(b) The Council may grant the application with or without such modifications as it thinks fit; or

(c) The Council may refuse to grant such application.

6. Where a dairy or dairy farm is newly established or constructed or is intended to be established or constructed or altered such premises shall not be used as a dairy farm or constructed or altered until written permission from the Council or its Inspector has been obtained.

7. All dairy farms shall conform with the conditions herein prescribed, and the Council may from time to time give notice to the proprietor to take or cause to be taken (within a time specified in such notice) such steps as may be necessary for the better construction and drainage of the buildings and premises and for the disposal of all drainage from such dairy farm.

8. Every proprietor of a dairy farm shall provide at the milking shed during the time of milking an ample supply of clean water, receptacles, and cloth for cleansing purposes.

9. An apparatus approved by the Inspector shall be provided and used by every proprietor of a dairy farm for the purpose of heating water for the cleansing, steaming, and sterilizing of dairy utensils, and shall be placed in a position approved by the Inspector, and no apparatus for such purpose shall be used unless it is approved by the Council or its Inspector.

10. No stagnant water which by its situation is likely to contaminate any dairy produce shall be permitted to remain upon any dairy premises.

11. Every milking shed, cow bail, yard, or stable shall be kept in a clean and wholesome condition.

12. The proprietor shall maintain or cause to be maintained in a clean and sanitary condition every dairy and all fittings, apparatus, receptacles, vessels, and utensils thereon or therein.

13. Every proprietor of a dairy farm shall provide and maintain an impervious receptacle, approved by the Inspector, in which all refuse which is offensive or likely to become offensive shall be placed with the least possible delay, and the contents of such receptacle shall be removed and disposed of at least once in each week, or with greater frequency as may be directed by the Inspector, and every receptacle shall be provided with a properly fitting lid and kept in a place approved by the Inspector, and after each emptying shall be thoroughly cleansed.

14. No person shall cause, permit, or suffer poultry, horses, or other animals to be at large in any yard adjoining the milking shed, cow bail, dairy, or separator room, and the proprietor shall provide and maintain suitable sheds, yards, or pens for such poultry, horses, or other animals as may be kept on the dairy farm.

15. The proprietor shall provide and maintain a properly constructed and covered receptacle of suitable capacity and approved type, into which shall be placed with the least possible delay all animal droppings and stable refuse. Such receptacle shall be provided at a place approved by the Inspector, and shall be emptied at least once in every week, or with such greater frequency as may be directed by the Inspector.

16. No accumulation of manure shall be permitted within 150 feet of any dairy farm, house, or any place where any milk or its products are kept or stored or any milking shed. All manure shall be lightly scattered over the surface of the ground in a thin layer when it is desired to use such manure as a fertilizer.

17. The proprietor of every dairy farm shall cause all dairy buildings, separator room, milking sheds, and bails to be lime-washed or treated in some other approved manner at least once in every twelve months, and at such other times as may be required by the Inspector. Provided that the Inspector may approve that this requirement shall not apply to any part of such ceiling, roof, or walls as may be properly painted or varnished, or constructed of or covered with any material which would render limewashing unsuitable or inexpedient, and as may be otherwise properly cleansed.

18. The separator bowl and all parts of the separator which come in contact with milk or cream shall be effectively cleansed on each occasion of use immediately after the process of separating, first by immersion and washing in warm water and soda and finally by hot water and steam. All dairy utensils and appliances shall, after use, be properly cleansed in the same manner.

19. Milch cows shall not be permitted to graze on any land whereon there is impure water, rubbish, or refuse.

20. No person shall cause, permit, or suffer milch cows to feed on any land whereon there is any musty, unsound, decayed, or unwholesome food which may injuriously affect the milk or health of the cows, and if an inspector has reasonable grounds for supposing that any cattle food on the premises is unsound or unfit for use as food he may require the proprietor to remove such food from the dairy farm premises and refrain from using it for any dairy purposes.

21. No swine shall be kept or permitted to be or to approach or to remain within 150 feet of any dairy produce premises, milking shed, cream separator room, or cream storage room.

22. Except with the written approval of the Council, calves shall not be housed under the same roof as that which covers the milking bails at any dairy farm premises, or within 50 feet of a dairy building.

23. No fowlhouse or bird roost shall be permitted to exist within 150 feet of any dairy or premises wherein dairy produce is handled, kept, or stored.

24. No person shall cause, permit, or suffer any dog, cat, or fowl, or other domestic animal or bird to have access to or remain in any milking shed, dairy building, or separating room. Provided that this shall not apply to milch cows being held in the milking yards and bails during the process of milking.

25. If the construction or situation of or material used in any piggery or stable or cowbails or milking yards or other conditions under which swine or other domestic animals are kept or enclosed is, in the opinion of the Inspector, detrimental to the quality of the dairy produce obtained on such premises, the proprietor of such premises shall forthwith make such alteration as the Inspector may by notice in writing require. Every such yard, pen, or floor shall be constructed with a layer of not less than 4 inches of cement concrete having its surface finished sufficiently smooth and properly sloped for drainage to a channel formed of like material and laid along the front of the enclosure outside of the latter.

26. Every proprietor of a dairy farm shall provide an abundant supply of wholesome water. Such proprietor shall cause any tank or other receptacle which may be provided on such farm for containing water to be emptied and cleansed as often as may be necessary to prevent the contamination of any water that may be kept therein.

