PORTLAND SEWERAGE AUTHORITY.

BY-LAW No. 1.—RELATING TO CONSENTS, LICENCES, ETC., ALSO LEVELS, DIMENSIONS, CONSTRUCTION, MAINTENANCE, VENTILATION AND CLEANSING OF SEWERS AND OTHER MATTERS RELATING TO HOUSE CONNEXION WORK.

THE Portland Sewerage Authority, pursuant to and in exercise of the powers and authorities conferred on it by the Sewerage District Acts and of any and every other power or authority in any wise enabling it in that behalf, doth hereby make and prescribe the following By-law, that is to say:—

In the construction and interpretation of this By-law, unless inconsistent with the context or subject-matter—

“Acts” means the Sewerage District Acts and any amendment thereof, and any Act incorporated therein, or amendment of such Acts.

“Anti-siphonage vent” (or “back vent”) means any vent pipe from any individual trap to the open air, or a main or branch vent pipe having for its purpose the prevention of loss of water seal in the trap.

“Approved” means to the approval of the Engineer when referring to workmanship or materials.

“Authority” means the Portland Sewerage Authority.

“Bore,” “diameter,” or “size,” in reference to any pipe, drain, or sewer means the nominal internal diameter thereof, in accordance with accepted trade practice.

“Building” means any building used as a work place, residence, place of business, place of amusement, or place of human habitation, or for the storage of food intended for human consumption, but does not include outbuildings unless such are used for any of the above purposes.

“Combined pipe system” means that type of plumbing installation in which disconnector traps are omitted and both soil and waste pipes are connected directly to the drain or to a common pipe taking both soil and waste discharges, and in which a common system of venting is used for all classes of pipe.

“Combined waste pipe” means any pipe which receives the discharges from both soil and waste fixtures and conveys the same to the drain. Combined waste pipes are connected directly to the drain and are used only in connexion with the “combined pipe system.”

“Disconnector trap” means a trap for isolating or disconnecting waste pipes from the house drain and soil pipes and providing inlet ventilation to the waste pipe or pipes discharging into it.

“Drain” means any drain used for the drainage of one building only or of premises within the same curtilage and includes any drain for draining any group or block of houses by a combined operation under the order of the Authority.

“Educt vent” means an opening or pipe for the exit of air from and the induction of draught in a soil pipe, waste pipe, or house drain.

“Engineer” means the Engineer of the Authority, and shall also include any officer or person appointed by the Authority for the purpose of discharging the duties or exercising the powers of the Engineer.

“External closet” means any sanitary convenience which is not entered directly from nor has an opening into any building: direct access being had to the closet from the open air.

“Fittings” mean all apparatus or appliances, together with their necessary appurtenances and connexions, for use in connexion with the plumbing or drainage system of any property, with the exception of fixtures and straight piping.

For the purpose of computing fees payable under this By-law “Fitting” includes any sanitary or plumbing fixture or each piece of equipment which is connected to or discharges its waste water through a waste outlet or to a common outlet.

“Fixtures” means all apparatus or appliances, together with their necessary appurtenances and connexions, which may be attached to the plumbing or drainage system of any property, and which are intended for the collection or retention of any wastes or waste waters for ultimate discharge into the sewerage system.

“Flat” means a suite of rooms used, or intended or adapted for use, as a separate habitation and comprised in a building containing one or more similar suites.

“Induct vent” means an opening or pipe for the admission of air to a soil pipe, waste pipe, or house drain.

“Interceptor trap” (or “boundary trap”) means a trap for preventing the passage of air or gases from the sewer to the house drain at some point between the sewer and the lowest inlet to the house drain.

“Internal closet” means any closet which is entered from or has an opening into, any building.

“Occupier” means the person for the time being in actual or constructive occupation of the premises.

“Owner” includes the person for the time being who receives or is entitled to receive the rent of the lands or premises in connexion with which the word is used, whether on his own account or as an agent of or as trustee

for any other person, or who if such lands or premises were let to a tenant at a rack rent would be entitled to receive the rack rent from the occupier thereof.

“Premises” includes any house and any building whatsoever and any part of any house or building and any garden, stable yard or offices used together or in connexion with any house or building and every part thereof.

“Responsible officer” means any officer or his deputy or person authorized by the Authority to act as its representative in the particular matter to which the reference is made.

“Sewer” means any sewer or underground conduit or pipe which is not a drain within the meaning of the Acts and any drain or portion of a drain laid between a sewer and the boundary line of any allotment or curtilage.

“Sewerage district” means any portion of the Borough of Portland to which the Acts apply and which under any Acts is proclaimed the sewerage district of the Authority, and includes any area which is added to and forms part of such sewerage district.

“Sewered property” means, as well as any sewered land or premises, any land or premises which have been declared by a general notice given by the Authority under the Acts to be deemed and taken to be a sewered property within the meaning of the Acts.

“Sewerage system” includes all sewers, fittings, fixtures, appliances, plant, machinery, and any other sewerage works vested in the Authority.

“Slop sink” means any fixture other than a closet pan or urinal used for the discharge of soil or urine waters and provided with a flushing apparatus in accordance with Division 33 of this By-law.

“Soil pipe” means any pipe which conveys the discharge from water closets, slop sinks, or urinals to the house drain.

“Stack” means any vertical line of soil, waste or vent piping with its offsets, if any.

“Trade waste” means the liquid refuse from any business trade or manufacturing property, other than domestic sewage, storm water, or unpolluted water.

“Trap” means any fitting designed to retain a quantity of water to arrest the passage of air or gases through such fitting.

“Waste pipe” means any pipe which conveys the discharge from any fixture (except water closets, slop sinks, or urinals), to a disconnector trap.

“Water seal” or “trap seal” means the vertical distance between the dip and the crown weir of a trap.

INTERPRETATION.

In the construction of this By-law the meaning which, in the Acts, is assigned to any word shall be the meaning of the same word where occurring in this By-law, unless inconsistent with the subject-matter or context.

PART 1.—GENERAL REGULATIONS.

DIVISION 1.—APPLICATIONS FOR CONSENTS, ETC.

Section 1.—Application for the Authority’s consent to connect with the sewerage system, or to do plumbing and drainage work connected therewith, must be made in writing by the owner of the property to be so connected, or by his authorized agent.

Section 2.—Such application shall give the precise location of the property, the name of the owner, and the name of the person employed to do the work, and shall be in the form prescribed by the Authority. For any wilful misrepresentation in such application the owner or authorized agent as aforesaid shall be guilty of an offence against this By-law. No consent given by the Authority shall be deemed to authorize anything not stated in the application nor to confer or grant the right to lay a drain through any land intervening between the sewer of the Authority and the land proposed to be connected, and every owner or agent applying for the Authority’s consent shall satisfy himself as to his legal right to drain through such intervening land and he shall be solely responsible for any trespass or damage thereon or thereto.

Section 3.—Consents to make connexions with the sewerage system will be issued only when the plumbing and draining in the property to be connected is planned to be made in accordance with the rules for plumbing and draining hereinafter prescribed, and after such plan has been inspected and approved of by the responsible officer appointed by the Authority for the purpose, or, in the case of new buildings, when a proper plan of the plumbing and of the drainage of the building into the branch, of which the Authority shall have fixed the position, has been approved of in writing by the Authority. All connexions with drains or sewers and all plumbing and drainage connexions therewith, shall be made under the direction of the responsible officer of the Authority. No person shall be engaged or employed as a workman in the actual performance of any plumbing or drainage work unless he is the holder of a licence or permit issued by the Authority authorizing him to do such work. Any person who shall at

any time or at any place make up, form, affix, alter, or repair, any fitting, pipe, bend, trap, or other thing connected or intended to be connected with the Authority's sewerage system unless he be the holder of a licence or permit from the Authority authorizing him to do such work shall be liable to a penalty not exceeding Ten pounds.

If any person, whether he is or is not the holder of a Plumber's Licence or Permit from the Authority, alters, removes, or in any way interferes with any drain, fitting, pipe, bend, trap, or other thing, which drain, fitting, pipe, bend, trap, or other thing is connected with the Authority's sewerage system, he shall, unless he has previously received consent, in accordance with the provisions of this section for the execution of such work, and such consent is in full force and effect, be guilty of a breach of this By-law and shall be liable to a penalty of not more than Ten pounds.

Section 4.—Where the sanction, permission, authority, consent, approval, satisfaction, order, direction, opinion, indication, or notice of, or from the Authority is necessary, whether specified in writing or otherwise, with regard to any act, matter, or thing mentioned in the By-law, the same may be given by and under the hand of the chairman of the Authority, or of the responsible officer, personally or through an inspection officer appointed under him, who severally shall be competent to give the same and be authorized on behalf of the Authority to prescribe any conditions attaching thereto, and subject to and in accordance with which only the same shall be deemed to have been given.

Section 5.—If, after the receipt of a written application from the owner for modification or alteration of the By-law, the Authority shall be of the opinion that a compliance with any of the provisions of this By-law would in any particular case be vexatious or be needless in the interest of public health, it shall be lawful for the Authority, by resolution, to dispense with or forbid such compliance in whole or in part as it shall think fit, or to authorize or direct such a modification or alteration of such provisions as shall, in its opinion, most nearly adapt the principle of those provisions to the particular case. It shall be unlawful to comply with any provision, or part of any provision, with which compliance shall have been forbidden, or to act contrary to or otherwise than as directed by such modification or alteration.

Notwithstanding the above stipulation no technical provision or requirement of the By-law shall be modified or waived except on the written recommendation of the Engineer.

DIVISION 2.—VARIATION OF BY-LAW.

Section 6.—Any permission for or approval of any variation of any of the provisions of this By-law which may be given by the Authority will be given only before the work in respect of which the variation is proposed has been commenced.

DIVISION 3.—PENALTIES, RECOVERY OF COST OF WORK, ETC.

Section 7.—Where anything is by this By-law directed to be done or forbidden to be done, or where any power is given to the Authority or any of its officers to direct or forbid anything to be done, and such act so directed to be done remains undone, or such act forbidden to be done is done, then, and in every such case, the person making default as to the said direction or prohibition respectively shall be guilty of an offence against this By-law.

Section 8.—Every person guilty of an offence against this By-law, not otherwise specially provided for by or under the Authority hereof, shall be liable for every such offence, besides any costs or expenses which may be incurred in the taking of proceedings against such person guilty of such offence, as well as any costs or expenses which may be incurred in remedying such default, as particularly provided for in this By-law or the Acts, to a penalty not exceeding Ten pounds, and to a further penalty of One pound for each day during which such offence is continued by such person after notice of the offence shall have been given by the Authority to him; and such penalty shall be recoverable notwithstanding that the Authority may not have chosen to exercise any power given to it by the Acts or by this By-law to remedy such default.

DIVISION 4.—HOUSE DRAINAGE PLANS—ALTERATIONS.

Section 9.—Copies of the Authority's plans and/or designs of individual house drainage will be furnished by the Authority upon application and payment for the same and subject to such conditions as follows:—

- (a) (i) Where the Authority designs the work and has same carried out for the owner, a charge shall be made equal to Ten per centum (10 per cent.) on the capital cost of the work for designing, specifying, letting contract, and supervising all details in connexion with such work.
- (ii) Consent for additions to and/or amendments of approved plans or to works previously approved will be made only on the application of the owner or his authorized agent, and on payment of a fee of Five shillings (5s.).

(b) When the Authority designs the work for the owner and the owner then carries out his own work—

- (i) For plan of design a fee of Twenty shillings (20s.), plus Two shillings and six pence (2s. 6d.) for each fitting.
- (ii) For making and/or examining any alterations or additions to a plan previously issued or approved by the Engineer, a fee of Five shillings (5s.) shall be made by the Authority for each fitting or drain altered or added.
- (iii) For inspecting drains and testing by the Authority's inspector a fee of Ten shillings (10s.), plus Five shillings (5s.) for each additional inspection necessary owing to faulty work.
- (iv) For inspecting plumbing by the Authority's inspector a fee of Ten shillings (10s.) for each ten (10) fittings or part of ten fittings in the installation, plus Five shillings (5s.) for each additional inspection necessary owing to faulty work.
- (v) For the final inspection by the Authority's Engineer and charting the work on the Authority's plans a fee of Ten shillings (10s.) for each ten fittings or part of ten fittings in the installation, plus Five shillings (5s.) for each additional inspection necessary owing to faulty work.
- (vi) The Engineer may during construction of the work order the owner to carry out such additions and/or amendments as may be necessary for the satisfactory completion of the work.

The house connexion will not be passed until the installation together with the amendments ordered have been completed to the Engineer's satisfaction.

(c) Where an owner designs and carries out his own work—

- (i) For the supply of a block plan a fee of Two shillings and six pence (2s. 6d.).
For tenements exceeding 4,000 square feet in ground floor area and/or properties exceeding 2 acres in extent an additional fee of Two shillings and six pence (2s. 6d.) shall be charged for each additional 4,000 square feet or part thereof and/or for each additional 2 acres or part thereof.
- (ii) The owner shall submit for examination a properly drawn design and a typewritten specification. The design and specification shall be supplied to the Authority in triplicate. The work shall not proceed until the owner's design and specification have been approved by the Engineer and the third copy returned to him with the official endorsement.
- (iii) For the examination of the owner's plan of design and specification a fee of Ten shillings (10s.) for each plan of from one to five fittings, plus Two shillings and six pence (2s. 6d.) for every fitting over five.
- (iv) For examining any alterations or additions to a plan previously issued or approved by the Engineer a fee of Two shillings and six pence (2s. 6d.) shall be made by the Authority for each fitting or drain altered or added.
- (v) For inspecting drains and testing by the Authority's inspector a fee of Ten shillings (10s.), plus Five shillings for each additional inspection necessary owing to faulty work.
- (vi) For inspecting plumbing by the Authority's inspector a fee of Ten shillings (10s.) for each ten (10) fittings or part of ten fittings in the installation, plus Five shillings (5s.) for each additional inspection necessary owing to faulty work.
- (vii) For the final inspection by the Authority's Engineer and charting work on the Authority's plans a fee of Ten shillings (10s.) for each ten fittings or part of ten fittings in the installation, plus Five shillings (5s.) for each additional inspection necessary owing to faulty work.
- (viii) The Engineer may during construction of the work order the owner to carry out such additions and/or amendments as may be necessary for the satisfactory completion of the work.

The house connexion will not be passed until the installation together with the amendments ordered have been completed to the Engineer's satisfaction.

DIVISION 5.—MAINTENANCE AND DEFECTIVE WORK.

Section 10.—Any drain pipe, soil pipe, trap, water closet, urinal, sink, or other fitting laid, used, or constructed otherwise than in accordance with this By-law, or which shall in the opinion of the Authority, be or become bad or of defective quality, shall, upon notice in writing from the Authority to the owner or occupier of the property, be by such owner or occupier removed or repaired in the manner determined and within the time fixed by the Authority, and in each case such owner or occupier fails to comply with the requirements of the notice, he shall be liable to prosecution and a penalty for an offence against the Acts, or the Authority may, if it think fit, remove or repair the said defective fitting and charge such owner or occupier of the premises with the cost so incurred, and will proceed for recovery of the same in a manner provided by the said Acts.

DIVISION 6.—LICENCES AND PERMITS.

Section 11.—(1) All plumbing work for sewerage shall be done and carried out only by Licensed Plumbers and/or by the persons in this section 11 hereinafter mentioned, but subject in all things to the conditions and terms of the said section.

(2) The Authority may, if it thinks fit, and subject to the provisions of sub-sections (3), (4), (7), and (8) of this section, issue a Plumber's Licence to any person who is the holder of a Certificate of Competency issued by the Sanitary Plumbers Examination Board of Victoria.

(3) The Authority, before issuing such Plumber's Licence, may require the applicant to satisfy it that he possesses the requisite knowledge of the Laws, By-laws, and Regulations relating to the sewerage system of the Authority, and it shall appoint officers to examine the said applicant as to his knowledge, and, after the consideration of the report thereon of such officers, may refuse to grant such licence, if, in its opinion, the applicant has not the requisite knowledge of such Laws, By-laws, and Regulations.

(4) Every person to whom a Plumber's Licence is to be issued shall, before the Licence is issued to him, sign in a register, to be kept by the Authority, a declaration that he will conform to and comply with the conditions of the Licence hereinafter contained and the By-laws and Regulations of the Authority.

(5) The Authority may, if it thinks fit, and subject to the provisions of sub-sections (7) and (10) of this section, issue a permit to work as a plumber to any person who has passed the practical examination of the Sanitary Plumbers Examination Board of Victoria.

(6) In the event of the holder of a Permit to work as a plumber being granted a Certificate of Competency by the Sanitary Plumbers Examination Board of Victoria, the Authority may issue a Plumber's Licence to him subject to the provisions of sub-sections (3), (4), and (7), of this section and upon his returning his Permit.

(7) The Authority may refuse to grant a Licence or Permit to any person, or may suspend or cancel any Licence or Permit previously granted, if, in its opinion—

- (a) such person has been guilty of an offence against the By-laws and Regulations of the Authority;
- (b) such person has failed to comply with the instructions issued by any responsible officer of the Authority;
- (c) such person at any time or place has so conducted himself as to warrant, in the opinion of the Authority, the refusal, suspension, or cancellation of such Licence or Permit.

(8) On application for renewal, the Authority may renew any such Licence or Permit.

(9) No person, other than a Plumber's Apprentice, Plumber's Improver, the holder of a Permit to work as a Plumber, or the holder of a Plumber's Licence, shall be engaged or employed as a workman in the actual performance of any of the plumbing work for sewerage.

(10) No such Plumber's Apprentice, Plumber's Improver, or holder of a Permit to work as a Plumber, shall be permitted to work in the actual performance of, or to do, any plumbing work for sewerage except under the supervision of a Licensed Plumber, who shall be responsible for such work and for compliance with the By-laws and Regulations of the Authority in respect thereof.

(11) "*Drainer's Licence*."—The Authority may issue a "Drainer's Licence" to any person who is to the satisfaction of the Authority competent to carry out the work of drainer, and for that purpose may require such person to satisfy it as to his competency by passing an examination conducted by the Engineer and such other examiners as the Authority may appoint or in such other manner as the Authority may determine, or in any particular case may decide that he has a thorough knowledge of the following subjects:—

Plans.—The reading of plans and the meaning of scales and of elevation, plan, and section drawing.

Levelling.—The use of the straight-edge, spirit-level, and boning rods.

Excavation, Timbering, and Refilling.—The use of tools for excavation, the protection of trenches by timbering, the treatment of different soils, tunnelling, and tunnel timbering, precautions near buildings, and manners of refilling trenches and tunnels.

Drain-laying.—The preparation of the bottom of trenches, the laying and jointing of stoneware, cement, concrete, and cast-iron pipes, cement, bitumen, lead, and self-fitting joints, laying of drains under houses and in soft ground, and the depth of drains below surface.

Drainage Details.—Junctions to sewers, diminishing of sizes of pipes, yard gullies, grease and other traps, inspection openings, and cast-iron drainage details.

Drainage Works.—Knowledge of the provisions of this By-law and of the Acts, insofar as same relate to the work and duties of drainers in regard to the construction, maintenance, and protection of the sewerage system and the construction and use of drains and drainage traps.

Candidates for Drainers' Licences shall give notice in writing to the Authority of their intention to submit themselves to examination, and this examination shall be at such a time and at such a place as shall be appointed by the Authority. Candidates must provide themselves with their own tools and materials, and pay a fee of 7s. 6d. for each examination.

