IN pursuance of the powers contained in the Health Acts and of every other power thereunto enabling them on that behalf, the President, Councillors, and Ratepayers of the Shire of Maffra, for the purpose of carrying the said Acts into execution within their jurisdiction, make the following By-law, that is to say:—

1. All former By-laws so far as they relate to the matters and things provided for in this By-law are hereby repealed.

2. This By-law shall come into full force and operation on its approval by the Governor in Council and immediately after its publication in the *Government Gazette*.

3. This By-law shall apply to and have operation in the Township of Heyfield and Township of Maffra and unless exempted by the Council shall apply to every house, building, and premises therein.

4. In this By-law unless inconsistent with the context or subject matter—

"Refuse" includes all wastes (except sewage and manure) produced or accumulated in or about any house, building, or premises.

5. The proprietor of every house, building, or premises shall provide, keep, and maintain at all times upon his premises a properly constructed receptacle in which he shall from time to time cause to be deposited all refuse produced or accumulated in or about such house, building, or premises.

6. Such receptacle shall be constructed of galvanized iron of not more than 26-gauge securely riveted and soldered, or other approved material, in such a manner as to prevent any absorption by any part of such receptacle of any offensive matter which may be deposited therein, or any escape by leakage or otherwise of any part of the contents of such receptacle.

7. Each such receptacle shall have a capacity of not more than 4 cubic feet, and shall be so constructed as to be capable of being easily and conveniently carried by one man.

8. It shall be strongly constructed and provided with properly attached side-lifting handles.

9. Every such receptacle shall be provided with a suitable close-fitting lid with a flange overlapping the top of such receptacle, and shall be kept constantly covered (except when such refuse is being deposited therein or discharged therefrom), and a sufficient quantity of some efficient deodorant shall be from time to time introduced therein when necessary to keep such refuse in an inoffensive condition.

10. No person shall place or cause or permit to be placed any slops or liquid waste in such receptacle, nor shall deposit any moist refuse in such receptacle unless such moist refuse has been previously strained and effectually wrapped in waste paper. Nor shall garden clippings be placed in such receptacle.

11. The proprietor shall cause such receptacle to be kept at all times in good order and sweet condition, and shall coat the inside of such receptacle with tar or other suitable substance when deemed necessary by the Council.

12. The proprietor shall cause at such hours and on such days as may be appointed by the Council for the removal of refuse such receptacle to be deposited close and within 10 feet inside of the entrance to such house, building, or premises from the street, lane, or right-of-way on which such house, building, or premises abut in order that the contents of such receptacle may be conveniently removed by the contractor or person authorized or employed in that behalf by the Council.

13. No person shall place or cause to be placed any such receptacle in or upon any street, lane, or right-of-way except in the case of business premises built on the street alignment where such premises do not abut on a suitable right-of-way or land on which such receptacle could be placed for collection and emptying.

14. The contractor or person authorized or employed by the Council for the removal of such refuse shall be responsible for the complete emptying (without spilling any of the contents) of such receptacle or receptacles directly into a vehicle provided for its reception at such hours and on such days as may be appointed by the Council.

Such contractor or person shall also be responsible for the replacement of such receptacle properly covered with its lid, and shall also close the gate or gates of the premises from which receptacle is taken.

15. The contractor or person authorized or employed by the Council for the removal of such refuse shall at least once in each week, or at such greater frequency as may be necessary, collect and remove such refuse in a suitable covered vehicle in such a manner as not to cause a nuisance, danger to health or offensiveness.

16. Such vehicle shall be provided with a cover and kept covered except when refuse is being put into or discharged from such vehicle.

17. Such vehicle shall as far as practicable be rendered watertight by means of an impervious lining or by painting the inside thereof with tar or by other suitable and effective means.

18. Such vehicle when full shall be taken by the quickest possible route to the tip, incinerator, or destructor, where as soon as practicable the refuse shall be rendered innocuous by means of such methods as may be approved by the Commission and in such manner as not to create a nuisance.

