## Water Rate.

4. All rateable property within the area now supplied or hereafter to be supplied with water shall be liable, for such rate as the Council may from time to time, by special order, provide.

4A. For all water supplied by measure by the Council of the Shire of Eltham, and distributed within the said area, a charge of One shilling per 1,000 gallons shall be paid, and a similar charge of One shilling per 1,000 gallons for all water supplied by the Council in connexion with or in respect to any and all rateable property, lands, or tenements in excess of the minimum quantity to be charged as hereinafter provided. The minimum quantity of water to be charged for by measurement in respect of any property, lands, and tenements within the said area shall be the quantity which at One shilling per 1,000 gallons will produce an amount equal to the amount of water rate of One shilling and three pence in the pound or such other amount as may be fixed from time to time by the Council by special order of the net annual value of the said property, lands, or tenements, if so supplied otherwise than by measure.

4B. All charges for water, including the said excess water over the said minimum quantity, and all sums due to the Council under the immediately last preceding clause 4A, shall be paid by and be recoverable from the person requiring, receiving, or using the said water. All such charges and sums due to the Council by any person shall be paid on demand by the Council or its collector.

## Consent of Engineer.

5. In every case in which it is necessary to obtain the consent, permission, or approval of the Engineer before doing any act or commencing any work, such consent must be asked for by notice, in writing, addressed to the Secretary, and be delivered to such Secretary at the office of the Council of such length of time as is required by this By-law, and in no case less than seven clear days prior to the time proposed for the doing of such act or the commencement of such work, and such notice must state clearly the act proposed to be done or work to be commenced, and such act shall not be done or work be commenced save upon the Engineer's consent, in writing, and then only subject to and in accordance with such directions or conditions as shall be therein specified.

6. Every person supplied with or using water for private water troughs, steam boilers, engines, building purposes, brickwork, concrete, masonry, syphons, hydraulic power blasts, watering of horses, cattle or other stock, glass-washing machines, cooling windows, washing or cleaning motor or other vehicles, watering gardens, yards, pathways, or drives, or for any trade, industry, boarding house, or business, shall be supplied by measure.

The amounts to be charged for the supply of water by measure shall be at the rate of One shilling per 1,000 gallons.

7. The Council may by notice, in writing, direct any person—

- (a) being a consumer supplied with water, whether for domestic purposes solely or not;
- (b) supplied with or desiring to be supplied with water;
- (c) whose premises are directly or indirectly connected with the mains or pipes of the Board, or are about to be so connected, to be supplied by measure, and to fix a meter in a position or place to be approved of by the Engineer to register the quantity of water so supplied.

Any person so directed who shall not, within fourteen days after service of such notice, duly and properly fix a meter, shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding One pound for each day after notice of the offence from the Council.

#### Meters.

8. (a) No meter shall be affixed until it has been examined, tested, and approved by a duly authorized officer of the Board, and each meter must be capable of registering at least 1,000,000 gallons, and each  $\frac{1}{2}$ -inch,  $\frac{3}{4}$ -inch, or 1-inch meter must be capable of registering any flow not less than 10, 15, or 30 gallons per hour, respectively.

(b) Every meter must be fixed truly level, with connexions above ground approved by the Engineer, in an easily accessible position and properly protected on a proper foundation of timber, stone, brick, or concrete approved by the Engineer which must, wherever practicable, be level with the surface of the ground, and within six feet of the building line of the property. Where it is impracticable to place the meter above the surface of the ground, it may be fixed in a pit approved by the Engineer, which must be properly constructed and drained. Lead connexions approved by the Engineer must be fixed on each side of the meter, except where the use of two wrought iron quarter bends has been allowed by such officer. The use of elbows will not be permitted. Any meter which does not comply with the provisions of this sub-clause must be made to so comply within seven days after notice of such defect shall have been sent by the Engineer to the owner.

(c) Wherever washers are necessary for meter connexion couplings, leather washers must in all cases be used.

(d) Every meter must be fixed to register the whole of the water supplied to any tenement or premises except where otherwise allowed by the Engineer.

(e) Every person desiring to remove or alter the position of a meter must make written application for consent of the Council to such removal or alteration, and no such removal or alteration shall be effected until the Engineer's permission, in writing, is given.

(f) No work in connexion with the fixing, removal, or alteration of a meter shall be done by any person other than a licensed plumber.