Section 12.—The conditions upon which all Plumbers' Licences and Permits and Drainers' Licences will be issued are—

- (1) That every Licence and Permit will be subject to suspension or cancellation at the will of the Authority, and that all such Licences or renewals thereof will expire on the 31st day of December next following.
- (2) That every holder of a Licence from the Authority who shall have received the consent of the Authority to execute any works in connexion with sewerage or drainage, or who shall (where such consent of the Authority is not required before the execution of any such works) have notified the Authority of his intention to carry out such works—
 - (a) shall obtain permission when necessary for the execution of such works on, over, or through any private property, or any streets, roads, parks, reserves, or other public places or properties; and
 - (b) shall pay any fees demanded by the Municipal Authority for opening any street, road, or thoroughfare, or otherwise in connexion with the work; and
 - (c) shall execute such works in accordance with the provisions of the Acts and of the By-laws made thereunder, and of any special directions or orders given or issued by the Authority or its responsible officer; and
 - (d) shall use materials of good quality only and free from defects; and
 - (e) shall employ only competent operatives or assistants; and
 - (f) shall execute such works in a thorough and tradesman-like manner to the satisfaction of the Authority as expeditiously as practicable, and leave site clean and undefaced; and
 - (g) shall in the execution of such works take such proper and necessary precautions that no accident or damage or unnecessary inconvenience may be directly or indirectly occasioned thereby; and
 - (h) shall restore any part of any street, road, or thoroughfare interfered with by the work to the satisfaction of the Municipal Authority having control thereof upon the completion of the work; and
 - (i) shall restore any other property interfered with by the work to the satisfaction of the responsible officer of the Authority; and
 - (j) shall in all cases notify the responsible officer immediately upon completion of any work in hand, promptly amend any defects therein, and again at once notify the said officer, and subsequently take steps forthwith to secure the certificate of satisfactory completion, and give the same to owner; and
 - (k) shall in no case interfere, remove, cut, or in any way damage any portion of any electrical, gas, water, or telephone installation. When portion of any such installations, including earth wires, connexions, or pipes, interferes with the proper laying of house sewerage plumbing, the plumber shall communicate with the Electrical Engineer, Portland Borough Council, the Gas Manager, Portland Borough Council, or the respective Engineer of the Portland Waterworks Trust, or the Postmaster-General's Department, to arrange for that portion of the electrical, gas, water, or telephone installation to be so located as not to cause further interference; and
 - (l) shall, when so directed by the Authority, make good at his own expense any defect found within twelve months of the date of completing of any such work which, in the opinion of the Engineer is due to faulty workmanship, or defective material.

Section 13.—Prior to the issue of any Licence or Permit the person to whom the same is to be issued shall pay to the Authority the fee named hereunder:—

	s. d.
For every Plumber's Licence	10 0
For every Permit to Work as a plumber ..	7 6
For every Drainer's Licence	7 6
For the Renewal of any Licence	2 6

DIVISION 7.—NEW BUILDINGS, ADDITIONS, ETC.

Section 14.—Every person who shall intend to erect a building on any property within the Sewerage District, or to rebuild or to make any alterations or additions to any such buildings shall, before commencing such work, give to the Authority fourteen (14) days' notice in writing of such intention and obtain a permit from the Authority; and such notice shall be accompanied by plans and sections of such intended buildings, alterations, or additions, showing their positions, dimensions, depths, and levels of foundations, cellars, or basements, all appurtenant walls and fences, the intended lines of drainage, and the boundary of the land, which plans, &c., shall become the property of the Authority.

DIVISION 8.—GENERAL.

Section 15.—Any work or thing in respect of or in connexion with sewerage under the Acts that is not specifically mentioned in this By-law shall be performed in accordance with the directions of the Authority.

PART 2.—GENERAL REGULATIONS.

DIVISION 9.—USE OF SEWERS AND DRAINS—PROHIBITION OF CERTAIN DISCHARGES.

Section 16—Use of Sewers and Drains.—The owner and the occupier of any sewer property shall discharge into the sewerage system (a) all faecal matter, urine, household slops and household liquid refuse from such property, and such other polluted water from stables, washing areas, manure bins, basements, cellars, and roofed yards, and

(b) such trade or manufacturing liquid refuse as the Authority may authorize, subject in each and every case to such conditions as it may impose.

Section 17—Prohibited Discharges.—The deposition or discharge of any of the following substances into any drain is prohibited:—

- (a) Any animal matter other than is specified in section 16, fleshings, wool, hair, dead animal, grease, dust, ashes, rubbish, garbage, offal, vegetable and fruit or their parings, rags, oil, silt, mud, sand, gravel, or like substances, or any other substance which is in the opinion of the Authority or its responsible officer, liable to be injurious to any part of the sewerage system or to employees of the Authority engaged in the operation or maintenance of same.
- (b) Any petrol or other inflammable or explosive substance, whether solid, liquid, or gaseous.
- (c) Any rain, roof, surface, or flood waters, except by special permission of the Authority.
- (d) The contents of any night-soil cart, cesspool, or privy.
- (e) Any liquid, trade waste or other substance which has not been neutralized to the approval of the responsible officer of the Authority, or which is above the temperature of 100 deg. Fahrenheit, or such lower temperature as may be prescribed by the Authority, having regard to the special circumstances of the case.
- (f) Any liquid which contains such percentage of common salt or any other mineral, salt, acid, or gas, as is, in the opinion of the responsible officer of the Authority, injurious to, or liable to form compounds injurious to, any part of the sewerage system or to employees of the Authority engaged in the operation or maintenance of same.

DIVISION 10.—TRADE WASTES.

Section 18—Conditions of Discharge.—No person shall discharge any trade or manufacturing liquid, refuse, or waste into any sewer, unless and until the following conditions are complied with:—

- (a) Application for permission to discharge any such trade wastes shall be made in writing and accompanied by plans and specifications of the work to be done and of the apparatus to be used, and shall include such details concerning the nature of the waste and the quantity and rates of discharge of the proposed effluent as considered necessary by the responsible officer of the Authority.
- (b) The permission of the Authority in writing shall be obtained and an agreement containing a covenant to comply with the By-law and with any further stipulations required by the Authority, shall be executed. The volume of liquid refuse or waste discharged shall, if ordered, be measured and determined by meter or by some other approved means of measurement. The maximum daily aggregate quantity of effluent which may pass from any trade premises into a sewer, the maximum permissible rate of such discharge, the size and capacity of the drain or pipe for conveying such effluent from the trade premises to the sewer, and the hours during which such flow will be permitted shall be determined by the Authority.

(c) All such liquid refuse or waste shall be passed through such settling, screening, and/or neutralizing chambers and/or such other appliances and/or otherwise treated as ordered or approved by the Authority to ensure that the resulting effluents shall comply with the conditions of the agreement.

(d) Every settling, screening, neutralizing, or other chamber, appliance, or apparatus for the treatment of trade wastes in accordance with this By-law shall be cleansed, operated, and maintained by the occupier at his own expense and at such intervals as may be considered necessary by the Authority or its responsible officer to ensure the efficient operation of such chamber, appliance, or apparatus and in no case shall such chamber, appliance, or apparatus be altered without the approval in writing of the Authority first being obtained.

DIVISION 11.—SUB-SOIL WATER.

Section 19.—The discharge of sub-soil water into sewers shall be prohibited except by permission of, and under conditions approved by, the Authority.

DIVISION 12.—INSPECTION TESTS AND MAINTENANCE.

Section 20—Notice.—The owner or his authorized agent, or the plumber, drainer, or contractor, shall give at least 48 hours' notice to the Authority, in writing, of his intention to commence work and of work ready for inspection. All work shall be left uncovered and accessible for examination until inspected and approved.

The contractor carrying out any work shall, within seven (7) days of the completion of such work, file in the office of the Authority on forms furnished for this purpose, a correct statement of the work done and the cost thereof. Such statement shall be countersigned by the responsible officer of the Authority, and a certificate embodying such statement shall be forwarded to the contractor.

Section 21—Inspection.—All drains, wastes, fittings, joints, fixtures, &c., will be inspected by the responsible officer of the Authority to ensure compliance with the By-law and approved plan.

Section 22—Tests.—Drains, whether laid by the Authority's workmen or others, must be thoroughly tested in every case before being passed by the Authority's officers. The responsible officer of the Authority may require the application of the water or smoke test, or such other tests as he may order or approve.

Section 23—Water Test.—The water test may be applied to the drainage and/or plumbing systems and their fittings in their entirety or in sections. It shall be applied by hermetically sealing all openings below the top of the section to be tested. The system shall then be filled with water to a height of 6 feet above the highest point of the section, or, if considered necessary to such additional height as the responsible officer may order, and every joint carefully examined for leaks.

In testing drains the water shall be maintained at this height for a period of fifteen minutes by the addition of a measured quantity of water as required. The amount of water added in the fifteen minutes shall not exceed 2 gallons for every 50 joints of 4-inch drain or sewer, and must not exceed 3 gallons, for every 50 joints of 6-inch drain or sewer, or proportionately for a lesser or greater number of joints.

Section 24—Smoke Test.—The smoke test shall be applied by hermetically sealing all openings into the section to be tested, and forcing into the system thick smoke to a pressure equivalent to 1 inch of water, by means of a smoke test apparatus. Every joint shall then be carefully examined for leaks.

Section 25—Equipment, &c.—The equipment, material, power and labour necessary for the inspection and tests shall be furnished by the contractor, plumber, or drainer.

Section 26—Defective Work.—Any pipes, fittings, fixtures, or other materials or apparatus found to be defective shall be removed and replaced by sound materials or apparatus; and all defective workmanship shall be made good to the satisfaction of the Engineer or his representative, and to comply in all respects with the provisions of the By-laws. Should the contractor fail to replace such defective materials or to make good such defective work within fourteen (14) days of his having been ordered in writing by the Engineer so to do, the work or replacement may be carried out by the Authority at the contractor's expense.

Section 27—Maintenance by Contractor.—Every person who holds a licence from the Authority and who executes any works in connexion with sewerage, drainage, and/or sanitary plumbing, shall make good within fourteen (14) days and at his own expense, when directed by the Engineer so to do, any defects which occur in such works within twelve months of the date of their completion, and which are, in the opinion of the Engineer, attributable to faulty workmanship or materials.

Section 28—Maintenance by Owner or Occupier.—The owner or occupier of every premises shall, at his own expense, maintain in efficient working order and in a clean and hygienic condition all traps, neutralizers, or other appliances installed on such premises. Should the owner or occupier of any premises fail or neglect satisfactorily to maintain and cleanse such appliances, the Authority may, after twenty-four (24) hours' notice in writing, have the necessary work carried out at the expense of the owner or occupier.

DIVISION 13.—MATERIALS AND WORKMANSHIP.

Section 29.—Materials.—All materials, pipes, bends, junctions, fittings, fixtures and apparatus shall be of the best of their respective kinds, sound and free from defects, and shall be approved by the responsible officer.

Section 30.—Testing.—All materials, pipes, bends, junctions, fittings, fixtures, and apparatus shall be submitted for examination and/or test, and shall not be placed in position until passed and stamped by the Authority. Such testing of materials shall be paid for by the person submitting same, whether passed or rejected, and shall be done at such time and place and at such rates, as may from time to time be fixed by the Authority.

Section 31.—Workmanship.—All work shall be executed in a thorough and workmanlike manner and to the satisfaction of the responsible officer.

Section 32.—Precautions.—Adequate precautions shall be adopted by the person carrying out the work to prevent injury to workmen, property, or the public, and the Authority will accept no responsibility for claims for injury arising from the inadequacy of such precautions.

Section 33.—Concrete.—Concrete, unless otherwise ordered, shall consist of 1 part Portland cement, 2 parts clean, sharp sand, and 4 parts hard metal, shingle, or gravel not exceeding 1-in. gauge, and shall be thoroughly mixed with clean water to such consistency as ordered or approved by the Engineer of the Authority.

The cement, sand and aggregate shall be thoroughly mixed and the whole batch completely turned over three times in the dry and turned over again at least three times while the water is being added. If a concrete mixer is used the minimum time of mixing in the machine after all the materials have been added shall be two minutes. All concrete shall be placed within 20 minutes of the time of mixing.

Section 34.—Cement Mortar.—Cement mortar, unless otherwise ordered, shall consist of 1 part Portland cement and 2 parts clean sharp sand, properly mixed with an approved proportion of clean water. Cement mortar shall be used within 20 minutes of the time of mixing. Re-tempering is forbidden.

PART 3.—DRAINAGE.

DIVISION 14.—DRAINAGE, GENERAL.

Section 35.—(1) Every premises shall be separately drained unless a combined drain shall have been ordered or approved by the Authority. Owners desiring to have the drainage of their properties combined must sign a request for a combined drain, and obtain the approval of the Authority. In any case in which it appears to the Authority that any properties may be drained more advantageously in combination than separately the Authority may order that those properties be drained by a combined operation.

(2) In any case where a combined drain serves two or more properties the Authority, with the consent of the owners of the properties served by such combined drain, may take over such combined drain, and thereafter such combined drain shall be and remain a sewer of the Authority.

(3) In every case of a combined drain the Authority will determine as between the respective owners and occupiers of the properties drained thereby, the proportions in which the cost of such combined drain shall be paid. In every case of the occurrence of an obstruction in a combined drain the Authority will also determine by whom and in what proportion the cost of removing such obstruction and/or effecting any necessary repairs to drains shall be paid.

(4) Owners and occupiers of premises are responsible for clearing stoppages in drains within their premises, or between their premises and the sewers into which the branches lead, but must employ only licensed plumbers or drainers to clear same.

(5) Before a licensed plumber or drainer commences to clear a stoppage in a drain he must notify the Authority in writing of the time when he intends to clear the stoppage, so that the Authority's proper officer may attend and pass the work in accordance with the provisions of the Acts.

Section 36.—Size of Drains.—Every drain shall be of adequate size for the drainage of the property to be served, in accordance with the requirements of section 88, with a minimum diameter of 4 inches.

Section 37.—Materials.—All drain pipes, bends, junctions, and fittings used shall be of glazed stoneware, concrete, cast iron or other approved material, provided that the responsible officer of the Authority may prohibit the use of any of the above-mentioned where the circumstances or conditions are considered unfavorable.

Section 38.—Cast-iron Pipes.—Cast-iron drainage pipes and their fittings shall comply with the standard approved by the Authority for cast-iron pipes and their fittings of similar diameter, but in the event of the issue by the Standards Association of Australia of an Australian Standard Specification for such pipes, and of the acceptance of such Standard Specification by the Authority, all cast-iron pipes and fittings shall be in accordance with this Standard Specification from a date to be fixed by the Authority.

Section 39.—Interceptor Traps.—Where directed by the Authority, but not otherwise, an interceptor trap shall be fixed in the drain laid from any property to the sewer. Such trap shall be fixed as near as practicable to the boundary, and wherever practicable shall be within the boundaries of the property. The interceptor trap shall be provided with an inspection cap on the sewer side of the trap. If ordered, an approved manhole shall be provided for the trap.

Section 40.—Inspection Chambers.—All drains shall, wherever considered necessary by the Authority, join in an inspection chamber at least 3 feet long by 2 feet wide. The portions of the drains crossing the floor of the inspection chamber shall be connected either in a straight line or by curved junctions in the floor of the chamber. All inspection chambers shall be cement rendered (two parts sand and one part cement) to a smooth surface, and made watertight. The inspection chamber must be provided with a closed cover of approved type and special ventilation must also be provided if considered necessary by the Engineer.

Section 41.—Inspection Openings.—Every line of drain shall be provided with an inspection opening inside and within 5 feet of the boundary line, at each junction not provided with an inspection chamber, at each change of direction, at each fixture, and nowhere greater than 30-foot intervals, and in paved areas these shall, if considered necessary by the responsible officer of the Authority, be brought to the surface and furnished with approved airtight covers. The area of an inspection opening shall not be less than the area of the drain. Inspection openings, inspection junctions, or branches are to be set in an approved manner to facilitate rodding.

Section 42.—Grating.—Every inlet to a drain other than from a water closet shall be effectively protected by an approved grating of ample area. The aggregate area of the apertures in any grating covering a ventilation opening shall be not less than the sectional area of the pipe or drain ventilated by such grating. Every opening for ventilation shall be kept perfectly free at all times from obstruction.

Section 43.—Drain Openings Not in Use.—The ends of all house drains and junctions not immediately connected with the plumbing fixtures and all inspection openings shall be securely closed with watertight imperishable materials. If the drain is of stoneware or cement concrete, a stoneware, cement concrete, or cast-iron disk must be cemented in; if wrought iron, a plug must be screwed on the end; if cast iron, a cast-iron plug must be caulked in with lead.

Section 44.—Replacing or Inserting Pipes.—Where it becomes necessary to remove a pipe to clear a stoppage or to insert a pipe or branch in an existing drain, such pipe so removed shall be replaced by an inspection pipe or inspection junction of the same length by one of the following methods under the direction of a responsible officer.

- (a) The top half of the socket of the new pipe and of the existing down-stream pipe may be removed, but the bottom half shall always be left intact and the joints surrounded with concrete not less than 3-in. thick.
- (b) An approved split pipe with double collar surrounded with concrete 3-in. thick may be used.
- (c) A length of not less than three pipes may be removed, the centre pipe replaced by an inspection pipe, and the pipes dropped back into place without springing or cutting.

Junctions in existing metal pipes shall not be made unless an approved closure pipe is used in each case. Springing pipes into position shall not be resorted to or allowed.

Section 45.—Use of Concrete.—Portland cement concrete brought to a smooth surface must be used in each of the following cases:—

- (i) Round and under gully basins where also the exposed surfaces shall be rendered in cement mortar, consisting of two parts sand, one part cement.
- (ii) Round the tops of vent pipe sockets and for 6 inches below the surface of the ground.
- (iii) Round the tops of disconnector traps and for 6 inches below the surface of the ground.
- (iv) Under and around bends rising vertically, off oblique branches, and under all drainage traps.

DIVISION 15.—BASEMENT AND CELLAR DRAINAGE.

Section 46.—Fixtures.—No water-closet, urinal, and/or other fixture shall be placed in any cellar or basement, or on any floor below ground level, unless by consent of the Authority, and then only when, in the opinion of the responsible officer, other provision cannot be made. The owner shall submit such plans and/or other information as the responsible officer may require, and shall undertake in writing to accept all risk of

damage that may occur. If satisfied that the ventilation and lighting provided are in accordance with this By-law, and all other conditions have been complied with, the Authority may give its consent; provided always that such consent may be revoked by the Authority at any time, and that upon fourteen (14) days' notice of revocation such fixture shall be abolished by the owner.

Section 47—Risk of Back Flow.—Where such cellar, basement, or floor below ground level is at such a level as may, in the opinion of the responsible officer, involve risk of back flow in the event of the sewer becoming overcharged, the sewage from all fixtures therein shall be raised by ejector, syphon, or other approved mechanical appliance to such height as ordered and discharged into the sewer as and where directed.

Section 48—Seepage Drains.—In no case shall seepage drains from cellars, basements, or any floor below ground level be discharged into a sewer without the consent of the Authority. Where such discharge is permitted, the seepage shall be raised by ejector, syphon, or other approved mechanical appliance to such height as ordered, and discharged into the sewer or elsewhere as and where directed.

DIVISION 16.—POLLUTED AREAS.

Section 49—Connexion.—The Authority may, if it thinks fit, authorize or require that any of the following places, namely, stables, cow sheds, dairies, market places, abattoirs, areas for washing vehicles, and any other polluted place, be connected with the sewers, subject to such conditions as the Authority may impose.

