(A) Design.

Except as otherwise required by this Schedule to Pipeline Licence No. 61, lines 1 and 3 of the pipeline shall be designed, constructed and tested according to the USA Standard Code for Pressure Piping ANSI B31.8—1968 "Gas Transmission and Distribution Piping Systems". Welding of lines 1 and 3 shall be performed as specified in API Standard 1104, 11th Edition, January, 1968, "Standard for Welding Pipelines and Related Facilities". The remainder of the pipeline shall be designed, constructed, tested and, together with the said lines 1 and 3, operated in accordance with the requirements of Australian Standard 1967—1975 "SAA Gas Pipeline Code".

The pipeline design shall include the following factors—

- (i) a maximum operating pressure of 2760 kPa (400 lbf/in.²);
- (ii) a maximum design factor of 0.40;
- (iii) a pipeline length of 4.8 km (3 miles);
- (iv) a buried pipeline with a minimum cover of 1.2 metres (4 feet) except for special rail crossing.

2. Delete Clause I. (B) (i) (b) of the Schedule to the licence and substitute the following:—

- (b) 88.9 mm (3.5 in.) OD × 5.49 mm (0.216 in.) WT in accordance with the requirements of Grade A or B of the American Petroleum Institute Standard 5L, Twenty-seventh Edition, March, 1973.

4. Amend sub-heading (iii) Valves of Clause I. (B) to read (ii) Valves.

5. Delete Clause I. (C) (ii) of the Schedule to the licence and substitute the following:—

(ii) Outlet Pressure

The pressure of the natural gas leaving the pipeline at any point shall, unless otherwise approved in writing by the Minister, be controlled to a maximum of 517 kPa (75 lbf/in.²) by means of pressure regulating installations approved by the Director, Oil and Gas Division of the Mines Department.

6. Delete Clause I. (D) of the Schedule to the licence and substitute the following:—

(D) CORROSION CONTROL.

The corrosion control system shall be in accordance with the following:—

(i) Pipe Coating

For lines 1 and 3 of the pipeline, the specification for the factory applied external coating of the pipe shall include cleaning the surface to bare metal followed by the application of a primer and coal tar enamel internally reinforced with random mesh fibreglass and externally wrapped with asbestos felt in accordance with the Gas and Fuel Corporation of Victoria specification dated March, 1970, which accompanied the licence application. The field coating of pipe joints shall conform to the requirements of

section 7 of the Construction Specification dated October, 1970, submitted with the licence application.

For the remainder of the pipeline, the factory applied external coating of the pipe shall be extruded polyethylene to Shaw Specification YJ No. 1. The field coating of pipe joints shall be by the use of heat-shrink polyethylene sleeves with a bituminous mastic undercoating.

(ii) *Cathodic Protection*

Cathodic protection will be afforded the proposed pipeline through its direct connection to the 12 inch Crib Point/Dandenong pipeline which in turn is cathodically protected by impressed current systems located at Boundary Road, Cranbourne, and at Salmon Road, Crib Point.

7. Delete Clause I. (E) of the Schedule to the licence and substitute the following:—

(F) *Pressure Test.*

After construction and before being placed in operation, the pipeline shall be subjected to a pressure test which for lines 1 and 3 of the pipeline shall be in accordance with the procedure outlined in section 10 of the Specification forming part of Contract No. 1191 which accompanied the Pipeline Licence Application. The remainder of the pipeline shall be subjected to a pressure test in compliance with Rule 7.4.3 of Australian Standard 1967-1975: "SAA Gas Pipeline Code" according to a programme to be approved by the Director, Oil and Gas Division of the Mines Department.

During the said test, the pressure at the control point shall be measured at appropriate, but in no case greater than hourly, intervals using a calibrated and certified dead weight tester of adequate sensitivity for the volume of the test section, and recorded.

In addition, continuous recording equipment shall be used to record the pressure in the pipeline during the whole period of pressure testing. This equipment and any other pressure gauges used in the said pipeline pressure test shall be checked immediately prior to and after the said test by the said dead weight tester. Water volume measurement during the pressure/volume plot where applicable shall be by suitably calibrated devices.

The licensee shall give the Director, Oil & Gas Division of the Mines Department seven days' notice of intention to test, and shall within fourteen days of completion of the pressure test, forward to the said Director, a copy of the pressure chart including its calibration, and graphs of the said dead weight tester readings (as well as other pertinent factors) with time and water volume where applicable, all duly interpreted and witnessed by the licensee's engineer.

8. In Clause II. (B) of the Schedule to the licence, delete the expression "procedure qualification as required in the said API Standard 1104" and substitute the expression "and radiographic procedure qualification as required in the said API Standard 1104 or the said Australian Standard 1967 as appropriate."

The pipeline shall be maintained in accordance with Section 8 of the Australian Standard 1967-1975: "SAA Gas Pipeline Code" to the extent that this standard is not inconsistent with the following:—

(i) *Corrosion Control*

Subject to compliance with the State Electricity Commission Cathodic Protection Regulations 1970, the licensee shall—

- (a) carry out a monthly check of the transformer and rectifier units of the impressed current systems hereinbefore mentioned to ensure they are operating satisfactorily. A log of such checks, giving details of amperage output and meter readings shall be maintained by the licensee;

- (b) at intervals not exceeding six months conduct corrosion surveys of the pipeline including tests for stray current electrolysis. Measuring instruments approved for the purpose by the Chief Electrical Inspector, State Electricity Commission of Victoria shall be used for these surveys which shall be carried out only

after the licensee has used his best endeavours to ensure that no abnormal condition exists which is likely to affect the validity of the results;

- (c) submit a summary of the results of these surveys annually to the said Chief Electrical Inspector for advice on action to be taken to maintain the cathodic nature of the pipeline so that corrosion is limited, and shall take all reasonable steps to give effect to the advice received;

- (d) submit to the Director, Oil and Gas Division of the Mines Department an annual report outlining the results of the corrosion surveys, the recommendations made by the said Chief Electrical Inspector and the details of the resulting action taken by the licensee.

10. Delete Clause II. (D) (ii) of the Schedule to the licence, and substitute the following:—

The **upset price** is the sum at which bidding will start, and no bid below that sum can be accepted. The highest bidder at or above that sum shall be the purchaser, subject to signature of contract and any necessary payment.

TERMS:

A deposit of at least 12½% of the purchase price must be paid at the sale, either in cash or by cheque.

The residue is payable in 20 half-yearly instalments, or may be paid off at any earlier time.

Interest at the rate of 7% per annum is payable, with all payments of residue, and is computed for each instalment from the date of sale to the date of such payment. Additional interest is charged if any instalment is not paid on or before the due date.

If paid off within 30 days of sale, no interest is payable.

FEEs, ETC.:

Also payable at the sale, in addition to the deposit, is the Survey Fee of \$70.00.

Payable with balance of purchase money—

Crown Grant fee—\$10.

Assurance Fund contribution.—One cent in every Five dollars or part thereof of purchase price. (This is a fund established to guarantee the validity of freehold titles.)

Transfer of interest prior to completion of payment may be allowed on payment of \$5 fee and subject to stamp duty.

If unable to attend personally, a prospective purchaser may arrange for another person to bid as his agent.

Attention is drawn to section 95, Land Act 1958, which provides that the purchaser shall be deemed to be the owner for the purposes of other Acts; also to an amendment to the Local Government Act providing for Government roads, in certain circumstances, to be declared "private streets", thus making the purchaser liable to contribute to the cost of street construction.
