Whereas by section 25 of the *Vegetation and Vine Diseases Act 1958* (No. 6407), it is provided that where the Governor in Council is of opinion that it is necessary to protect the fruit industry of Victoria against the introduction or spread of the insects of the family Tryptidae (commonly known as fruit flies), he may by Proclamation declare any portion of Victoria specified therein to be a proclaimed area, and prohibit the planting on any land in the proclaimed area of any tree, plant or vegetable specified, and prohibit the removal from any place in the proclaimed area to any place outside that area or from any place in the proclaimed area to any other place in that area of any fruit fly or any fruit or vegetables of a kind or species which in his opinion may provide a host for fruit flies or any package which has or is reasonably suspected of having contained such fruit or vegetables and require occupiers and owners of land in the proclaimed area to take such action for the eradication or prevention of the spread of fruit fly as is specified in the Proclamation: Now therefore, I, the Governor of the State of Victoria, in the Commonwealth of Australia, being of opinion that it is necessary to protect the fruit industry of Victoria against the introduction or spread of the insects of the family Tryptidae (commonly known as fruit flies) and by and with the advice of the Executive Council of the said State, do by this my Proclamation hereby—

3. Require occupiers and owners of land, not being a commercial orchard or commercial vegetable farm, in the proclaimed area to—

(a) Thoroughly spray all trees and plants of the kinds and species named in the Second Schedule of this Proclamation at intervals of not more than fourteen days commencing at the time fruit has set and continuing until the fruit is harvested with a solution containing either:—

(i) Six hundred (600) parts of fenthion to one million (1,000,000) parts of water (0.06 per cent.), or

(ii) Six hundred (600) parts of dimethoate to one million (1,000,000) parts of water (0.06 per cent.), or

six (6) fluid ounces per four hundred (400) feet of planted area of such plants.

- (b) Pick up from the said land before noon each day all fallen fruits of the kinds and species specified in the Second Schedule to this Proclamation, and dispose of all such fruits as prescribed in paragraph 4 (c) below.

4. Require occupiers and owners of land in the proclaimed area to take action as and when directed by a notice served on such occupier or owner by an Inspector and within the time specified in such notice—

 Brambles (except cultivated varieties),  
 Box thorn (*Lycium* sp.), provided that where box thorn is grown as a hedge along a boundary or dividing fence the occupier or owner may continue to so grow it on the following conditions:—

- (i) that the hedge is cut back forthwith and periodically as necessary to retain it within a height not exceeding six (6) feet from the ground level and a width not exceeding two (2) feet, and

- (ii) that when such a hedge has been cut back to within the foregoing dimensions, he shall thoroughly spray it forthwith to cover all parts of the plants forming the hedge with a solution containing two thousand (2,000) parts of two-four Dichloro-phenoxy-acetic acid (2-4D), or one of its derivatives to one million (1,000,000) parts of water (0.2 per cent.) and he shall spray it thereafter as often as is necessary to prevent the plants from forming fruit,

and refrain from planting such plants while this Proclamation remains in force.

- (b) To remove from all trees and plants growing upon the said land and to pick up from the said land all fruits and vegetables of the kinds and species named in the Second Schedule to this Proclamation, including all such fruits and vegetables which shall form on such trees and plants after the service of the said notice during such time as this Proclamation remains in force.
- (c) To dispose of all such fruits and/or vegetables by boiling for fifteen (15) minutes, or burning them so as to destroy all eggs and larvae of the fruit fly or burying them under a depth of soil at least three (3) feet after having applied to the upper layer of such buried fruit or vegetables a dust containing 1 per cent. of the pure gamma isomer of Benzene hexachloride at the rate of not less than two (2) ounces per square yard, and/or by giving such other treatment as is specified in the said notice, in such a manner as to kill all eggs, larvae and pupae of fruit flies.

- (e) To treat the soil beneath and around trees and plants known or suspected by an Inspector to be infested or to have been infested with fruit fly by applying uniformly to the surface of an area or areas marked by an Inspector a dust containing 1 per cent. of the pure gamma isomer of Benzene hexachloride at the rate of not less than two (2) ounces per square yard, and/or by giving such other treatment as is specified in the said notice.

- (f) To reduce the size and height of trees and plants (except for fruit trees growing in a commercial orchard) to a size and height which will in the opinion of an Inspector enable effective spraying, stripping and other treatment of such trees and plants to be carried out.

- (g) To apply to an Inspector for a permit to remove from any place within the proclaimed area to any place outside that area or to any other place in that area any plant or soil and to refrain from such removal until a permit is granted.