Section 50—Conditions Governing Connexion.—No such connexion shall be made unless the following conditions have been complied with:—

- (a) The place to be connected shall, if required, be so roofed as to prevent the entry of rain water from it to the sewers, and in no case shall rain water be permitted to discharge on to such place from adjoining surfaces.
- (b) The place to be connected shall be paved above the level of the yard with approved materials, and graded to the satisfaction of the responsible officer of the Authority.
- (c) The drain from any such place shall be provided with an approved silt trap with a removable grating and connected with the drain inside the boundary line of the property. A water tap connected with a satisfactory water service shall be provided in a suitable position over the area.

Section 51—Manure Bins.—(a) Manure bins must be provided for all stables or cow yards, where the local Municipal By-laws demand their construction, or where the locality is closely built on.

(b) All the manure bins must have the inside surfaces rendered with cement mortar, and must be impervious throughout, and provided with an approved close-fitting cover. Walls of new manure bins must, unless otherwise approved by the Engineer, be at least 9 inches in thickness, built of brick-work laid in cement mortar. If an outlet pipe be provided for a manure bin, it must be properly connected with the Authority's sewers. Branches in house drains must be provided in all cases where manure bins exist, for their connexion whenever the Authority shall deem it necessary.

DIVISION 17.—PIPE TRENCHES.

Section 52.—The trench for the house drain from any property shall be so dug as to meet the Authority's sewer at the position provided or to be provided for the connexion.

The material from the trench shall be so placed as to cause the least possible obstruction and inconvenience to the public. Proper barriers and lights shall be maintained where necessary to guard against accident during the progress of the work.

In refilling the trench selected refilling shall first be deposited around and over the pipe to a depth of 12 inches and carefully consolidated, after which the remainder of the trench shall be filled in layers and rammed or flooded, as ordered or approved.

No stone shall be used in refilling until earth or gravel has been placed over the pipe to a depth of 1 foot, or more if directed.

On no account shall any water, sand, earth, &c., be allowed to enter the sewer during the progress of the work.

On completion of refilling the surface shall be restored as nearly as possible to the same condition as it was in before operations were commenced, unless the owner in writing otherwise requires.

DIVISION 18.—LAYING DRAINS, ETC.

Section 53—Position and Line.—Every drain and every fitting, &c., connected therewith shall be laid and fixed where directed by the responsible officer of the Authority. As far as possible all drains shall be laid in straight lines; where changes of direction occur they shall be made in manholes, or by a suitably curved pipe with an inspection opening on each straight pipe next adjoining the curve, or by installing an inspection branch in the curve itself, or by such other means as the responsible officer may direct.

Section 54—Oblique Junctions.—Where any drain joins another drain, or a sewer, the junction shall be made obliquely at an angle of not greater than 45 degrees with the direction of flow of such drain or sewer.

Section 55—Connexion to Sewer.—The position of the Authority's connexion to any premises shall be located prior to the commencement of any drain excavation. The disk stopper at the point of connexion to the sewer shall be carefully removed so as not to injure the socket or allow any debris to enter the sewer.

The first length of the drain at the branch shall be an inspection opening.

Section 56—Gradients.—All drains shall be laid on an even grade, and, except by special permission in writing, from the responsible officer, such gradients shall in no case be less than the following:—

4-in. diameter	1 in 40.
6-in. diameter	1 in 60.
9-in. diameter	1 in 80.

In cases where the grades of drains are steeper than 1 in 15, concrete anchorage blocks shall be placed at intervals of not more than 30 feet.

Such blocks shall be let into the sides of the trench at least 6 inches on each side and shall extend not less than 3 inches above and below the barrel of the pipe and for a length of 12 inches along the pipe.

Section 57—Depth of Drains.—Drains of stoneware or concrete pipe, unless bedded on and encased in concrete of not less than 4 inches thick over any part of the drain, shall be laid at a depth to the socket of the pipe of not less than the following:—

- (a) In public thoroughfares, rights-of-way, or other open spaces subject to vehicular traffic—2 feet.
- (b) In private property not subject to vehicular traffic—1 foot.

No person shall alter the surface over any drain, so as to deprive it of the minimum depth of cover specified by the preceding paragraph, unless approved measures are adopted to protect the drain.

Section 58—Laying Drains.—All pipes shall be laid to such lines and grades as may be shown on the plans or directed, and, except where otherwise ordered shall be bedded on approved sand or other material up to one-third of the diameter of the pipe and so that there shall be at least 2 inches of the bedding material below the barrel of the pipe in the case of earth bottomed trenches and up to the horizontal diameter of the pipe, and so that there shall be at least 3 inches of the bedding material below the barrel of the pipe in the case of rock.

In water-charged ground, or where the foundation is bad, or near the roots of trees, or where directed, the drain shall be formed of cast-iron pipes or, if of stoneware or concrete pipes, they shall be bedded on and encased in concrete as ordered, and if ordered, supported upon approved timber foundations as directed. The thickness of concrete encasing and the form of concrete haunching shall be as directed by the responsible officer.

Drops or bends in vertical or inclined drains shall have a concrete support placed under and round the drain as directed.

DIVISION 19.—DRAINS UNDER BUILDINGS.

Section 59.—Every drain shall, as far as practicable, be so constructed as not to pass under any building or out-building. When a drain does pass under a building or out-building it shall, if practicable, be laid in a direct line for the whole distance beneath such building or out-building, and shall have approved means of access for rodding outside the walls of the building or out-building and also, if directed, beneath the building or out-building. The pipes used shall be of stoneware or concrete, surrounded by not less than 4 inches of concrete, or of cast-iron.

In any case in which pipes pass through or under walls, approved provision shall be made to prevent injury to the pipes by settlement and, in outer walls, to prevent the ingress of vermin.

DIVISION 20.—JOINTS, DRAINAGE.

Section 60—Stoneware and Cement Pipes.—Joints of stoneware and cement pipes shall be filled in solidly with cement mortar neatly splayed off, or with other approved material. After each joint is made the interior of the joint shall be wiped clear of surplus mortar before the next pipe is laid.

Section 61—Cast-iron Pipes.—All joints in cast-iron pipes must be stemmed with approved gaskets and so filled and caulked with lead or other approved material as to make them gas and watertight.

All connexions between stoneware or concrete pipes and cast-iron pipes shall be made as for joints in stoneware or concrete pipes.

DIVISION 21.—DRAINAGE TRAPS.

Section 62—Trapping of Inlets.—Every inlet to any drain other than inlets provided for ventilation in accordance with the By-law shall be provided with an approved trap. No inlets to any drain connecting directly with a sewer shall be constructed within a building or out-building other than such inlets necessary for the apparatus of any water-closet, urinal, or slop sink.

Section 63—Classes of Traps.—Five classes of traps shall be used:—

- (a) "Traps" for intercepting gases only, which shall be of round section and self-cleansing form, but not such as to empty by momentum or suction.
- (b) "Silt traps" for intercepting both gases and solids, which have slightly tapered sides, flat bottom, and rounded angles, and which shall be provided with approved means for catching and removing solids.
- (c) "Grease traps" for solidifying and collecting grease, fatty domestic wastes, and other semi-fluid or viscous material liable to foul the pipes. The grease trap shall be designed for the requirements of the particular drain. The design and capacity shall be to the approval of the Engineer. The interior surfaces shall be tiled, and it shall be equipped with non-corrodible baffles, the whole trap being designed for easy cleaning.
- (d) "Acid traps" or "Neutralizers" for neutralizing acid or other aggressive water prior to its entering the house drains.
- (e) "Oil traps" for collecting all kinds of oil, which shall be of such form as approved.

The term "yard gully" is applied to traps (a) in cases where they are used externally and fitted with dished tops and gratings. The tops of inlets of all disconnector traps must be at least 6 inches above the surface of the surrounding ground.

Section 64—Water Seal.—Every trap must have a water seal of at least half the diameter of the outlet pipe, but in no case of less than 2 inches.

Section 65—Provision of Yard Gullies.—A yard gully shall, wherever practicable, be provided in the yard of every property as near as practicable to the kitchen or back door, with a water tap connected with a satisfactory water service placed over it at a height of not less than 2 feet. No yard gully shall be situated within a building or out-building. Where it is not practicable to provide a yard gully, a slop sink must be provided within the building or out-building.

Section 66—Details of Yard Gullies.—Yard gullies shall be fitted with dished tops and gratings, the dished top being in one piece with the trap or jointed thereto by spigot and faucet, or as otherwise approved.

The depth of the dished top to the grating must not be less than 6 inches. The grating to every gully trap must not be less than 6¼ inches over all, and the grating to every disconnector trap shall be convex in section, with an opening of suitable outlet capacity. Every grating must be fixed down in an approved manner with bitumen or wedges of lead.

Section 67—Kerbing, &c., to Yard Gullies.—Yard gully basins and the dished tops of silt traps must be so surrounded with an approved impervious kerbing as to prevent the access of surface water to the drains, and, if directed, the wall at the rear of the gully or silt trap, if of brick or stone, must be cement rendered to the height of the tap over same, and if of wood the wall must be provided with an approved galvanized sheet-iron apron. The internal diameter of kerbing around gully traps measured from the face of cement rendering must not be less than 15 inches, and must be neatly rounded to meet the gully top.

DIVISION 22.—VENTILATION.

Section 68—Vents of Main Drain.—The main drain shall be ventilated at its upper end by a pipe ventilator erected vertically, and such ventilator may be a soil pipe.

If the drain is provided with an interceptor trap there shall be in addition a ventilator connected to the interceptor trap shaft. In such cases there shall, wherever practicable, be a difference in height of not less than 6 feet between the tops of the vents at the upper and lower ends of the drains respectively.

Section 69—Vents of Branch Drains.—Branch drains need not be vented if the drainage traps are within 20 feet from the main house drain, measured along the line of pipes, including the drop, if any, from the centre line of the main drain to the centre of the outlet side of the water seal of the drainage trap, unless otherwise ordered by the responsible officer, in which case they must be vented as directed.

Section 70—Size of Drainage Vents.—Drainage vent pipes shall, unless otherwise ordered, be of not less than 4-in. diameter in the case of educt vents and not less than 3-in. diameter in the case of induct vents, with the provision that where more than one educt vent is provided the vent on the

longest line of drain shall be of not less than 4-in. diameter, and all others of not less than 3-in. diameter; but in no case shall a drainage vent be of smaller diameter than necessary to comply with the requirements of section 89.

Unless otherwise ordered or approved every such vent pipe shall be without return bend and provided with basket and/or educt or induct cowls as directed.

Section 71—Materials, &c.—Drainage vent pipes situated wholly outside of buildings or out-buildings shall be of cast-iron, galvanized wrought-iron, double galvanized sheet-iron, or other approved material above ground and of stoneware or concrete beneath the surface of the ground. Galvanized sheet-iron vent pipe shall not be less gauge than 20 for 3-in. and 4-in. diameter pipes and 18 for 8-in. pipes, and where ordered the first 6 feet above ground shall be of cast-iron or other approved material. Drainage vent pipes inside a building or out-building shall, unless otherwise approved, be of cast-iron or of galvanized wrought-iron. The circumferential joints of galvanized sheet-iron vent pipes shall be riveted and soldered. All galvanized sheet-iron vent pipe used to ventilate the drainage system, or used as anti-siphonage pipes to soil or waste pipes from closets, slop sinks, or urinals, must be coated with hot tar or asphaltum inside before erection.

Section 72—Induct Vents.—Every induct vent shall be securely supported in an approved manner.

Section 73—Materials for Vents of Soil or Waste Pipes.—Vent pipes, if inside a building or out-building, shall always be of cast-iron, wrought iron, lead, copper, or brass. Grooved, welded, or riveted double galvanized sheet-iron vent pipes may be used where they are entirely outside a building or out-building, and shall be connected to the traps or waste or soil pipes by brass ferrules or by other means approved by the responsible officer of the Authority.

Section 74—Soil Vent Pipes.—The upward extension from the soil pipes for ventilation shall always pass in as direct a manner as possible above, and, if necessary, through the roof.

Section 75—Anti-siphonage Vents.—Traps must be prevented from siphoning by proper ventilation, in accordance with the requirements of section 89. Such anti-siphonage vents from fixtures shall be carried above the eaves of the building, or jointed to the branch or main vent above the level of the fixture, unless special permission to the contrary is granted.

These vent pipes shall be connected to the waste or soil pipe at a point not less than 3 inches, nor more than 12 inches, from the crown of the trap, and on the opposite side of the water seal to the fixture.

Section 76—Height of Vents.—Every vent pipe extending upwards from a soil or drain pipe shall be carried not less than 6 feet higher than any window or door within a distance of 30 feet thereof, and always at least 21 feet above ground level and 6 feet above the level of the eaves or coping, or to such additional height as may be necessary to prevent effectually the escape of foul air into any building or out-building within the vicinity.

Where the vent pipe extends into a gable of the building or out-building, it shall further be carried at least 2 feet above the point of intersection with the roof.

Such pipe shall, where necessary, be provided with sufficient clips or stays to support it effectively.

Section 77—Chimneys.—No chimney shall be used as a ventilator to any drain, soil, or waste pipe.

Section 78—Vents near Chimneys.—Vents must, as far as possible, be kept away from chimneys and ventilating air shafts. Where a ventilator pipe terminates six feet or more from a chimney opening or ventilating air shaft, the requirements of section 76 shall apply, but where the distance is less than six feet the vent pipe shall, unless otherwise ordered, terminate not less than two feet below the top of such chimney or air shaft.

Section 79—Vent Pipe Grades.—All vertical lines of vent pipes shall connect, full size, at their bases with a soil, waste, or drain pipe at an angle of not less than 45 degrees to the horizontal, and shall extend in undiminished size above the roof, or be connected to the soil, waste, or vent stack, in compliance with the requirements of section 80, on a grade sufficient to avoid the collection of water.

All intermediate bends or offsets shall be at a grade of not less than 45 degrees to the horizontal.

Vent pipes shall not be used as waste or soil pipes.

Section 80—Combining of Vents.—The various vents may be combined by branching together those which serve traps of the same class. The vent pipes may be branched into a soil or waste pipe of the same class above the level of the highest fixture.

Section 81—Galvanized Sheet-iron Vent Branches.—Where a branch is required to a galvanized sheet-iron vent pipe, a brass saddle piece bolted and soldered to the vent shall be used.

Provided that—

- (i) No vent shall be less than 1½ inches in diameter, and in no case shall a main or branch vent have a diameter less than one-half that of the soil, combined waste, or waste pipe which it serves.
 - (ii) For 2-in. and 2½-in. waste pipes the main or branch vent shall have a diameter of not less than 1½ inches.
 - (iii) No branch vent need be larger in diameter than the soil, combined waste, or waste pipe which it serves.
- (3) *Individual Anti-siphonage Vents.*—The sizes of individual anti-siphonage vents shall be not less than the sizes determined from the diameter of the fixture trap served, in accordance with the following table:—

Diameter of Fixture Trap.	Minimum Permissible Size of Anti-Siphonage Vent.	Diameter of Fixture Trap.	Minimum Permissible Size of Anti-Siphonage Vent.
Inches.	Inches.	Inches.	Inches.
1½	1½	2½	2
2	1½	3	2
2½	1½	4	2

PART 5.—PLUMBING.
DIVISION 24.—GENERAL.

Section 90—Waste Pipes.—Except as provided in section 97, separate waste pipes shall be provided for each of the following classes of polluted water, viz.:—

- (a) Dirty water from baths, sinks, lavatory basins and wash troughs, and other water containing a small proportion of soap and/or dirt.
- (b) Greasy water from kitchen and scullery sinks or other fixtures, in such cases where grease traps are ordered or required.

Section 91—Soil Pipes.—Soil pipes shall be provided for soil water from closets and other water containing faecal matter, and for urinal waters from slop sinks and urinals and, where directed, for discharges from operating theatres and mortuaries, and in no case shall such waters be discharged into any waste pipe as defined by this By-law, except by permission of the Authority.

Section 92—Connections to Drains.—Except as provided in section 97 all waste pipes shall discharge under the grating of a yard gully or into a disconnector trap. All soil pipes, including those for urinals and slop sinks, must be connected direct to the drain. No waste pipe shall be laid in the ground outside any building or outbuilding unless by special permission.

Section 93—Flashing, &c.—All troughs, sinks, and other fixtures which are placed less than 3 inches, and all baths fixed less than 6 inches clear from any wall, shall be flashed with 5-lb. sheet lead, 24-gauge copper, bronze, brass, nickel-silver, or monel metal, or other approved material. Twenty-four-gauge sheet galvanized iron may be used for fixtures other than sinks.

All such flashings shall be turned up the walls at least 4 inches, except where the walls are tiled, when the flashings shall be carried up at least 1 inch behind the tiles. Baths and other fixtures having turned-up flanges for use against tiled walls in lieu of sheet-metal flashing shall be properly supported to prevent settlement, and the tiles shall be brought hard down on to the surface of the fixture. Such tiles or sheet materials shall be securely bedded upon cement mortar in an approved manner for a height of at least 3 inches above the fixture. The flange of the fixture shall lap behind the tiles or sheet materials not less than ½ inch where the fixture is supported on brick or concrete walls carried up from permanent foundations, and not less than ¾ inch if the fixture is supported on material other than brick or concrete. All flashing shall be properly secured and made watertight, and shall be bedded for a width of not less than 1 inch along the edge nearer the fixture in red or white lead.

Section 94—Fixtures Not to Abut Against Walls.—Unless otherwise directed or permitted sinks, tubs, and similar fixtures situated in buildings, other than private houses, where food for human consumption is prepared, manufactured, or stored for sale, and draining boards, slabs, and plates used in connexion with such fixtures, shall not abut against any wall, but shall have a clear space not less than 6 inches between such fixtures and any wall surfaces or obstructions.

Section 95—Bib-cocks.—Internal bib-cocks shall not be permitted unless a sink, lavatory basin, or other approved fixture, or a properly drained impervious floor, is provided underneath.

Section 96—Pipes through Roof.—Where any vent, waste, or soil pipe passes through any roof, a suitable lead collar or approved flashing shall be soldered or otherwise fixed to the pipe and also to the roof in such a manner as will make the roof perfectly watertight.

Section 97—Combined Wastes—Combined Pipe System.—The Authority may approve of the adoption of the combined pipe system for plumbing installations, subject to the following conditions and such other conditions as it may think necessary in any particular case, viz.:—

- (a) Application shall be made in writing by the owner or his authorized agent.
- (b) Plans shall be in accordance with section 9.
- (c) The size and arrangement of all soil, waste, combined waste, and vent pipes shall be approved by the Authority.

DIVISION 25.—SOIL, WASTE, AND VENT PIPES.

Section 98—Materials.—Except by permission of the Engineer, no material shall be used for soil pipes, other than cast-iron, 7-lb. lead, brass, stoneware, or ceramic ware, and for waste pipes, other than wrought-iron, cast-iron, 6-lb. lead, brass, copper, stoneware, or ceramic ware.

Section 99—Lead Pipes.—The minimum permissible weight of lead for soil pipes shall be 7 lb. per square foot, and for waste pipes 6 lb. per square foot.

Section 100—Wrought-iron Pipes.—All wrought-iron or wrought-steel pipes and their fittings shall be approved standard weight and quality and galvanized or lined to the approval of the Engineer.

Section 101—Cast-iron Pipes.—All cast-iron pipes shall be sound, free from holes and cracks, and coated with approved bituminous composition, or lined with glass enamel or other approved material.