19. The contractor or person authorized or employed by the Council for the removal of such refuse shall cause all vehicles used for the reception and removal of such refuse to be properly constructed, kept clean, and thoroughly disinfected with approved disinfectant and maintained in a proper state of repair.

20. If any refuse is authorized to be deposited or disposed of in or on any land, hole, quarry, or indentation, such refuse shall be deposited in a regular and orderly manner, and at the conclusion of each day's depositing the contractor or the person or persons authorized or employed by the Council shall blind the surface with clean earth, lime, or other approved material so as not to create any nuisance.

21. If any person or persons commit a breach of this By-law, he or they shall for every such breach be liable to a penalty of not more than Twenty pounds, and in the case of a continuing offence a further daily penalty of not more than Five pounds.

The Resolution for the passing of this By-law was agreed to by the Council on the 12th day of January, 1954, and was confirmed on the 9th day of February, 1954.

Part I.—Unapprenticed.

27. (a) The proportion of unapprenticed junior employees to journeymen employed by any employer shall not exceed one to four on building construction work performed on site and one to six on work performed in shops or joinery mills: Provided nevertheless that an employer who employs two adult employees may employ one unapprenticed junior employee.

(b) Unapprenticed junior employees shall be paid the same wages as are prescribed for apprentices under the jurisdiction of the Apprenticeship Commission, and they shall also be paid the special rates prescribed in clause 3 of this Determination according to the exigencies of their employment.

(c) The provisions of clauses 2 to 25 (both inclusive) of this Determination shall be applicable to and in respect of the employment of unapprenticed junior employees.

(d) No unapprenticed junior employee shall be permitted or required by his employer to attend winches, sling timber or work power-driven machinery.

Part II.—Apprentices.

The wage rates and conditions of Apprentices shall be in accordance with those prescribed from time to time by the Apprenticeship Commission.

DEFINITIONS.

28. For the purposes of this Determination—unless otherwise by the context implied—

Carpenter or Joiner means an employee engaged upon construction work and upon work ordinarily performed by carpenters or joiners in any workshop, establishment or yard.

Casual hand means an employee engaged by the hour who is or has been employed for a period of less than five days (exclusive of overtime) and who has not been summarily dismissed for misconduct or inefficiency or has not by his own act terminated his employment. Provided that a person who is engaged on weekly hiring in any other capacity than a carpenter and who without interruption in the continuity of his employment is directed to do carpenter's work shall not be deemed to be a casual hand within the meaning of this definition.

Confined space means a place the dimensions or nature of which necessitate working in a cramped position or without sufficient ventilation.

Construction work means work in connexion with the erection, repair, maintenance, renovation, ornamentation or demolition of buildings or structures, and the making, preparing, assembling or fixing of all woodwork and fittings in connexion therewith and the making, preparing, assembling and fixing of any material necessitating the use of carpentering tools or machines.

Dirty work means work concerning which the employer or his foreman and the employee agree that it is of an unusually dirty or offensive nature.

Insulation work means work which involves the handling in loose form of charcoal, pumice, "slag-wool", "insul-wool" or other loose materials of a like nature used in the construction, repair or demolition of roofing, flooring, walls or partitions for providing insulation against heat, cold or noise.

Leading hand means a tradesman carpenter or joiner who is given by the employer or his agent the responsibility of directing and/or supervising the work of other tradesmen carpenters or joiners.

Maintenance means work performed by carpenters or joiners employed in a mixed enterprise not being work in or in connexion with the erection of structures whose purpose is the extension of the productive, administrative, storage or distributive functions of such an enterprise for the performance of which erection carpenters or joiners additional to the regular staff of carpenters or joiners employed by such enterprise are engaged.

Mixed enterprise means an employer's enterprise carried on for the purpose of the production, treatment, distribution or provision of articles, goods, merchandise, materials, gas, electric current or power or any transport, water supply or sewerage service, the production, treatment, distribution or provision whereof is not mainly attributed to or mainly dependent on the work performed by carpenters or joiners therein employed but in which the work performed by carpenters or joiners is subsidiary and auxiliary to the carrying on of the enterprise.