27. No person shall cause, suffer, or permit the pollution of any water supply used for cleansing purposes.

28. No person shall cause, permit, or suffer any nuisance to be committed or exist on any dairy farm.

29. The proprietor of every dairy farm shall, with respect to every milking machine used in such dairy farm, comply with the following provisions:—

- (a) The releaser and vacuum-tank shall be either in the open air or in an apartment (hereinafter called the releaser-room) other than that used for milking (hereinafter called the milking-shed), and if the releaser-room is under the same roof as the milking-shed there shall be between the releaser-room and the milking-shed a complete and draught-proof partition, or, in the alternative, a passage walled on both sides throughout the width and height of the releaser-room, open at both ends to the air, and not less than 6 feet wide throughout,
- (b) No internal combustion engine or steam engine shall be in the same room as the releaser or cream-separator,
- (c) An adequate supply of water, and a suitable plant for the boiling of sufficient water and the generation of sufficient steam for thoroughly cleansing, steaming, and sterilizing the milking machine and its appurtenances shall be installed and maintained near the machine.
- (d) The body of the vacuum-tank shall be in two parts, or, in the alternative, the diameter of the cover shall be as nearly as possible equal to that of the tank.
- (e) The releaser and vacuum-tank shall be coupled together by short removable connexions.
- (f) The connexions to the vacuum tank, from the vacuum-pump, releaser, and milking-shed vacuum-pipe respectively, shall be as straight as possible, and, if it is reasonably practicable, shall be independent of each other.
- (g) The milk-pipe shall be of brass tinned on the inside or internally lined with other approved metal, or wholly of other metal approved by the Inspector, and no iron piping, whether galvanized or not, shall be used in the vacuum or releaser system.
- (h) The vacuum-pump, vacuum-tank, and releaser shall be so installed and maintained that all lines of pipes shall be as straight as possible.
- (i) The milk-pipe and vacuum-pipes shall have a sufficient fall, which shall be provided and maintained so as to be as regular as possible, for the purpose of proper drainage.

(j) All pipes shall be coupled together in lengths in an approved manner to enable them to be easily taken down for cleansing.

(k) All taps and other fittings shall be of a design approved, and shall be fitted in an approved manner to enable them to be easily taken apart for cleansing.

(l) In every other respect not expressly referred to herein, milking machines shall be cleansed in a proper and efficient manner.

Provided that nothing in this By-law shall be held to make compulsory the installation of a vacuum-tank or releaser.

30. (a) All separation of cream from milk at any dairy farm shall be done in a room that is well lighted and ventilated to the satisfaction of the Council, and provided with a substantial floor and drain, both made of concrete impervious to moisture and having a smooth surface capable of being readily cleaned.

(b) On every dairy farm in which the separator-room or milk collecting room is under the same roof with an engine-room there shall be a passage walled on both sides throughout the width and height of the separator-room or milk collecting room, open to the outer air at both ends, and not less than 6 feet wide throughout between the engine-room and the separator-room or milk collecting room.

31. No person shall cause, permit, or suffer any poisonous or odorous disinfectants to be kept in the dairy or milking sheds.

32. Where an electric supply is available, the yards, milking-bails, separator-room, and dairy shall be adequately lighted by electric light to the satisfaction of the Inspector.

33. Every receptacle used for the storage of garbage or refuse used or intended to be used for the feeding of swine shall be so constructed as to present durable smooth surfaces inside and outside and shall be provided with a cover presenting like surfaces and capable of being fitted closely to such receptacle so as to prevent the emission of offensive vapours, gases, or effluvia from the contents of such receptacle. Whilst any such receptacle contains such garbage or refuse matter it shall not be permitted to remain open wholly or in part longer than is necessary for the discharge or for the reception of such garbage, as the case may be, and at all other times it shall be kept closed by means of the cover aforesaid.

34. All holding yards or pens used for the holding of cows during milking time shall be paved with cement concrete or other approved durable, smooth, and impervious material, laid in such a manner as to be water-tight and graded with a slope to an open drain running the full length of such yard, and of such width as to be able to be swept with a broom, and such drain shall continue to at least 30 feet beyond the confines of the milking-shed or bail or yards, whichever may be the nearer, to an approved point of discharge.

35. All paddocks, lands, enclosures, and premises used as grazing ground for dairy cattle and any buildings relative thereto shall, whenever necessary, be inspected by the Inspector, and no person shall cause, permit, or suffer the use of such paddock, land, or enclosure if such use is likely to be prejudicial to health, by affecting the milk or otherwise.

36. All cattle and other animals on any dairy farm may be inspected by a veterinary surgeon or other competent person, and any cows found to be diseased, or which from poverty or weakness are, in the opinion of the Inspector or other qualified person, likely to be unfit for use for dairy purposes, and any other diseased animal, shall be forthwith removed from such dairy farm if ordered by such Inspector or other qualified person aforesaid.

37. If at any time there exists on the dairy farm any animal which is suffering from any disease which is injurious to health the proprietor or person in charge shall forthwith notify the Inspector of such disease, and the milk from any such diseased cow shall not be used in any way whatsoever, and any utensils or vessels being contaminated by such diseased cow or by milk therefrom shall be effectively disinfected and sterilized forthwith. On the appearance or knowledge of any disease affecting any animal on any dairy farm such animal shall forthwith be isolated by the owner and shall remain in isolation until freed by an order of the Inspector.

38. The fees payable for the registration as Cowkeepers, Dairy-men, or Purveyors of Milk shall be as hereunder, in accordance with the number of cows on the premises:—

(a) Six pence per cow, but not more than the sum of Two pounds.

(b) For every person selling milk for human consumption, being a Milk Vendor or Purveyor of Milk, a fee of Two shillings and six pence, in addition to any fee prescribed as above, provided that such fees shall not exceed Two pounds.

39. Any person doing any act forbidden to be done or failing to do any act directed to be done by this By-law shall be guilty of an offence against this By-law, and shall be liable to a penalty of not more than Twenty pounds, and in the case of a continuing offence a further penalty of not more

than Five pounds, but so that the total of such penalties shall not exceed One hundred pounds.
