Section 3. Section 52. *Connexion.*—The Authority may, if it thinks fit, authorize or require that any of the following places, namely, stables, cow-sheds, dairies, market places, areas for washing vehicles, and any other polluted place, be connected with the sewers, subject to such conditions as the Authority may impose.

Section 53. *Conditions Governing Connexion.*—No such connexion shall be made unless the following conditions have been complied with:—

- (a) The place to be connected shall, if required, be so roofed as to prevent the entry of rain water from it to the sewers, and in no case shall rain water be permitted to discharge on to such place from adjoining surfaces.
- (b) The place to be connected shall be paved with approved materials and graded to the satisfaction of the responsible officer of the Authority.
- (c) The drain from any such place shall be provided with an approved silt trap with a removable grating and connected with the drain above the interceptor trap where such is used.

Division 16.—Pipe Trenches.

Section 54. The trench for the house drain from any property shall be so dug as to meet the Authority's sewer at the position provided or to be provided for the connexion.

The material from the trench shall be so placed as to cause the least possible obstruction and inconvenience to the public. Proper barriers and lights must be maintained where necessary to guard against accident during the progress of the work.

In refilling the trench selected refilling shall first be deposited around and over the pipe to a depth of 12 inches and carefully consolidated, after which the remainder of the trench shall be filled in in layers and rammed or flooded, as ordered or approved.

No stone shall be used in refilling until earth or gravel has been placed over the pipe to a depth of 1 foot, or more if directed.

On no account shall any water, sand, earth, &c., be allowed to enter the sewer during the progress of the work.

On completion of refilling the surface shall be restored as nearly as possible to the same condition as it was in before operations were commenced, unless the owner in writing otherwise requires.

Division 17.—Laying Drains, &c.

Section 55. *Position and Line.*—Every drain and every fitting, &c., connected therewith shall be laid and fixed where directed by the responsible officer of the Authority. As far as possible all drains shall be laid in straight lines; where changes of direction occur they shall be made in manholes, or by a suitably curved pipe with an inspection opening on each straight pipe next adjoining the curve.

Section 56. *Oblique Junctions.*—Where any drain joins another drain the junction shall be made obliquely at an approved angle with the direction of flow of such drain. Right-angled junctions shall not be made.

Section 57. *Connexion to Sewer.*—The position of the Authority's connexion to any premises shall be located prior to the commencement of any drain excavation. The disc stopper at the point of connexion to the sewer shall be carefully removed so as not to injure the socket or allow any debris to enter the sewer.

The first length of the drain at the branch shall be an inspection opening.

Section 58. *Gradients.*—All drains shall be laid on an even grade, and, except by special permission, in writing, from the Authority, such gradients shall in no case be less than the following minimum permissible gradients:—

4-in diameter	1 in 40
6-in. diameter	1 in 60

In cases where the grades of 4-in. and 6-in. drains are steeper than 1 in 10 and 1 in 15, respectively, concrete stops shall be placed as and where directed by the responsible officer of the Authority.

Section 59. *Depth of Drains.*—Drains of stoneware or concrete pipe, unless bedded in and encased in concrete of not less than 3 inches thickness over any part of the drain, shall be laid at a depth to the socket of the pipe of not less than the following:—

- (a) In public thoroughfares, rights-of-way, or other open spaces subject to vehicular traffic—2 feet.
- (b) In private property not subject to vehicular traffic—1 foot.

No person shall alter the surface over any drain so as to deprive it of the minimum depth of cover specified by the preceding paragraph, unless approved measures are adopted to protect the drain.

Section 60. *Laying Drains.*—All pipes shall be laid to such lines and grades as may be shown on the plans or directed, and, except where otherwise ordered, holes shall be cut in the bottom of the pipe trench to receive the sockets of the pipes, and all the pipes shall be carefully bedded with the barrel on the solid ground.

In the case of rock-bottomed trench, or where directed, the pipes shall be bedded up to the horizontal diameter upon not less than 2 inches thickness of approved sand or other approved material measured from the barrel of the pipe.