Cast-iron pipes and their fittings, where laid in the ground, shall comply with the standard approved by the Authority for cast-iron water pipes and their fittings of similar diameter. Cast-iron pipes for use in other situations shall have a minimum thickness of 3-16 inches measured in the case of lined pipes without the lining, and their fittings shall correspond with them in weight and quality. All junctions shall be curved; right-angled junction shall not be made.

Section 102.—Where lead, copper, brass, or cast-iron soil or waste pipes are fixed outside a wall for upstairs fixtures, the lead, copper, brass, or cast-iron pipes shall be carried at least 2 feet above the level of the highest fixture attached to the pipe.

Section 103.—Copper or brass pipes for soil, combined waste, or waste pipes shall be seamless, solid drawn tube connected in accordance with the provisions herein, and shall be of a diameter and thickness not less than those given in the table hereunder.

Nominal Internal Diameter.	Minimum Permissible Actual Internal Diameter.	Minimum Permissible Wall Thickness (S.W.G.)		British Standard Pipe Thread for Screwed Connections.
		Screwed Connections.	Braced or Compression Joints.	
Inches.	Inches.			Inches.
1½	1 1/4	12	16	1½
2	1 7/8	11	16	2
2½	2 1/4	11	14	2½
3	2 7/8	10	14	3
4	3 1/4	8	12	4

Section 104—Use of Lead Pipes.—Lead pipes shall not be used where, in the opinion of the Engineer, such pipes would be liable to damage.

Section 105—Supporting Lead Pipes.—Lead pipes shall be supported by cast lead tacks of approved dimensions, wiped on to the pipe or by other approved fastenings, and such fastenings shall be arranged as nearly as possible thus—

- 4-in. vertical lead pipes—2-ft. 6-in. centres.
- 4-in. horizontal lead pipes—2-ft. centres.
- Less than 4-in. vertical pipe—3-ft. centres.
- Less than 4-in. horizontal pipe—2-ft. 3-in. centres.

Two pairs of tacks, fixed opposite, are sufficient for fixing lead flush pipes from cisterns.

Section 106—Minimum permissible Gradients.—The following are the minimum gradients to be adopted for soil and waste pipes:—

Diameter of Pipe.	Minimum Gradient.
1½ inch	1 in 15
1½ inch	1 in 18
1½ inch	1 in 21
2 inches	1 in 24
2½ inches	1 in 30
3 inches	1 in 36
4 inches	1 in 48
5 inches	1 in 60
6 inches	1 in 72

Section 107—Length of Unvented Waste Pipes.—Waste pipes need not be ventilated unless they exceed 10 feet in inclined length or 18 feet in vertical length, provided that there is only one fixture attached to the waste pipe, and provided that the water seal of the trap is not reduced by siphonage or other cause. Where there is more than one fixture, or the water seal is reduced, a vent pipe shall be supplied to the fixture trap or traps.

Section 108—Junctions.—Where a waste or soil stack is branched into a graded waste, soil, or drain pipe, the branch fitting shall have an angle of not less than 45 degrees to the horizontal, and the length of the branch of the fitting shall be such that the vertical projection of the attached stack will be wholly outside the area of the junction with the graded pipe.

Section 109—Sealing of Pipes.—Wherever a fixture is abolished, the soil, waste, vent, and water supply pipes to such fixture shall be removed, or, if allowed by the Authority to remain, the ends of the pipes shall be sealed with water-tight imperishable materials.

Section 110—Sheet Metal Bends and Offsets.—All sheet metal bends and offsets for flush and vent pipes shall be bent or pressed. Mitred elbows will not be permitted.

Section 111—Concealment of Pipes.—All soil, waste, and main vent pipes and traps shall, except where passing through walls, partitions, and floors, be reasonably accessible at all times for inspection and convenience of repairing.

(a) In hospitals and similar institutions, all soil, waste, and main vent pipes, where practicable, shall be fixed on the outside of external walls or in pipe ducts having a minimum width of 2 feet and minimum area of 9 square feet (measured clear of all pipes or other obstructions) and shall be so arranged as to facilitate inspection and maintenance at all times. Such pipe ducts shall be provided with access doors so placed as to permit ready inspection of every straight line of waste or soil pipe or main vent pipe.

(b) In buildings other than hospitals and similar institutions, if soil, waste, or main vent pipes are concealed within pipe ducts or recesses in walls, such pipe duct or recess shall—

(i) be provided with approved means of access and have a width of not less than 2 feet and a minimum area of 9 square feet (measured clear of all pipes or other obstructions); or

(ii) have at least one of its sides constructed of woodwork, brickwork in lime mortar, terracotta, or gypsum blocks, plaster on expanded metal lathing, or other approved material, so constructed and fixed as to be capable of being removed independently of and without damage to any other part of the structure and provided with inspection openings so placed as to allow ready inspection and maintenance of every straight line of soil or waste or main vent pipe.

(c) Branch and anti-siphonage vent pipes may be concealed in hollow walls or may be built in lime mortar in wall-chases provided the pipes and fittings are made of cast-iron or wrought-iron or steel pipe, or of brass or copper of thickness not less than 12 gauge where screwed fittings are used, and not less than 16 gauge where compression fittings are used, with fittings to correspond, or when joints are brazed.

In no case, except by special permission, shall junctions be built into walls.

(d) All inspection or access openings to concealed pipes shall be finished throughout with smooth surfaces, and shall be of such size and shape as to permit the entrance of cleaning tools, as required, to the pipe.

For the purpose of this section a straight line of soil, waste, or main vent pipe shall be taken to include any offset or deviation from the straight line of not more than 45 degrees and not more than 3 feet in length.

Section 112—Concealed Standing Wastes.—Concealed standing wastes will not be permitted.

Section 113—Painting.—All external plumbers' work and all cast-iron cisterns and brackets, woodwork in connexion with plumbing installations, sheet-iron flush pipes and sheet-iron storage tanks and trays shall be painted, after inspection, to the approval of the responsible officer.

DIVISION 26.—JOINTS.

Section 114—Stoneware, Cement, or Cast-iron Pipes.—Joints of stoneware, cement, or cast-iron pipes shall conform with the requirements of Division 20.

Section 115—Lead Pipe.—All joints to lead pipe shall be plumber's wiped joints.

Section 116—Wrought-iron Pipe.—The screwed ends and sockets of each particular size of wrought-iron or wrought steel pipe shall be so formed and the threads so cut that the ends of the pipe will butt against each other when screwed home in the sockets; bends, junctions, and similar fittings

shall be similarly formed and screwed so that when the pipe ends are screwed home the bore will be continuously uniform, and without breaks or pockets. The burr shall be neatly filed off on the inner edge of all pipe ends. All screwed joints shall be made with approved jointing material.

Section 117—Wrought-iron Pipe to Lead Pipe.—All joints between wrought-iron and lead pipes shall be made by means of brass unions screwed to iron, and wiped to lead.

Section 118—Brass or Copper Pipes.—Joints of brass or copper pipes shall be made by means of screwed or compression fittings approved, tested, and stamped in accordance with the provisions of section 30, or by means of brazing or other approved method. All brazed work shall be inspected and approved by the Inspecting Officer before installation.

Section 119—Lead Pipe to Cast-iron Pipe.—The connexion of lead pipes or traps to cast-iron pipes shall be made by means of brass ferrules. The brass ferrules shall be lined with and connected to the lead pipe or trap by means of a wiped joint, and connected to the cast iron by inserting ferrule in socket thereof, and making the joint in the same way as in cast-iron pipe.

Section 120—Sheet-iron Pipe to Cast-iron Pipe.—All connexions of galvanized sheet-iron to cast-iron pipes shall be made with molten lead, lightly but tightly caulked in to cast-iron sockets, or with approved material.

Section 121—Sheet-iron pipe to Wrought-iron Pipe.—Galvanized sheet iron pipes shall be connected to wrought-iron pipes by means of brass unions or sleeves soldered to the sheet iron and screwed to the wrought-iron or by means of a wrought-iron socket which is screwed to the wrought-iron pipe and into which the sheet-iron pipe is lightly but tightly caulked with molten lead.

Section 122—Sheet-iron Pipe to Lead Pipe.—Connexions of sheet-iron pipes to lead pipes shall be made by means of brass sleeves wiped to the lead pipe, and soldered to the sheet-iron pipe, or by means of a cast lead collar which is wiped to the lead pipe and into which the sheet-iron pipe is caulked as directed, or soldered and jacketed.

Section 123—Concrete or Stoneware Pipe and Traps to Lead Pipe.—Connexions of lead pipe to stoneware or concrete pipe shall be made by means of a brass ferrule connected to the lead pipe by means of a wiped joint, and connected to the stoneware or concrete pipe by inserting it in the socket thereof, and making a cement mortar joint.

The connexion of a stoneware or concrete trap to a lead pipe shall be by means of a cast lead or brass socket, and the joint made with bitumen or other approved material. The lead pipe shall be connected to the tail end of the brass or lead socket by means of a plumber's wiped joint.

Section 124—Connexion of Closet Pan Traps to Soil Pipe or Drain.—Connexion of a closet pan to a soil or drain pipe shall be made by means of a bituminous jointing material, consisting of a mixture of approved bitumen and finely graded inert mineral filler in equal proportions, filled in solidly into faucet of soil or drain pipe and neatly splayed off, or by other approved method. In the case of lead soil pipes, a cast-lead or brass faucet shall be used and connected to the lead pipe by means of a wiped joint.

Section 125—Cistern Flush Pipe to Closet Pan.—The flushing pipe from cistern shall be connected to the water-closet pan by a lead cap piece of not less than 4-lb. lead, packed with red lead or other approved material. The cap piece shall be jointed to galvanized sheet-iron, copper, brass, or drawn-steel pipe by means of a soldered joint. The connexion of the flushing pipe to cistern shall be by means of a brass union, wiped to lead pipe or soldered to sheet-iron pipe. Copper or brass pipe shall be connected to cistern by means of a brass ring, with nut brazed to pipe, or by other approved means.

Section 126—Vent Pipe to Closet Pan.—Vent pipe shall be connected to the vent horn of water-closet trap by a lead cap piece with red lead packing or by other approved methods. The cap piece shall be jointed to copper or brass pipe by means of a soldered joint and to lead flush pipe by a soldered or wiped joint.

Section 127—Outlet Fittings to Fixtures.—Connexions between outlet fittings and such fixtures as baths, sinks, basins, &c., when the latter are constructed of cast-iron, plate-iron, ceramic ware, or concrete, shall be made with lock nuts. The outlet fitting shall in all cases be connected to the waste pipe by means of a union.

When these fixtures are made of sheet-metal lighter than 20 gauge soldered connexions may be used in lieu of lock nuts.

Section 128—Waste Pipes to Troughs.—Connexions of waste pipes to wash troughs shall be made as under:—

(a) Cement troughs, unless otherwise approved, shall have cast-in outlets.

- (b) Sheet-metal troughs shall be connected to the waste pipes in compliance with section 127.
- (c) For wooden troughs, lead, copper, or brass waste pipes shall have flanges connected to the waste pipes in accordance with the provisions of this By-law, and fastened to the underside of the trough with round-head brass screws, and the waste pipe shall then be turned over inside the trough and the plug-casting bedded over it with red lead putty and screwed to trough with brass-wood screws.

Where wrought-iron or other screwed pipes are used the plug must be connected to the trough by means of a lock nut in lieu of flange.

DIVISION 27.—FIXTURE TRAPS.

Section 129—Fixtures to be Trapped.—Every fixture shall be effectively trapped unless otherwise permitted, in writing, by the Engineer. Separate traps shall be provided for each fixture, except lavatory basins, sinks, or troughs, which may be connected in pairs.

Section 130—Omission of Traps.—Baths, lavatory basins, wash troughs, and sinks may remain untrapped where they are fixed in the open air or in a detached out-building not used as a living room, workroom, or room for the preparation, cooking, or storage of food, and not connected directly, by openings, with the main building or residence, provided that the length of the waste pipe, measured from the furthest inlet to the waste pipe outlet, does not exceed 6 feet.

Section 131—Position of Traps.—Traps shall be placed as near the fixtures as possible, and nowhere shall a trap be more than 2 feet from its fixture, except as provided in section 180, unless otherwise specially permitted by the Engineer.

Section 132—Materials of Traps.—Traps for all fixtures other than water-closets, housemaids' slop sinks, and urinals shall be of copper, brass, or drawn lead.

Section 133—Depth of Water Seal.—Every trap shall have a water seal of not less than two inches.

Section 134—Closet-pan Traps.—Outlets from closet-pan traps shall be of not less than 3½-in. nor more than 4-in. in diameter except in the case of siphonic pans.

Section 135—Sealed Disconnecter Traps.—Where approved by the Engineer, sealed disconnecter traps may be fixed outside or inside the building or out-building, but in such cases breather pipes or fresh air inlets of the same diameter as disconnecter traps shall be taken above the level of the lowest fixture, or to such other height as directed, and when the trap is inside shall be led to the outside of the building or out-building. The material for such breather pipes shall be the same as for waste pipes; sheet iron will not be allowed. Inspection openings to such traps shall be sealed with screwed plugs, or as otherwise approved by the Engineer.

Section 136—Form of Trap.—The "P" form of trap shall be used in preference to the "S" form where in the opinion of the Engineer, it is equally suitable for the situation.

Section 137—Lead Traps.—All lead traps must be of the weights specified in section 98 for lead pipes of the same diameter.

DIVISION 28.—GRATINGS.

Section 138.—Incorrodible outlet gratings of approved design and material in accordance with the Australian Standard Specification No. B.38 "Metal Alloy Sanitary Fittings," shall be provided for all urinals and housemaids' slop sinks and for all fixtures discharging into waste pipes. If for the fixtures in question there is no Australian standard, the grating shall be to the approval of the Engineer.

DIVISION 29.—CLEANING EYES AND INSPECTION OPENINGS.

Section 139—Provision for Inspection and Cleaning.—Sufficient inspection and cleaning eyes shall be provided in such positions on soil and waste pipes as to be easy of access and easily opened for proper inspection and cleansing.

Traps for fixtures, other than water closets, urinals, and slop sinks, shall be provided with approved screwed brass plugs for cleaning purposes fixed under the water line of the trap, unless by permission of the Engineer.

Section 140—Inspection Openings on Soil Pipes.—In all cases where the vertical stack of soil pipe provides for closets 4 feet or more above the ground level, measured from floor level of water-closet to ground level at foot of stack, an inspection opening eight inches in length having a cover fixed to a flange with brass or bronze bolts or studs and fitted with an approved rubber or insertion gasket, shall be provided in such a position as directed by the responsible officer of the Authority.

DIVISION 30.—GREASE TRAPS.

Section 141—Provision of Grease Traps.—Every fixture or area from which grease or any other objectionable matter is likely to be discharged or conveyed into waste or soil pipes, or house drains, and every sink in all such places as food-packing houses, butchers' shops, lard-rendering establishments, hotels, restaurants, and boarding-houses, and such fixtures, areas, apparatus, or appliances as the responsible officer may direct, shall first discharge into an approved apparatus for preventing the objectionable matter from reaching the soil pipe or drain. Such apparatus shall be of such dimension, design, and construction, and in such positions as the responsible officer may in each case approve.

Section 142—External Grease Traps.—Every grease trap shall be fixed outside the premises whenever practicable and (if not portable) shall be constructed of glazed stoneware, or of concrete, or brick in cement, lined throughout with approved tiling with bronze gunmetal or Muntz-metal baffles, and the outlet shall be connected to the drain through a disconnecter trap. The grease trap shall be designed for the particular waste to be trapped both as to capacity and type. Every external grease trap shall be provided with a ¾-in. bib-tap connected with a ½-in. water service and capable of discharging into the grease trap.

Section 143—Internal Grease Traps.—Wherever a grease trap is used inside a building or out-building it shall be so fitted as to be easily removable, and, if directed, fixed upon a tray. All internal grease traps shall be of copper lined inside or other approved material, provided with a close fitting cover, and shall be independently ventilated as required by the responsible officer. An internal grease trap which is not removable may be permitted in special circumstances, provided the design permits easy access and cleansing, and special precautions over and above those required for external grease traps are taken.

Section 144—Grease Trap Ventilation.—Unless otherwise approved, every internal grease trap and all external grease traps which are within 30 feet of any door, window, or other opening into a building shall, unless fitted with an approved air-tight cover, have independent provision made for inlet and outlet ventilation.

Every such vent shall be carried not less than 6 feet above any window, door, or other opening into any building within a distance of 30 feet thereof, and in any case at least 2 feet above the eaves or coping, or to such additional height as may be necessary to prevent effectually the escape of foul air into any building within the vicinity.

In all cases there shall be a difference in height of at least 6 feet between the tops of the inlet and outlet vents.

The size of such vents shall be in compliance with the requirements for main vents in section 89, the diameter of waste pipe being taken as that of the outlet from the grease trap and the number of fixture units equivalent to the number represented by the sinks served by the grease trap.

Section 145—Size of Grease Trap.—The dimensions of the grease trap to be provided shall be such as to ensure the congealing and retention of all grease entering such trap.

Section 146—Outlet Pipes.—The outlet pipe from any grease trap must be at least one size larger than that size of pipe which has a cross sectional area equivalent to the total area of incoming waste pipes. In no case, except by special permission, shall the outlet pipe be less than 3-in. diameter for grease traps of copper or other approved metal and 4-in. for stoneware.

Section 147—Maintenance.—Every grease trap shall be maintained by the occupier at his own expense, and shall be cleaned daily, to ensure that such trap operates in an efficient and hygienic manner.

DIVISION 31.—WATER-CLOSETS AND FLUSHING APPARATUS.

Section 148—Provision of Water-closets.—(1) At least one water-closet, approved by the Authority, shall be provided for each house, building, out-building, or land required by notice from the Authority to be connected with a sewer of the Authority, and for each flat, as defined in this By-law.

(2) Every licensed victualler's property, restaurant, boarding-house, lodging-house, school, shop, factory, office, public building, or building used for public entertainment, shall be provided with water-closet accommodation in accordance with the requirements of the Health Acts and/or Factories and Shops Acts of the State of Victoria, or of any regulations under any of the said Acts, or of other relevant statutory requirements or regulations; provided that, in any property other than a house or flat, which is not provided for in any of the aforesaid Acts, separate water-closet accommodation shall be provided for males and females, one water-closet for each ten or portion of ten persons for whom water-closet accommodation is required.

(3) Water-closets shall be so placed, either within or outside the building, as to ensure the due observance of decency and to be easily accessible to the occupiers of such building.

(4) After the date fixed by notice from the Authority to the owner of any house, building, or land, requiring him to connect the same with a sewer of the Authority, or after such further time as shall be allowed by the Authority for the purpose of such connexion, no privy closet, other than a water-closet approved by the Authority, shall be used in such house or building, or upon such land.

Section 149—Airlocks for Water-closets.—(1) Except as provided in sub-section (2) hereunder, no water-closet or urinal compartment within a building shall be entered directly from any room used for human habitation or for the manufacture, preparation, or storage of food for human consumption, or used as a factory, workshop, or work place.

In cases where otherwise such closet or urinal compartment would be directly entered from any such room, an airlock shall be provided, having a floor area of not less than twenty square feet, and lighted and ventilated in accordance with the provisions of section 151.

In private residences a hall, passage, lobby, or stair-case may be considered as an airlock, provided it has a floor area of not less than twenty square feet and complies with the requirements of sections 151 and 152.

(2) The airlock may be omitted where a water-closet, within any building, is intended solely for the private use of not more than two persons and opens off a room normally occupied by those persons only, provided that such room is not used for the manufacture, preparation, storage, or consumption of food, or as a factory, workshop, or work place.

