REGULATIONS RELATING TO THE SUPPLY OF  
ELECTRICITY AND TO CONSTRUCTION IN CONNEXION  
THEREWITH.

WHEREAS by Order in Council made the 6th day of March, 1928, and published in the *Government Gazette* on the 14th day of March, 1928, pages 955 and following, Regulations were made by the Governor in Council on the recommendation of the State Electricity Commission of Victoria for securing the adoption of such standards of plant and equipment and of system frequency and pressure for the generation, distribution, and supply of electricity as will admit of the efficient inter-connexion of electricity supply undertakings and interchange of electricity throughout the same and generally the safe, economical, and effective supply of electricity throughout Victoria, and for securing the persons and property of the public from injury by fire or otherwise, and for other purposes (which Regulations are referred to in Regulation 1 hereof as "the principal Regulations"); And whereas the aforesaid Regulations were amended by Order in Council made the 14th day of October, 1935, and published in the *Government Gazette* on the 16th day of October, 1935, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby, on the recommendation of the State Electricity Commission of Victoria, make further amendments and additions to the aforesaid Regulations in manner following, that is to say:—

## Short Title.

1. The principal Regulations, together with any amendment thereof, and these Regulations may be cited as "Electricity Supply and Construction Regulations."

## Date of Operation.

2. These Regulations shall come into force on the date of publication thereof in the *Government Gazette*.

## Alteration of Definition.

3. In Regulation 1 (Definitions) of the Electricity Supply and Construction Regulations the definition of "Distribution System" shall be deleted and the following definition substituted therefor, namely:—

"Distribution System" means a system of mains for receiving from a generating station, sub-station, or transformer and conveying at the same pressure throughout, between active and neutral conductors, electricity for distribution to consumers.

## Amendment and Addition to Regulation 2.

4. In Regulation 2 of the Electricity Supply and Construction Regulations:—

(A) Clause (x) shall be deleted and the following clause substituted therefor:—

"(x) Connexion of Circuits with Earth.

Except in the case of a distribution system, in which the requirements of clause (xiii) of this Regulation 2 are complied with (which is hereinafter referred to as a multiple earthed neutral system of distribution), the intermediate or neutral conductor of every distribution system, in which the pressure of supply between such intermediate or neutral conductor and an outer conductor exceeds 125 volts, shall be connected with earth at one point on each circuit, at the generating station, sub-station, or transformer, as the case may be, and shall be insulated from earth at all other parts.

The conductors of the distribution system shall be so insulated that the leakage current does not exceed one-thousandth part of the maximum supply current or such other value as the Commission in any specific case may have determined by notice in writing to the undertakers, and, if required by the Commission, the undertakers shall install and keep installed such indicating and/or recording instruments as may, in the opinion of the Commission, be necessary for ascertaining whether or not this requirement as to the amount of leakage current is complied with. The negative conductor of a two-wire direct current distribution system shall be connected with earth at the generating station, under similar conditions as to limitations of leakage current, and tests to ascertain the amount of such leakage of current shall be made daily, and shall be duly recorded by the undertakers.

Notwithstanding this Regulation an outer conductor may be temporarily earthed, with proper precautions, for purposes of testing."

(B) After clause (x) there shall be inserted the following clauses, namely:—

"(xi) Supply Permitted Only Where Exposed Metal is Connected with Earth.

The undertakers shall not supply electricity to any consumer's premises unless all exposed metal, which forms a part of the wires and fittings on such premises or is used in association therewith and which, in the event of a leakage, would be likely to become charged with electricity, is prevented, by one or other of the following methods, from acquiring a dangerous potential, viz.:—

- (1) By direct connexion to an earthing medium, which is effective for the purpose (direct earthing); or
- (2) by connexion to the neutral conductor of a multiple earthed neutral system of distribution; or
- (3) by the connexion of such wires and fittings to the mains through an earth leakage circuit-breaker.

Provided, however, that the undertakers shall not supply electricity to a consumer's premises, where direct earthing is used, except in accordance with the provisions of clause (xii) of this Regulation 2, and shall not supply electricity to a consumer's premises in which exposed metal is connected to the neutral conductor except where the conditions set out in clause (xiii) of this Regulation 2 for the construction and use of a multiple earthed neutral system of distribution are complied with.