In water-charged ground, or where the foundation is bad, or where directed, the drain shall be formed of cast-iron pipes; or, if of stoneware or concrete pipes, they shall be bedded on and encased in concrete as ordered, and, if ordered, supported upon approved timber foundations as directed.

Drops or bends in vertically-inclined drains shall have a concrete support placed under and around as directed.

Division 18.—Drains Under Buildings.

Section 61. Every drain shall, as far as practicable, be so constructed as not to pass under any building. Where a drain does pass under a building it shall, if practicable, be laid in a direct line for the whole distance beneath such building, and shall have approved means of access for rodding outside the

walls of the building, and also, if directed, beneath the building. The pipes used shall be of stoneware or concrete, surrounded by not less than 4 inches of concrete or 3 inches of cement mortar or of cast-iron.

In any case in which pipes pass through or under walls, approved provision shall be made to prevent injury to the pipes by settlement, and, in outer walls, to prevent the ingress of vermin.

Division 19.—Joints, Drainage.

Section 62. *Stoneware and Cement Pipes.*—Joints of stoneware and cement pipes shall be filled in solidly with cement mortar neatly splayed off, or with other approved material. After each joint is made the interior of the joint shall be wiped clear of surplus mortar before the next pipe is laid.

Section 63. *Cast-iron Pipes.*—All joints in cast-iron pipes must be stemmed with approved gaskets and so filled and caulked with lead or other approved material as to make them gas and water tight.

All connexions between stoneware or concrete pipes and cast-iron pipes shall be made as for joints in stoneware or concrete pipes.

Division 20.—Drainage Ventilation.

Section 64. *Vents on Main House Drain.*—The main drain shall be ventilated at its upper end by a pipe ventilator erected vertically, and such ventilator may be a soil pipe.

If the drain is provided with an interceptor trap there shall be in addition a ventilator connected to the interceptor trap shaft.

In such cases there shall, wherever practicable, be a difference in height of not less than 6 feet between the tops of the vents at the upper and lower beds of the drains respectively.

Section 65. *Vents on Branch Drains.*—Branch drains need not be vented if the drainage traps are within 20 feet from the main house drain, measured along the line of pipes, including the drop, if any, from the centre line of the main drain to the centre of the outlet side of the water seal of the drainage trap, unless otherwise ordered by the Authority, in which case they must be vented as directed.

Section 66. *Height of Vents.*—Every vent pipe extending upwards from a soil or drain pipe shall be carried not less than 6 feet higher than any window or door within a distance of 30 feet thereof, and in any case at least 18 feet above ground level and 6 feet above the level of the eaves or coping, or to such additional height as may be necessary to prevent effectually the escape of foul air into any building within the vicinity.

Where the vent pipe extends into a gable of the building it shall further be carried at least 2 feet above the point of intersection with the roof.

Such pipes shall, where necessary, be provided with sufficient clips or stays to support them effectively.

Section 67. *Chimneys.*—No chimney shall be used as a ventilator to any drain, soil, or waste pipe.

Section 68. *Vents Near Chimneys.*—Vents must, as far as possible, be kept away from chimneys and ventilating air shafts. Where a ventilator pipe terminates 6 feet or more from a chimney opening or ventilating air shaft, the requirements of section 66 shall apply, but where the distance is less than 6 feet the vent pipe shall, unless otherwise ordered, terminate not less than 2 feet below the top of such chimney or air shaft.

Section 69. *Vents Adjoining High Buildings.*—In any case in which a building is erected next to a previously existing building of less elevation, and any windows of the new building are located within 30 feet of any existing vent stack on the lower building, the owner of such new building shall defray the cost of or shall himself make such alterations to the vents of the previously existing building as necessary to conform with section 66.

The owner of the lower or existing building shall make such alterations upon the receipt of money, or security therefor sufficient for the purpose, from the owner of the new or higher building, or shall permit at the election of the owner of the new or higher building, the making of such alteration by the owner of such new or higher building.