(3) No airlocks will be required where ventilation, in accordance with section 153, is provided to water-closet or urinal compartments.

Section 150—Lighting and Ventilation of Water-closets.—Except as provided in section 152, every water-closet or urinal compartments within a building shall comply with the following conditions:—

(a) One of its sides shall be an external wall of such building, abutting on to a street or lane, or an open space within the property, having a width of not less than four feet and an area not less than the following:—

	sq. ft.
For first story above floor level of open space	36
For second story above floor level of open space	72
For all other stories above floor level of open space	100

Each water closet or urinal compartment shall be provided with a window in such external wall having a clear light area of not less than three square feet per closet pan and capable of being opened.

(b) Each water-closet or urinal compartment shall be provided with direct ventilation to the open air from a point near ceiling level and a floor vent. Such ventilation shall be provided by a vent, or vents, carried as direct to the open air as is practicable, and boxed throughout, and having a minimum clear area at any point of not less than 27 square inches per closet pan.

(c) Glazed louvres may be used in lieu of windows and ventilators, subject to their providing a clear light area of not less than three square feet per closet pan and a clear ventilating area of not less than 27 square inches per closet pan.

Section 151—Lighting and Ventilation of Airlocks.—(1) Each airlock shall be:—

(a) Provided with a window made to open or glazed louvres on an external wall, having a clear area of not less than 3 square feet for each 100 square feet, or part of 100 square feet of floor area of airlock; or

(b) separately lighted by electricity and provided with a switch within the airlock.

(2) Except as provided in sub-section (3) of this section, every airlock shall be provided with direct ventilation to the open air from a point near ceiling level.

Such ventilation shall be provided by a vent, or vents, carried as direct to the open air as is practicable, and boxed throughout, and having a minimum clear area at any point of not less than 27 square inches for every 100 square feet, or part of 100 square feet of floor area of airlock.

(3) In private residences, the requirements of sub-section (2) of this section may be omitted, provided:—

(a) That the floor area of the airlock is not less than 20 square feet, and that the doors of water-closets are fitted with approved self-closing devices; or

(b) that other provisions are made to the approval of the Engineer.

Section 152—Alternative Methods of Lighting and Ventilating Water-closets and Airlocks.—(1) Subject to the approval of the Engineer first obtained, in writing, water-closet or urinal compartments, and airlocks in buildings, other than hospitals and similar institutions, may be ventilated by one of the following methods, instead of by the method set out in sections 151 and 152:—

(a) (i) In buildings up to four stories in height (measured from the floor of the lowest water-closet or urinal compartment to be so ventilated) the water-closet and urinal compartments and airlocks may abut on to a ventilating shaft, open to the sky and carried to such height as may be necessary to prevent the deflection of wind currents down the shaft by neighbouring structures.

No rooms, other than water-closet and urinal compartments, airlocks, and bathrooms, may open on to such shaft.

The area of such ventilating shafts, and the maximum number of water-closets or urinals to be served by any one such shaft, shall be as shown in the following table:—

Height of Ventilating Shaft in Stories.	Minimum Area of Ventilating Shaft.	Maximum Permissible Number of Closet Pans or Urinals on any Vent Shaft.
1 or 2	16 square feet	4
3 or 4	1st and 2nd stories—16 square feet 3rd story—20 square feet Top story—24 square feet	10

No dimension of such ventilating shaft shall be less than 4 feet.

(ii) In buildings in which such ventilating shaft is three or four stories in height, a ventilating duct having a clear area of not less than two square feet, shall be carried from the bottom of the ventilating shaft to an external wall, and shall be boxed throughout.

(iii) Every water-closet or urinal compartment or airlock which abuts on to a ventilating shaft as afore-mentioned shall have a window, capable of being opened to such shaft, with an effective glass area at least equal to one-fifth of the floor area of the compartment, with a minimum of four square feet, and shall be provided with ventilating openings to the ventilating shaft, having a total clear area at any point of not less than 50 square inches per closet pan.

(iv) Where water-closets or urinals are situated in a basement or cellar, in addition to the above-mentioned requirements, there shall be provided a ventilating duct, carried through the roof, and fitted with an approved cowl designed either to give a positive up draught or down draught in the duct, at the option of the owner. Such ventilating duct and cowl shall be capable of changing the air in each water-closet or urinal compartment or airlock served by it, at least six times per hour, when subject to a wind velocity of four miles per hour, the inside and outside temperatures being equal.

Ventilating ducts serving different compartments may be combined, but the minimum area of any ventilating duct shall be 25 square inches for each closet pan or urinal served by the said duct.

(b) The water closet or urinal compartment may be ventilated by a mechanical system of exhaust ventilation in compliance with the requirements of section 153.

(2) Every water-closet or urinal compartment permitted by the Authority to be ventilated in accordance with this section shall be separately lighted by electricity and provided with a separate switch within the compartment.

Section 153—Mechanical Ventilation.—(1) Every system of mechanical ventilation shall be approved by the Engineer and be capable of changing the air contents of the water-closets served at least six times per hour.

(2) In every case, the ventilating fan and the power unit operating same shall be in duplicate, unless the main air shaft shall, in the opinion of the Engineer, be designed to act as an efficient natural vent in the event of the mechanical equipment failing.

(3) Upon completion, the owner or his representative shall carry out such tests of the ventilating system as the Authority may deem necessary.

(4) Such mechanical system shall be operated continuously and maintained in good working order and condition, under the direction of a properly qualified person.

(5) Any such mechanical system shall be open to inspection by the officers of the Authority at all reasonable times, and shall be subject to such tests as the Authority shall from time to time direct.

(6) Subject to the requirements of section 111, air shafts may be used also as pipe shafts.

(7) The failure, for a period longer than 48 hours, of any such ventilating system, to operate efficiently, or to fulfil the requirements of this section, shall be an offence against this By-law.

Section 154—Construction of Water-closets.—

- (a) Each closet apartment shall be not less than 3 feet wide and 5 feet long, inside measurements, and the walls shall be at least 7 feet high at the lowest part.
- (b) The floors of all internal water-closet apartments shall be constructed of concrete of not less than 4 inches thickness or of other approved impervious material and graded as directed, or they shall be provided with safes of lead or other approved material in accordance with the requirements of sections 185, 186, and 187.
- (c) In wooden water-closets the bottom plates and plinths shall be of approved timber and the frame shall be securely fastened to the floor and made rigid, without attachment to fences.
- (d) Where repairs to wooden closet buildings are required, the studs shall be cut back to sound timber and new plates fixed to the sound ends and bedded and secured to dwarf concrete or brick walls extending up to such a height as is necessary to give the required height from the floor to the level of the top wall plates.

External closet doors shall be saw-toothed on top, and a space of 3 inches shall be left between bottom of door and floor, or other approved means of ventilation provided.

Section 155—Fixing Closet Pan.—On concrete floors, or floors of tiles set in concrete, the closet pan shall be securely bedded upon concrete or cement mortar and fixed with brass screws to approved lead dowels set in the floor. Where the floor is of timber covered with an approved impervious material the closet pan shall be secured to the timber by means of brass screws as directed or by other approved means.

Section 156—Closet Pans.—Every water-closet shall be furnished with a pan of non-absorbent material of such shape, capacity, and construction as approved by the responsible officer. Water-closet pans and fittings thereto shall be entirely open to inspection and without any enclosure. Vent horns shall be provided on all pans, even if anti-siphonage vent is required. If not used for a vent such vent horn shall be sealed with a lead disk, bituminous filler and a lead cap piece, or by other approved method.

Section 157—Closet Pan Seats.—All closet pan seats must be of the flap or hinged tip-up type. Except as approved by the responsible officer, all seats shall not be less than 1 inch in thickness and constructed of approved material. When constructed of wood, four-piece seats shall be glued and either dowelled or bolted, and one-piece seats shall be reinforced with two wood or brass slips let in flush on the underside. To prevent fouling of pan, the closet seat openings must not be larger than 10½-in. x 9-in., and seats with holes so large as to cause fouling of the pan must not be used, provided that open front seats of approved design may be used. Pans must measure at least 12 inches between the lower edge of the front and back faces of flushing rims. Water-closet seats must be provided with approved buffers to prevent damage to the pan, and an approved buffer clip must be fixed to the flush pipe at a suitable height from the pan.

Section 158—Flushing Apparatus.—Approved apparatus shall be provided for the effective application of water to the pan of the water-closet and for the efficient flushing and cleansing of the pan and effective removal therefrom of any solid or liquid matter which may from time to time be deposited therein. Such apparatus shall have a flushing capacity of not less than 2½ gallons, and shall be so constructed, fitted, and placed as to supply water for use in the pan without any direct communication with any service water pipe upon the premises.

Section 159—Flushing Cisterns.—Flushing cisterns shall be of cast iron, glass enamelled porcelain, stoneware or other material approved by the Engineer, and shall be fixed at such height as will effectively flush the pan; but, except by special permission, no cistern shall be fixed at a less height, measured from top of seat to bottom of cistern, than 5 feet, where 1½-in. flush pipe is used, or 4 ft. 6 in. where 1¼-in. flush pipe is used. There shall be a distance of at least 9 inches between top of cistern and ceiling of closet.

Every cistern shall be provided with an approved ball tap and shall have a separate stop-tap and an overflow of ½-in. internal diameter, and shall be fixed to cistern boards not less than 12 inches deep and 1¼ inch thick, or fixed in other approved manner.

Water supply pipes to cisterns shall be adequate to fill any cistern at the rate of not less than 1 gallon per minute.

Section 160—Flush Pipes.—Flush pipes to closet pans shall be of brass, copper, 6-lb. lead, galvanized-iron of not less than 22-gauge, or other approved material, and shall have a minimum diameter of 1¼-in.

Section 161—Flushing Apparatus other than Cisterns.—Notwithstanding anything contained in this By-law, closet pans in any building may be flushed by means of any apparatus which—

- (a) automatically controls the amount of water used, and/or
- (b) is approved by the Authority.

Section 162—Storage Tanks.—Except where otherwise allowed by the Authority, on request, in writing, by the owner accepting all responsibility in the matter, internal water-closets shall be provided with storage tanks capable of holding 6 gallons of water for each occupant of the building, with a minimum of 60 gallons per closet for all buildings except private residences, which shall have a minimum capacity of 30 gallons, and flats with separate external entrances, which shall have a minimum capacity of 30 gallons per tenement. These tanks may be of 22-gauge galvanized sheet iron or 24-gauge galvanized corrugated iron.

Unless otherwise directed by the responsible officer, the storage tanks may be placed in the water-closet compartment itself, on the roof over a flat or gutter, or in an accessible place between the ceiling and the roof, in which latter case a safe of galvanized-iron, lead, or other approved impervious material, with over-flow, shall be fixed under the storage tank.

Section 163—Venting Closet Pans.—Unless otherwise directed or permitted, every closet pan on an upstairs floor shall discharge into a soil-ventilator pipe, except that any closet pan on a floor which is not more than 8 feet in height from the ground surface level may be ventilated by an anti-siphonage vent only, in accordance with the requirements of sections 75 and 89, and discharge into a soil pipe without extension as a ventilator pipe; provided that no fixtures at a lower level are connected to such soil pipe.

Any closet pan where ordered, and, also, unless otherwise directed, every internal closet pan which is more than 4 feet from a fully vented soil-pipe drain as measured along the axis of the pipe between the centre of soil pipe and centre of pan, shall be ventilated by an anti-siphonage vent in accordance with the requirements of section 89, sufficiently close to prevent siphonage, and in no case more than 18 inches from the trap. Notwithstanding the above, all "S" trap pans must be provided with anti-siphonage vents.

Section 164—Grouped External Closets.—Where there are two or more external water-closet pans grouped on the ground floor or in the yard of any premises special provision to prevent siphonage may be ordered by the Engineer.

DIVISION 32.—URINALS AND FLUSHING APPARATUS.

Section 165—Urinals, General.—In every licensed victualler's property, restaurant, boarding-house, lodging-house, school, shop, factory, office, public building, or building used for public entertainment, urinal accommodation shall be provided in accordance with the requirements of the Health Acts and/or Factories and Shops Acts of the State of Victoria, or of any regulation under any of the said respective Acts or of other relevant Acts.

Section 166—Internal Urinals.—The positions, approaches, arrangement of lighting, ventilation, &c., for urinals shall comply as nearly as possible with the provisions set out in this By-law as to internal water-closets.

Section 167—Details of Construction, &c.—Except by special permission, only round-backed stall type urinals of approved impervious material shall be used. The soil pipe shall be of lead, stoneware, or glass, enamelled or coated cast-iron, or other approved material, shall be kept as short and free from bends as possible, and shall be trapped. Inspection openings shall be provided on soil pipes as directed, with clamped covers. The urinals shall be provided with approved flushing apparatus, and a hose tap shall be provided in a suitable position for hosing down.

Section 168—Treatment of Floors.—The floor in front of a urinal shall be covered with approved impervious material for a width of not less than 2 feet, or, if raised above floor level of urinal compartment, not less than 1 ft. 6 in., and graded to drain to urinal.

Impervious Materials.—The following materials will be considered impervious:—

- (a) For urinals: glazed fire clay or salt-glazed stoneware.
- (b) For floors in front of urinals: approved tiles set in cement mortar (composed of equal parts of cement and sand), concrete 4 inches thick rendered with ½-in. thick cement mortar, slate, marble, or asphaltum.

Section 169—Flushing Apparatus.—Pull and chain flushing cisterns or other approved apparatus operated by hand shall be fixed on all urinals except where automatic flushing cisterns are permitted or directed by the Engineer.

Section 170—Flushing Cisterns.—The discharge from a cistern shall be equal to 1 gallon for each urinal stall, except where otherwise allowed by the Authority, but in no case shall more than three stalls be served by a single-flushing apparatus.

The height of a cistern shall, unless otherwise allowed by special permission, be at least 6 ft. 6 in. from the floor to the bottom of the cistern. The cistern shall be so fixed that the ball tap is accessible.

A separate stop tap shall be provided for each urinal cistern.

Section 171—Flush Pipes.—Flush pipes for urinals shall be of brass or copper with gunmetal fittings, and shall have a minimum diameter of 1½-in., except that flush pipes for automatic flushing cisterns generally shall not exceed—

For 1-gallon cistern, ¾-in. internal diameter.

For 2-gallon cistern, 1-in. internal diameter.

For 3-gallon cistern, 1¼-in. internal diameter,

with branches as directed by the responsible officer of the Authority.

DIVISION 33.—SLOP SINKS.

Section 172—General.—Slop sinks shall be made in one piece of approved impervious material and provided with approved flushing apparatus of 2½-gallon capacity.

Section 173—Ventilation, Light, &c.—Slop sinks shall be so placed and ventilated as to comply with the requirements for internal water-closets as set out in this By-law.

Section 174—Bibcock over Slop Sink.—A bibcock shall be fixed directly over a slop sink, and at least 18 inches above such sink. A pedestal pan must be used wherever combined water-closet, slop sink, and internal urinals are required, and in such case must be provided with hinged tip-up seat. A lead safe of suitable area must be fixed under the pan.

DIVISION 34.—WASH TROUGHS.

Section 175—General.—Every wash trough shall be of approved pattern and material, securely fixed and graded to outlet pipe, fitted with brass strainer sunk to level of bottom of trough.

Section 176—Support for Lead Waste Pipe.—Where the distance between outlets on troughs exceeds 21 inches and lead waste pipe is used, the pipe shall be supported either by a lead tack wiped on the top of the pipe or by a wooden block screwed to the bottom of the trough and clamped to the pipe.

Section 177—Troughs Abutting Against Brick Wash Copper.—Wherever the end of a wash trough abuts against the brick-work of a wash copper, the space between the end of trough and the brick-work shall be filled with approved water-proof material, and made water-tight.

DIVISION 35.—SINKS, BATHS, LAVATORY BASINS, AND SHOWERS.

Section 178—Sinks.—All sinks shall be fixed on brackets, and traps and wastes left readily accessible.

Section 179—Galvanized Sheet-iron Baths.—The bottoms of galvanized sheet-iron baths shall be effectively supported. Such baths shall not be enclosed. Longitudinal joints in the bottoms of baths shall not be permitted. Where it is necessary to fix new wastes to galvanized-iron baths, the bottoms of which are unsupported, efficient supports for the bath must be provided before the wastes are fixed.

Section 180—Bath Traps.—Where a bath trap is fixed on the outside of a wall it shall in no case be more than 3 feet from the outlet of the bath, unless by special permission of the Engineer.

Section 181—Baths Without Flashing.—Where pedestal baths are fixed, and it is not desired to flash them, they shall be fixed with a space of at least 6 inches clear of walls.

Section 182—Venting of Lavatory Basins.—Except as hereunder all lavatory basins, placed singly, shall be provided with anti-siphonage vents. Where the length of waste pipe does not exceed 4 feet, measured from crown of trap to outlet end of waste pipe, and siphonage does not occur, the anti-siphonage vent may be omitted.

In ranges of lavatory basins, ventilation by means of a single vent pipe at the upper end of the range will be permitted provided that the vent and main waste pipe are sufficiently large to prevent siphonage.

Section 183—Tip-up Basins.—Tip-up lavatory basins shall not be permitted.

Section 184—Showers.—All shower compartments shall be provided with drainage in accordance with the requirements for baths, and the drainage outlet shall be fitted with brass grating.

The floors of shower compartments shall be well graded to the trapped outlet and shall be constructed of not less than 4 inches of concrete, trowelled smooth or covered with tiles set in cement mortar, or of other approved impervious materials, or if constructed of timber shall be covered with enamelled cast-iron, approved non-corrosive sheet-metal, or other approved material turned up at the edges and flashed, in accordance with the requirements of section 93.

The walls of shower compartments shall be constructed of brickwork or concrete, cement rendered to a smooth finish, or covered with tiles set in cement mortar, or of other approved impervious materials, or if constructed of timber shall be lined with approved non-corrosive sheet-metal or other impervious material, and with impervious joints.

DIVISION 36.—SAFES AND OVERFLOWS.

Section 185—Safes, where Required.—Safes of lead or other approved impervious material shall be fitted under slop sinks and internal water-closets, and in such other positions as directed, where there is not already an impervious waterproof floor, suitably graded and provided with a suitable drainage outlet.

Section 186—Lead Safes in Water-closets, &c.—All lead safes shall be laid with sheet-lead weighing not less than 5 lb. per square foot, and where the whole floor is not covered with lead the safe shall extend 12 inches beyond the sides and 15 inches beyond the front of the pan, measured from the outside of the basin, and shall extend back to and 3 inches up the wall and over-flashed, if directed. The roll of such safe shall be 2 inches wide and ¼ inch high. In the case of baths, sinks, and lavatory basin, the lead where directed shall extend 6 inches beyond the ends or sides, measured from the extreme edge of the fitting, and shall be carried back to and up the wall as for closets.

Section 187—Safe Overflows.—Unless otherwise permitted, every safe shall be drained by a separate 2-in. diameter pipe, provided at the inlet with a brass grating and at the outlet into the open air with a flap valve of brass or other approved metal, and shall not connect with any waste pipe, soil pipe, drain, or sewer.

Section 188—Cistern Overflows.—Every cistern supplied with water shall, unless otherwise approved, have an overflow pipe of adequate size discharging in a position where it will not cause damage, but where it will act as a warning pipe. On ground floors where cisterns are fixed over impervious floors graded to drain outside of the room, the overflow may discharge on to such floors, provided no damage is likely to arise therefrom.