Rate of double time means a rate of payment for work done comprised of the rate of payment ordinarily applicable to such work plus a rate equal to once that rate of payment; but in respect of an hourly rate of payment, the rate of double time prescribed by clause 12 of this Determination for work performed on any such prescribed holiday means a rate of payment at the rate which would ordinarily have been payable for such work had it been performed on a working day other than such a holiday.

Stock work means the making and/or cramping and/or assembling of stock doors not larger than 7 feet by 3 feet by 2 inches, double insertion moulder, or ledge doors of the same size, stock sashes not larger than 6 feet by 3 feet by 1½ inches or stock frames for the same, ladders, step-ladders, skirt-ironing boards, shirt-ironing boards, boot-cutting boards, paste-boards, clothes horses, fly-wire doors, fly-wire windows, tree-guards, dog-kennels, wheel-barrows, water-closets (other than pedestal seats).

Wet place means a place where water is dripping so that the clothing of the employee becomes saturated or a place where the employee has to stand in water exceeding 2 inches in depth so that his feet become wet.

POSTING OF NOTICES.

29. The employer shall not prevent an Official of a Union from posting at any time a copy of this Determination or any notice of a Union dealing with industrial matters not inconsistent with compliance with this Determination in a suitable place on any job. Provided that the employer may require that any such notice shall not exceed fourteen inches by nine inches in measurement.

PERIODICAL ADJUSTMENT OF WAGES.

30. The wages rates set out in clause 2 are based upon the following basic wage and, pursuant to the provisions of section 21 of the *Factories and Shops Act 1934*, the Board hereby determines that such rates shall be automatically adjusted as prescribed in clause 31.

Elsewhere—3s. less than the contemporaneous basic wage for Melbourne		

ADJUSTMENT OF BASIC WAGE.

31. (a) For the purposes of this Determination the expression "Commonwealth Statistician's 'all items' retail price index numbers" or any like expression means the numbers stated to be such index numbers in any document purporting, and not proved to be wrongly so purporting, to be printed by the Commonwealth Government Printer or to be signed by or on behalf of the Commonwealth Statistician.

(b) Until the beginning of the first pay period to commence in May 1954, amounts of the basic wage shall be as prescribed in clause 30.

(c) During each future successive period beginning with the first pay period to commence in a May, an August, a November, or a February, the amount of the basic wage shall be adjusted by the following method, namely, by multiplying the last published Commonwealth Statistician's "All Items" retail price index number by the factor '103 taken to one place of decimals, the resultant whole number being the amount of the basic wage expressed in shillings, but should the decimal number reach '5 or more the basic wage shall be taken to the next higher shilling.

32. The wages rates set out in clause 2 hereof consist of the Basic Wage prescribed in clause 29 and the margins and loadings set out hereunder:—

Section B—Hourly Employees.

An hourly rate (calculated to the nearest farthing), equivalent to one-fortieth of the fifty-two forty-eighths of the weekly rate which would be payable in pursuance of section A of this clause had the employee been engaged by the week: Provided, nevertheless, that a casual hand shall be paid an additional amount at the rate of 4d. per hour with a minimum payment as for two hours of employment.

NOTE.—(1) The disabilities allowance referred to in section A above is to compensate for conditions peculiar to building construction work, namely, working in the open and being thereby subjected to climatic conditions, dusty conditions (i.e., from dust blowing in the wind) brick dust, drippings from concrete, sloppy conditions, lack of usual amenities associated with factory work, e.g., meal rooms, change rooms, lockers, &c., and to compensate for relative handicaps occasioned by the reduction of the standard working hours in industry generally from 48 to 44 hours per week and for all other matters not specifically compensated or allowed for by any other provision of this clause 2 of this Determination.

(2) The calculation of the hourly rate prescribed in this clause takes account of loss of earnings by employees engaged by the hour due to the occurrence of any of the holidays mentioned in clause 12 of this Determination, the non-application to such employees of the benefits of clause 23 of this Determination and the incidence of loss of wages for periods of unemployment between jobs.