9. No person shall construct, place, stack, store, or permit to be constructed, placed, stacked, or stored any building, erection, materials, or goods over or upon any meter through which water is supplied by the Board, or do or permit anything which shall prevent or interfere with the inspection at any time by any officer of the Council of any such meter. Any person who neglects or refuses on notice from the Council to remove any such obstruction or impediment to inspection shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council. The Council may by notice, in writing, direct the removal of any meter to a position approved by the Engineer free from obstruction or impediment to inspection at any time by any officer of the Council of any such meter. Any person who neglects or refuses to comply with such notice shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council.

10. The Council may, if it so thinks fit, but not otherwise, let for hire water meters, the rent for which, if inferential meters, shall be at the rate per annum of—

For  $\frac{1}{2}$ -inch meter, Five shillings.

For  $\frac{3}{4}$ -inch meter, Six shillings.

For 1-inch meter, Eight shillings.

For 1 $\frac{1}{2}$ -inch meter, Ten shillings and six pence.

For 2-inch meter, Fourteen shillings.

Such rent shall be exclusive of and in addition to the amount of rate chargeable for the recorded consumption of water, and shall be due and must be paid quarterly in advance on the first day of the months of January, April, July, and October in every year, the first payment to date and be made as from the commencement of the then current quarter.

Every meter must be fixed by a licensed plumber at the cost of the owner or hirer on his premises in the position directed by the Engineer.

11. (a) Every hired meter must be kept in repair by and at the cost of the Board except in case of receiving external injury, in which case the hirer must bear the cost of repair.

(b) Every private meter shall be kept in repair by and at the cost of the owner.

(c) If any meter in use ceases to register or is reported as out of repair or registering inaccurately, the Council will estimate and charge for the water consumed during the period such meter is not working in order and until it is repaired and refixed—

(1) by taking an average of the quantity used during the previous quarter or during the corresponding period of the previous year; or

(2) on the basis of subsequent consumption after repairing; or the Council may insert a check meter on the service pipe and charge upon estimate from the registering thereof.

(d) In the event of the hirer being dissatisfied with the registering of a hired meter, he may by notice, in writing, require the Council to cause such meter to be removed and tested, and together with such notice, shall forward a sum of One pound which, if the meter is found to register correctly, shall be applied in paying the cost of removing, testing, and replacing such meter, and the balance, if any, shall be returned to him, but if such meter is found to fail to register incorrectly, such meter shall be repaired and replaced or another meter shall be placed instead of it at cost of the Council, and the amount deposited by the hirer shall be returned to him. In the case of a private meter the owner must employ, at his expense, a licensed plumber to remove and submit the meter for test by the Council.

(e) Every meter removed through being out of order must be repaired, adjusted, and submitted for test, and refixed with the least possible delay by a licensed plumber employed for the purpose. For any unnecessary delay in refixing the meter, such licensed plumber shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds or suspension or cancellation of his licence.

(f) In every case of fixing and refixing a 2-inch meter or meter of larger size, provision must be made for testing the working of the meter in position by the affixing of a stop-tap ferrule between the stop-tap and the meter. No branches are to be taken off between the stop-tap or valve and the meter. The sizes of stop-tap ferrules must be as follows:—

For 2-inch and 3-inch meters— $\frac{3}{4}$ -inch.

For 4-inch meters—1-inch.

For meters larger than 4-inch—1 $\frac{1}{2}$ -inch.

12. Any person hiring a meter from the Council who shall leave the premises on which such meter is fixed without having previously given, in writing, at least six days' notice to the Council of his intention to leave the premises, shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds.

13. Any meter fixed prior to this By-law coming into operation shall, if removed for any purposes whatever, be refixed in manner and position in strict accordance with the provisions of this By-law.

14. Such meters, instruments, pipes, and apparatus shall not be subject to distress for rent of the premises where the same are used, or be attached or taken in execution under any process of any Court of law or equity, or in pursuance of any sequestration or order in insolvency or other legal proceedings against or affecting the consumers of water or the occupier of the premises or other the person in whose possession the meters, pipes, instruments, and apparatus may be.

15. If any repairs to the meter are required such person shall immediately give notice to the Council, and if he fails to give such notice, he shall be liable to a penalty of not more than Five pounds. Before any repairs are effected a registration of the quantity of water used shall be taken by the Engineer or other proper officer of the Council.

16. If any person refuses or delays to have the meter provided by him properly repaired and put in correct working order after having been required by the Engineer so to do, the Council may shut off the supply of water from the premises of such person either by closing or cutting the service pipe or otherwise until such meter has been properly repaired and certified by the Engineer as being in proper working order.