Section 70. *Size of Drainage Vents.*—Drainage vent pipes shall, unless otherwise ordered, be of not less than 4 inches diameter in the case of educt vents and not less than 3 inches diameter in the case of induct vents, with the provision that where more than one educt vent is provided the vent on the longest line of drain shall be of not less than 4 inches diameter and all others of not less than 3 inches diameter; but in no case shall a drainage vent be of smaller diameter than necessary to comply with the requirements of section 65.

Unless otherwise ordered or approved every such vent pipe shall be without return bend and provided with basket end or educt or induct cowls as directed.

Section 71. *Materials, &c.*—Drainage vent pipes situated wholly outside of buildings shall be of cast-iron, galvanized wrought iron, double galvanized sheet iron, or other approved material above ground, and of stoneware or concrete beneath the surface of the ground. Galvanized sheet-iron vent pipes shall not be less gauge than 20 for 3-in. and 4-in. diameter pipes and 18 for 6-in. pipes, and where ordered the first 6 feet above ground shall be of cast-iron or other approved material. Drainage vent pipes inside a building shall, unless otherwise approved, be of cast-iron or of galvanized wrought iron. The circumferential joints of galvanized sheet-iron vent pipes shall be riveted and soldered.

Section 72. *Gratings.*—Openings or ventilation shall be effectively protected by approved gratings of ample area. The aggregate area of apertures in any such grating shall not be less than the sectional area of the pipe or drain to which such grating is fixed. Every opening for ventilation shall at all times be kept perfectly free from obstruction.

Section 73. *Pipe Clips, &c.*—There shall be at least one pipe clip to each 6-ft. length of vent pipe.

For cast-iron or wrought-iron pipe approved coated wrought-iron clips and for galvanized sheet-iron pipe 1½-in. x 14-gauge galvanized band-iron clips shall be provided. Wherever it is necessary to fix pipes clear of the wall approved extension clips shall be used.

Clips in the case of cast-iron pipes must be placed tight up against the bead or underside of collar.

Section 74. *Attachment to Walls.*—Where a galvanized sheet-iron pipe, with or without offset, is carried up above the brick wall of a building a galvanized wrought-iron clip must be used, leaded into the wall near the top wherever possible and bolted against the vent pipe.

All band-iron clips of vent pipes to brick walls shall be fastened with nuts and bolts, leaded in, or by means of T-headed bolts passed through the brick joints and turned at right angles to the joints.

Section 75. *Supporting Vents.*—Wherever a vent pipe with offset is not more than 12 feet long above such offset it need not be stayed; if longer, it shall be stayed as directed with ½-in. galvanized wrought-iron piping.

An unsupported length of 15 feet above highest clip of straight vent pipe without offset will be permitted.

Section 76. *Induct Vents.*—Every induct vent shall be securely supported in an approved manner.

Division 21.—Drainage Traps.

Section 77. *Trapping of Inlets.*—Every inlet to any drain other than inlets provided for ventilation in accordance with the By-law shall be provided with an approved trap. No inlets to any drain connecting directly with a sewer shall be constructed within a building other than such inlets necessary for the apparatus of any water-closet, urinal, or housemaid's slop sink.

Section 78. *Classes of Traps.*—Four classes of traps shall be used—

- (a) "Traps" for intercepting gases only, to be of round section and self-cleansing form, but not such as to empty by momentum or suction.
- (b) "Silt traps" for intercepting both gases and solids to have slightly tapered sides, flat bottom, and rounded angles, and provided with approved means for catching and removing solids.
- (c) "Grease traps" for solidifying and collecting grease or other semi-fluid matter liable to foul the pipes to be of such form as approved.
- (d) "Oil traps" for collecting all kinds of oil and to be of such form as approved.

The term "yard gully" is applied to traps (a) in cases where they are used externally and fitted with dished tops and gratings.

Section 79. *Water Seal.*—Every drainage trap must have a water seal not less than 2 inches in depth.

Section 80. *Provision of Yard Gullies.*—A yard gully must, wherever practicable, be provided in the yard of every property, as near as practicable, to the kitchen or back door, with a tap placed over it at a height of not less than 2 feet. No yard gully shall be situated within a building. Where it is not practicable to provide a yard gully, a slop sink must be provided within the building.

