## NOTICE OF VARIATION OF STATEMENT OF PLANNING POLICY No. 2 (MORNINGTON PENINSULA).

Whereas the Governor in Council on the sixth day of October, 1970 approved Statement of Planning Policy No. 2 (Mornington Peninsula);

And whereas it is provided by section 8c of the *Town and Country Planning Act 1961* that a Statement of Planning Policy approved by the Governor in Council may by the Governor in Council by notice published in the *Government Gazette* be varied:

Now therefore, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth by this Notice upon publication thereof in the *Government Gazette* (which is hereby directed) vary the said Statement of Planning Policy No. 2 (Mornington Peninsula) so that the Statement as varied shall be as follows immediately hereafter.

## MORNINGTON PENINSULA.

## STATEMENT OF PLANNING POLICY No. 2.

(As Varied, February, 1976.)

1. This is a Statement of Planning Policy under Part I. of the *Town and Country Planning Act 1961*. It applies to that part of the Mornington Peninsula which lies generally to the south of the existing urban settlements of Mornington and Hastings as indicated on the attached map, and which is referred to in this Statement as "the Policy Area". The Statement is directed primarily to the planning and management necessary for the conservation and enhancement of the Policy Area as a recreation outlet and place of scientific and natural interest for the benefit of both local and wider communities.

2. The planning policy to be applied in the Policy Area is that:—

- 2.1 The natural resources of the area shall be conserved for their recreation and scenic value and biological and geological significance, and to maintain and enhance the human environment.
- 2.2 Appropriate provision shall be made for protection of areas and sites of special character, beauty and significance.
- 2.3 The rural character of the area and its landscapes and coastlines shall be protected.
- 2.4 Due account shall be taken of the value of the area for rural pursuits, and the role of primary producers.
- 2.5 Urban development of such scale and type as to prejudice the conservation of the area shall not be permitted.
- 2.6 Development shall be required to harmonize generally with the natural environment and to maintain and where appropriate enhance the scenic values, special character and rural environment of the area.
- 2.7 The character and functions of the resort settlements shall be protected.
- 2.8 Maintenance of environmental quality generally and protection against pollution of every description shall be primary considerations.
- 2.9 Planning for the use of land shall be integrated with policies for the protection both of the adjacent bays and sea and of the environment generally.
- 2.10 Planning for the use of land shall take into account information from scientific studies of the area and adjacent bays and catchments.
- 2.11 Planning for the Policy Area shall take into account not only the interests of the Victorian community but also the needs and views of the local community.

3. The main factors requiring and influencing the Statement of Planning Policy are:—

- 3.1 Increased leisure time, and the increasing popularity and range of recreational activities—especially of an outdoor and unstructured nature—making areas and natural resources which provide for them; particularly in the vicinity of large urban areas, of special value and importance to the community.
  - 3.2 The resources of the Mornington Peninsula which provide a variety of outstanding landscapes and seascapes, of places suitable for a wide range of recreational activities, and of areas and sites of special character or special interest related to history and the natural sciences.
  - 3.3 The present and increasing importance of the Mornington Peninsula as a major recreation outlet and resort area, and the implications of this for the local community.
  - 3.4 Metropolitan expansion and permitted port and industrial development at Western Port which could expose the Mornington Peninsula to pressures for development of a type prejudicial to the area.
  - 3.5 The adverse effects to the area as a whole of unconstrained access to and development in areas of indigenous vegetation, floral communities and faunal habitats.
  - 3.6 Undue pressures for subdivision, and the existence of unsuitable past subdivisions.
  - 3.7 The particular detriment which could be occasioned to scenic coastal land as a result of inappropriate subdivision.
  - 3.8 The important role of existing settlements and rural pursuits in relation to the character, function and future of the Policy Area.
  - 3.9 The unacceptable effect that continuing expansion of urban areas and inappropriate management within them would have on the character of the Policy Area.
  - 3.10 The potential for conflict in the Policy Area between its recreation and nature conservation functions, and agricultural activities and interests.
  - 3.11 The potential for conflict between extensive utilization of extractive resources and maintenance of recreation and nature conservation values and the human environment.
  - 3.12 The information available from scientific studies of the environment and its relevance for planning in the Policy Area.
  - 3.13 The potential for conflict between the interests of metropolitan and local communities and the importance of adequate recognition of both.
4. In implementing this policy, every Department, Public Authority, Regional Planning Authority and other Responsible Authority where appropriate to its function, shall pay special attention to the following:—
- 4.1 Provision in selected locations of recreation facilities and areas of a kind and scale appropriate to the surrounding natural environment.
  - 4.2 Protection and where consistent with this Policy development of existing settlements paying particular regard to:—
    - (a) the special character and functions of each particular settlement;
    - (b) the provision as the case requires of resort facilities, holiday accommodation, recreation spaces, associated services, social facilities, roads and vehicle parking—all of a kind and scale appropriate to the surrounding environment, and to the character and functions of the particular settlement;
    - (c) the limitation of size and the maintenance of a compact form of each settlement.
  - 4.3 Protection and appropriate enhancement of landscape and seascape, paying particular regard to:—
    - (a) landscape areas and vantage points of high quality;
    - (b) visual sequences along access routes;
    - (c) conservation of significant areas of indigenous vegetation and significant stands of trees along ridges and in valleys and of trees along roadsides;

