Town and Country Planning Act 1961.
OVENS-UPPER MURRAY PLANNING SCHEME.

INTERIM DEVELOPMENT ORDER.

Notice of Approval.

In pursuance of the powers conferred by the *Town and Country Planning Act 1961*, the Governor in Council on the 14th day of March, 1973, approved the making of an Interim Development Order by the Town and Country Planning Board for the whole of the municipal districts of the Shires of Beechworth, Chiltern and Wodonga and part of the municipal districts of the Shires of Bright, Myrtleford, Oxley, Rutherglen, Towong, Wangaratta and Yackandandah.

The Interim Development Order provides that—

- (i) After the coming into operation of the Order, the use, development or subdivision of any land within the area south of the Murray River within 55 kilometres of the south bank of the Murray River at the Union Bridge is prohibited except in accordance with the provisions of a permit issued by the Responsible Authority.
- (2) Notwithstanding the provision referred to in (1) above, the Order does not prohibit—
 - (a) the erection, construction or carrying out of any dwelling house or ancillary works on any land shown as a separate allotment on a plan of subdivision sealed before the coming into operation of the Order; or
 - (b) the erection, construction or carrying out of any buildings or works ancillary to farming activities.

A copy of the Interim Development Order and a map showing the area affected may be inspected, free of charge, at the office of the Town and Country Planning Board, 235 Queen-street, Melbourne, and at the office of the Council of the Shires of Beechworth, Bright, Chiltern, Myrtleford, Oxley, Rutherglen, Towong, Wangaratta, Wodonga and Yackandandah.

W. H. CRAIG, Secretary,
Town and Country Planning Board.

Diagram of the Earth's orbit

1681

1681

The Earth's orbit is elliptical, with the Sun at one focus. The Earth moves in a clockwise direction around the Sun. The diagram shows the Earth at various points in its orbit, with the Sun at the center. The Earth's axis is tilted, and the diagram illustrates the seasons and the variation of day and night lengths throughout the year.

The diagram is a circular representation of the Earth's orbit around the Sun. The Sun is located at the center of the circle. The Earth is shown at several positions along the orbit, with its axis tilted. The diagram illustrates the Earth's movement and the resulting changes in day and night lengths throughout the year.