Section 81. *Details of Yard Gullies.*—Yard gullies shall be fitted with dished tops and gratings, the dished top being in one piece with the trap or jointed thereto by spigot and faucet, or as otherwise approved.

The depth of the dished top to the grating must be not less than 6 inches, and the grating must be so fixed as to be removable with reasonable facility.

Section 82. *Kerbing, &c., to Yard Gullies.*—Yard gully basins and the dished tops of silt traps must be so surrounded with an approved impervious kerbing as to prevent the access of

surface water to the drains, and, if directed, the wall at the rear of the gully or silt trap, if of brick or stone, must be cement rendered to the height of the tap over same, and if of wood the wall must be provided with an approved galvanized sheet iron apron.

All fixtures discharging into a sub drain of greater length than 10 feet shall be vented.

Section 104. *Junctions.*—Where a waste or soil stack is branched into a graded waste, soil, or drain pipe, the branch fitting shall have an angle of not less than 45 degrees to the horizontal, and the length of the branch of the fitting shall be such that the vertical projection of the attached stack will be wholly outside of the area of the junction with the graded pipe.

Section 105. *Sealing of Pipes.*—Wherever a fixture is abolished, the soil, waste, vent, and water supply pipes to such fixture shall be removed, or, if allowed by the Authority to remain, the ends of the pipes shall be sealed with watertight imperishable materials.

Section 106. *Soil Vent Pipes.*—In all cases the upward extension from the soil pipe for ventilation shall pass in as direct a manner as possible above, and, if necessary, through the roof.

Section 107. *Vent Pipe Grades.*—All vertical lines of vent pipe shall connect, full size, at their bases with a soil, waste, or drain pipe at an angle of not less than 45 degrees to the horizontal, and shall extend in undiminished size above the roof or be connected to the soil, waste, or vent stack, in compliance with the requirements of section 103, on a grade sufficient to avoid the collection of water.

Such anti-syphonage vents from fixtures shall be carried above the eaves of the building or joined to the branch or main vent above the level of the fixture, unless special permission to the contrary is granted.

These vent pipes shall be connected to the waste or soil pipe at a point not less than 3 inches nor more than 12 inches from the crown of the trap and on the opposite side of the water seal to the fixture, except in the case of closet pans where the vent pipe shall be not more than 3 feet from the crown of the trap. No other fixture shall be connected to the soil or waste pipe between the anti-syphonage vent and the fixture which it serves.

On ground floors where cisterns are fixed over impervious floors graded to drain outside of the room the overflow may discharge on to such floors, provided no damage is likely to arise therefrom.

Section 186. *Discharges from Overflows.*—Overflows may discharge into the open air above ground floor level only when the discharge will not cause any inconvenience or nuisance. In all other cases the pipes must be brought to the ground surface or be arranged to discharge where they will not prove a source of annoyance or inconvenience.

Section 187. *Existing Floors.*—Where necessary, in the opinion of the responsible officer of the Authority, every existing floor under a fixture shall be regraded and a proper waste pipe, and, if directed, a flap valve fixed.

Division 36.—Existing Fixtures.

Section 188. All existing fixtures, fittings, and appliances not in accordance with this By-law which the owner may desire to retain unaltered, and which, in the opinion of the Authority, will be inoffensive, may at the distinct request in writing of the owner only remain unaltered until such time as the Authority shall otherwise order. Existing fixtures, fittings, and appliances which, in the opinion of the Authority, are offensive shall be removed at once.

PART 6.

WATER SUPPLY.

Section 189. *Supply of Water to Fixtures.*—All water-closets and other plumbing fixtures shall be provided with a sufficient supply of water for flushing purposes to keep them at all times in proper and cleanly conditions.

Every owner of property who desires, or has been ordered by the Authority, to provide sanitary appliances for his own property and to connect his property with the sewers of the Authority, shall before or at the commencement of the work of making such connexion, provide piping approved of by the Authority for the conveyance of water, and shall cause the piping to be joined at the most convenient water supply main, or, with the permission of the Authority, to some pipe already joined to the main. Such piping shall be of capacity sufficient to supply all sanitary fittings on the property freely and continuously, and convey to the flushing cistern, flushing tank, or other flushing apparatus of each water-closet on the property enough water to fill the same at a rate of not less than 1 gallon per minute, and the owner shall cause such piping to be connected with the cistern before the completion of the work.