Section 189—Discharges from Overflows.—Overflows may discharge into the open air above ground level only when the discharge, in the opinion of the responsible officer, will not cause any inconvenience or nuisance. In all other cases the pipes must be brought to the ground surface or be arranged to discharge where they will not prove a source of annoyance or inconvenience.

Section 190—Steam Exhaust.—No steam exhaust, blow-off condensate, or drip pipe shall be connected with any drain or any soil or waste pipe.

Section 191—Existing Floors.—Where necessary, in the opinion of the responsible officer of the Authority, every existing floor under a fixture shall be regraded and a proper waste pipe and, if directed, a flap valve fixed.

DIVISION 37.—EXISTING FIXTURES.

Section 192.—All existing fixtures, fittings, and appliances not in accordance with this By-law, which the owner may desire to remain unaltered, and which, in the opinion of the Authority, will be inoffensive, may at the distinct request, in writing of the owner, remain unaltered until such time as the Authority shall otherwise order. Existing fixtures, fittings, and appliances which, in the opinion of the Authority, are offensive shall be removed at once.

PART 6.—WATER SUPPLY.

DIVISION 38.—WATER SERVICES TO SANITARY FIXTURES.

Section 193—Supply of Water to Fixtures.—All water closets and other plumbing fixtures shall be provided by the owner with a sufficient supply of water for flushing purposes to keep them at all times in proper and cleanly conditions.

Every owner of property who desires, or has been ordered, to provide sanitary appliances for his own property and to connect his property with the sewers of the Authority, shall before or at the commencement of the work of making such connexion, provide piping approved of by the Authority for the conveyance of water, and shall cause the piping to be joined at the most convenient water supply main, or, with the permission of the responsible officer, to some pipe already joined to the main. Such piping shall be of sufficient capacity to supply all sanitary fittings on the property freely and

continuously, and convey to the flushing cistern, flushing tank, or other flushing apparatus of each water-closet on the property enough water to fill the same at a rate of not less than 1 gallon per minute, and the owner shall cause such piping to be connected with the cistern, tank, or other flushing apparatus before the completion of the work.

The water supply to any fixture shall be so arranged that there shall be an actual physical discontinuity between the water stored or used in any such fixture and that in the water service pipe. The water supply for water-closets or urinals shall not be taken from a storage tank serving a hot water service.

Section 194—Material, Condition, Capacity, &c., of Water Supply Piping.—The entire length of the water supply piping from its connexion with the water supply main to the water-closet flushing cistern, or other fixture, shall be such as is, in the opinion of the responsible officer, suitable in regard to material, condition, and capacity, to convey a sufficiency of water for the sanitary requirements of the particular tenement.

The owner shall keep the piping from becoming, whether by reason of corrosion or other cause, of insufficient capacity to fill the flushing cistern, storage tank, or other flushing apparatus at the rate of not less than 1 gallon per minute.

Section 195—Fixtures Not Connected with Sewers.—No water service pipe shall be laid to supply any fixture in any property in any sewerage area unless such fixture is connected with the sewers of the Authority, or unless special permission, in writing, has been previously given to lay such service pipe.

Section 196—Storage Tanks.—Water supply pipes to storage tanks for internal closets shall be not less than $\frac{3}{4}$ -in. diameter, and be provided with stop taps and high-pressure ball valves, except where the water pressure at the storage tank is not sufficient to allow of high-pressure ball valves being used; in such cases the permission of the Engineer shall be obtained to fix low-pressure ball valves. Where the head of the water supply of the storage tank to the flushing cistern is less than 20 feet, a low-pressure ball valve shall be provided to the cistern. Except by special permission of the Engineer the head of water supply shall in no case be less than 10 feet, measured vertically from top water level of storage tank to the level of the point of discharge into the cistern, or to the flush valve, as the case may be.

The water supply pipes from storage tanks to cistern shall not be less than the following diameter:—

- For 1 to 2 cisterns, $\frac{3}{4}$ -in. diameter.
- For 3 to 6 cisterns, 1-in. diameter.
- For 7 to 25 cisterns, $1\frac{1}{4}$ -in. diameter.
- For 26 to 50 cisterns, 2-in. diameter.

Except by special permission of the Engineer, more than ten (10) cisterns shall not be subject to a head of less than 20 feet.

Where the number of water-closets or urinals served by any storage tank exceeds two in the case of private residences or flats, or one for any other building, a full-way gate valve shall be provided on the outlet from the storage tank.

The overflow pipe from a storage tank shall not be less than $1\frac{1}{4}$ -in. in diameter, and shall lead to a gutter or open drain outside the building or out-building. In all water-closets, a lead or annealed copper connexion not less than 12 inches in length shall be used between the flushing cistern and the supply pipe.

Section 197—Supply Pipe Connexion with Flushing Cistern.—In all water-closets, where directed, a piece of lead or annealed copper pipe not less than 12 inches in length shall be used between the flushing cistern and the stop-cock on the supply pipe.

The above By-law was made and passed by the Portland Sewerage Authority on the 6th day of August, 1940, and confirmed on the 28th day of August, 1940.

In witness whereof the common seal of the Authority was hereto affixed in the presence of—

(SEAL) JAS. G. MURRELL, Chairman.
B. L. WILKINS, Member.
E. NOEL T. HENRY, Secretary.

Approved by the Governor in Council.

Clerk of the Executive Council.

LANCEFIELD WATERWORKS TRUST.

RATING BY-LAW FOR THE YEAR 1941 AS PASSED BY THE TRUST ON 15TH OCTOBER, 1940.

THE Lancefield Waterworks Trust, in pursuance and exercise of the powers conferred by the Water Acts, doth hereby make a rate for the supply of water, for domestic purposes, of Three shillings and six pence in the pound of the annual municipal valuation of lands and tenements liable to be rated within the Lancefield Urban District.

Provided that in no case shall the amount of rate payable per annum in respect of any tenement (other than land on which there is no building) be less than Fifty shillings, and in respect of any land on which there is no building, less than Ten shillings.

Such rates are made and shall be levied upon occupiers or owners of the said lands and tenements for the year commencing the 1st day of January, 1941, and shall be payable in two moieties on the 1st day of January, 1941, and on the 1st day of July, 1941, at the office of the said Trust.

Dated this 15th day of October, 1940.

(SEAL) GEO. HALL, Chairman.
J. S. RUMMING, Secretary.

BRIGHT WATERWORKS TRUST.

RATING BY-LAW, 1941.

THE Commissioners of the Bright Waterworks Trust, in pursuance of the powers conferred by the Water Acts, do hereby make the following By-law:—

The following are the rates and charges which the occupiers or owners of the lands and tenements liable to be rated shall pay for the year 1941, in respect of the water supplied by the Trust within the Urban District of the said Trust:—

- (1) For all lands and tenements of the annual municipal valuation of Eighteen pounds or under—the sum of One pound ten shillings.
- (2) For all lands and tenements exceeding the annual municipal valuation of Eighteen pounds—the rate of One shilling and eight pence in the pound sterling.
- (3) The above-mentioned rates and charges shall be payable on the 1st day of March, 1941.
- (4) Such person or persons as the Commissioners may from time to time appoint for that purpose shall be authorized to demand, receive, and collect and recover the said rates and charges.

Passed this 14th day of October, 1940.

(SEAL) W. H. MANNING, Chairman.
E. J. DELANY, Secretary.

MARYBOROUGH WATERWORKS TRUST.

BY-LAW No. 39.

THE Maryborough Waterworks Trust, hereinafter referred to as "the Trust," in pursuance and exercise of the powers conferred by the Water Acts, doth hereby make the By-law following for preventing the waste and misuse of water supplied by the said Trust within the Maryborough Urban District within the Maryborough Waterworks Trust District:—

1. During the period commencing with the 1st day of November, 1940, and ending with the 30th day of June, 1941, no person shall use or permit to be used or allowed to run on any premises any water for other than domestic purposes, manufacturing or fire-fighting purposes, or the use of hoses for other than fire-fighting purposes, excepting within the hours and days of each week as mentioned hereunder.

2. No person shall connect or permit to be connected any hose or hoses to taps on any premises for the use of water for other than domestic purposes, manufacturing or fire-fighting purposes, excepting within the hours and days of each week as mentioned hereunder.

3. No person shall use or permit to be used any hose for the use of water for other than domestic purposes, manufacturing or fire-fighting purposes, unless such hose is held by hand, and within the days and hours of each week as mentioned hereunder:—

South Ward of the Borough of Maryborough.

Mondays and Thursdays of each week from 6 p.m. to 9 p.m.

East Ward of the Borough of Maryborough.

Tuesdays and Fridays of each week from 6 p.m. to 9 p.m.

West Ward of the Borough of Maryborough.

Wednesdays and Saturdays of each week from 6 p.m. to 9 p.m.

4. Every person who shall use, or permit, or suffer water supplied by the Trust to be used contrary to the provisions of this By-law shall be guilty of an offence, and shall be liable to a penalty not exceeding Five pounds, recoverable summarily

before any court of competent jurisdiction and in cases of continuing the offence to a further penalty not exceeding Five pounds for every day after notice of the offence from the Trust.

5. If any person supplied with water by the Trust wrongly does, or causes, or permits to be done anything in contravention of this By-law, the Trust may (without prejudice to any remedy in respect thereof), close or cut off any pipes by or through which water is supplied by the Trust to him or for his use, and may cease to supply him with water as provided by the Water Acts.

The foregoing By-law was made by the Maryborough Waterworks Trust on the 17th day of October, 1940, and the common seal of the said Trust was hereto affixed on the 17th day of October, 1940.

FOSTER WATERWORKS TRUST.

BY-LAW No. 1.

Standing Orders for Regulating and Appointing the Place and Hour of Meetings of the Foster Waterworks Trust and Providing for the Management and Conduct of Business Thereat.

THE Foster Waterworks Trust, in pursuance and exercise of the powers and authorities conferred by the Water Acts, doth hereby make the By-law following for its Waterworks District:—

1. In all cases not provided for by the Acts of Parliament of Victoria relating to authorities, or by this By-law, resort shall be had to the rules, forms, and usages of the Parliament of Victoria, which shall be followed so far as the same are applicable to the proceedings of the Trust.

2. *Place and Hour of Meetings.*—Meetings of the Trust shall be held periodically on the third Friday in the month, at half-past Seven o'clock p.m., at the Shire Office, Foster. Upon notice of motion the time, day, and hour of the meeting may be altered by a majority of the Commissioners.

3. *Meetings, Notice of.*—A notice of every regular meeting of the Commissioners shall be, by the Trust Secretary, delivered or sent by post, addressed to the usual address of Commissioner, three clear days at least prior to the day on which such intended meeting is to be held.

4. *Meeting, Resolutions at, Not to be Revoked.*—No resolution at any meeting of the Commissioners shall be revoked or altered at any subsequent meeting unless notice of intention to propose such revocation or alteration be given by the Trust Secretary to each of the Commissioners seven days at least before holding the meeting, nor unless such revocation or alteration be determined upon by a majority consisting of two-thirds of the Commissioners present at such subsequent meeting (if the number of the Commissioners present at such subsequent meeting be not greater than the number present when such resolution was come to), or by majority if the number of Commissioners present at such subsequent meeting be greater than the number present at such former meeting.

5. *Business, &c., Order of, Minutes.*—At every meeting of the Commissioners the first business thereof shall be reading and putting a question for the confirmation of the minutes of the proceedings at the preceding meeting, and no discussion shall be permitted thereon except as to their accuracy as a record of the proceedings, and the rough minutes of the proceedings of the Commissioners at any meeting shall be read at the close of such meeting, if required by any Commissioner present at such meeting.

6. After the signing of the minutes by the Chairman, the order of business of any ordinary meeting shall be as follows, or as near thereto as may be practicable, but for the greater convenience of the Commissioners at any particular meeting thereof it may be altered by resolution to that effect:—

- (1) Reading of copies of letters sent by the authority of the Commissioners, if called for.
- (2) Reading letters received and considering and ordering thereon.
- (3) Reception and reading of petitions and memorials.
- (4) Receiving deputations from the ratepayers.
- (5) Presentation of reports of committees and officers.
- (6) Payments.
- (7) Orders of the day, including subjects continued from proceedings of former meetings, and any business the Chairman may think desirable.
- (8) Other motions of which previous notice has been given.
- (9) Notices of motion and the order of business at a special meeting shall be the order in which such business stands in the notice thereof.

7. *Titles, Official.*—The Commissioners, in meeting, shall designate each other by their official titles, namely, that of Chairman, or Commissioner, as the case may require.

8. *Who to Speak.*—If two or more Commissioners rise to speak at the same time, the Chairman shall decide which is entitled to priority.

9. *Chairman to Rise Whilst Addressing Meeting.*—The Chairman shall rise in addressing the Commissioners to discuss any question, and shall not leave the Chair on such occasions.

10. *Commissioners Not to Speak Twice on the Same Question.*—No Commissioner shall speak twice on the same question unless entitled to reply, or in the explanation when he has been misrepresented or misunderstood.

11. *Points of Order.*—The Chairman, when called upon to decide on points of order or practice, shall state the provision, rule, or practice which he deems applicable to the case, without discussing or commenting on the same, and his decision as to order or explanation in each case shall be final.

12. *Commissioners Not to Digress or Impute Improper Motives.*—No Commissioner shall digress from the subject-matter of the question under discussion, nor impute improper motives, and all personal reflections on Commissioners shall be deemed disorderly, and every Commissioner so doing shall, upon being called to order by the Chairman, apologize for such conduct, and withdraw such imputations or reflections, as the case may be.

13. A Commissioner called to order shall sit down, unless permitted to explain.

14. *Persons Not Commissioners to Leave when Requested.*—No person not being a Commissioner who, having been admitted to any meeting of the Commissioners, shall be guilty thereof of any improper or disorderly conduct, and every such person shall leave such meeting when requested by the Chairman to do so.

15. *Call of the Commissioners.*—No Commissioner shall absent himself from any meeting held in compliance with an order for a call of the whole Commissioners without reasonable excuse to the satisfaction of the majority thereof.

16. *Documents to be Produced.*—Any Commissioner may of right demand the production of any of the documents of the Commissioners applying to the question under discussion.

17. *Motions, Amendments, and Notice Thereof.*—All notices of motion shall be in writing, dated and numbered, and given by the intending mover to the Trust Secretary at the close of meeting of the Commissioners; or if not given at the meeting then seven days prior to the day upon which the next meeting of the Commissioners is to take place, and the Secretary shall enter the same in the notice of motion book in the order in which they may be received.

18. *No Motion Without Notice.*—No member shall make any motion initiating a subject for discussion except in pursuance of notice given as prescribed in the last preceding clause.

19. *Motions on Petitions.*—No motion except that for the receiving the same shall, unless under most urgent circumstances, be made on any petition, memorial, or other like application until the next ordinary meeting of the Commissioners after that at which it has been presented.

20. *Motions to be Moved in Order.*—Except by leave of the Commissioners, motions shall be moved in the order in which they have been received and recorded by the Trust Secretary in the notice of motion book, and if not so moved or postponed shall be struck out.

21. *Motions Not to be Proceeded With in the Absence of the Mover.*—No motion entered in the notice of motion book shall be proceeded with in the absence of the Commissioner who gave notice of the same, unless by some other Commissioner producing written authority from him to that effect.

22. No motion for an address or petition shall be entertained unless the mover shall, at some previous meeting, have submitted a draft of the same.

23. *Mover of Motion or Amendment Not to be Interrupted.*—Any Commissioner desirous of making a motion or amendment, or taking part in discussion thereon, shall rise and address the Chairman, and shall not be interrupted unless called to order, when he shall sit down until the Commissioner calling to order shall have been heard thereon, and the question or order disposed of, when the Commissioner in possession of the chair may proceed with the subject.

24. *Nature of Motion to be Stated.*—Any Commissioner desirous of proposing an original motion or amendment must state the nature of the same before he addresses the Commissioners thereon.

25. *Leave to be Obtained Before Motion Withdrawn.*—No motion or amendment shall be withdrawn without the leave of the Commissioners.

26. *Motions to be Seconded Prior to Discussions.*—No motion or amendment shall be discussed or put to the vote of the Commissioners unless it be seconded; but a Commissioner may, however, require the enforcement of any standing order of the Commissioners by directing the Chairman's attention to the infraction thereof.

27. *Mover and Not the Seconder Held to Have Spoken.*—A Commissioner moving a motion shall be held to have spoken thereon, but a Commissioner merely seconding shall not be held to have spoken upon it.

28. *Motions to be in Writing.*—At every meeting of the Commissioners all motions, whether original motions or amendments, shall be reduced to writing, signed by the mover, and

be delivered to the Chairman immediately on their being moved and seconded.

29. *Amendments.*—No second or subsequent amendment, whether upon an original proposition or on an amendment, shall be taken into consideration until the previous amendment is disposed of.

30. *Amendment to Become the Question.*—If an amendment be carried, the amendment shall become itself the question, whereupon any further amendment upon any portion of the question may be moved.

31. *Second Amendment May be Moved.*—If an amendment be negatived, then a second may be moved to the question to which the first-mentioned amendment was moved, but only one amendment shall be submitted to the Commissioners for discussion at a time.

32. *Right of Mover to Reply.*—The mover of every original proposition, but not of any amendment, shall have a right to reply, immediately after which question shall be put from the Chair, but no Commissioner shall be allowed to speak more than once on the same question unless permission be given to explain or the attention of the Chair be called to a point of order.

33. *Adjournment, Motion for.*—No discussion shall be allowed on any motion for adjournment of the Commissioners, but if, on the question being put, the motion be negatived, the subject then under consideration, the next on the notice paper, shall be discussed, or any other that may be allowed precedence before any subsequent motion of adjournment be made.

34. *Protest, Commissioners May.*—Any Commissioner may protest against any resolution of the Commissioners, and notice of intention to protest shall in every case be given forthwith on the adoption of the resolution protested against, and the protest shall specify the reasons for protesting, and shall be entered three days at least before the next ordinary meeting of the Commissioners by the protesting Commissioner in a book to be kept for that purpose in the Trust Secretary's office, and signed by such Commissioner, and shall also be entered in the minutes of the meeting at which notice of the intention to protest shall have been given previously to the confirmation thereof; but such protest may be expunged from the minutes if declared by a majority of the Commissioners to be not in accordance with truth or in its terms disrespectful to the Commissioners.

35. *Legal Questions.*—If a debate on any motion moved and seconded be interrupted by the number of Commissioners present becoming insufficient for the transaction of business, such debate may be resumed at the point where it was so interrupted on motion upon notice.

36. *Order of the Day to be Restored.*—If a debate on any order of the day be interrupted by such insufficiency of number as aforesaid happening, such order may be restored to the notice book for a future day on motion upon notice, and then such debate shall be resumed at the point where it was so interrupted.

37. *Voting.*—Whenever a division shall be demanded by any Commissioner, the Commissioners voting in the affirmative shall first hold up their hands, and all those voting in the negative shall then hold up their hands, and result be declared by the Chairman. The Chairman shall have a deliberate vote, and in case of an equal division he shall have a casting vote, and every Commissioner present shall vote except he be disabled by law from so doing.

38. *Questions to be Put.*—The Chairman shall, in taking the sense of the Commissioners, put the question first in the affirmative, then in the negative, and the result thereof shall be recorded in the minutes.

39. *Contents of Petitions.*—It shall be incumbent on every Commissioner presenting a petition to acquaint himself with the contents thereof and to ascertain that it does not contain language disrespectful to the Commissioners and that the contents do not violate any By-law or any provision thereof.

40. *Name at Beginning of Petition.*—Every Commissioner presenting a petition to the Commissioners shall write his name at the beginning thereof.

