For the purposes of this sub-clause, the maximum hourly discharge shall be either that permitted by the limiting apparatus installed, or where a meter is installed calculated by averaging the maximum hourly discharge recorded by the meter in each calendar month in the period for which charge is being made, and the mean hourly discharge shall be calculated by dividing the total volume discharged in the period for which the charge is being made by 160 times the number of weeks contained in such period.

Mode of Calculating Volume of Trade Waste.

(b) For the purpose of calculating the amount payable, pursuant to the preceding sub-clause, the volume of trade waste admitted into any sewer of the Trust shall be determined by any of the following methods as directed from time to time by the Engineer-in-Chief:—

- (iv) Measurement or assessment of the portion of the water supplied to the property and not discharged to the sewer, and deducting this amount together with an allowance for ordinary domestic sewage as hereinafter provided from the total amount of water supplied to the property.
- (v) For the purposes of any calculation or determination to be made under this sub-clause:—
 - (a) where there is a common discharge of both trade waste and ordinary domestic sewage, domestic sewage shall be

allowed for at the rate of 30,000 gallons per annum for each water closet on the property contributing to such discharge, and

- (b) the volume of water supplied to any property shall include water supplied from the Trust's mains and water from any other source
- (c) where the total quantity of water from all sources supplied to any property does not exceed 150,000 gallons per annum the assessment and charge shall be the minimum as set forth in clause 18 (5) (a) hereinbefore and no detailed measurement of effluent shall be required.

Review of Engineer-in-Chief's Determination as to the Volume of Discharge.

(c) Where an occupier considers that the Trust's determination of the volume of trade waste being discharged to any sewer of the Trust is in excess of the actual volume discharged, the Engineer-in-Chief may upon the receipt of written application by the said occupier carry out such measurements as he considers practicable and necessary to determine the volume of trade waste discharged and all costs incurred by the Trust in so doing shall be borne by the occupier, unless the volume then determined is at least 10 per cent less than the Trust's determination.

Occupier May be Required to Install Meters and Sampling Chambers.

(d) The occupier of any property from which trade waste is discharged into any sewer of the Trust shall if and where directed by the Engineer-in-Chief install any or all of the following:—
