AUSTRALIA.—VICTORIA.

PORT PHILLIP.—INFORMATION ABOUT UNDERWATER ETHANE PIPELINE CONSTRUCTION.

Victorian Notice to Mariners No. 27(T) of 1972 is hereby cancelled.

Reference Victorian Notices to Mariners Nos. 7 and 20(T) of 1972.

1. The pipelaying barge "Beaver" and bucket dredger "A.D. Victoria" have completed operations on the pipeline route and have been withdrawn from the project. All unlit pontoons and mooring buoys associated with these vessels have been removed.

2. On or about 5th December, 1972, trench filling operations using "Geopotes V." along the pipeline route between Long. 144 deg. 53 min. 40 sec. E. and Long. 144 deg. 55 min. 37 sec. E. will commence and will continue for an estimated period of two weeks.

To facilitate the positioning of "Geopotes V." a number of small yellow conical buoys will be laid above the pipeline trench, and a number of small spar buoys each side of the trench, within the limits of the extent of these yellow conical buoys. The distance between these limits will be 1,000 feet and 2,000 feet south-eastward of the eastern buoy will be a 15-ft. long pontoon, painted orange. This combination with the pontoon leading, will proceed in a south-easterly direction along the route of the pipeline, at an estimated rate of 1,200 feet per day with the pontoon initially being in the position Lat. 37 deg. 56 min. 12 sec. S. Long. 144 deg. 53 min. 40 sec. E. When this orange pontoon is within 1,000 feet of the Port Melbourne Approach Channel it will remain stationary in this position, and the yellow conical buoys and the spar buoys referred to above will then be located eastward of the pontoon along the route of the pipeline.

At this stage shipping approaching or leaving the Port of Melbourne should pass to the westward of the orange pontoon.

The small yellow conical buoys will each be surmounted by a small quick flashing white light and the pontoon will be surmounted by a white light group flashing (3) every 8 seconds visible 5 miles together with a radar reflector. Mariners should give the pontoon light a wide berth.

3. On or about 5th December, 1972, seabed grading operations will commence along the pipeline route between the Altona terminus and Long. 144 deg. 57 min. 30 sec. E. and it is estimated they will continue for 5 weeks. These operations which are confined to daylight hours only will be conducted by a tug towing a barge fitted with underwater equipment.

Vessels should not pass closer than 1,000 feet from this tug-barge combination. The section of pipeline where the tugs are working will be marked by small spar buoys.

The "Geopotes V." and the tug will display the relevant shapes and/or lights required under Rule 4 (c) of the "Rules for Preventing Collisions at Sea", namely:—

by night: three lights in a vertical line one over the other spaced 6 feet apart of which the upper and lower light will be red and the middle light white: lights visible all round the horizon for at least 2 miles.

by day: three shapes in vertical line one over the other spaced 6 feet apart of which the highest and lowest will be globular in shape and red in colour and the middle one diamond in shape and white, signifying that the vessel is engaged in under water operations and unable to get out of the way of approaching vessels and in conditions of restricted visibility the sound signals as provided in Rule 15 of the Rules for Preventing Collisions at Sea will be given also by each vessel.

Vessels are not permitted to be anchored along the route of the pipeline or in its vicinity.