- (d) control of the density of buildings and subdivision in areas of scenic value;
- (e) provisions to foster the location, design and execution of buildings and works in a manner compatible with the special character of the area and to provide for consultation on these matters;
- (f) effective management policies in respect of public lands; and
- (g) careful and appropriate zonings, reservations and ordinances for these purposes.
- 4.4 Conservation of areas significant for flora and fauna paying special regard to the capacity of those areas to withstand change and development without detriment, management of such areas to sustain the integrity of biotic communities both on land and in water, and appropriate regulation of the use of land or its reservation and purchase where necessary.
- 4.5 Conservation of sites and areas of historic and scientific value and special character, interest or significance—paying special regard to: the capacity of those sites and areas to withstand change, development and improvement without detriment, management of such sites and areas to sustain their value, and appropriate regulation of the use of land, or its reservation and purchase where necessary.
- 4.6 Promotion of standards for the siting and appearance of buildings and other developments, with provision for consultation thereon, particularly in recreation and resort areas and areas of landscape value.
- 4.7 Limitation on subdivision to ensure that the intensity of land use and development is appropriate to the agricultural capacity and natural attributes of the land and to the protection of landscape.
- 4.8 (a) Limitations on small lot rural residential development so that it occurs only in locations where it does not adversely affect the landscape and nature conservation values or the maintenance of rural pursuits; and
- (b) Review and evaluation of existing subdivisions and their capacity for development without detriment to the area, and formulation of equitable policies and protective measures to avoid such detriment.
- 4.9 Containment of extractive industries to carefully limited works and sites with regulation of the use of land to ensure that staging of development and subsequent reclamation are effected without significant detriment to the recreational and scenic value, and biological and geological significance of the surrounding area or to the human environment.
- 4.10 Classification and location of access routes to places of interest, including where necessary the segregation of vehicles, pedestrians and other forms of recreational travel, and the limitation of access.
- 4.11 Provision of utilities, drainage, sewerage and other waste disposal facilities in keeping with the area's special significance.
- 4.12 The requirement that all development of an urban character shall be connected to or provided with a high grade system for the treatment and disposal of waste materials and effluents.
- 4.13 Regulation of the use of land together with appropriate waste management procedures to minimize all forms of pollution: in particular, control of the pollution of air and surface and groundwater, including the protection of adjacent bays and sea in compatibility with other Government Policies.
- 4.14 Those conclusions and recommendations of and arising from the Port Phillip Bay and Western Port Bay Environmental Studies that are adopted by the Government.
- 4.15 The institution of adequate programs to foster public participation in the planning of the area and to enable assessment of the needs and views of the local community and to assist in reconciling State and local interests.

- 4.16 The preparation, adoption, regular review and observance of a comprehensive recreation and conservation plan or plans—either separately or as part of a planning scheme for the whole of the region—which shall take due account of the needs and interests of people and of the various values of all land in the area for different purposes within the scope of this Policy, and especially the factors set out above.

And the Honorable Alan John Hunt, Her Majesty's Minister for Planning for the State of Victoria, shall give the necessary directions herein accordingly.