(xii) Direct Earthing.

Electricity shall be supplied to a consumer's premises where direct earthing is used only:—

- (1) from an underground distribution system, in which the mains throughout the distribution system are underground cables, the neutral conductor of which is earthed at the source of supply and is bonded to the metallic sheathing of all cables of the distribution system, and if the earthing connexion at the consumer's premises is made to the sheathing of the cable; or
- (2) from an overhead distribution system, which existed prior to the making of this Regulation and throughout the extent of which there is an underground public water supply system of metal piping, in which the metallic and electrical continuity of the piping is unbroken, and if the earthing connexion at the consumer's premises is made to a metal water pipe, which is electrically continuous with the piping of the underground water supply system;

and in either case:—

- (3) if the premises are not supplied from a multiple earthed neutral system of distribution, unless it be between the date of the Governor in Council's approval of electricity being supplied by that system in the relevant area and the date prescribed in that approval as the date after which no installation in that area is to be protected by direct earthing.

(xiii) Multiple Earthed Neutral System.

An undertaker shall not supply electricity in its area of supply or in any part of such area by means of a distribution system in which the intermediate or neutral or any conductor is connected to earth at any point other than at the generating station, sub-station, or transformer, as the case may be, unless the Governor in Council has approved of electricity being supplied at the relevant voltage by means of a multiple earthed neutral system of distribution within such area of supply or part thereof, and, from and after such date or dates as may be prescribed in that behalf in the Governor in Council's approval:—

- (1) at the premises of every consumer in the area or such part thereof, the conductors, and exposed metal which form a part of or are used in association with the consumer's wires and fittings, and which are by or in accordance with the provisions of the Provisional Wiring Regulations or other Regulations for the time being in force, made pursuant to paragraph (d) of section 27 of the *State Electricity Commission Act 1928*, as amended by any Act, to be connected to an earthing electrode, are so connected, and in addition are connected to the neutral conductor of the distribution system; and

- (2) the neutral conductor of the distribution system:—

(a) is a copper conductor not smaller than 7/044 inches and, where any active conductor is larger than 7/044 inches, is not smaller than such active conductor, provided that, where the cross-sectional area

of the neutral conductor is .04 square inch or greater, it shall suffice if the neutral conductor be not less than half the cross-sectional area of the largest active conductor; and

- (b) is connected with earth at or immediately adjacent to the generating station, sub-station, or transformer, as the case may be, and at such other places in the distribution system as may be necessary, in addition to the earthing connexions at consumers' premises, to ensure that there is an even distribution of the connexions to earth and also that the resistance between the neutral conductor and earth is limited to the value specified in paragraph (3) below; and
  - (c) is connected to earth at the generating station, sub-station, or transformer, as the case may be, only by a conductor which is separated from any earthing conductor used for the purpose of connecting to earth high pressure apparatus, such as transformer and switchgear frames and lightning arresters, and which is connected to an earthing electrode situated at least 12 feet from the electrode to which such earthing conductor is connected. Provided, however, that the neutral conductor may be connected to the cable sheathing of an underground distribution network or to an extensive metallic continuous water piping system regardless of any other connexions made to such cable sheathing or piping system; and
  - (d) is clearly identified on poles or other supporting structures by its position with respect to other conductors or by coloured disks or other indicators attached to the supporting structures; and
  - (e) is insulated and supported in the same manner as is required for an active conductor, except that it shall not be necessary for the neutral conductor of a distribution system or a service line to be insulated cable where it is within 7 feet of a building or structure; and
- (3) the earthing connexions between the neutral conductor and earth are so installed and maintained that the resistance between the neutral conductor and earth does not at any time exceed 10 ohms; and
- (4) the cross-sectional area of every conductor connecting the neutral conductor of the distribution system with earth at any point (other than earthing connexions in consumers' premises) is not smaller than 7/64 inches and, except where it can be shown that the maximum current which could flow in the conductor under any conditions would not exceed the safe current for any smaller conductor used, is at least as large as that of such neutral conductor at that point; and
- (5) the distribution system is so divided into sections by means of graded fusible cut-outs, circuit-breakers, or other means that, in the event of a contact between a phase conductor and a neutral conductor at any point up to the consumer's terminals, the supply will be automatically cut off from that section; and
- (6) no installation supplied from the distribution system is protected by direct earthing.
- (xiv) *Checking of Multiple Earthed Neutral Systems.*  
In respect of every multiple earthed neutral system of distribution—
- (1) the undertaker shall forward to the Commission twice in each year a return showing the resistance to earth of the neutral conductor. One of the returns shall be of measurements taken in January, February, or March, and the other return of measurements taken in July, August, or September; and
  - (2) the undertaker shall, at the request of the Commission, made at any time in writing, show, either by calculation or by test, that the requirements of paragraph (5) of clause (xiii) of this Regulation 2 have been satisfied."

