Soil Conservation and Land Utilization Act 1958.

MIRBOO NORTH WATER SUPPLY CATCHMENT.

NOTICE OF DETERMINATION OF LAND USE.

Proclaimed 24th February 1965, *Victoria Government Gazette*, No. 14, dated 3rd March, 1965, pursuant to section 22 (1) of the *Soil Conservation and Land Utilization Act 1958*.

In pursuance of the provisions of section 23, sub-section (1) of the *Soil Conservation and Land Utilization Act 1958*, the Soil Conservation Authority, after consultation with the Land Conservation Council, has determined the land use for all that land in the Parishes of Allambee East, Mirboo and Narracan South within the boundaries of the Mirboo North Water Supply Catchment delineated and marked on Plan No. 1542, the original of which is lodged at the Head Office of the Soil Conservation Authority. All land within this area shall be used in accordance with the particular category of land use to which the area has been assigned. The boundaries of land use categories shown on Plan No. S-101 are intended as a guide to persons and departments involved in the area, who should consult with the Soil Conservation Authority before making any changes in land use.

GENERAL PROVISIONS.

The general provisions of individual land use categories are set out below and should be read in conjunction with the specific requirements and the Determination plan.

Category 1.

Land to be used primarily for the protection of streams, watercourses and spring areas where—

1. No further clearing, cultivation, earthworks, buildings or stream crossings will be permitted without the prior approval of the Soil Conservation Authority.
2. Improvements in the location and design of existing stream crossings may be required by the Soil Conservation Authority.

This category includes land within 100 metres of the offtake weir, within 20 metres or 40 metres or such other distance the Authority may require of the banks of streams, watercourses and spring areas. Most of these streams and watercourses are shown on Plan No. S-101 but the category also includes other streams, watercourses and spring areas in the catchment.

Category 2.

Land to be retained as permanent forest.

Category 3.

Land suited to forest purposes. Parts of the land in this category may be suitable for pastures or agriculture, but development of such land for these purposes requires the prior approval of the Soil Conservation Authority.

Category 4.

Land which may be used for grazing. Parts of this land may be used for cropping subject to the prior approval of the Soil Conservation Authority.

Category 5.

Land which may be used for grazing or cropping. Parts of this land may be used for more intensive purposes, subject to the prior approval of the Soil Conservation Authority.

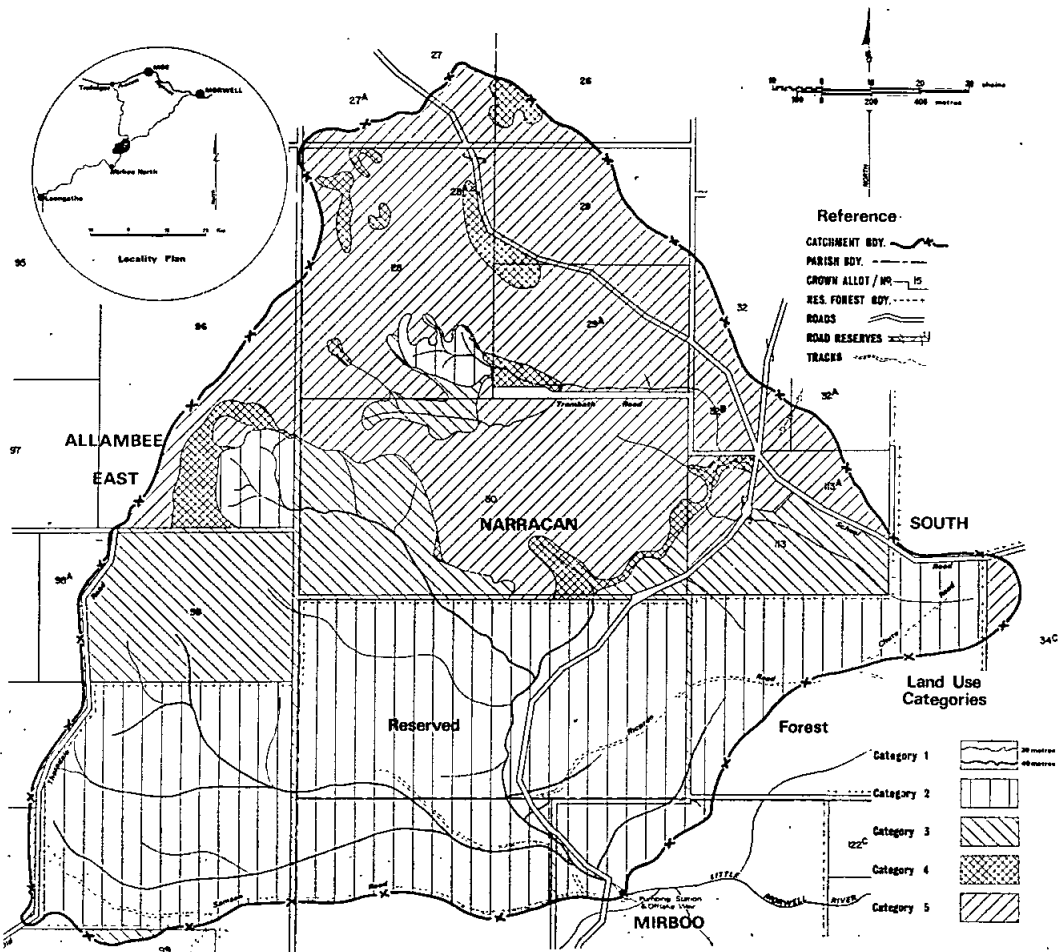

SPECIFIC REQUIREMENTS.

While the categories described above are given as a guide to the most suitable uses of catchment land, the Authority may have specific requirements in relation to any land use.

In particular:—

1. All forest operations are to be carried out in accordance with management prescriptions drawn up or approved by the Soil Conservation Authority.
2. Prior approval is required before roadworks or any earthworks associated with dam, drain building construction or any other purpose are carried out in the catchment.
3. Prior approval is required before any land in the catchment is subdivided.
