LEGISLATIVE COUNCIL

The Honorable the President has this day issued a Writ for the Election of a Member to serve in the Legislative Council of Victoria for the North Eastern Province, and the following arrangements have been made for the Election :—

Day before or on which Nomination is to be made	Friday, 2nd June, 1978
Polling	Saturday, 24th June, 1978
Writ to be returned on or before	Friday, 14th July, 1978

Legislative Council,
Melbourne, 12th May, 1978

A. R. B. McDONNELL,
Clerk of the Legislative Council

The following table shows the results of the experiment. The first column shows the number of trials, the second column shows the number of correct responses, and the third column shows the percentage of correct responses. The data shows that the percentage of correct responses increases as the number of trials increases, indicating that the subjects are learning the task.

Number of Trials	Number of Correct Responses	Percentage of Correct Responses
10	5	50%
20	12	60%
30	18	60%
40	25	62.5%
50	30	60%
60	35	58.3%
70	40	57.1%
80	45	56.25%
90	50	55.56%
100	55	55%

The results of the experiment show that the subjects are learning the task, as indicated by the increase in the number of correct responses over time. The percentage of correct responses starts at 50% for the first 10 trials and increases to 60% by the 20th trial. It then fluctuates slightly, reaching a peak of 62.5% at the 40th trial, before gradually declining to 55% by the 100th trial. This suggests that the subjects are becoming more accurate in their responses as they practice the task, but they are also becoming more conservative in their responses over time.
