PIPELINE LICENCE

Whereas sub-section (3) of section 30 of the *Pipelines Act 1967* provides that the Minister may by notice published in the *Government Gazette* amend, vary, add to or revoke any conditions stated or included in a licence, I, James Charles Murray Balfour, Minister for Minerals and Energy do now hereby vary the conditions of Pipeline Licence No. 9 in the manner indicated in the Schedule hereto.

SCHEDULE

1. Delete Clause I. (A) (iii) of the Schedule to the Licence.

2. Amend Clause I. (d) of the Schedule to read—

(d) Pumps and Pressure Control

(i) The aforesaid pipeline at the Shell Newport Installation end is tied, by means of a valve connection, into a major transmission pipeline conveying product from the Shell Geelong Refinery to the said Shell Newport Installation, and is to be cross-connected, subject to separate approval being given as hereinafter provided for in Clause (d) of Schedule II, at an easement adjacent to the Maribyrnong River and east of Burleigh Street Newport, to two licensed transmission pipelines (Nos. 37 and 38) owned by Petroleum Refineries (Australia) Pty. Ltd. for conveyance of product from Altona to Yarraville. The pumping units which convey the liquid hydrocarbons along the pipeline are located at either the Shell Geelong Refinery or at the PRA Altona refinery.

(ii) Whereas the licence as originally granted provided that the pipeline be designed to operate at maximum inlet pressure of 300 psig (0.044 Mpa) and whereas the actual design, construction and hydrostatic and other testing is now such that the pipeline is safely able to be used with a maximum inlet pressure of 700 psig (0.102 MPa) approval is given to operate the pipeline at this higher pressure or at such reduced pressure as the Minister for Minerals and Energy may from time to time direct subject to such operation being in accordance with the Australian Standard AS 2018-1978—SAA Liquid Petroleum Pipeline Code and controlled by such pressure controlling or limiting devices as are approved by the Director, Oil and Gas Division of the Department of Minerals and Energy.

3. Delete Part II. Conditions of the Schedule to the Licence and substitute the following:—

II. FURTHER CONDITIONS

(A) Product Transported

The product transported in the pipeline shall be non-corrosive liquid hydrocarbons with characteristics generally conforming to those detailed in the licence application dated 9th September, 1968.

(B) Maintenance and Routine Test Procedures

The pipeline shall be maintained in accordance with Section 7 of Australian Standard 2018-1977 SAA Liquid Petroleum Pipeline Code to the extent that this standard is not inconsistent with the following:—

(i) Corrosion Prevention

Subject to compliance with the State Electricity Commission Cathodic Protection Regulations 1970, the licensee shall—

(a) Carry out a monthly check of the transformer and rectifier units of the impressed current systems hereinbefore mentioned to ensure they are operating satisfactorily. A log of such checks, giving details of amperage output and meter readings shall be maintained by the licensee.

(b) At intervals not exceeding six months conduct corrosion surveys of the pipeline including tests for stray current electrolysis. Measuring instruments approved for the purpose by the Chief Electrical Inspector, State Electricity Commission of Victoria shall be used for these surveys which shall be carried out only after the licensee has used his best endeavours to ensure that no abnormal condition exists which is likely to affect the validity of the results.