And the Honorable Francis Edward Old, His Majesty's Minister in Charge of Electrical Undertakings for the State of Victoria, shall give the necessary directions herein accordingly.

C. W. KINSMAN,  
Clerk of the Executive Council.

Tender Forms can be obtained on Application to the Lands Department, Melbourne, or any of the Lands Offices in the Country.

Tenders should be placed in the Lands Department Tender-box, State Treasury Buildings, Melbourne, C.2, at or before Noon on Thursday, 25th July, 1940.

NOTE.—No tender will be accepted unless the rent for the full period and fee of Seven shillings and six pence for licence are forwarded.

**TENDERS** are invited and must be lodged at the Lands Department, Melbourne, at or before Noon on Thursday, 25th July, 1940, for the right to depasture stock on the following unappropriated portions of lands subject to the Regulations approved by the Governor in Council and also the subjoined special conditions.

Every licence granted under section 121 of the *Land Act 1928* shall be subject to the conditions set forth in the Schedule hereto and to such special conditions and payment in advance of such fee as the Minister may determine, and shall be issued by an officer of the Department of Lands and Survey duly authorized in that behalf.

#### CONDITIONS.

1. The issue of this licence shall not prevent the land comprised therein, or any part or parts thereof, being sold, leased, licensed, alienated, or dealt with under any of the provisions of the *Land Acts*; except under the 121st section of the *Land Act 1928*, or being resumed by order of the Governor or Administrator of the Government of Victoria; with the advice of the Executive Council.

2. In case the said land, or any part thereof, should be sold, leased, licensed, alienated, dealt with, or resumed as aforesaid, the licensee shall not be entitled to any compensation other than that which the responsible Minister of the Crown for the time being administering the *Land Acts* may think fit.

3. This licence is subject to the rights of the holders of miner's rights or of mining leases now issued or hereafter to be issued to enter upon the allotment hereby licensed, and to search for gold and to mine thereon and to erect and occupy mining plant and machinery, without making any compensation to the licensee, his executors, administrators, or assigns, for surface or other damage.

4. Subject to these conditions, the licensee shall be entitled to use the land for the purpose for which this licence has been granted until such land, or any part thereof, has been sold, leased, licensed, alienated, dealt with, or resumed as aforesaid; and thereupon all the interest of the licensee therein shall cease and be determined.

5. No land comprised in roads from time to time surveyed and marked out within the boundaries of the land comprised in this licence shall be deemed within its operation.

6. This licence shall entitle the holder thereof, during the period for which it is granted, to use the land therein comprised for depasturing purposes only, but shall not confer any right to build thereon, or to cultivate or, without the permission of the Minister, fence any portion thereof, or construct a dam or tank.

7. The taking in of stock for agistment or otherwise allowing the use of the land, or part thereof, without the authority in writing by the Minister, is forbidden.

8. That in the event of the Minister granting permission to fence the whole or any part of this area, the licensee shall provide gates or slip-panels in suitable places for the convenience of the public. No compensation will be allowed for fencing erected on boundaries of allotments alienated or in course of alienation.

