The Council may, before issuing any permit to commence and carry on excavating operations, other than quarrying or blasting operations, require the person applying for the permit to enter into such bond, or deposit, or give such security as it may think sufficient to secure compliance with the requirements of paragraph 2 hereof.

4. No excavating operations (whether or not on any land on which such operations were commenced before the 10th day of November, 1938, and since that date continued without substantial interruption or on any other land on which excavating operations were being carried on at the commencement of the *Local Government (Amendment) Act 1954* whether or not the Minister in writing approves of the application of this By-law to such land) shall be carried on within a distance of 50 feet from any street or road, or any land set out or reserved as a street or road, on any plan of subdivision lodged in the Office of Titles, or any land which is in fact used as a street, road, lane, or passage, or within a distance of 30 feet from any land the ownership or occupation whereof is in some person other than the owner of the land on which such excavating operations are being carried on.

5. Every person carrying on excavating operations (hereinafter called "the excavator") shall observe the following rules as to such operations:—

(a) If such excavating operations are carried on by manual power, the excavator shall carry on the same, using either one of the following methods:—

(i) The wall or face of such excavation may be terraced, but the vertical wall or face of each step in such terrace shall not be more than 6 feet in height, and the horizontal face of every terrace other than the step at the floor of such excavation shall be of not less width than one-half of the height of the vertical wall or face immediately above it; or

(ii) The banks or sides of all such excavations shall be sloped down so that the batter of such banks or sides shall be maintained at a slope ratio of one horizontal to one vertical.

(b) If such excavations shall be carried on by means of a hydraulic nozzle or power shovel or similar method, then the excavator may work with a vertical wall or face, subject to the following conditions:—

(i) The excavator shall not permit any person, whether employee or otherwise, to be within a distance of 10 feet from such wall or face; and

(ii) The excavator shall not allow any overhang to exist in such wall or face;

(iii) Every excavator working upon a vertical wall or face of a greater depth than 6 feet shall erect a fence of not less than 4 feet in height either upon the boundary line of the land occupied by the excavator or in such position in relation to the brink of such wall or face as will protect persons on ground level from falling into the pit worked by the excavator. Such fence shall be of substantial construction, and may be of posts and rails or of posts not less than 22 feet apart, with two droppers equally spaced between posts, and of not less than three strands of wire (two of barb and one of eight-gauge plain). The top wire shall be barbed and shall not be more than 6 inches from the top of each post. The bottom wire shall be not more than 15 inches above ground level, and the intermediate wire shall be equidistant from the top and the bottom wires. The bottom wire may be barbed or plain according to the option of the excavator.

6. Every person carrying on excavating operations (other than quarrying or blasting operations) and using any mechanical or hydraulic power for such operations shall, within fourteen days from the publication of this By-law in the *Government Gazette*, notify the Council of the place where such power is used or intended to be used, and in such notice shall furnish the Council with full information of the type and nature of such power.

7. Every person carrying on excavating operations (other than quarrying or blasting operations) and whether using manual power or mechanical or hydraulic power, and whether working upon a vertical or a sloped or a terraced face, shall work or carry on all such excavations in such a manner that when any part of any excavation made by him is, at ground surface level, 50 feet from a street or road, or 30 feet from land not in the ownership or occupation of such person (which are the limits provided in clause 4 hereof), the banks or sides of such excavations, and of all parts of such excavations, shall be sloped down so that a slope or batter of one horizontal to one vertical is maintained.

8. In this By-law, the word "person" includes "corporation."

9. Any person guilty of any wilful breach of any of the provisions of this By-law shall be liable for every such breach to a penalty of not less than Five pounds, nor

more than Twenty pounds, and if such offence be a continuing offence to a further penalty of not more than Five pounds per day for each day of which such offence is continued after a conviction or order by any court.

Carrying on excavating operations (other than quarrying or blasting operations) without a permit or otherwise than in accordance with the limits of a permit (where a permit is required) shall be deemed a continuing offence.
