## GEELONG WATERWORKS AND SEWERAGE TRUST.

## BY-LAW NUMBER 130.

## A BY-LAW TO AMEND SEWERAGE BY-LAW NUMBER 97.

The Geelong Waterworks and Sewerage Trust (hereinafter called the Trust) in pursuance of and in exercise of the powers and authorities conferred on such Trust by the *Geelong Waterworks and Sewerage Act 1958*, the *Sewerage Districts Act 1958* and every other power enabling it in that behalf hereby amends Sewerage By-Law number 97 as follows:

1 Sub-Clause 4 (c) (ii) Clause 12, Sub-Clause 24 (b), Clauses 28, 29 and 30, Sub-Clause 33 (e), Clauses 34, 35 and 36 are deleted and the following Clauses and Sub-Clauses respectively substituted.

4 (c) (ii) The owner shall submit for examination a properly drawn design on tracing cloth and a type-written specification. The tracing cloth shall be of a standard size of 330 MM by 215 MM and the drawing shall be to a scale of 1:500 unless such standard tracing cloth and such standard scale are too small to show clearly the nature and position of all fittings. In cases where it is necessary to use a larger tracing cloth and a larger scale, in order to show clearly the nature and position of all fittings, such larger tracing cloth and such larger scale shall be approved by the Trust. The design and specification shall be supplied to the Trust in triplicate. The work shall not proceed until the owner's design and specification have been approved by the Engineer-in-Chief and the third copy returned to the owner with official endorsement.

12 The owner or his authorized agent, or the plumber, drainer or contractor carrying out the work, must give at least twenty-four hour's notice in writing to the Trust of his intention to commence work, and also when any work is ready for inspection. All work must be left uncovered and convenient for examination until inspected and approved by an inspecting officer appointed by the Trust.

Such inspection shall be made within twenty-four hours of such notification being received at the office of the Trust, except when notification is received on Fridays, when seventy-two hours must be allowed.

The inspecting officer may apply the ether, peppermint, water or smoke test, and the plumber or drainer shall furnish all the necessary tools, labour and assistance for such tests.

The owner or his authorized agent shall remove or repair any defect when so ordered by the inspecting officer, and if he neglect or fail to do so, he shall be liable, upon conviction, to a penalty not exceeding Ten dollars and to a penalty not exceeding Two dollars for every day thereafter during which such neglect or failure shall continue.

Before the fittings are connected with the plumbing of any house or building, or after, if so ordered, and before the soil or waste pipe is connected with the sewer, the outlet of the soil or waste pipe and all openings into it below the top shall be hermetically sealed.

The pipes shall then be filled with water to such height as the inspecting officer of the Trust shall require, and every joint carefully examined for leaks. Work already in place may be examined by the peppermint or other test. Defective pipes must be removed and replaced by sound ones, and all defective joints made tight, and every part of the work made to conform to this By-Law, and subject to the approval of an inspecting officer of the Trust.

House drains, whether laid by the Trust's workmen or others, must be thoroughly tested in every case before being passed by the Trust's inspecting officers. When being tested with water, there must be a head of at least 2 Metres above every part of the drain.

Before a licensed plumber or drainer commences to clear a stoppage in a drain he shall notify the Trust in writing of the time when he intends to clear the stoppage, so that an inspector may attend and pass the work in accordance with the provisions of the Act.

24 (b) All the manure bins must have the inside surfaces rendered with cement mortar, and must be impervious throughout, and provided with an approved close-fitting cover. Walls of new manure bins must, unless otherwise approved by the Engineer-in-Chief, be at least 230 MM in thickness, built of brickwork laid in cement mortar. If an outlet pipe be provided for a manure bin, it must be properly connected with the Trust's sewers. Branches in house drains must be provided in all cases where manure bins exist for their connexion whenever the Trust shall deem it necessary.

28 All drains shall be laid on an even grade and except by special permission, in writing, from the proper officer, such gradients shall not be less than the following:

100 MM diameter	1 in 40
150 MM diameter	1 in 60
230 MM diameter	1 in 90

In cases where the grades of drains are steeper than 1 in 15, concrete anchorage blocks shall be placed at intervals of not more than 10 Metres.

Such blocks shall be let into the sides of the trench at least 150 MM on each side and shall extend not less than 80 MM above and below the barrel of the pipe and for a length of 300 MM along the pipe.

29 Drains of stoneware or concrete pipes, unless bedded on and encased in concrete of not less than 150 MM thick over any part of the drain, shall be laid at a depth to the top of the socket of the pipe of not less than the following:

- (a) In public thoroughfares, rights-of-way, or other open spaces subject to vehicular traffic—800 MM
- (b) In private property not subject to vehicular traffic—500 MM

30 All pipes shall be laid to such lines and grades as may be shown on the plans or directed, and, except where otherwise ordered, shall be bedded on approved sand or other approved bedding material up to one-third of the diameter of the pipe and so that there shall be at least 50 MM of the bedding material below the barrel of the pipe in the case of earth bottomed trenches and up to the horizontal diameter of the pipe, and so that there shall be at least 80 MM of the bedding material below the barrel of the pipe where laid in trenches in rock.

In water-charged ground, or where the foundation is bad, or near the roots of trees, or where directed, the drain shall be formed of cast-iron pipes or, if of stoneware or concrete or other approved pipes, they shall be bedded on and encased in concrete as ordered, and, if ordered supported upon approved timber foundations as directed. The thickness of concrete encasing and the form of concrete haunching support shall be as directed by the proper officer.

Drops or bends in vertical or inclined drains shall have a concrete support placed under and around the drain as directed.

33 (e) "Oil Traps" for collecting all kinds of oil, which shall be of such forms as approved. The term "yard gully" is applied to traps (a) where they are used externally and fitted with dished tops and gratings. The tops of inlets of all disconnector traps must be at least 150 MM above the surface of the surrounding ground.

34 Yard gullies, when provided in the yard shall be as near as practicable to the kitchen or back door, with a water tap connected with a satisfactory water service placed over it at a height of not less than 600 MM. No yard gully shall be situated within a building or out-building.

35 Yard gullies shall be fitted with dished tops and gratings, the dished top being in one piece with the trap or jointed thereto by spigot and faucet, or as otherwise approved.

The depth of the dished top to the grating shall not be less than 150 MM. The grating to every gully trap shall not be less than 174 MM over all, and the grating to every disconnector trap shall be convex in section, with an opening of suitable outlet capacity. Every grating shall be fixed down in an approved manner with bitumen or wedges of lead.