9. That where improvements are authorized under section 123 of the *Land Act 1928* the licensee shall notify, on completion, that such improvements have been made; otherwise the work will not be recognized.

10. The interest in this licence shall not be transferred without the consent of the Minister, and the payment of a fee of Ten shillings.

11. The licence shall be liable to forfeiture if the licensee commit a breach of or neglect to comply with these conditions.

12. The publication of a notice in the *Government Gazette*, purporting to declare that the Governor or Administrator, with the advice aforesaid, has forfeited this licence, shall be conclusive evidence that the licence is forfeited.

13. The ring-barking of the timber upon the land by the licensee is forbidden, and he shall not be entitled to destroy or cut and take away any such timber.

14. Free access to water shall be kept open at all times for travelling or other stock and for persons desiring to take water for domestic purposes.

15. The licensee shall destroy all noxious weeds on the land, and on the half-width of the adjoining roads, and shall be responsible for the destruction of noxious weeds under the *Vermin and Noxious Weeds Act 1928* in like manner as holders of freehold lands.

16. The licensee shall keep the land free from vermin, and should he fail to do so, the licence shall be liable to forfeiture.

17. This licence is issued subject to the right of saw-millers to graze on this area such horses and bullocks as are actually used in connexion with their licensed operations on this land.

18. The licensee shall thoroughly and effectively protect the land within the boundaries of his licensed area from fire, and shall extinguish any fire which may break out on such area or may spread to it. In the event of the area being damaged by fire, the licence may be forfeited, unless the licensee satisfy the Minister that neither he, directly, or indirectly, nor his workmen or servants, were in any way responsible for such fire.

19. The licensee shall not interfere in any way with any survey marks on the land hereby licensed.

20. The licensee shall pay shire rates and all other charges for the period of occupation.

#### SPECIAL CONDITIONS.

1. The period of occupation will be for fourteen (14) months from 1st August, 1940, to 30th September, 1941, with the right of renewal annually for a further period as stated.

2. The rent for the full period—for which the licence will be issued, and the fee for licence—must accompany the tender, otherwise the offer of the next highest tenderer who complies with this condition may be accepted.

3. Separate tenders must be lodged for each block.

4. Tenders to be addressed to the Secretary for Lands (Tender-box), Melbourne.

5. The highest or any tender not necessarily accepted.

6. Tenderers must give their full name, occupation, and ordinary postal address.

7. The areas are given as more or less, and all appropriated, alienated, or licensed lands (if any) within the boundaries are excluded.

8. Where permission to fence has been granted, the outgoing tenant has the option to remove any existing fencing owned by him within one month, or he may arrange with the incoming tenant to pay for it in accordance with the provisions of section 124, *Land Act 1928*.

This does not apply to cases where the land was the subject of an expired Grazing Area Lease. In all such cases, the ingoing tenant will be held responsible for the care and maintenance of any improvements.

In addition to the foregoing conditions the following will apply to lot 10 only:—

The Minister may grant permission to cultivate.

No advances will be made by the Board of Land and Works with respect to these areas.

Existing improvements, including clearing, to be maintained to the satisfaction of the Minister.

Any allotment or allotments at present occupied within the boundaries of the proposed grazing licence will be included, when vacant, and shall be accepted by the licensee at a rental equal to the average price per acre he will be paying for his original licence.

The Board of Land and Works reserves the right to sell or remove from each lot the surplus houses or other buildings not required for the reasonable working of the areas.

The Minister may grant permission to the licensee to remove any internal fencing to complete the boundary fences.

NOTE.—No provision has been made for the supply of water to these five areas; consequently each licensee will be required to make his own arrangements.

Plans can be seen and information may be obtained in this office.

Section 121, *Land Act* 1928, provides—

1. Where a licensee under section 121 of the *Land Act* 1928 has, with the consent of the Minister, enclosed with a substantial fence the land which is the subject of his licence, he may impound any cattle, sheep, or other animals found trespassing thereon.

2. Where the licensee holds land under the said section which is unfenced, he may, in any court of competent jurisdiction, sue the owner of any cattle, sheep, or other animals for damages arising from trespass by such cattle, sheep, or other animals.
