## NOTICE TO MARINERS.

[No. 17 of 1954.]

## AUSTRALIA.—VICTORIA.

## PORT PHILLIP HEADS.—DEEP WATER CHANNEL.—45 FEET.

*Details.*—A channel has been deepened, as the result of blasting operations, across Rip bank, south-westward of the line between Point Lonsdale and Nepean rock, to a depth of 45 feet, for a width of 400 feet to westward, and for 200 feet to eastward, and parallel to the line of leading lights—High light and Low in transit, bearing 042 deg. 27 min.

*Remarks.*—The greater area of the channel carries a general depth of 9 fathoms, the 45-foot patches, rock, being small and few in number.

*Demarcation.—Western Limit.—By Day.*—The western limit of the 45-ft. channel, parallel to the line of leading lights, does not allow of parallel demarcation for the whole of its length across Rip bank, but the 53-foot flagstaff on Shortland bluff and the High light in transit bearing 044 deg. and 540 feet apart, define this limit close enough for practical use. The flagstaff is beflagged from 8 a.m. to sunset, at mast-head and yard. (1954.)

*By Night.*—This western limit is defined by the High light bearing 044 deg. seen just perceptibly less than half-way between the white and red lights of the Low light and the Hume tower respectively.

*Eastern Limit by Day.*—The eastern limit, also, does not permit of parallel demarcation on Shortland bluff, but the High light seen quarter way between Low light and Obelisk marks the limit close enough for practical use, and for this specific purpose two 30-ft. white diamond-topped beacons were established in 1953, at 511 feet and 1,094 feet respectively from the High light, and in transit therewith, bearing 041 deg. 27 min.

*By Night.*—The eastern limit is defined by the High light bearing 041 deg. 27 min. seen quarter-way between the white and green lights of the Low light and Obelisk respectively.
