the said section ninety-eight modified as aforesaid, and the said section one hundred shall apply to and in relation to the branch register kept by The Bank in Victoria as hereinbefore referred to.

And the Honorable Henry Stephen Bailey, His Majesty's Attorney-General for the State of Victoria, shall give the necessary directions herein accordingly.

C. W. KINSMAN,
Clerk of the Executive Council.

DEPARTMENT OF LANDS AND SURVEY.

PRESENT:

His Excellency the Governor of Victoria.
Mr. Hogan | Sir John Harris.

REMOVAL OF LICENCE TO NEW SITE IN THE TOWNSHIP OF WODONGA.

WHEREAS it is provided by section 127 of the *Licensing Act 1928*, that, where in the opinion of a Licensing Court it is not practicable without unusually great expenditure on the site occupied by any licensed victualler's premises to maintain or keep the same and the accommodation thereof at the standard required by that Act or to prevent the premises becoming ruinous or dilapidated, the said Court on the application of the owner of the said premises and with the consent of the Governor in Council previously obtained may grant a certificate authorizing the removal of the licence to existing premises on another site in the same village or township or conditionally upon the erection of premises on the new site in conformity with plans approved by the Court and within a time specified in the certificate: And whereas application has been made to the Licensing Court for the Licensing District of Benambra by J. C. B. McKenzie-McHarg, solicitor, of Sydney-street, Wodonga, on behalf of Irene Alice Weatherall and Lena Emily Pickering, the owners of the licensed victualler's premises known as the "Half-way Hotel" and situate in the Township of Wodonga, for a certificate pursuant to the said section authorizing the removal of the licence to premises to be erected on another site in the same township: Now therefore His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby Order, pursuant to the provisions of the said section 127 of the *Licensing Act 1928*, that consent be given to the said Licensing Court for the Licensing District of Benambra to grant a certificate authorizing the removal of the said licence to another site in the said township of Wodonga and more particularly described as follows:—Allotment 2 of section 0, Town and Parish of Wodonga, County of Bogong, in certificate of title, volume 1948, folio 389549, corner of Elgin and Smyth streets, Wodonga, frontage 230 links to Elgin-street by a depth along Smyth-street of 250 links—conditionally upon the erection of premises on the new site in conformity with plans approved by the said Court, and within a time specified in such certificate.

And the Honorable Henry Stephen Bailey, His Majesty's Chief Secretary of the State of Victoria, shall give the necessary directions herein accordingly.

LIST OF CROWN LANDS AVAILABLE (INCLUDING MALEE LANDS).

THE under-mentioned areas are available for application as provided by various sections of the Land Act 1928, and all applications received on or before Wednesday, 1st May, 1940, will be deemed to have been simultaneously made, but any application lodged after such date may be considered if received in time for inclusion in the advertisement of the cases to be heard at the Local Land Board.

Applications on proper form, accompanied by 5s. duty stamp unaccompanied (registration fee), may be delivered or forwarded by post to the Local Land Officer or to any Crown Lands Office in Victoria. Applicants may obtain from Local Land Officers, or the Enquiry Office, Lands Department, Melbourne, a certificate authorizing the issue by the Railway Department of a return ticket at concession fares to enable them to inspect available areas or to attend Local Land Boards. When an applicant is granted an allotment he may, if travelling by rail, obtain reduced fares for his family and also freight concessions in regard to some of his effects.

Subject to the approval of the Minister, when the survey fee exceeds £10, a deposit of £5 may be paid, and the balance over six years in half-yearly instalments.

Marked plans of any particular area, application forms, and any further information may be obtained from the Enquiry Office, Lands Department, Melbourne, and Land Officers, Bairnsdale, Ballarat, Beechworth, Renalla, Bendigo, Geelong, Hamilton, Horsham, Melbourne, Omeo, Redcliff, Sale, Seymour, and St. Arnaud.

Tenders to be addressed to the Honorable the Commissioner of Public Works, and envelope containing tender marked "Tender for _____", due

GEO. L. GOUDIE,
Commissioner of Public Works.

Melbourne, 3rd April, 1940.

TENDERS FOR THE SERVICE, 1940.**BOOTS AND SHOES.**

TENDERS will be received until Eleven o'clock a.m. on Friday, 12th April, 1940, from persons willing to supply the under-mentioned articles required by the Victorian Government during the three months commencing 1st May, 1940:—

Schedule No.	Preliminary Deposit for each item.
10. Boots and shoes (Items 1 to 5)	£ 3

The prices tendered must not include sales tax.

Security.—Five per cent. of total amount of tender accepted, but in no case will security of less than £3 be received.

Schedules as above, with full particulars, may be obtained from the Secretary to the Tender Board, by whom also the samples will be shown and any information afforded to persons tendering.

Samples must be submitted with tenders.

Tenders for each item must be accompanied by the preliminary deposit, as shown above, by bank draft or marked cheque in favour of the Secretary to the Tender Board. Cheques, Savings Bank deposit books, fixed deposit receipts, Commonwealth Treasury bonds, or reference to securities on existing contracts will in no case be received or entertained as preliminary deposits. Preliminary deposits will be returned within ten days to unsuccessful tenderers on their application.

The amount of the preliminary deposit required with each tender must be enclosed, and the amount must be clearly written in and the designation stated, whether marked cheque or bank draft, as the case may be.

Security will be required, either in bank guarantee (bank to be approved by the Tender Board), Commonwealth Treasury bonds, Savings Bank deposit book or fixed deposit receipt in favour of the Secretary to the Tender Board, or cash deposit, as the tenderer may elect.

The security must be completed and the contract signed within five days of acceptance of the tender, failing which the contract may be again advertised, or another tender accepted.

The lowest or any tender will not necessarily be accepted.