17. Any plumber or other person who fixes or refixes any meter upon any premises supplied with water, without having first obtained a certificate from the Board that the said meter has been examined and found in correct working order, shall be liable to a penalty of not more than Five pounds.

#### Connexion with New Mains.

18. Where a pipe for the supply of water has been laid by the Board in any street or part thereof the owner of any tenement abutting on such street or part thereof whose premises are being supplied directly or indirectly with water from some other pipe laid in a street or part of a street not abutting on the said tenement shall, within two months after written notice from the Council, cause a proper pipe and stop-taps to be laid so as to convey a supply of water within such tenement from the pipe laid in the street or part thereof upon which his said tenement abuts, and shall disconnect and plug such other pipe supplying his premises as aforesaid, and shall also, if ordered in writing by the Council so to do, plug the main to which such other pipe is attached. Every person guilty of any breach of this clause shall be liable for each such offence to a penalty not exceeding Five pounds, and in the event of continuing the offence, to a further penalty not exceeding One pound for each day after notice of the offence from the Council.

*Tappings and Services.*

19. (a) All work, connexions, fitting apparatus, and material in connexion with the supply of water from the pipes of the Board must be in strict accordance with the provisions of this By-law, and where any service existing at the time of the coming into operation of this By-law, and supplying water from the pipes of the Board, or any fitting or apparatus connected therewith, is not in accordance with the provisions of this By-law, all renewals, alterations, or replacements thereof or thereto must be effected in strict accordance with the provisions of this By-law.

(b) Ordinary connexions with sub-mains must be made with proper stop-cock ferrules to which for iron services a length of not less than 3 feet of lead pipe must be attached, or alternatively, a stop-tap ferrule with standard-tested brass tail piece screwed for wrought-iron pipe may be used in conjunction with a galvanized wrought-iron right-angle bend in cases where it may be desired, and if no objection is offered by the Engineer. One service pipe only for domestic supply to each tenement will be permitted. For tenements rated at Twenty pounds per annum or under, the bore of such service pipe must not exceed  $\frac{1}{2}$ -inch; and for tenement rated at over Twenty pounds per annum, the bore of such service pipe must not exceed  $\frac{3}{4}$ -inch unless permission for a larger service has been received, in writing, from the Engineer, and the supply is taken through a meter; and no such larger service shall exceed 1-inch in diameter unless the average number of persons residing in the tenement is more than twenty-five, or the tenement is rated at not less than One hundred and fifty pounds per annum, nor shall it exceed 1 $\frac{1}{2}$ -inch in diameter unless the average number of persons residing in the tenement is more than One hundred, or the tenement is rated at not less than Two hundred and fifty pounds per annum.

(c) The maximum tapping that will be allowed without clip for each size of cast-iron main is as follows:—

- For 3-inch and 4-inch pipes,  $\frac{1}{2}$ -inch tapping.
- For 5-inch, 6-inch, and 7-inch pipes, 1-inch tapping.
- For 8-inch pipes, 1 $\frac{1}{2}$ -inch tapping.
- For 9-inch pipes, 1 $\frac{3}{4}$ -inch tapping.
- Over 9-inch pipes, 2-inch tapping.

A clip must be used for tappings to all pipes other than cast iron, except where otherwise permitted by the Engineer.

(d) A branch must be inserted for all connexions of 2-inch diameter or over to mains of 5-inch diameter or less, and for all connexions of 3-inch diameter or over to mains of 6-inch diameter or over. All such branches must be of pattern and material approved by and be fixed only in accordance with the directions of the Engineer.

(e) All connexions with lead and iron pipes must be made with brass union couplings.

20. A high-pressure screw-down stop-tap, properly secured, must be fixed on each water service in one of the following positions:—

- (a) Between the main and the street alignment, and covered with an approved cast-iron box;
- (b) where a meter is fixed, between the inlet bends to the meter; or
- (c) where a meter is not fixed, on the service pipe at no greater distance than 1 foot inside the street alignment.

If the said stop-tap be fixed either between the inlet bends of the meter or on the service pipe inside the street alignment the owner shall, if required by the Board, and upon receiving notice, immediately fix an additional stop-tap and cover on the water service between the main and the street alignment.

Where mains are under wood blocks, concrete, or other special pavements, an approved iron box must be fixed over the stop-tap ferrule in the main.

