Plan No. S-085.

Proclaimed 3rd March, 1970, *Victoria Government Gazette*, No. 19, dated 11th March, 1970, pursuant to section 22 (1) of the *Soil Conservation and Land Utilization Act 1958*.

In pursuance of the provisions of section 23, sub-section (1) of the *Soil Conservation and Land Utilization Act 1958*, the Soil Conservation Authority, after consultation with the Land Conservation Council, has determined the land use for all that land in the Parishes of Myrree, Toombullup and Toombullup North within the boundaries of the Ryans Creek Water Supply Catchment delineated and marked on Plan No. 2339, the original of which is lodged at the Head Office of the Soil Conservation Authority. All land within this area shall be used in accordance with the particular category of land use to which the area has been assigned. The boundaries of land use categories shown on Plan No. S-085 are intended as a guide to persons and departments involved in the area, who should consult with the Soil Conservation Authority before making any changes in land use.

General provisions of each of the land use categories are set out hereunder:—

Category 1.

Land to be used primarily for the protection of streams and watercourses, where forest operations are to be minimal and where no earthworks or soil disturbance may be carried out without the specific approval of the Soil Conservation Authority. This category covers:—

- (a) land within 100 metres of full supply level of either storage, or within 100 metres of each bank of Ryans Creek up to its Junction with Cherry Tree Creek;
- (b) land within 40 metres of other streams and watercourses shown on plan No. S-085; and
- (c) land within 20 metres, or such greater distance as the authority may specify, of other streams and watercourses within the catchment.

Category 2.

Protection forest. Forested land where no clear felling operations will be permitted and where timber utilization operations may be permitted only where slopes are generally less than 12° or 20%.

Category 3.

Utilization forest. Land generally suitable for timber utilization operations and other low intensity forest purposes.

Category 4.

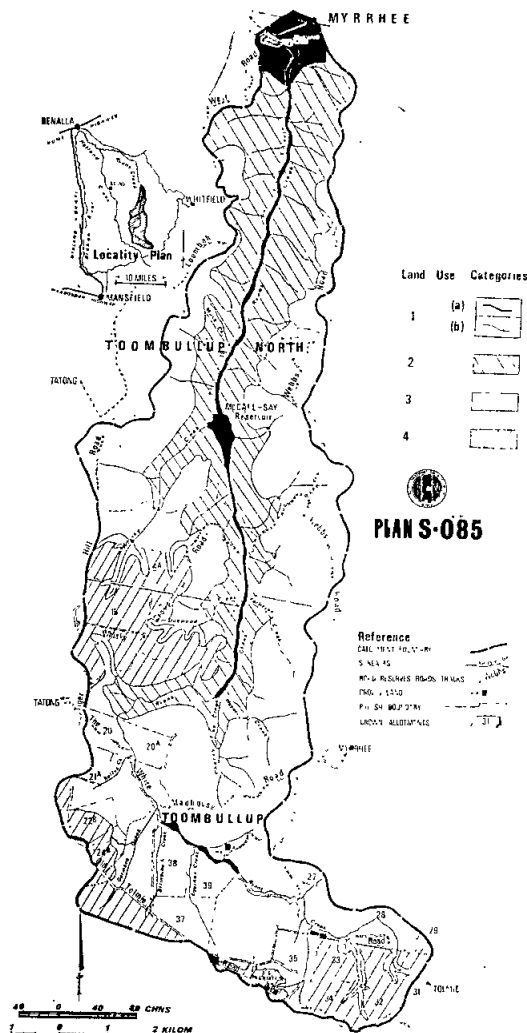

Land suitable for intensive forest and plantation purposes and parts of which may be suitable for other intensive uses, subject to conditions.

Specific Requirements.

While the categories listed above are given as a guide to the forms of land use which may be permitted without hazard to the water supply, the Soil Conservation Authority may have specific requirements in relation to any land use. In particular:—

- (a) all forest operations are to be carried out in accordance with management prescriptions drawn up or approved by the authority;
- (b) prior approval is necessary before any roadworks or earthworks are carried out within the catchment;
- (c) prior approval is necessary before any developments associated with recreational facilities or residential use are carried out in the catchment;

- (d) public access to the catchment will be the subject of conditions specified by the authority from time to time.