The water supply to any fixture shall be so arranged that there shall be an actual physical discontinuity between the water stored or used in any such fixture and that in the water service pipe.

Section 190. *Material, Condition, Capacity, &c., of Water Supply Piping.*—The entire length of the water supply piping from its connexion with the water supply main to the water-closet flushing cistern or other fixture shall be such as is, in the opinion of the Authority, suitable in regard to material, condition, and capacity to convey a sufficiency of water for the sanitary requirements of the particular tenement.

The owner shall keep the piping from becoming, whether by reason of corrosion or other cause, of insufficient capacity to fill the flushing cistern, storage tank, or other flushing apparatus at the rate of not less than 1 gallon per minute.

Section 191. *Fixtures Not Connected With Sewers.*—No water service pipe shall be laid to supply any fixture in any property in any sewerage area unless such fixture is connected with the sewers of the Authority, or unless special permission in writing has been previously given to lay such service pipe.

Section 192. *Storage Tanks.*—Water supply pipes to storage tanks for internal closets shall be of not less than $\frac{1}{2}$ -in. diameter and be provided with stop-taps and high-pressure ball valves, except where the elevation of the storage tank is not sufficient to allow of high-pressure ball valves being used. In such cases the permission of the Authority shall be obtained to fix low-pressure ball valves. CARTAGE OF GOODS AND PARCELS (GOVERNMENT PRINTING OFFICE).

TENDERS will be received until Eleven o'clock a.m. on Friday, 29th November, 1940, for the cartage and delivery of goods and parcels to and from the Government Printing Office, for and on behalf of the Government of Victoria, from 1st January, 1941, to 30th June, 1941, as per Schedule No. 1, sub-schedule B.

A deposit of £5, by marked cheque or bank draft payable to the order of the Secretary to the Tender Board (private cheques will in no case be received), must accompany each tender, such deposit to be forfeited in the event of the tenderer withdrawing or attempting to withdraw his tender before notification of acceptance of tender, or in the event of the successful tenderer failing to sign and complete his contract within the period specified. Deposits will be returned to unsuccessful tenderers within ten days of acceptance of tender, on their application.

Security of £20 will be required, either in bank guarantee (bank to be approved by the Tender Board), Commonwealth Treasury bonds, Savings Bank deposit book or fixed deposit receipt in favour of the Secretary to the Tender Board, or cash deposit, as the tenderer may elect.

The security must be completed and the contract signed within five days of acceptance of the tender, failing which the service may be again advertised, or another tender accepted.

Tenderers failing to take up their accepted tenders may be disqualified from tendering or holding any future contract or contracts for a period of twelve months from the date of such disqualification.

Full particulars, forms of tender, conditions of contract, &c., may be obtained at the office of the Secretary to the Tender Board, Gisborne-street, Melbourne.

The lowest or any tender will not necessarily be accepted.

Tenders, enclosed in an envelope, and having the words "Tender for Cartage" written thereon, must be deposited in the Tender-box at the Tender Board Offices, Gisborne-street, Melbourne, C.2; or, if sent by post, postage must be prepaid, and tenders addressed to the Chairman of the Tender Board, Tender Board Offices, Gisborne-street, Melbourne, C.2, which office they must reach not later than by first post on the date of closing of tenders.

CONDITIONS OF CONTRACT.

1. No subletting shall be allowed; all work must be carried out by the contractor, and every person engaged in the cartage tendered for in this schedule shall be paid such wages and employed subject to such labour conditions as are or may be determined by any Federal Arbitration Court award or any State Wages Board determination, and a copy of such labour conditions shall be kept conspicuously and continually posted, in legible Roman characters, on the premises of the contractor. Any infringement of this condition, in the opinion of the Treasurer, will subject the contractor, upon report from the Tender Board, to such mulct, not exceeding Fifty pounds (£50), as the Treasurer may direct, and the amount will be deducted from the contractor's account or

from the security money; and the Treasurer's decision shall be binding, final, and conclusive as to the fact of infringement and in all other respects.