In the event of tenderers withdrawing or attempting to withdraw their tenders before notification of acceptance of same, or failing to take up their accepted tenders within the prescribed period after notification of acceptance, the preliminary deposit will be forfeited and, in addition, they may be disqualified from tendering or holding any future contracts for Government supplies for a period of twelve months, such disqualification to date from the notification of acceptance of tender. It is also stipulated that, if a tenderer be a member of a firm and such firm be interested in the contract, the tender shall be in the name of the firm and not in that of the individual, and that for a breach of this condition the preliminary deposit will be forfeited and the tender declared informal.

Tenders enclosed in a separate envelope, and having the words "Tender for _____" (as the case may be) written thereon, must be deposited in the Tender-box at the Tender Board Offices, Gisborne-street, Melbourne, or, if sent by post, postage must be prepaid, and the tenders addressed to the Chairman of the Tender Board, Tender Board Offices, Gisborne-street, Melbourne, C.2, which office they must reach not later than by first post on the date of closing of tenders.

The conditions of contract are those published in the *Victoria Government Gazette* of 21st February, 1940, pages 885 and 886.

A By-law of the City of St. Kilda made under Part VII. of the *Local Government Act 1928*, and numbered 122, for preserving good order and decency in any building belonging to the municipality or under the control and management of the Council, and preventing damage to such building and to the furniture and fittings thereof, and for preventing and extinguishing fires and for preserving public decency.

IN pursuance of the powers conferred by the Local Government Acts, the Mayor, Councillors, and Citizens of the City of St. Kilda order as follows:—

1. In this By-law the word "building" shall mean a building belonging to the municipality or under the control and management of the Council; the word "Council" shall mean the Council of the City of St. Kilda; the word "Municipality" shall mean the Municipality of the City of St. Kilda; and the words "fire prevention appliance" shall mean any appliance, fixture, plant, machinery, or thing, whether part of attached or fixed to or placed in any building and used or intended to be used for the purpose of preventing, controlling, extinguishing, or preventing the extension of fire, and includes, without affecting the generality of the foregoing, any hoses, taps, hydrants, sprinklers, or portable fire extinguishers.

2. No person shall in any building—

(a) Behave in a riotous, indecent, offensive, threatening, insulting, violent, quarrelsome, or disorderly manner; or

(b) Use any threatening, abusive, obscene, indecent, or insulting words.

3. No person shall enter into or remain in any building while in a drunken or intoxicated condition.

4. No person shall expectorate upon the floor, walls, furniture, or fittings of any building.

5. No person shall cut, mark, deface, write or scribble on, or otherwise damage or injure any building or any part thereof, or the furniture or fittings of any building.

6. No person shall in any building stand upon any chair, seat, or table, or stand or sit on any window sill, parapet, roof, gutter, gable, roof, balcony, or parapet cornice of any building.

7. No person shall use any stair handrail otherwise than for support or assistance by hand in ascending or descending such stair.

8. No person shall in any way interfere with or destroy, damage, or injure any fire-prevention appliance of or in any building.

9. This By-law shall apply to and have operation throughout the whole of the municipal district of the municipality.

The Resolution for passing this By-law was agreed to by the Council on the twelfth day of February, 1940, and confirmed on the eleventh day of March, 1940.

The common seal of the Mayor, Councillors, and Citizens of the City of St. Kilda was hereunto affixed, on the eleventh day of March, 1940, in the presence of—

SHIRE OF YEA.

By-Law No. 14.

A By-law of the Shire of Yea, numbered 14, made under section 197 of the *Local Government Act 1928*, for prescribing areas within the *Municipal District as residential areas* and for the purpose of prohibiting within the whole of such residential areas the erection, adaptation for use, or use of any buildings for the purpose of trades, industries, manufactures, businesses, or public amusements as herein specified.

IN pursuance of the powers conferred by the *Local Government Acts*, the President, Councillors, and Ratepayers of the Shire of Yea, with the approval of the Governor in Council, do hereby order as follows:—

1. The whole of the Township of Yea, as hereinafter defined, shall be and is hereby prescribed a residential area.

2. The erection (including adaptation for use) or the use of any building for the purposes of any of the classes of trades, industries, manufactures, businesses, or public amusements, as provided and set out in Schedule A of this By-law within such residential area, shall be and is hereby prohibited.

3. This By-law shall not preclude the continuance of the use of any building for any purpose for which the same was used immediately before the coming into operation of this By-law, or the enlargement, rebuilding or extension of any building used for any such purpose, whether or not such enlargement, rebuilding, or extension involve the use of adjoining land which immediately before the coming into operation of the By-law was in the same ownership.

4. This By-law shall apply to and operate throughout the Township of Yea as hereinafter defined.

5. The Township of Yea shall mean and include the whole of the area contained within the boundaries as set out hereinunder:—Commencing at a point on the south bank of the Yea River due north of the easternmost corner of allotment 2 of section 41; thence in a south-westerly direction to the southerly corner of Smith-street at its junction with the Yea-Glenburn road; thence in a south-westerly direction following the south-east side of Smith-street to the north-west corner of allotment 8, section A, of the Township Extension; thence due westerly to the east bank of the Boundary Creek; thence generally northerly following the right bank of the Boundary Creek to its junction with the Yea River; thence following the left bank of the Yea River in a generally north-easterly, easterly, and south-easterly direction to the point of commencement.

6. Any person who shall be guilty of any breach of any of the provisions of this By-law shall be liable to a penalty of not less than Five pounds (£5) and not exceeding Twenty pounds (£20), and if such offence is a continuing one, to a further penalty of not less than One pound (£1) per day, and not exceeding Five pounds (£5) per day for each day such offence is committed.

7. This By-law shall come into operation and have effect immediately upon its publication in the *Victoria Government Gazette*.