41. *Petition to be in Writing.*—Every petition shall be in writing and not printed or lithographed, and shall contain the prayer of the petitioner at the end thereof, and be signed by at least one person on every sheet on which it is written.

42. *How Signed.*—Every petition shall be signed by the persons whose names are appended thereto by their names or marks and by no one else, except in cases of incapacity by sickness.

43. *No Letters, &c., to be Attached.*—No letters, affidavits, or other documents shall be attached to any petition.

44. *Presentation of Petitions.*—Every Commissioner presenting a petition to the Commissioners shall confine himself to a statement of the persons from whom it comes, of the number of signatures attached to it, of the material allegations contained in it, and to the reading of the prayer thereof.

45. *Deputations.*—Deputations from the ratepayers wishing to be heard before the Commissioners in support of any petition or otherwise must send in an application, in writing, to the Trust Secretary the day before the meeting of the Commissioners at which such petition is intended to be presented.

46. *Cheques to be Signed.*—That all cheques shall be signed by two Commissioners and countersigned by the Secretary.

47. *Appointment to Permanent Office.*—No appointment to any permanent office at the disposal of the Commissioners shall take place until seven clear days' public notice shall have been given by advertisement in one or more newspapers circulating in the Town of Foster inviting applications from qualified candidates for same.

48. *Salaries to be Fixed.*—The salary or allowance attached to all offices and places at the disposal of the Commissioners shall in all cases be fixed before they proceed to appoint any person to fill the same.

49. *Commissioners, &c., Not to be Surety.*—No Commissioner or officer of the Commissioners, and no assessor or auditor, shall be received as a surety for any officer appointed by the Commissioners, or for any work to be done for the Commissioners.

50. *Contracts.*—In all cases of security being given for the faithful performance of any contract, the expenses of preparing such security shall be borne by the person providing the same.

51. *Plans, &c.*—All the plans and specifications for any public work shall be laid before the Commissioners at least six days prior to the same being considered and ordered upon, and be open for inspection by any Commissioner during that time, except in cases of emergency.

52. *Secretary to Expend Moneys.*—It shall be lawful for the Trust Secretary from time to time, on the written order of the Chairman, to disburse such moneys as shall have been appropriated by the Commissioners for the purposes of this clause, and as shall be required for any necessary occasion, not exceeding in the whole in an interval between two ordinary meetings of the Commissioners, the sum of Ten pounds.

53. *Addresses to the Governor, &c.*—All addresses to the Governor shall be presented by the Chairman and Trust Secretary, unless otherwise ordered by the Commissioners.

54. *Suspension of Regulations.*—Any one of more of the rules and provisions herein contained may be suspended for a special purpose on motion upon notice being given, and shall not otherwise be suspended except by a unanimous vote of the Commissioners.

55. *Penalty.*—Every person who shall so offend against this By-law shall be liable to a penalty not exceeding Five pounds for each such offence.

56. *Common Seal.*—The common seal of the Trust shall be kept in a locked box of which the key shall be kept by the Trust Secretary, and the corporate seal shall not be affixed to any document unless the Chairman, or in the absence of the Chairman, unless two Commissioners be present.

Passed this 15th day of March, 1940, and confirmed on the 16th day of August 1940.

(SEAL) F. FISHER, Chairman.
W. R. JACKSON, Commissioner.
W. S. PEARL, Secretary.

STATE RIVERS AND WATER SUPPLY COMMISSION.

BY-LAW No. 3960.—RATES AND CHARGES FOR WATER—URBAN DISTRICTS AND URBAN DIVISIONS.

THE State Rivers and Water Supply Commission, in pursuance and exercise of the powers conferred by the Water Acts, doth hereby make the By-law following:—

1. The following rates for the supply of water for domestic purposes are hereby made, and shall be levied upon the occupiers or owners of tenements and lands within the respective Urban Districts and Urban Divisions as set out hereunder:—
 - (1) Of any tenement (other than land on which there is no building) situate in a street in which a pipe for the supply of water has been laid down—a rate of such amount in the pound of the annual municipal valuation of such tenement as is set down in column 2 opposite the name of the respective Urban District and Urban Division in column 1 of the Schedule hereto: Provided that the total amount of the rate payable annually for the supply of water as aforesaid to any such tenement shall not be less than the sum set down in column 3 opposite the name of the respective Urban District and Urban Division in column 1 of the said Schedule.
 - (2) Of lands on which there is no building, situate in a street in which a pipe for the supply of water has been laid down—a rate of such amount in the pound of the annual municipal valuation of such lands as is set down in column 2 opposite the name of the respective Urban District and Urban Division in column 1 of the said Schedule: Provided that the total amount of the rate payable annually for the supply of water as aforesaid to any such lands shall be not less than the sum set down in column 4 opposite the name of the respective Urban District and Urban Division in column 1 of the said Schedule.
 - (3) Of any tenement or land within the Berriwillock, Beulah, Birchip, Culgoa, Dimboola, Hopetoun, Jeparit, Jung Jung, Lake Boga, Manangatang, Merbein, Minyip, Natimuk, Nyah, Nyahwest, Ouyen, Piangil, Quambatook, Rainbow, Rupanyup, Sea Lake, Ultima, Watchem, Woomelang, and Wycheproof Urban Districts, and within the Cohuna and Corop Urban Divisions on which there is no building situate otherwise than in a street in which a pipe for the supply of water has been laid down, and which tenement or land is not supplied with water by reticulation from any service pipe of the Commission, and being within a quarter of a mile of any stand-pipe of the Commission for the supply of water—one-half of the amount which would be payable if the tenement or land were supplied with water from service pipes; and where such tenement or land is over a quarter of a mile from a stand-pipe of the Commission, and within half a mile thereof—one-fourth of such amount.
 2. Such rates are made and shall be levied for the year beginning with the 1st day of July, 1940, and ending with the 30th day of June, 1941, and shall be payable on the 1st day of November, 1940, at the office of the State Rivers and Water Supply Commission, at the place set down in column 6 opposite the name of the respective Urban District and Urban Division in column 1 of the said Schedule.
 3. The maximum quantity of water to be supplied per annum without further charge to properties rated by the Commission shall be the quantity which, if charged for at the amount per 1,000 gallons set down in column 5 opposite the name of the respective Urban District and Urban Division in column 1 of the said schedule, would give an amount equal to that payable per annum in respect of the properties so supplied under the provisions of any By-law of the Commission for making and levying rates.
 4. For all water supplied per annum in excess of the maximum quantity referred to in clause 3 of this By-law the charge shall be the amount per 1,000 gallons set down in column 5 opposite the name of the respective Urban District and Urban Division in column 1 of the said Schedule.
- Such charge shall be payable on demand at the office of the State Rivers and Water Supply Commission at the place mentioned in column 6 opposite the name of the respective Urban District and Urban Division in column 1 of the said Schedule.
5. Such person or persons as the State Rivers and Water Supply Commission may from time to time appoint for that purpose shall be and is or are hereby authorized to demand, receive, collect, and recover the said rates.

NOTICE TO MARINERS.—VICTORIA.

[No. 15 of 1940.]

THE following Notice to Mariners, which has been received from the Harbor Master, Geelong, is published for general information.

D. STEVENSON,
Port Officer.

Ports and Harbors Branch, Department of Public Works, Melbourne, C.2. 28th October, 1940.

THE GEELONG HARBOR TRUST COMMISSIONERS.

PORT OF GEELONG.—POINT HENRY SIGNAL STATION.

Masters, Pilots, and others are hereby notified that a new Signal Station has been established on the bluff at Point Henry.

The building, which is of cream-coloured bricks, is 40 feet in height, the top of which is 65 feet above High Water.

The building is surmounted by a Signal Mast and Yard, the position of which is lat. 38 deg. 07 min. 53 sec. S.; long. 144 deg. 25 min. 19 sec. E.

The bearings and distances from Nos. 1 and 5 beacons, Hopetoun Channel, are as follow:—

From No. 1 beacon—224 deg. 4,761 feet.
From No. 5 beacon—115½ deg. 5,326 feet.

The Station has been established primarily for the more adequate control of traffic through the Wilson's Spit and Hopetoun Channels, and will come into operation on or about the 7th November, 1940. Simultaneously, the control stations at Portarlington and Moorabool Pier, Geelong, will cease to function.

The triangular Neon lights on Portarlington Pier will be discontinued and will be replaced by a fixed green light—visible 3 miles.

Point Henry Signal Station is fitted with a 24-in. search-light for daylight signalling and with an electric morse lamp for night signalling. Communication can also be effected by means of International Code of Signals, and the Station is connected to the general telephone system. The procedure to be adopted for the control of traffic is as follows:—

By Day.

Inward bound vessels approaching No. 2 Buoy, Wilson's Spit Channel, should keep a lookout for the projector light at the Station, which will make the general call sign, consisting of a series of the letter "A" in morse code, viz., — — — — —, &c. This sign will be continued until the vessel concerned hoists her answering pennant to the "dip" position.

If the Channel is open to inward traffic, the word "Proceed," or, if closed, the word "Stop" will be signalled in morse. When the signal is understood, the vessel should in either case hoist her answering pennant "close up."

In the event of a failure of the projector light, the following one-flag signals will be flown from the Yard-arm:—

International Code Flag V.—Channel open to inward traffic.

International Code Flag N.—Channel closed to inward traffic.

No. 383.—13464/40.—3

Outward bound vessels desirous of proceeding through the channels will (a) if moored at a pier or wharf, obtain permission from the Signal Station by telephone; (b) if at anchor by hoisting the International Code Signal S.W.

By Night.

Inward bound vessels will receive their instructions by morse signal lamp, situated immediately above the roof of Signal Station building. Vessels will acknowledge receipt of these signals in the usual way on their own signal lamp.

Outward bound vessels—

- (a) If moored at a pier will communicate with Signal Station by telephone as "By Day."
- (b) If at anchor by communication with Signal Station by morse Signal Lamp.

A continuous watch will be maintained at Point Henry Signal Station, and the Signalmen will at all times receive and transmit messages between Shipmasters and their Agents, and will supply such information as may be desired.

TRAFALGAR WATERWORKS TRUST.—ALTERATION IN THE CONSTITUTION OF THE TRUST.

WHEREAS by an Order in Council bearing date the 13th day of October, 1924, a certain Waterworks Trust, known as the Trafalgar Waterworks Trust, was duly constituted, and it was ordered and provided that the councillors for the East Riding of the municipal district of the Shire of Narracan and three other persons should be the Commissioners of the said Trust.

And whereas a petition has been signed by a majority of the ratepayers within the Waterworks District of the said Trust praying that the municipal councillors for the East Riding of the municipal district of the Shire of Narracan and the three other persons appointed Commissioners of the said Trust shall cease to hold office as such Commissioners, and that they be succeeded by seven Commissioners, six of whom shall be elected by the ratepayers within the Waterworks District of the said Trust, and one shall be appointed by the Governor in Council.

Now, therefore, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council of the said State, and in pursuance of the powers conferred upon him by the provisions of the Water Acts, doth hereby declare that the persons holding office as Commissioners of the said Trafalgar Waterworks Trust, by virtue of their office as municipal councillors for the East Riding of the municipal district of the Shire of Narracan and the three other persons

appointed Commissioners of such Trust shall, after the twenty-second day of January, 1941, cease to hold office as such Commissioners accordingly, and shall, after such day, be succeeded by seven Commissioners, six of whom shall be elected for such Trust on the twenty-third day of January, 1941, in the manner prescribed by regulations made for that purpose, and also for the purpose of conducting subsequent elections, and one shall be appointed by the Governor in Council.

HEPBURN WATERWORKS TRUST.—AUTHORITY TO OBTAIN BANK OVERDRAFT.

HIS Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby authorize, in pursuance of section 271 of the *Water Act 1928* (No. 3801), the Hepburn Waterworks Trust to obtain an advance or advances during the year 1940 from the National Bank of Australasia Limited, Daylesford, by overdraft of the Trust's current account thereat, such overdraft not to exceed at any one time the sum of Two hundred and fifty pounds (£250).

BENALLA WATERWORKS TRUST.—SALE OF LAND.

HIS Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, and in pursuance of the provisions of the Water Acts, doth hereby approve of the sale by the Benalla Waterworks Trust of the land hereunder described:—

Part of Crown allotment 108, Parish of Myrree, County of Delatite, being the whole of the land more particularly described in leasehold certificate of title, vol. 1140, fol. 227975.

And the Honorable Francis Edward Old, His Majesty's Minister of Water Supply for the State of Victoria, shall give the necessary directions herein accordingly.

COUNTRY ROADS BOARD.

At the Executive Council Chamber, Melbourne, the
twenty-eighth day of October, 1940.

PRESENT:

His Excellency the Governor of Victoria.

Mr. Lind

Mr. Tuckett.

Mr. Hyland

ORDER APPROVING OF A NEW MAIN ROAD IN THE
SHIRE OF BERWICK.

WHEREAS the Country Roads Board constituted under the *Country Roads Act 1928* (No. 3662) has represented to His Excellency the Governor in Council that it appears to it desirable that the new Woori Yallock-Pakenham-Koo-wee-rup road in the Shire of Berwick should be made by the said Board: And whereas the said Board in accordance with the requirements of section 19 of the said cited Act has caused to be prepared a map plan and estimate showing the points between which and on and through what land the said new road is proposed to be made and the cost of acquiring the land and constructing the said new road: And whereas on an inspection of the said map and plan and a consideration of the said estimate His Excellency the Governor in Council is satisfied that there are funds legally available for acquiring the land and constructing the said new road: Now therefore be it known by this present Order that His Excellency the Governor of the State of Victoria with the advice of the Executive Council thereof doth hereby approve of the said road being made, that is to say:—

All those pieces of land in the Parish of Nar-nar-goon the boundaries of which are as follow:—

- (a) Commencing at the north-eastern angle of allotment 96c of the said parish; thence by lines bearing respectively 153 deg. 57 min. 350 links, 317 deg. 35 min. 318.4 links, 297 deg. 1 min. 298.7 links, and 99 deg. 47 min. 332 links to the point of commencement.
- (b) Commencing at a point on the eastern boundary of allotment 94b of the said parish, distant 153 deg. 57 min. 1,166.5 links from the north-eastern angle of the said allotment; thence by lines bearing respectively 153 deg. 57 min. 240 links, 187 deg. 4 min. 240 links, 355 deg. 16 min. 230.7 links, and 345 deg. 45 min. 231 links to the point of commencement—

which said pieces of land are particularly delineated and shown coloured red on survey plan No. 4469, lodged in the office of the Country Roads Board.

ORDER APPROVING OF A NEW STATE HIGHWAY IN
THE SHIRE OF BROADMEADOWS.

WHEREAS the Country Roads Board constituted under the *Country Roads Act 1928* (No. 3662) has represented to His Excellency the Governor in Council that it appears to it desirable that the new Hume Highway in the Shire of Broadmeadows should be made by the said Board: And whereas the said Board in accordance with the requirements of section 19 of the said cited Act has caused to be prepared a map plan and estimate showing the points between which and on and through what land the said new highway is proposed to be made and the cost of acquiring the land and constructing the said new highway: And whereas on an inspection of the said map and plan and a consideration of the said estimate His Excellency the Governor in Council is satisfied that there are funds legally available for acquiring the land and constructing the said new highway: Now therefore be it known by this present Order that His Excellency the Governor of the State of Victoria with the advice of the Executive Council thereof doth hereby approve of the said highway being made, that is to say:—

All that piece of land in the Parish of Kalkallo, the boundaries of which are as follow:—Commencing at the north-eastern angle of Crown portion 24 of the said parish; thence by lines bearing respectively 180 deg. 0 min. 8,000 links, 270 deg. 0 min. 75 links, 300 deg. 0 min. 8,000 links, and 90 deg. 0 min. 75 links to the point of commencement—which said piece of land is particularly delineated and shown coloured red on survey plan No. 4473, lodged in the office of the Country Roads Board.

DECLARATION OF A DEVIATION FROM THE PRINCES
HIGHWAY IN THE SHIRE OF WERRIBEE.

WHEREAS by section 58 of the *Country Roads Act 1928* (No. 3662) it is amongst other things enacted that when the Country Roads Board under the provisions of the Country Roads Act has by Resolution declared a deviation to be a State Highway the said Board may also declare that such deviation shall be in lieu of any existing highway or part thereof named in such Resolution and that on publication in the *Government Gazette* of the Order confirming such Resolution the existing highway or part thereof shall cease to be a State Highway or be discontinued as provided in the Resolution: And whereas the said Board has by Resolution declared the deviation on the land described in the First Schedule to such Resolution to be a State Highway and has also declared that such deviation shall be in lieu of the part of the existing highway being the land described in the Second Schedule to the said Resolution and that such part of the said existing road as is described in the Third Schedule shall be discontinued: Now therefore His Excellency the Governor of the State of Victoria by and with the advice of the Executive Council thereof doth hereby confirm the said Resolution.

*Resolution for Declaration of a Deviation under the Country
Roads Act.*

Whereas the land the site of the highway the course of which is below set out was taken by the Board under the provisions of the *Country Roads Act 1928* for the purpose of constructing such highway deviation which highway deviation has now been laid out and formed on the same: And whereas the said Board (being the Country Roads Board incorporated under the said Act) thinks that the highway aforesaid is fit to be used as a public highway such Board at a meeting now holden acting under the authority conferred upon it by section 58 of the said Act doth by this present Resolution hereby declare the said highway deviation the course of which is described in the First Schedule hereto with the commencing and terminating points thereof respectively specified to be part of a State Highway within the meaning and for the purposes of the *Country Roads Act 1928*: And the said Board doth also declare that such deviation shall be in lieu of the existing highway or part thereof described in the Second Schedule hereto and that such part of the said existing road as is described in the Third Schedule shall be discontinued.

Mr. Tuckett.

GENERAL FIRE LIGHTING REGULATIONS 1940.

IN pursuance of the powers contained in the Forests Acts and of all other powers thereto enabling him, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby repeal the Regulations under section 69, sub-section (5), of the Forests Act 1928, made on the fifteenth day of January, 1935, and doth hereby make the following Regulations (that is to say):—

1. These Regulations may be cited as the "General Fire Lighting Regulations 1940," and shall come into operation upon publication in the *Government Gazette*.

2. During any prohibited period within any fire protected area or during any proclaimed period within a proclaimed area under the Forests Acts (not being portion of an acute fire danger period under section 7 of the Forests Act 1939 (No. 4703)), as the case may be, fires may be lit or maintained in the open air by any person, provided that the conditions and precautions set out hereunder are observed.

(i) In the case of fires for the purpose of *preparing meals or providing warmth for personal comfort*, provided that—

- (a) during any proclaimed period or whenever there is danger of the spread of the fire, all such fires shall be confined to properly constructed stoves, receptacles, fireplaces, or trenches at least 18 inches deep, and no such fire may be left unattended at any time;
- (b) under no circumstances during any prohibited period shall any such fire occupy an area in excess of 10 square feet;
- (c) the area within a radius of 10 feet of such fire shall be thoroughly cleared of all inflammable material;
- (d) no such fire shall be lit or maintained in circumstances of climate or position so that any forest produce or the property of any other person is injured or destroyed or is in danger of being injured or destroyed;
- (e) every such fire shall be thoroughly and completely extinguished before being left;
- (f) every such fire shall be extinguished instantly upon request of a forest officer or member of the Police Force.

