STATE ELECTRICITY COMMISSION OF
VICTORIA
SUPPLEMENTARY CONDITIONS FOR
CONTRACT DEMAND TARIFFS L AND H

These Conditions apply to supply given under the Contract Demand Tariffs L and H for low and high voltage supplies respectively.

The Contract Demand is the level of demand which forms the basis of a demand charge to the Customer over a full 12 months period. The level of Contract Demand is subject always to the necessary capacity being available in the Supply Authority's system.

1. INITIAL SELECTION OF CONTRACT DEMAND

Prior to commencement of supply under these tariffs, the required level of maximum demand is established by discussion between the Customer and the Supply Authority to ensure that the customer's needs are within the available capacity of the Supply Authority's system.

During the third month of supply, the customer and the Supply Authority shall negotiate the Contract demand to apply for the following 12 months, having regard to:

- The Minimum Chargeable Demand quoted under the relevant tariff; or
- the actual metered maximum demand in each of the three months.

2. CHANGES TO CONTRACT DEMAND

2.1 Increase in Contract Demand

- (a) Where a Customer requires an increase in Contract Demand, a written request should be made to the Supply Authority. The increased level of Contract Demand shall apply from the requested date or as near as possible thereafter, subject to any required work being completed by the Supply Authority.
- (b) Temporary increases in Contract Demand may be available to the Customer to cover specific, short-term needs, such as for the commissioning of new plant, subject to:
 - a minimum of 1 month written notice from the Customer, and
 - prior agreement from the Supply Authority; such agreement will be conditional upon the necessary capacity being available in the Supply Authority's system.
 - Such temporary increases will:
 - be defined in terms of "additional demand" for a specific period,

G 13 10 April 1991 917

- apply for one full billing period except in the case of plant commissioning in which case the duration of the temporary increase may be extended for the duration of the commissioning,
- be charged at the standard Contract Demand price, and
- be limited to once in any 12 month period.

2.2 Reduction in Contract Demand

- (a) Where a Customer requires a reduction in Contract Demand, 12 months' written notice of the new Contract Demand shall be given to the Supply Authority. The new Contract Demand shall be applied after the reading date first following the expiration of the 12 months' notice. However, following installation by the customer of approved load management equipment or the implementation of an approved demand management initiative, the 12 months notice period may be reduced at the discretion of the Supply Authority.
- (b) If, in the 12 months following any reduction in Contract Demand, the reduced Contract Demand is exceeded the demand so recorded shall become the Contract Demand applicable from the time of the reduction and retrospective demand charges shall apply.

This shall not apply to temporary increases in demand negotiated as per item 2.1 b.

2.3 Changes Following Contract Demand Being Exceeded

In the event that the metered maximum demand in a month exceeds the Contract Demand the following shall apply:

- (a) A new Contract Demand shall be established equal to the metered maximum demand in that month.
- (b) The new Contract Demand shall apply for at least 12 months unless exempted under either of the following circumstances:
 - If it is a fault on the Customer's electrical installation which caused a new Contract Demand to be established, the Contract Demand may be reduced back to the previous level after three months, provided that:
 - a written application is received from the customer within 30 days of billing following the fault, and
 - the Customer can satisfy the Supply Authority that the fault has been diagnosed, and
 - that action has been taken to avoid a recurrence of that or similar faults.

Where the capacity of the Supply Authority system is inadequate to make supply available at a higher rate on a continuous basis the Customer shall be advised that the new Contract Demand would apply only for the month in which it was established, pending augmentation of the Supply Authority System and renegotiation of a revised Contract Demand. The maximum demand thereafter would be limited to the available capacity, as determined by the Supply Authority, by suitable load limiting equipment installed by the Customer to the satisfaction of the Supply Authority.

3 METERING

Metering to accommodate Tariff L or H will be provided without charge to new installations provided the customer notifies the Supply Authority of the tariff selected prior to meters being installed.

However, any existing customer, including customers taking over an existing installation, who elect to take supply under these tariffs shall pay the cost of any necessary metering change.

4 MULTIPLE SUPPLIES

A single supply should normally be adequate to satisfy a Customer's total needs for electricity on a property. Nevertheless, where the Supply Authority provides multiple supplies, including alternative supplies to a property, each supply would normally be separately metered and billed under the tariff selected by the customer for each supply. However, where such multiple supplies are taken from and metered at a single Supply Authority substation, switch, metering or other single enclosure containing Supply Authority supply terminations, such multiple supplies shall be treated as a single supply for tariff and billing purposes. In these circumstances, if the Customer wishes to combine the metering to gain the benefits of a Contract Demand, all Supply Authority costs in excess of those for a single supply must be paid, in particular—

- additional metering costs;
- capital costs of any feeder capacity reserved in excess of the Contract Demand; and
- the operating and maintenance costs associated with such reserve feeder capacity.

5 STANDARD TIME

Periods for pricing are normally for Australian Eastern Standard Time without adjustment for Summer Time (that is, daylight savings time). However, if suitable metering is available the Supply Authority may agree to adjust the times of commencement and conclusion of Peak Periods and Off-Peak Periods to Summer Time and back to Standard Time each year, subject to the customer

paying the Supply Authority's costs. Unless advised otherwise for a particular Customer installation, these costs shall be taken to be the relevant charge in the Schedule of Fixed Charges, as published by the Supply Authority from time to time.

1 APPLICATION

The following conditions apply to Customers taking supply at either 6.6, 11 or 22 kV, who have private Generation Plant operating in parallel with the Supply Authority's electricity supply system.

Subordinate Legislation Act 1962
**PROPOSED FISHING (TROUT COD)
 REGULATIONS 1991**

Regulatory Impact Statement

A Regulatory Impact Statement has been prepared in relation to the proposed Fishing (Trout Cod) Regulations 1991.

The objective of the proposed Regulations is to prohibit the taking of trout cod from all Victorian inland waters to allow the re-establishment of populations of this endangered freshwater fish.

The major alternatives to the proposed Regulations which were examined in the Regulatory Impact Statement were—

- (1) total closure of specified Victorian inland waters to fishing for trout cod; and
- (2) the application of localised, variable sets of Regulations specifying a minimum legal length for trout cod, a bag limit and/or an initial closed season for each water stocked with trout cod as part of the species conservation program.

The Regulatory Impact Statement concluded that these alternatives were not viable and that the proposed Regulations are the best means of achieving the stated objective.

Public comments on the Regulatory Impact Statement and the proposed Regulations are invited. Copies of the Regulatory Impact Statement may be obtained from Mr Alan Woodroffe (telephone (03) 412 4753).

Written submissions on the Regulatory Impact Statement and the accompanying Regulations will be received up to 21 days from the date of publication of this notice. All submissions will be treated as public documents. Submissions should be addressed to Mr Alan Woodroffe, Subordinate Legislation Officer, Department of Conservation and Environment, 8th Floor, 240 Victoria Parade, East Melbourne 3002.