Except where otherwise permitted by the Engineer, every stop-tap and stop-tap ferrule must be opposite the tenement supplied and in one line at right angles to the main on which such stop-tap ferrule is fixed. Every service which does not enter the building line of the tenement supplied at a point opposite to the main to which such service is connected must be provided with two high-pressure screw-down stop-taps and approved cast-iron covers, one of which must be fixed opposite the stop-tap ferrule on the main, and the other in a position approved by the Engineer immediately outside the building line where the service enters the tenement.

21. All joints connecting lead pipes must be "wiped" joints, and in no case will "bolt" or "copper bit" or "blown" joints be allowed on water service pipes either in the interior or on the exterior of any buildings or tenement. Any licensed plumber who by himself or his workmen commits a breach of this clause shall be guilty of an offence, and shall be liable to suspension or cancellation of his licence.

22. (a) Except with the permission, in writing, of the Engineer, not more than one tenement shall be supplied from a single water service.

(b) The Engineer may, if he thinks fit, give permission to arrange in special cases that the water supply to more than one tenement may pass from the water main into a single pipe (herein called "trunk service") which must be laid in a street and have branch piping to each tenement, and on each such branch there must be a stop tap fixed in a public thoroughfare, but in no case shall branches be fixed in excess of the number or of the diameter proportioned to the trunk service set forth in the subjoined table, namely:—

Diameter of Trunk Service.	No. of 1-in. Branches only.	No. of $\frac{3}{4}$ -in. Branches only.	No. of $\frac{1}{2}$ -in. Branches only.
$\frac{1}{2}$ -inch	—	—	2
1-inch	—	2	or 5
1 $\frac{1}{2}$ -inch	2	or 4	or 10
1 $\frac{3}{4}$ -inch	3	or 6	or 15
2-inch	6	or 12	or 30

(c) In any thoroughfare every service pipe must be laid at a depth of at least 1 foot from the surface so as to ensure freedom from damage as far as possible. A service pipe must not be laid longitudinally under a footpath or pitched channel, or in a water channel, unless expressly allowed by the regulations of the local Municipal Council, which are in all cases to be observed.

(d) Whenever any service existing at the time of the coming into operation of this By-law supplies more than one tenement, and such service is not laid in accordance with the provisions of this clause, repair of such service will not be permitted should the repair involve the replacement of more than one pipe length of the service, but the service must be renewed strictly in accordance with the before-mentioned provisions.

(e) Any person offending against the provisions of this clause shall be guilty of an offence, and shall be liable to a penalty not exceeding Two pounds.

23. No extension of a private service will be allowed, except by consent of the Engineer.

In connexion with every application to lay a water service of 2 inches and upwards in diameter, or to alter the position of any such water service, the plumber's notice must be accompanied by a properly dimensioned plan showing the locality of the premises at which the work is to be effected, and the position in which it is intended to lay the pipes, and fix meters, plugs, stop-taps, &c., thereto.

24. Any permission granted by the Engineer to supply a property with water by means of an extension service from a main pipe which does not pass in front of the said property, or from a private service, shall be deemed to be temporary, and shall be liable to revocation at the pleasure of the Engineer.

25. The service pipe from the main being the property of the owner or occupier of the tenement supplied by such service pipe, the occupier (if any) or (if none) the owner shall, upon receiving notice that his service pipe requires repairing, immediately to proceed to repair the same, and he shall be responsible for any loss of water or any damage which is caused by reason of such service pipe being leaky or otherwise out of repair or broken, and in default of so repairing he shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, and in the event of continuing the offence, to a further penalty not exceeding Two pounds for each day after receipt of such notice, and the Council may stop the water from flowing into such tenement either by cutting off the service pipe or otherwise as to the Council may seem fit until the necessary repairs have been effected.

*Waste of Water.*

26. Any person supplied with water by the Council who shall wilfully or negligently allow the same to run to waste shall be guilty of an offence, and shall be liable for each such offence to a penalty not exceeding Five pounds, and in the event of continuing the offence to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council.

*Taking or Supplying Water Without Authority.*

27. Any person receiving water from the Council who, without the written permission of the Engineer, takes or carries away such water from his tenement, or allows any person to take or carry away such water, or sells the same to any other person, shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds.

Any person not having agreed to be supplied by the Council who takes or carries away water from the premises of any other person so supplied, or from any drinking tap, trough, or private or public service pipe, shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds.

