After Regulation 18 the heading "Grading of Milk and Cream" and Regulations 19 and 20 shall be deleted and the following headings and Regulations substituted in lieu thereof:—

GRADING OF MILK.

19. (i) A grader employed at a factory, creamery, or milk depot shall, as soon as practicable after the arrival of any milk at such factory, creamery, or milk depot and in any case within twenty-four hours, grade such milk in accordance with the tests and standards prescribed herein and in the condition in which it was received and, save as otherwise herein provided, shall record and sign the result of such grading in ink or indelible pencil in the form prescribed in Schedule II. hereto.

(ii) (a) There shall be three grades of milk designated—Choicest Grade, First Grade, Second Grade.

(b) Choicest Grade milk shall be milk free from all taints, colostrum, and foreign matter, and when subjected to the Methylene Blue Test the period elapsing between the insertion of the methylene blue into the milk and its reduction to a colourless form shall not be less than three and one-half hours.

(c) First Grade milk shall be milk free from serious taints, from colostrum, and from foreign matter, and when tested by the Methylene Blue Test the period of time elapsing between the insertion of the methylene blue into the milk and its reduction to a colourless form shall not be less than one and one-half hours.

(d) Second Grade milk shall be milk free from colostrum and foreign matter, and when tested by the Methylene Blue Test the period of time elapsing between the insertion of the methylene blue into the milk and its reduction to a colourless form shall not be less than one-half hour.

(e) Any milk which does not conform to one or other of the foregoing standards shall be deemed to be below the lowest grade.

(f) Notwithstanding any of the provisions in these Regulations, milk received at a factory, creamery, or milk depot may be graded solely by the senses test or the sediment test in any case where by the application of either test it is in the opinion of the grader of, or below, the standard prescribed for second grade milk.

(iii) If a consignment of milk received at a factory, creamery, or milk depot from any dairy farm consists of morning and afternoon milk not mixed together, then every sample taken for the purpose of grading any of that milk by the Methylene Blue Test shall be a fair and representative sample of all the milk in the consignment: Provided that at a milk depot from which the milk of any supplier is being forwarded to the metropolis a further sample taken from the morning milk only of such supplier and clearly marked to distinguish it from the sample representing the whole consignment shall also be submitted to the Methylene Blue Test and such sample shall be held under test for a period of at least five and a half hours unless it decolourizes in a shorter period.

(iv) If milk is delivered from a dairy farm to a factory, creamery, or milk depot both by a morning delivery and an evening delivery on the day on which it is produced, then every sample used for the purpose of grading any of that milk by the Methylene Blue Test shall be a representative sample made by mixing a sample taken from the milk delivered at the evening delivery and held overnight at a temperature of not less than 60°F. nor more than 65°F. with a sample taken from milk delivered on the next following morning, the samples to be mixed being proportionate in quantity to the quantities of milk delivered at the two deliveries: Provided that at a milk depot from which the milk of any supplier is being forwarded to the metropolis, a further sample taken from the morning milk only of such supplier and clearly marked to distinguish it from the sample representing the whole consignment, shall also be submitted to the Methylene Blue Test and such sample shall be held under test for a period of at least five and a half hours unless it decolourizes in a shorter period.

(v) The reduction time for all samples submitted to the Methylene Blue Test shall be recorded in a form as may be required by an officer and preserved for inspection for a period of twelve months.

GRADING OF CREAM.

20. (i) A grader employed at a factory shall forthwith grade, in accordance with the standards prescribed herein, all cream received at such factory in the state in which it was received and without being mixed with any other supplier's cream, and save as otherwise herein provided, record and sign the result of such grading in ink or indelible pencil in the form prescribed in Schedule III. hereto.

(ii) There shall be three grades of cream designated—Choicest Grade, First Grade, Second Grade.