(ii) In the case of fires for the purpose of *burning refuse in incinerators*, provided that—

- (a) every such fire be effectively restricted to the limits of the said incinerator;
- (b) the area within a radius of 20 feet of the said incinerator be thoroughly cleared of all inflammable material;
- (c) an adequate supply of water be readily available for fire extinguishment at all times when any such fire is burning;
- (d) such fire be thoroughly and completely extinguished before being left.

(iii) In the case of fires for the purpose of *burning any stubble*, provided that—

- (a) no such burning shall commence before 4 o'clock p.m.;
- (b) at the time of burning the temperature does not exceed 90 deg. Fahr., and that not more than a light breeze is prevailing;
- (c) a firebreak, comprised of one ploughed strip at least 15 feet in width or alternatively comprised of two ploughed strips each at least 5 feet wide and at least 5 feet apart with such intervening space cleared by burning against the wind at least 24 hours before the main body is lighted, has been made around the said stubble and around all trees and timber less than 100 feet within the boundary of the area to be burnt;
- (d) at least three men equipped with adequate fire-fighting appliances be present at the fire until it is extinguished;

- (e) the fire be thoroughly extinguished before sunrise on the day following and at no time be left unattended;
- (f) notice in writing has been given by him to the occupiers of all land contiguous to the land upon which such stubble is intended to be burnt at least 24 hours before burning as aforesaid of the time at which it is his intention so to burn;
- (g) where the stubble is situate within 1 mile of any State forest or national park, notice of intention to burn be forwarded either in writing by registered post or personal service, or by telegram to the nearest forest officer and member of the Police Force not less than 48 hours before the day on which it is intended to burn.

(iv) In the case of fires for the purpose of *burning firebreaks* not less than 15 feet nor exceeding 132 feet in width in grasslands, not being portion of a State forest or national park, provided that—

- (a) no such burning shall commence before 4 o'clock p.m., and that at no time the fire be left unattended;
- (b) at the time of burning the temperature does not exceed 90 deg. Fahr., and that not more than a light breeze is prevailing;
- (c) a strip of land at least 5 feet wide on either side of the proposed firebreak be completely cleared of all inflammable material and that the length of break burnt at any one time does not exceed 200 yards. In stony or other unploughable ground in lieu of the cleared strip of land a strip not less than 5 feet wide may be thoroughly wetted with water on all sides of the firebreak provided that the interior area is burnt whilst the strip is thoroughly wet and that the length of such firebreak burnt at any one time shall not exceed 100 yards before the next section is wetted and burned;
- (d) at least three men equipped with adequate fire-fighting appliances be present at the fire until it is extinguished;
- (e) the fire be thoroughly extinguished before sunrise on the day following;
- (f) notice in writing has been given by him to the occupiers of all land contiguous to the land upon which such firebreak is intended to be burnt at least 24 hours before burning as aforesaid of the time at which it is his intention so to burn;
- (g) where the firebreak is situated within 1 mile of any State forest or national park, notice of intention to burn be forwarded either in writing by registered post or personal service, or by telegram to the nearest forest officer and member of the Police Force not less than 48 hours before the day on which it is intended to burn.

(v) In the case of fires for the purpose of *burning grass not situated within a State forest or national park*, provided that—

- (a) a firebreak be first made in the manner prescribed in sub-clause (iv) hereof around the area to be burned, and
- (b) the provisions of paragraphs (a), (b), (d), (e), (f), and (g) of sub-clause (iv) hereof be observed.

(vi) In the case of fires for the purpose of *burning bracken, scrub, or timber*, in order to remove a fire hazard—

- (1) within any fire protected area during any prohibited period only, and
- (2) within any proclaimed area during any proclaimed period at a time when rain is falling or has recently fallen, provided that—
 - (a) authority in writing has first been obtained from a forest officer;
 - (b) such precautions and provisions as are directed by such forest officer are fully observed; and
 - (c) notice in writing has been given by such person who has obtained such authority to the occupiers of all land contiguous to the land upon which such bracken, scrub, or timber is intended to be burnt at least 24 hours before burning as aforesaid of the time at which it is his intention so to burn.

And the Honorable Albert Eli Lind, His Majesty's Minister of Forests for the State of Victoria, shall give the necessary directions herein accordingly.

FOREST INDUSTRIES FIRE PROTECTION
REGULATIONS 1940.

IN pursuance of the powers contained in the Forests Acts and of all other powers thereto enabling him, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth hereby make the following Regulations (that is to say):—

1. These Regulations may be cited as the "Forest Industries Fire Protection Regulations 1940," and shall come into operation upon publication in the *Government Gazette*.

DIVISION A.—FIRE-FIGHTING APPARATUS AND EQUIPMENT.

2. Every person conducting any sawmilling or other industrial occupation in any State forest shall, upon receipt of a notice in writing to that effect from the Commission, and within the period stated in such notice, provide or cause to be provided such fire-fighting apparatus and equipment as is specified therein.

3. Such person shall—

- (a) keep or cause to be kept such apparatus and equipment at such place or places as a Forest Officer directs, in writing;
- (b) separately store or cause to be stored such apparatus and equipment in such manner as to be immediately available, whenever required for fire-fighting purposes;
- (c) maintain or cause to be maintained such apparatus and equipment in an efficient condition to the satisfaction of the Forest Officer for the time being in charge of the area in which such sawmilling or other industrial occupation is carried on.

4. Such person or any other person for the time being in charge of such sawmilling or other industrial occupation shall—

- (a) permit any Forest Officer to inspect such apparatus and equipment at any reasonable time;
- (b) make such apparatus and equipment available for fire-fighting purposes to any officer or employee of the Commission at any time when not being used or required for a like purpose by any person employed in connexion with such sawmilling or other industrial operation.

DIVISION B.—TELEPHONIC COMMUNICATION.

5. Every person conducting sawmilling operations within any fire-protected area shall, on receipt of notice, in writing, to that effect from the Commission, construct or cause to be constructed a telephone line to the specification prescribed by the Commission between his mill and such other terminal as the Commission in such notice directs.

6. Such person shall maintain or cause to be maintained such telephone line at all times in an efficient working condition.

7. Such person or any other person for the time being in charge of such sawmilling operations shall make such telephone line available to any Forest Officer or any authorized employee of the Commission for the transmission of official communications.

DIVISION C.—MILL CLEARINGS.

8. Every person conducting sawmilling operations in any fire-protected area shall—

- (a) maintain or cause to be maintained in a condition clear of all standing and fallen timber and other inflammable material the whole area within two chains of any portion of the mill or of any buildings associated therewith;
- (b) carry out or cause to be carried out such burning or other protective operations in the vicinity of such mill as are directed by a Forest Officer from time to time;
- (c) erect or cause to be erected all huts, residences, and other buildings in as close proximity to the mill as is practicable, and in any case within the boundaries of the licensed mill site;
- (d) adequately and effectively clear or cause to be cleared of all inflammable material any new sawmill site prior to commencement of the construction of the sawmill and buildings.

DIVISION D.—WATER SUPPLY.

9. Every person conducting sawmilling operations in any fire-protected area shall provide adequate water supply such that—

- (a) not less than 3,000 gallons shall be held in reserve in overhead tanks or in a reservoir of sufficient elevation to provide a stream of at least 30 feet from a $\frac{1}{2}$ -in. nozzle at the end of a hose 100 feet long;
- (b) supply shall be by metal pipes, the main from reservoir being not less than 2 inches in diameter;
- (c) a number of hydrants from such pipes as aforesaid shall be provided so that no part of the sawmill, sawdust burner, waste pit, and timber stacks shall be beyond effective reach from at least one such hydrant with a hose not exceeding 100 feet in length.

DIVISION E.—DISPOSAL OF EDGINGS, WASTE, ETC.

10. (a) No person conducting any sawmilling operations within any fire-protected area, nor any person employed in connexion therewith, shall light or maintain any fire in the open air for the purpose of burning edgings, offcuts, hearts, bark or other waste parts of logs or trees (hereinafter called waste material), or permit any fire which is in fact burning any such waste material to remain alight unless—

- (i) such burning be confined to pits located as approved by a Forest Officer, and so that no part of the mill or buildings in connexion therewith shall be endangered;
- (ii) such pits to be of sufficient size and depth to ensure that all such waste material may be kept at least 1 foot below the level of the banks of such pits.

(b) During any proclaimed period within any proclaimed area, any such waste material may be burned by any such person in pits as prescribed only between the hours of Four o'clock in the afternoon and half-past Seven o'clock in the forenoon of the day following on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays, provided that—

- (i) all fire be completely extinguished with water not later than half-past Seven o'clock each morning;
- (ii) no such burning shall take place on Saturdays, Sundays, or holidays;
- (iii) no such burning shall take place on any day when insufficient men are in attendance to extinguish the fire.

(c) During any period of extreme danger of the spread of fire; and during any acute fire danger period within the meaning of section 7 of the *Forests Act 1939*, no such person as aforesaid shall light or permit to remain unextinguished any fire whatsoever for the purpose of burning any such waste material as aforesaid.

(d) Any such person as aforesaid shall completely extinguish any fire in any such pit when requested so to do by a Forest Officer.

And the Honorable Albert Eli Lind, His Majesty's Minister of Forests for the State of Victoria, shall give the necessary directions herein accordingly.

C. W. KINSMAN,
Clerk of the Executive Council.

REGULATIONS FOR THE CARE, PROTECTION, AND MANAGEMENT OF THE "OMEO PUBLIC PURPOSES RESERVE."

WHEREAS by the 181st section of the Land Act 1928, power is given to the Board of Land and Works to make Rules and Regulations for the care, protection, and management of all public parks and reserves not conveyed to and vested in trustees, and for the preservation of good order and decency therein, and also for the collection and receipt of tolls, entrance fees, and other charges for entering therein or thereupon: Now therefore the Board of Land and Works, in pursuance of the powers conferred as aforesaid, doth hereby make the following Regulations in respect of the land temporarily reserved by Order in Council dated the 6th February, 1940, as a site for Public Purposes in the Township of Omeo, Parishes of Bingo Munjie and Cobungra, together with portion of the permanent reservation along the Livingstone Creek, as are indicated in red and blue tint respectively on plan marked O/17.11.39 attached to Lands Department Correspondence Rs.4988, and known as the "Omeo Public Purposes Reserve."

REGULATIONS.

1. The Reserve shall be open to the public at all times, free of charge, except on such days (not exceeding twelve in any one year), as the Reserve may be set apart for fêtes, sports, or holiday amusements, on any of which occasions a sum not exceeding One shilling may be charged and taken for the admission of every adult to the Reserve.

2. No person shall enter or remain in the Reserve who may offend against decency as regards dress, language, or conduct.

3. No person shall damage in any way the trees, shrubs, or flowers in the Reserve, nor shall fires be lighted therein excepting in those places specially provided for the purpose by the Committee of Management.

4. No person shall climb or jump over the gates or fence in or around the Reserve, stick bills thereon, or cut names on, or in any way damage or injure any of the buildings, gates or fences, seats, or trees in the Reserve; nor leave or deposit any glass, paper, or rubbish; nor throw or roll stones or any missiles of any kind therein.

5. No person shall put in the Reserve any cattle, horses, sheep, goats, pigs, or other animals without the permission, in writing, of the Committee of Management first obtained: Provided always that the moneys received for agistment shall be expended in the maintenance and improvement of the Reserve, and that an account thereof shall be furnished annually to the Board of Land and Works.

6. The Committee of Management shall have full power and authority to impound any cattle found trespassing on the Reserve, and shall be taken to be the occupier of the Reserve (with all power incidental to that status) within the meaning of any law for the time being in force relating to the impounding of cattle.

For the purpose of this clause "cattle" shall mean cattle as interpreted by section 3 of the Pounds Act 1928.

7. No person shall bring into the Reserve any dog, unless controlled by a chain or cord, without the permission, in writing, of the Committee of Management first obtained.

8. No person shall camp in the Reserve nor erect therein any building or any booth for the purpose of offering for sale any article, without the permission, in writing, of the Committee of Management first obtained.

9. No person shall take part in any public entertainment of any sort in the Reserve without the permission, in writing, of the Committee of Management first obtained.

10. No person shall spit or expectorate on the paths or on any structure or erection in the Reserve.

11. No person shall bet publicly in any part of the Reserve, and every person infringing this Regulation shall be liable to expulsion from the enclosures and Reserve.

12. No person shall play, practise, or engage in any game or sport within the Reserve on Sundays.

13. Persons renting or hiring any stand, building, erection, or enclosure on the occasions of any fêtes, sports, or holiday amusements may be required to deposit any sum which the Committee of Management may from time to time determine, not exceeding Ten pounds, by way of guarantee that due care shall be taken of such stand, building, erection, or enclosure, and such Committee in its absolute discretion may make good any damage or injury sustained by such stand, building, erection, or enclosure, or anything contained therein, during such occupancy or hiring, and deduct the cost of making good such damage, injury, or loss from the sum of money deposited by way of guarantee, and all persons so renting or hiring shall abide by these Regulations and by any order given by the Committee of Management.

14. No person, except a labourer or workman employed in the Reserve, shall enter any plots therein which may be enclosed for plantations of young trees or shrubs.

15. Every person bathing from the Reserve shall be decently attired in a bathing costume.

16. No person shall undress or dress on the Reserve unless in a bathing box or other structure provided for the purpose.

17. No person shall remove any sand, gravel, or other material from the Reserve.

18. No person shall drive any motor vehicle within the Reserve in such a manner as to cause danger to the public, and in no case shall a motor vehicle be driven at a greater speed than twenty miles per hour.

The Reserve has been placed under the control of the Council of the Shire of Oneco, as a Committee of Management, with power and authority to enforce the foregoing Regulations.

Every person offending against these Regulations shall, in accordance with the provisions of section 181 of the *Land Act 1928*, for each offence be liable to a penalty of not more than Five pounds (£5), and every person who knowingly and wilfully offends against any such Regulations, and who, after he has been warned by any bailiff of Crown lands or by any member of the Police Force, does not desist from so offending, may be forthwith apprehended by such bailiff or member of the Police Force and taken before some Justice to be dealt with according to law, and shall be liable to a penalty of not more than Ten pounds (£10).

The common seal of the Board of Land and Works was hereunto affixed, this 24th day of October, 1940, in the presence of—

ADDITIONAL REGULATION FOR THE CARE, PROTECTION, AND MANAGEMENT OF THE RESERVE FOR THE PUBLIC PARK (EXCLUDING THE AREA KNOWN AS THE "SANDRINGHAM CRICKET GROUND") IN THE PARISHES OF MOORABBIN AND MORDIALLOC KNOWN AS THE "SANDRINGHAM BEACH PARK."

WHEREAS by the 181st section of the *Land Act 1928*, power is given to the Board of Land and Works to make Rules and Regulations, and to rescind any Rules and Regulations for the care, protection, and management of all public parks and reserves not conveyed to or vested in trustees, and for the preservation of good order and decency therein, and also for the collection and receipt of tolls, entrance fees, and other charges for entering therein or thereupon: Now therefore the Board of Land and Works, in pursuance of the powers conferred as aforesaid, doth hereby rescind Regulation 6 of the Regulations made on the 19th day of April, 1939, in respect of that portion of the reserve for a Public Park (excluding the area known as the "Sandringham Cricket Ground") in the Parishes of Moorabbin and Mordialloc as is indicated by pink tint on plan marked D.21/6/1017 attached to Lands Department Correspondence Rs.1116, and is in the Municipality of Sandringham and known as the "Sandringham Beach Park" (hereinafter referred to as "the Park"), and in lieu thereof substitute the following Regulation:—

REGULATION.

6. (a) No person shall cause, suffer, permit, or allow any dog belonging to him or in his charge to enter or remain in the Park save and except that any dog other than a greyhound may be brought into the Park between the hours of Seven p.m. and Ten a.m., provided that any such dog be and continue to be under proper control on a chain, cord, or leash, and be effectively restrained from causing annoyance to any person, or from damaging or interfering in any way with the property of the Committee of Management.

(b) Notwithstanding sub-paragraph (a) of this Regulation, the Committee of Management may, at any time, by notice set up, prohibit the taking of a dog or dogs under any circumstances into any particular portion or portions of the Park.

(c) Any dog found in the Park, except as provided in these Regulations, shall be liable to be seized and/or destroyed by the officers and/or servants of the said committee, and the owner or any person having the custody of any dog so found shall be guilty of an offence against these Regulations, and shall also make compensation for any damage done to the property of the said committee by such dog.

The Council of the City of Sandringham has been appointed a Committee of Management of the Park with power and authority to enforce the foregoing Regulation.

The common seal of the Board of Land and Works was hereunto affixed, this 24th day of October, 1940, in the presence of—

LIST OF CROWN LANDS AVAILABLE.

THE under-mentioned areas are available for application as provided by various sections of the *Land Act 1928*, and all applications received on or before Wednesday, 27th November, 1940, will be deemed to have been simultaneously made, but any application lodged after such date may be considered if received in time for inclusion in the advertisement of the cases to be heard at the Local Land Board.

Applications on proper form, accompanied by 5s. duty stamp uncancelled (registration fee), may be delivered or forwarded by post to the Local Land Officer or to any Crown Lands Office in Victoria. Applicants may obtain from Local Land Officers, or the Enquiry Office, Lands Department, Melbourne, a certificate authorizing the issue by the Railway Department of a return ticket at concession fares to enable them to inspect available areas or to attend Local Land Boards. When an applicant is granted an allotment he may, if travelling by rail, obtain reduced fares for his family and also freight concessions in regard to some of his effects.

Subject to the approval of the Minister, when the survey fee exceeds £10, a deposit of £5 may be paid, and the balance over six years in half-yearly instalments.

Marked plans of any particular area, application forms, and any further information may be obtained from the Enquiry Office, Lands Department, Melbourne, and Land Officer, Omeo.

NOTICE is hereby given that an amending building By-law, No. 121, has been made and passed by the Council of the City of Ballarat. The title thereof is:—A By-law of the City of Ballarat, made under the Local Government Acts, and numbered 121, for amending and altering By-law No. 108, and other By-laws and Regulations of the City and for other purposes as therein provided. The By-law is made with the approval of the Governor in Council in pursuance of the powers conferred by the Local Government Acts and the Health Acts and every other act or power enabling the Council in that behalf. It is to be read and construed as one with By-law No. 108 and any By-law amending the same. It is to apply (save as therein provided) to the whole municipality, and is to come into operation on its confirmation by the Governor in Council and immediately after the publication of this summary in the *Government Gazette*. By-law No. 121 provides that By-law 108, as amended, shall apply throughout the whole municipality of the City of Ballarat as constituted at the date on which By-law No. 121 shall come into operation. It makes amendments in clauses 3, 4, 6, 20, 36, 40, 42, 51, 88, and 89 of By-law No. 108. It repeals clauses 4 and 7 of By-law No. 100, amends clause 37 of By-law No. 89, and limits the operation of Regulation No. 39 relating to porticoes. It makes provision for a maximum fee of £5 5s. for new buildings, additions, and alterations. It adds to By-law No. 108 provisions as to the construction of brick veneer houses, steel and/or reinforced concrete buildings, cantilever verandahs, signs on street verandahs, new flats, stairways, attic rooms, domestic fowl houses, fowl houses used for purpose of trade or business, and openings in windows for sale of commodities. A copy of the By-law is open for inspection, free of charge, at the Town Hall, Ballarat, during office hours. Such By-law was passed by the Council of the City of Ballarat on the 15th day of April, 1940, and confirmed on the 20th day of May, 1940, and approved by the Governor in Council on the 30th day of September, 1940.

Dated this 28th day of October, 1940.

By order of the Council,

6486

GEO. F. MORTON, Town Clerk.