*Licensed Plumbers.*

28. (a) No person who is not the holder of a plumber's licence from the Board shall affix any service pipe to any pipe of the Board, or alter, repair, or in any manner interfere with any pipe of the Board or any service pipe, tap, meter, or fitting connected with the pipes of the Board; and any

person who is not the holder of a plumber's licence from the Board affixing, altering, repairing, or in any manner interfering with any such pipe, service pipe, tap, meter, or fitting as aforesaid, shall be guilty of an offence, and shall be liable to a penalty not exceeding Ten pounds.

(b) Plumbers' licences shall be at and during the pleasure of the Board, and be subject to review from time to time, and the Board may at any time suspend or cancel any such licence in the event of the holder thereof being adjudged by the Board to be incompetent, or by himself or his employees committing any breach of the Board's Acts, By-laws, Regulations, or this By-law.

(c) A licence issued in conformity with the provisions of the *Water Act 1928*, or any Act repealed thereby, shall not authorize the holder thereof to do any kind of work connected with the sanitary fittings of houses or the sewerage system.

#### Notices.

29. (a) Any person, whether licensed as aforesaid or not, who opens any ground so as to uncover any pipe or pipes the property of the Board without giving two days' notice to the Council of his intention so to do, or who in any way tampers with or alters any pipe, the property of the Board, without the permission, in writing, of the Engineer being first obtained, or who wilfully or carelessly breaks, injures, or opens any lock, tap, valve, pipe work, or engine, the property of the Board, shall be guilty of an offence, and shall be liable for each such offence to a penalty not exceeding Ten pounds.

(b) Every notice must be signed by the licensed plumber actually engaged in carrying out the works referred to in the notice, or by a licensed plumber employing another plumber to carry out the work under his supervision.

(c) Any licensed plumber signing a notice for work which is not actually done either by himself or by a plumber employed under his supervision, or carrying out work under a notice not signed by himself, shall be guilty of an offence, and shall be liable to suspension or cancellation of his licence.

(d) Any person, whether licensed as aforesaid or not, who lays any pipe to communicate with a pipe of the Board, or who alters, repairs, or replaces pipes or fittings in communication with a pipe of the Board without giving two days' notice of the day and hour when such work is to be carried out, or who makes such communication, alteration, repair, or replacement except under the superintendence and according to the directions of the Engineer, or who lays any leaden or other pipe to communicate with a pipe of the Board of a strength and material not sanctioned by the Engineer, shall be guilty of an offence, and shall be liable for each such offence to a penalty not exceeding Five pounds, and in the event of continuing the offence to a further penalty not exceeding Two pounds for each day after notice of the offence from the Council.

(e) In the case of service communication with a pipe of the Board being made through the intervening medium of a storage tank, the provisions of this clause shall have as full application as if the communication were by direct service.

(f) The giving of two days' notice as aforesaid will only be dispensed with in the event of urgent repairs being required to stop the waste or escape of water, in which case notice must be sent to the Council by the licensed plumber concurrently with or immediately after the execution of such urgent repairs. The penalty of not giving notice as herein required will be as mentioned in sub-clause (d) of this clause.

#### Quality of Materials.

30. No person shall use in connexion with a supply of water of the Council any stop-tap, bib-tap, ball-tap, valve, closet, cistern, service box, bath-tap, or valve, or other fitting which is not of the best quality, tested, stamped, and approved by the Board.

No person shall use any stop or bib taps which are not screw-down, high-pressure taps, made of hard brass or gun-metal, and in every respect of best quality and workmanship, tested, stamped, and approved by the Board.

Lead piping shall be of the following weights:—

Diameter of pipe.	Weight of Pipe per Yard.	Diameter of Pipe.	Weight of Pipe per Yard.
$\frac{1}{2}$ -inch	5 lb.	1-inch	14 $\frac{1}{2}$ lb.
$\frac{3}{4}$ -inch	6 lb.	1 $\frac{1}{2}$ -inch	22 lb.

1-inch	9 lb.	2-inch	45 lb.

Except with the written consent of the Engineer, only galvanized iron piping of approved quality, tested and stamped by the Board, will be allowed for external and internal services. The fixing of lead pipes on water supply to filters will not be permitted, but tin-lined lead pipes or galvanized wrought iron pipes of approved quality must be used.

Notwithstanding anything to the contrary contained in the preceding paragraph, where a water service is to be laid or renewed from a main of the Board in any street, solid-drawn

copper pipes, tested and passed by the Board, may be installed from the main. Such copper pipes shall be of the following diameters and dimensions:—
