#### TOWN AND COUNTRY PLANNING ACT 1961.

At the Executive Council Chamber, Melbourne, the  
thirteenth day of February, 1973.

PRESENT:

His Excellency the Governor of Victoria.  
Mr. Balfour | Mr. Rafferty.  
Mr. Scanlan |

#### STATEMENT OF PLANNING POLICY No. 5 (HIGHWAY AREAS).

Whereas the Town and Country Planning Board on the 5th day of November, 1971, adopted a Statement of Planning Policy a copy of which is annexed hereunder:

And whereas in the preparation of the said Statement the said Board conferred with the State Planning Council:

And whereas a draft of the proposed Statement was submitted to the said Council, the Melbourne and Metropolitan Board of Works, the Western Port Regional Planning Authority and the Geelong Regional Planning Authority for consideration and comment:

And whereas comments were received from the Melbourne and Metropolitan Board of Works, the Western Port Regional Planning Authority and the Geelong Regional Planning Authority and were forwarded to the Minister with the adopted statement:

Now therefore, His Excellency the Governor of the State of Victoria, by and with the advice of the Executive Council thereof, doth by this Order approve the said statement with modifications so that the statement as modified shall be as set out hereunder, that is to say:

1. This is a Statement of Planning Policy under Part 1 of the *Town and Country Planning Act 1961*. It applies to roads declared under the *Country Roads Act, 1958* to be State Highways, Freeways, Main Roads, Tourists' Roads and Forest Roads, to roads shown as Main Roads in planning schemes, and to the areas through which they pass. (These roads are referred to in this Statement as Highways).

2. It is planning policy that:—

2.1 The planning of highways and the planning and control of land use and development in the areas through which they pass shall be co-ordinated and undertaken as an integrated operation;

2.2 Any new use or development of land in the vicinity of an existing or proposed highway shall be so planned and regulated as to avoid

detriment to the levels of service, safety and amenity desirable for that highway in both the short and long term;

2.3 New highways shall be so located and designed as to minimize detriment to the environment and disruption of residential communities and their amenity;

2.4 The planning of highways and of areas in their vicinity shall be designed to achieve standards of visual amenity commensurate with the importance of the highway.

3. The major factors influencing this Statement of Planning Policy are:—

3.1 The need to recognize the mutual relationship of highways and land use as fundamental to highway efficiency, best use of land and most satisfactory environmental standards;

3.2 The need for consultation, particularly between public bodies, on the location and design of highways;

3.3 The increasing demand for mobility and the high cost of augmenting the existing highway system and improving levels of service to accommodate present and future traffic;

3.4 The need to ensure the highest practicable standards of efficiency in the movement of vehicles and to obtain maximum public benefit from the funds applied for that purpose;

3.5 The high cost of attempting to restore the levels of service of existing highways the efficiency of which has been impaired by inappropriate land use developments, and the further social and financial costs of duplicating or restructuring highway systems in urban areas;

3.6 The significance of visual surroundings in contributing to the safe, efficient and pleasurable use of highways, particularly on long journeys;

3.7 The need to regulate the use of land for access and advertising purposes to avoid detriment to the efficiency and safety of highways and the appearance of their surroundings;

3.8 The need to minimize the adverse effects of highways on the urban environment and the amenity of areas through which they pass, and to preclude the adoption of highway proposals in locations where they would cause disproportionate detriment;

3.9 The importance of balancing the requirements of highway travellers with those of people living, working or seeking recreation in the areas traversed or proposed to be traversed by highways.

4. In implementing this Policy special attention shall be given to the following:—

4.1 Careful assessment of the traffic generation characteristics of land use and their effects upon highways;

4.2 Continuing consultation between planning and highway authorities to achieve integration of existing and proposed land use patterns with existing and proposed highways and required levels of service on a balanced and mutually beneficial basis;

4.3 Zoning and regulation of land use in relation to highways, taking into account particularly the reconciliation of the needs of vehicular and pedestrian access and the cross movements generated thereby with those of through traffic;

4.4 The assessment of location of highway projects so as to achieve the greatest overall benefit to the community and with due regard to the environment and ecology;

4.5 The location, planning, design and construction of new highways in a manner which provides for appropriate standards of safety, efficiency and speed and also for satisfactory environmental standards;

4.6 Formulation of standards and general provisions for preserving or enhancing the visual environment of highways, with particular reference to landscaping and the control of outdoor advertising and, where appropriate, provision for buffer zones and resting places alongside highways.

And the Honorable Alan John Hunt, Her Majesty's Minister for Local Government for the State of Victoria, shall give the necessary directions herein accordingly.

T. J. FORRISTAL,  
Clerk of the Executive Council.