2. Accounts shall be rendered fortnightly, and shall be subject to any deductions for goods or parcels lost or damaged whilst in the custody of the contractor.

3. No claims for detention shall be entertained, but should the contractor be subjected to unreasonable delay, the cause of delay, if reported, shall be investigated.

4. The contractor must have an office connected by telephone, and within a radius of 6 miles of the Melbourne (Elizabeth-street) Post Office, and will be liable to be called upon to provide the vehicle at any hour of the day or night.

5. Thirty minutes will be deemed sufficient notice, and in the event of the contractor failing to supply the vehicle when ordered, and to the satisfaction of the officer requiring the service, such service will be performed at his risk and expense, and the extra expense incurred will be deducted as provided in Clause 1.

No services performed under these contracts shall be deemed to be of a special nature, provided that the contractor be given 30 minutes' notice that his services shall be required, and no increase in the contract rates shall be permitted.

6. All vehicles in which the goods or parcels are carried must be fitted with good waterproof covers, be in thorough working order and, in general, suitable for requirements.

7. The contract shall not be considered broken, infringed, or vitiated by the use of Government vehicles for such cartage as may be found necessary.

8. Contractors are not at liberty to transfer their contracts under cover of power of attorney, coupled with an interest or otherwise, and no such transfer will be recognized by the Government.

9. Under no circumstances will a contractor be permitted to abandon his contract. In the event of the contractor failing to carry on the contract, the security money will in that case be absolutely forfeited, and, in addition, the contractor may be held liable for any loss which the Government may sustain in consequence of such failure.

10. A refusal to execute orders, irregularity or delay in delivering the goods or parcels as required, or failure to comply with the requirements of clause 2, or any breach of Railway or Harbor Trust Regulations, will subject the contractor, upon report from the Tender Board, to such mulct as the Treasurer may direct, and the amount may be deducted as provided in clause 1. It will also be in the power of the said Treasurer upon such refusal, irregularity, or delay, to terminate the contract forthwith, and declare forfeit the whole or any portion of the security money; and, in addition, the contractor will be disqualified from tendering or holding any future contract or contracts for a period of twelve months from the date of such disqualification.

11. In the event of any dispute arising as to matters or things contained in the contract or schedule the same shall be settled by the Tender Board, and the Board's decision shall be binding, final, and conclusive.

1. Every crossing over a footway and channel shall, from the building line to a point 6 feet distant from such building line be flush with such footway, and shall between such point and the invert of the channel lying along the outer edge of such footway fall with a constant inclination to the level of such invert, and shall from there continue towards the roadway as far as the outside edge of such channel with a constant

upward inclination to such invert equal to the inclination to such invert of the outer side of such channel.

2. Every such crossing shall be of a width of not less than 8 feet.

3. All crossings shall be constructed of cement concrete.

4. Every such crossing which is intended to be used by vehicles weighing more than 40 cwt. shall be constructed of concrete at least 6 inches in depth, and every such crossing which is intended to be used by vehicles weighing not more than 40 cwt. shall be constructed of concrete at least 5 inches in depth.

Such return kerbing shall be returned on a radius of not less than 3 feet, and tapered so that the top thereof meets the rising gradient of the crossing in a manner least likely to cause inconvenience to pedestrians.

9. Notwithstanding anything herein contained:—

- (a) The Council may, if it thinks fit, grant permission for the construction of crossings of such other designs or materials as it may approve, and
- (b) Any person engaged in the construction of any building may cart building materials over any footway or channel if he causes such footway and channel to be adequately protected by a covering of battens or planks laid on the surface and firmly secured in position so as not to cause any obstruction or be a source of danger to pedestrians using such footway, and so as not to cause any obstruction in such channel to the free flow of water therein.

10. Regulation No. 9, for regulating width, &c., of crossings over footways and channels and materials for making and constructing the same, &c., is hereby repealed.
